

**ASX ANNOUNCEMENT**

By e-lodgement

**21 November 2023****Notice Under Section 708A(5) of the Corporations Act 2001 (the Act)**

This notice is given by Volt Resources Limited (ASX: VRC) ("**Volt**" or the "**Company**") in relation to the issue of 57,539,962 fully paid ordinary shares as detailed in the Appendix 2A announced today.

The Corporations Act 2001 (Cth) (Act) restricts the on-sale of securities issued without disclosure unless the sale is exempt under section 708 or 708A of the Act. By giving this notice, the Shares detailed in the Appendix 2A announced on 21 November 2023 will fall within the exemption in section 708A(5) of the Act. Pursuant to section 708A(5)(e) of the Act, the Company gives notice that:

- a) the Company issued the Shares without disclosure to investors under Part 6D.2 of the Act;
- b) as at the date of this notice the Company has complied with the provisions of Chapter 2M of the Act as they apply to the Company, and sections 674 and 674A of the Act; and
- c) as at the date of this notice there is no information:
  - i) that has been excluded from a continuous disclosure notice in accordance with the Listing Rules; and
  - ii) that investors and their professional advisors would reasonably require for the purpose of making an informed assessment of:
    - 1) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; or
    - 2) the rights and liabilities attaching to the Shares.

## **About Volt Resources Limited**

Volt Resources Limited (“Volt”) is critical minerals and battery material company listed on the Australian Stock Exchange under the ASX code VRC. We are an established graphite producer and an emerging natural graphite anode (a key component of lithium-ion batteries) producer. Volt has a 70% interest in the Zavalievsky Graphite (ZG) business in Ukraine. The ZG mine and processing facilities have been in operation since 1934 and are near key markets with significant developments in lithium-ion battery production. ZG benefits from an existing customer base and graphite product supply chains based on excellent transport infrastructure covering road, rail, river, and sea freight combined with reliable grid power, ample potable ground water supply and good communications<sup>[1]</sup>.

Volt acquired three licence applications that are prospective for lithium-borate mineralisation. The licence applications are in respect to a total area of 291km<sup>2</sup>, located in Serbia and are west and south-west of the Serbian capital, Belgrade<sup>[2]</sup>.

Volt is progressing the development of its large wholly owned Bunyu Graphite Project in Tanzania. The Bunyu Graphite Project is ideally located near to critical infrastructure with sealed roads running through the project area and ready access to the deep-water port of Mtwara 140km from the Project. In August 2023, Volt reported the completion of the revised Feasibility Study (“FS”) for Stage 1 development of the Bunyu Graphite Project. The Stage 1 development is based on a mining and processing plant annual throughput rate of 400,000 tonnes of ore to produce on average 24,780 tpa of graphite products<sup>[3]</sup>. Key objectives of Stage 1 development are to establish Bunyu Graphite Project as a world-class supplier of graphite products, grow Volt’s existing natural flake graphite business, provide cashflow, and establish infrastructure in support of the development of the significantly larger Stage 2 expansion project.
