

QUARTERLY ACTIVITIES & CASH FLOW REPORT DECEMBER 2023

Highlights

East Canyon Uranium Vanadium Project

- Fieldwork (mapping and sampling) completed across various East Canyon prospects
- Significantly over 30 occurrences of uranium minerals identified at surface across East Canyon claims along a consistent RL (elevation)
- Fieldwork completed at Loya Ray identified 5 clusters of uranium minerals observed along 2.4km strike length uranium anomaly
- Fieldwork completed at previously unknown and untested uranium anomaly prospect Big Sally identified uranium soil anomalism
- Additional previously unknown prospects with uranium minerals identified along similar elevation to known historical occurrences
- Laboratory results from rock chip samples collected from completed fieldwork at East Canyon expected imminently
- Planning underway for northern hemisphere spring-summer-autumn field season including sedimentary facies mapping and drill hole planning

South Pass Lithium Project

- Secured highly prospective hard rock lithium project in Wyoming
- Direct staking completed via Uvre, securing a first mover advantage in the area and representing a low cost entry
- Maiden field exploration program completed which consisted of mapping and sampling various outcropping pegmatites
- Laboratory results from rock chip and soil samples expected imminently

Other

- Uranium prices reaching in excess of US\$100/lb
- Several potential assets and strategic opportunities evaluated
- Cash balance of \$2.895 million as at 31 Dec 2023

Uvre Limited (**Uvre** or **Company**) (**ASX: UVA**) is pleased to provide a summary of its Quarterly Activities and Cash Flow Report for the quarter ended 31 December 2023.

East Canyon Uranium Vanadium Project

The East Canyon Project (100% ownership) is strategically located in south-eastern Utah, USA, which is in close proximity to established mining operations and infrastructure within the extended Uravan Belt, a well-known uranium and vanadium district.

The Uravan Mineral Belt and surrounding Salt Wash ore producing districts of the Colorado Plateau, which hosts the Claims, has been an important source of uranium and vanadium in the US for more than 100 years, with historic production of more than 85 million pounds of uranium at an average grade of more than 0.13% U_3O_8 and more than 440 million pounds of vanadium at an average grade of 1.25% V_2O_5 .

The district hosts several significant uranium-vanadium operations and the only fully licensed and operating conventional uranium-vanadium mill in the US (Energy Fuels' White Mesa Mill) is located 50km from the East Canyon Project along major highway 191.

Operational Overview - East Canyon Uranium Vanadium Project

During the quarter the Company completed some key fieldwork which consisted of mapping and sampling several prospects across the East Canyon claims and investigating two significant uranium anomalies identified via airborne radiometric survey, Loya Ray and Big Sally.

Over thirty (30) mapped occurrences of uranium minerals were identified at a consistent elevation range within the East Canyon Project area. This observation provides a general favourable horizon to search for uranium mineralisation across the entire East Canyon Project area in the Salt Wash Member which is a considerably large search space. Figure 1 provides the locations in which uranium minerals (note map/key showing carnotite, uraninite, coffinite locations) were observed as well as the additional prospects previously unknown to the Company and only identified during the recent mapping campaign. (These newly identified prospects have been named Sue Mac, Balmia, None Such West, None Such East and Bonanza West as well as the additional clusters identified at Loya Ray along the 2.4km strike length.

