4. EXPLORATION AND EVALUATION ASSETS

Macarthur Australia's wholly owned subsidiary MIO holds assets which include the Iron Ore Projects. 4. EXPLORATION AND EVALUATION ASSETS (Cont'd)***Commitments***

In order to maintain its current rights of tenure for exploration and/or mining activities, the Company is required to perform minimum annual expenditure requirements specified in the tenement documents. The expenditure obligations are subject to renegotiation when an application for a mining lease and/or renewal of exploration permits are made or at other times and are subject to whether the Company decides to continue a tenement's rights until its expiry. Due to the nature of the Company's activities, it is difficult to accurately forecast the amount of future expenditure that will be necessary to incur in order to maintain present interests.

These obligations are not provided for in the financial statements and are payable at future dates as follows:

	December 31, 2022 \$	March 31, 2022 \$
Not later than one year	1,056,183	980,663
Later than one year but not later than five years	3,942,326	3,674,506
	<u>4,998,509</u>	<u>4,655,169</u>

For the 12-month period ending December 31, 2023, the Company may apply for exemptions against expenditure in relation to those tenements which did not have sufficient expenditure recorded against them in the prior 12 months of their term. Exemption has and may be sought on the basis that aggregate expenditure on those tenements in prior years far exceeded the minimum required. In the event that exemption for these tenements is not granted (which the Company believes is highly unlikely), the Company may have to impair/expense the value of the amount capitalised to exploration and evaluation assets for those tenements.

If exemptions being applied for are approved as outlined above, the obligations not provided for in the financial statements and are payable at future dates as follows:

	December 31, 2022 \$	March 31, 2022 \$
Not later than one year	427,483	407,205
Later than one year but not later than five years	3,942,326	3,674,506

6. SHARE-BASED COMPENSATION

The Company measures the cost of share options at fair value at the grant date using the Black-Scholes formula, adjusted to reflect market vesting conditions, but excludes any non-market vesting conditions. Non-market vesting conditions are included in assumptions about the number of options that are expected to vest and the entity revises its estimate of options that are expected to vest at each reporting date.

The fair value calculated for options issued is expensed over their vesting period as share-based compensation in the Condensed Interim Statement of Profit and Loss and Comprehensive Income/(Loss) and a corresponding amount is recorded to reserves. Upon exercise the fair value of the options is re-classified from reserves to contributed equity. Refer to Note 6 for details of options.

12. FINANCIAL INSTRUMENTS (Cont'd)*Sensitivity analysis*

The following table illustrates sensitivities to the Group's exposures to changes in interest rates and exchange rates. The table indicates the impact of how profit and equity values reported at the end of the reporting period would have been affected by changes in the relevant risk variable that management considers to be reasonably possible.

These sensitivities assume that the movement in a particular variable is independent of other variables.

	December 31, 2022		March 31, 2022	
	Profit	Equity	Profit	Equity
	\$	\$	\$	\$
+/-2% in interest rates	+/- \$53,276	+/- 53,276	+/\$33,644	+/\$33,644
+/-5% in \$AUD/\$CAD	+/- \$22,288	+/- \$22,288	+/- \$3,289	+/- \$3,289
+/-5% in \$AUD/\$US	+/- \$16	+/- \$16	+/- \$7,199	+/- \$7,199
+/-10% in listed investments	Nil	Nil	+/- \$Nil	+/- \$Nil

Interest rate risk

The Company's cash equivalents are highly liquid and earn interest at market rates. Due to the short-term nature of these financial instruments, fluctuations in market interest rates do not have a significant impact on the fair values of these financial instruments. At the reporting date the interest rate profile of the Company's interest-bearing financial instruments was:

	December 31, 2022	March 31, 2022
	\$	\$
Interest-bearing financial instruments		
Financial assets	2,663,779	1,682,214
Financial assets are comprised of:		
Cash and cash equivalents	2,628,382	1,625,572
Security deposits	35,397	56,642
	2,663,779	1,682,214

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates on the above interest-bearing financial instruments at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2022.

13. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of resource properties. The Board of Directors do not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

In the management of capital, the Company includes shareholders' equity. The properties in which the Company currently has an interest are in the exploration and development stage, as such the Company is dependent on external financing to fund activities. In order to carry out planned exploration, conduct studies and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed.

In addition to its lithium and iron ore exploration and evaluation activities, the Company will continue to assess new properties and seek to acquire an interest in additional properties if there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period ended December 31, 2022. The Company is not subject to externally imposed capital requirements.