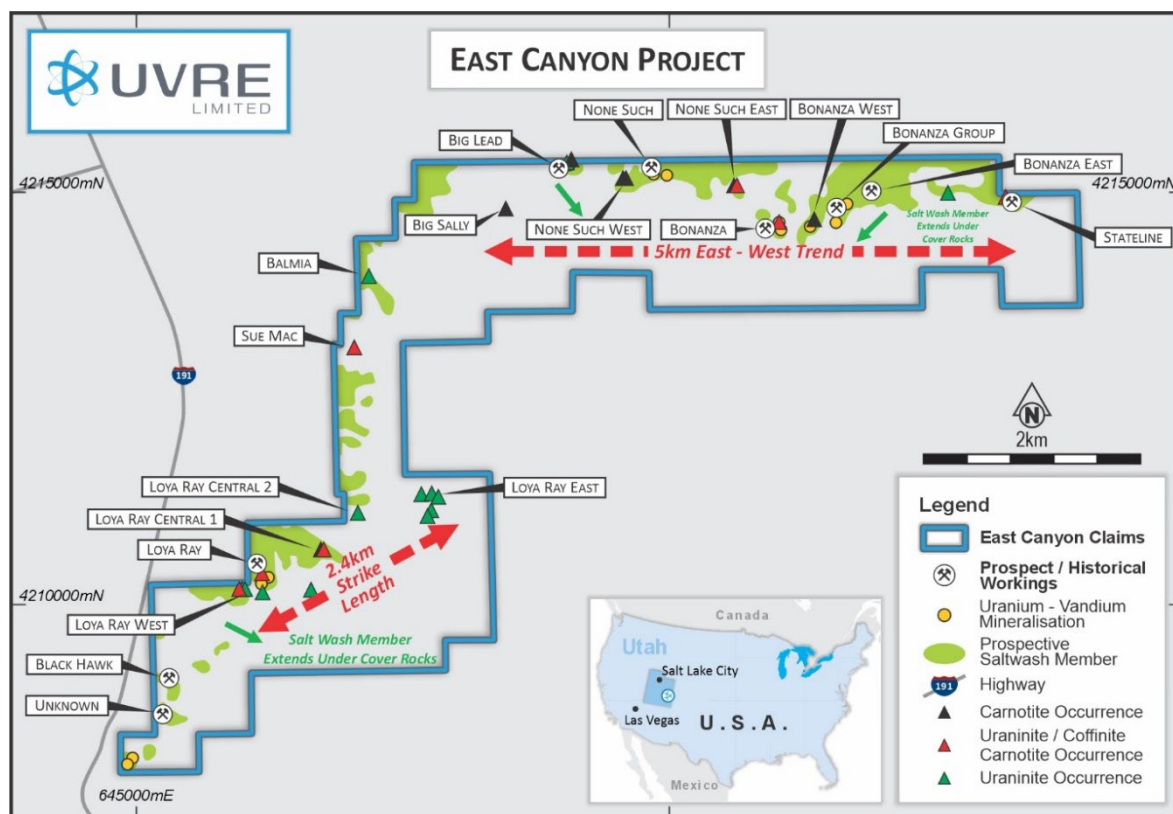

Figure 1. East Canyon project showing all prospects and uranium mineral locations identified during the mapping program.

Loya Ray Uranium Prospect – East Canyon

The Loya Ray 2.4km strike length uranium anomaly¹ was also identified from the recently completed radiometric survey with anomalism defined by the ratio of U^2/Th (figure 2). This anomaly was confirmed with uranium-vanadium minerals at surface observed in five (5) clusters over the strike length and some small scale historical open pit mining was also observed at the 'Loya Ray' mine (figure 2 and picture 1). This is highly encouraging given the large strike of the U^2/Th anomalism which was confirmed with uranium-vanadium mineralogy in the recent mapping program. The five clusters at Loya Ray are referred Loya Ray, Loya Ray West, Loya Ray Central 1, Loya Ray Central 2 and Loya Ray East (figure 2). The surface mineralisation at Loya Ray now requires detailed facies mapping prior to drill testing to understand the most favourable stratigraphic distribution of mineralisation along the 2.4km strike length and to ascertain if the northeast trend is channel influenced. The mineralisation style understanding is critical to ensure future drill hole testing investment is used to maximum effect by placing the holes in the best possible locations to intersect uranium-vanadium mineralisation. Further sampling of the small pit area is also required to understand if ore was left in the walls, floor or along strike of the shallow mined pit. Rock chip and crumbly clay profile samples were sent to a certified laboratory for analysis of uranium, vanadium and rare earth elements and once received further confirmation sampling will be conducted at Loya Ray.

¹ Untested Uranium Anomaly over 2.4km Strike Length Identified by Airborne Survey at Loya Ray Prospect, East Canyon. Reported 13 September 2023

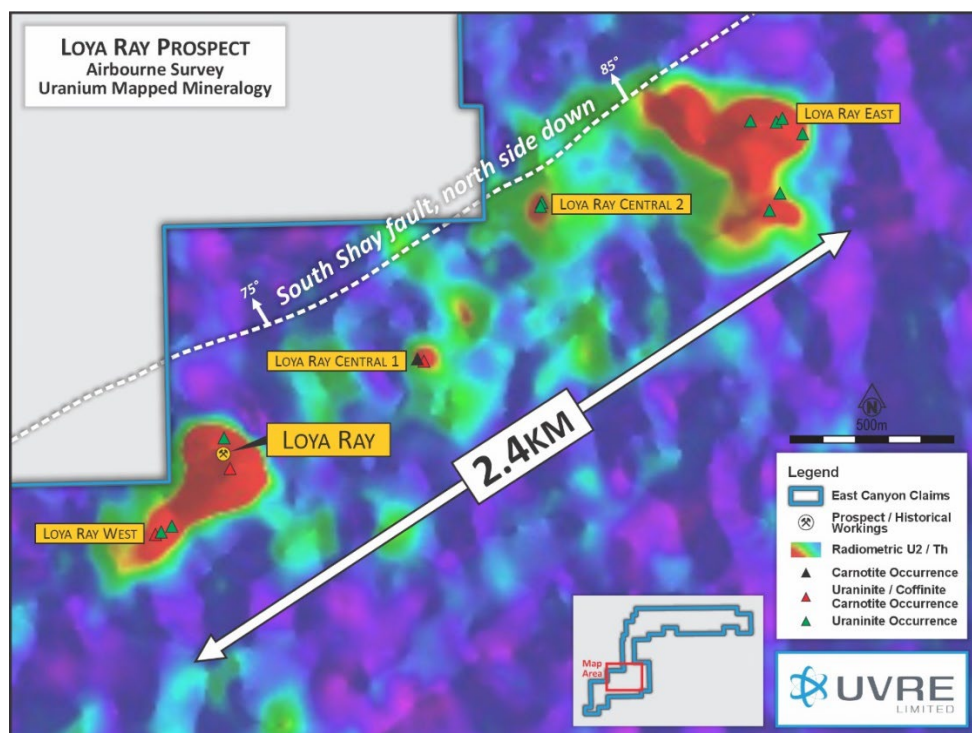

Figure 2. Loya Ray Prospect showing mapped uranium mineral locations relative to the U^2/Th imagery depicting the 2.4km trend.

Picture 1: Loya Ray mine historical open pit which may be a uranium bearing palaeochannel. Detailed facies mapping and sampling is required to better understand the mined uranium-vanadium mineralisation prior to drill testing.

Big Sally Uranium Prospect – East Canyon

The Big Sally prospect was identified as a prominent uranium anomaly² defined by a ratio of U^2/Th delineated from the recently flown radiometric survey. This prospect was previously unknown prior to the airborne survey being flown and had not been subject to any prior exploration work by the Company. Initial fieldwork at Big Sally has identified the prospect is anomalous for uranium within the soil profile and further facies mapping and sampling is required to understand the distribution of uranium within the profile to target drill testing. Several soil and rock samples were taken within this area and have been sent to a certified laboratory for uranium, vanadium and rare earth analysis with results expected imminently. This prospect sits above the targeted elevation range within the Saltwash Member and the uranium-vanadium mineralisation may be influenced by faulting. Further detailed facies mapping will assist to understand the best locations for drill targeting.

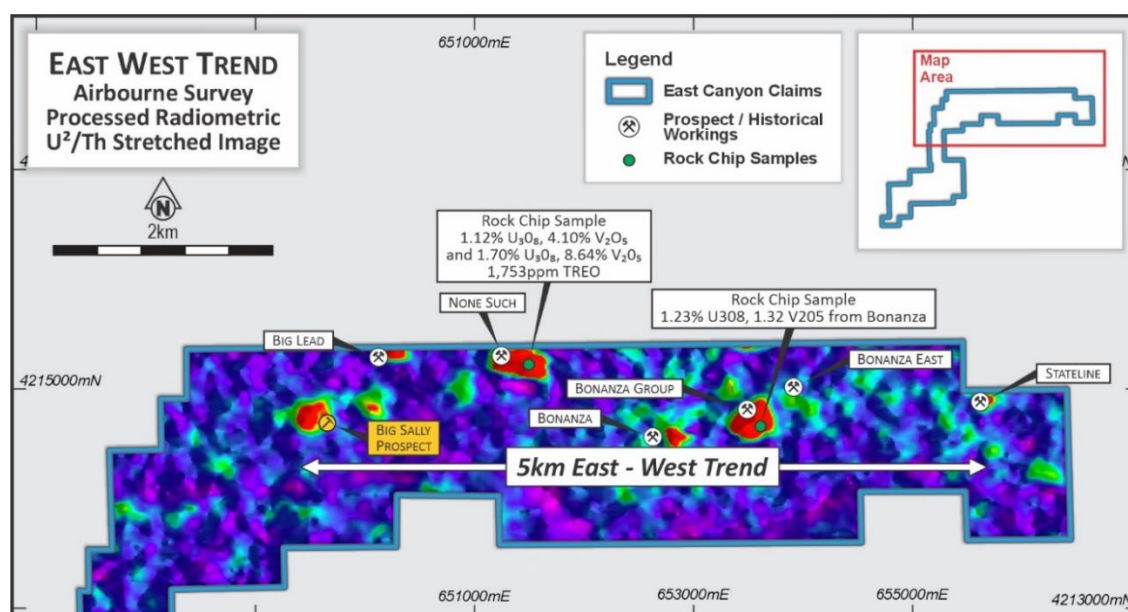

Figure 3: 5km East-West Trend image of the processed radiometric data showing the U^2/Th ratio imagery which has been stretched to identify the highest tenor areas of interest in which to focus exploration for uranium. The newly identified anomaly Big Sally in the western portion of the trend was previously unknown and is untested.

5km East-West Trend – East Canyon

In the northern East Canyon area, the 5km East West trend³ also reported consistent uranium-vanadium minerals associated with the Saltwash member elevation range as observed in the western and southern East Canyon project areas including Loya Ray. Big Sally in the west of the 5km East West trend sits at a higher elevation and this may be influenced by fault displacement. Further detailed facies mapping and more sampling is required prior to drill testing to ensure the holes are drilled in the most prospective locations. The identification of so many outcropping uranium minerals over a large search area of five (5) kilometres has

² Field work Commences at Big Sally Uranium Anomaly. Reported 8 November 2023

³ 5km Uranium Trend and Separate Untested Uranium Target Identified at East Canyon. Reported 28 September 2023

highlighted the uranium potential outside the previously drilled prospects Bonanza and None Such.

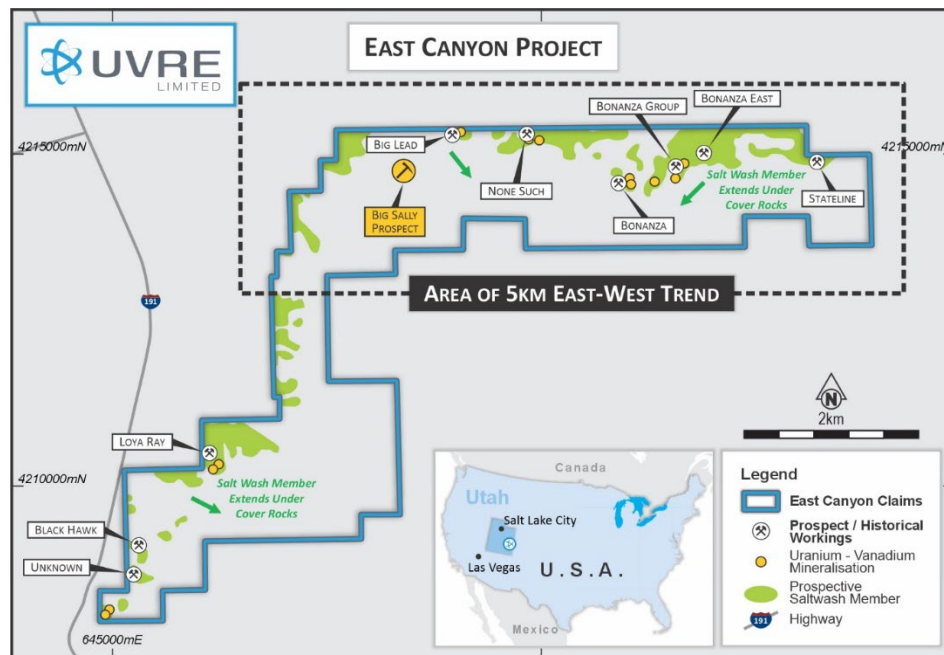

Figure 4. East Canyon project showing 5km East-West Trend to the east of the 5km East-West Trend, the Stateline prospect returned high scintillometer readings with carnotite and uraninite or coffinite observed (picture 2) within crumbly clay stone close to a sandstone contact.

Picture 2: Carnotite (yellow) observed with possible uraninite or coffinite (black mineral) from the Stateline prospect. Location of this photo is Stateline with co-ordinate reading WGS84 UTM zone 12N 653129E 4214930N.

The number and geographical spread of uranium minerals over the East Canyon project, comprising carnotite and either uraninite or coffinite, confirms uranium and vanadium exists throughout the project area and the mineralisation appears constrained to an elevation within the flat lying easterly dipping Saltwash Member stratigraphy. These observations provide further encouragement to understand which facies within the Saltwash Member are most favourable for uranium-vanadium and rare earth mineralisation, and if mineralisation is deposited within channels at the Loya Ray prospect. Uranium mineralisation was observed within the soil profile at Big Sally and associated with claystone and sandstone elsewhere on the project.

All samples taken during the fieldwork were submitted to a certified laboratory and analysis for uranium, vanadium and rare earth elements is pending with results expected imminently.

South Pass Lithium Project

The South Pass Lithium Project (100% ownership) is strategically located, highly prospective hard rock lithium project in Wyoming, USA which was secured via direct staking by the Company during the quarter. The South Pass Lithium Project comprises of 206 unpatented mining lode claims covering an area of 4,258 acres and is located near the Wind River Range, Fremont County, Wyoming, USA.

The South Pass Lithium Project is a large, early stage and highly prospective exploration project with favourable geological characteristics. These include outcropping pegmatites and dykes that occur in large swarms which have the potential to contain lithium bearing Lithium Caesium Tantalum (LCT) pegmatites. This potential is based on historical lithium mineral reports and lithium detected in historical regional multi element chemical sampling.

Given the favourable geology, recent exploration activities and discoveries of lithium in the Wyoming/South Dakota regions by other companies (Chariot Corporation ASX.CC9 and Iris Metals ASX.IR1)⁴ gives the Company reason to believe Wyoming could be an emerging US lithium province.

⁴ Refer Chariot Corporation (ASX.CC9) announcement 27 October 2023 “Drill Rig Arrives at Black Mountain” and Iris Metals (ASX.IR1) announcement 9th October 2023 “78m @ 1.03% from 19m Confirms Major lithium Discovery”

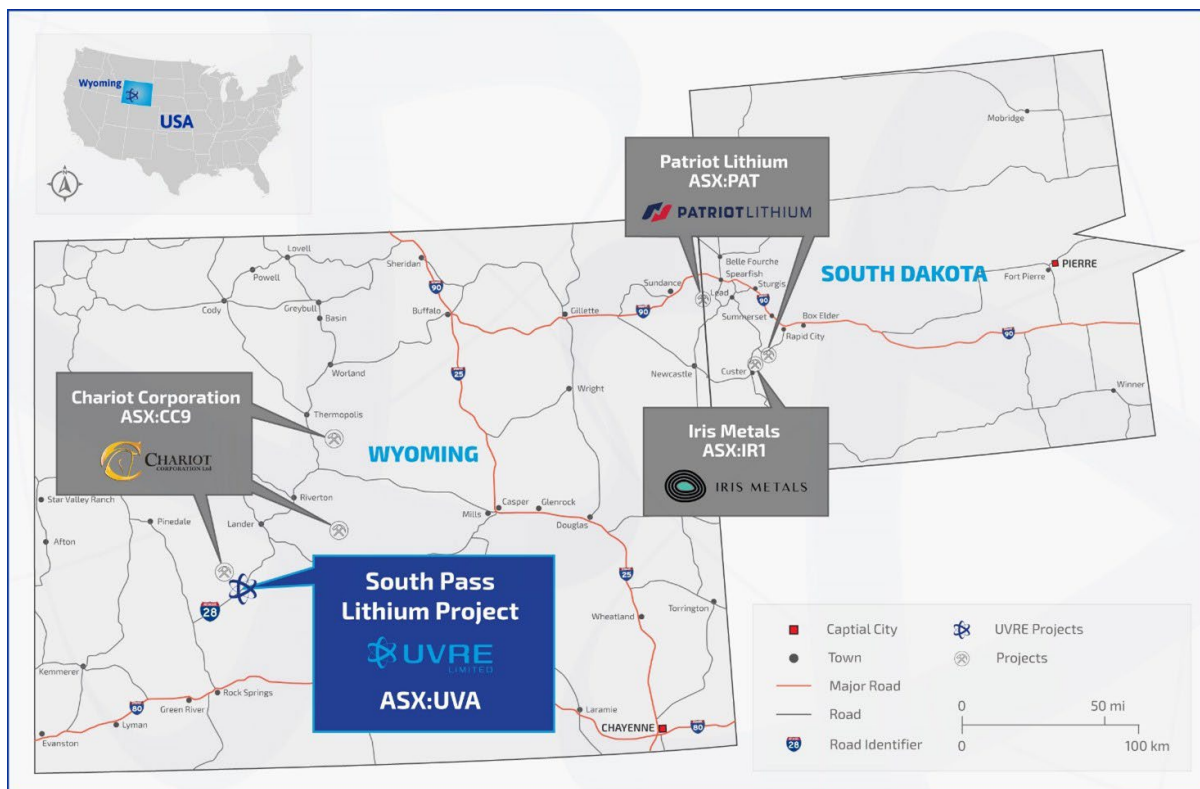

Figure 5. Location of South Pass Project in emerging Wyoming-South Dakota lithium province.

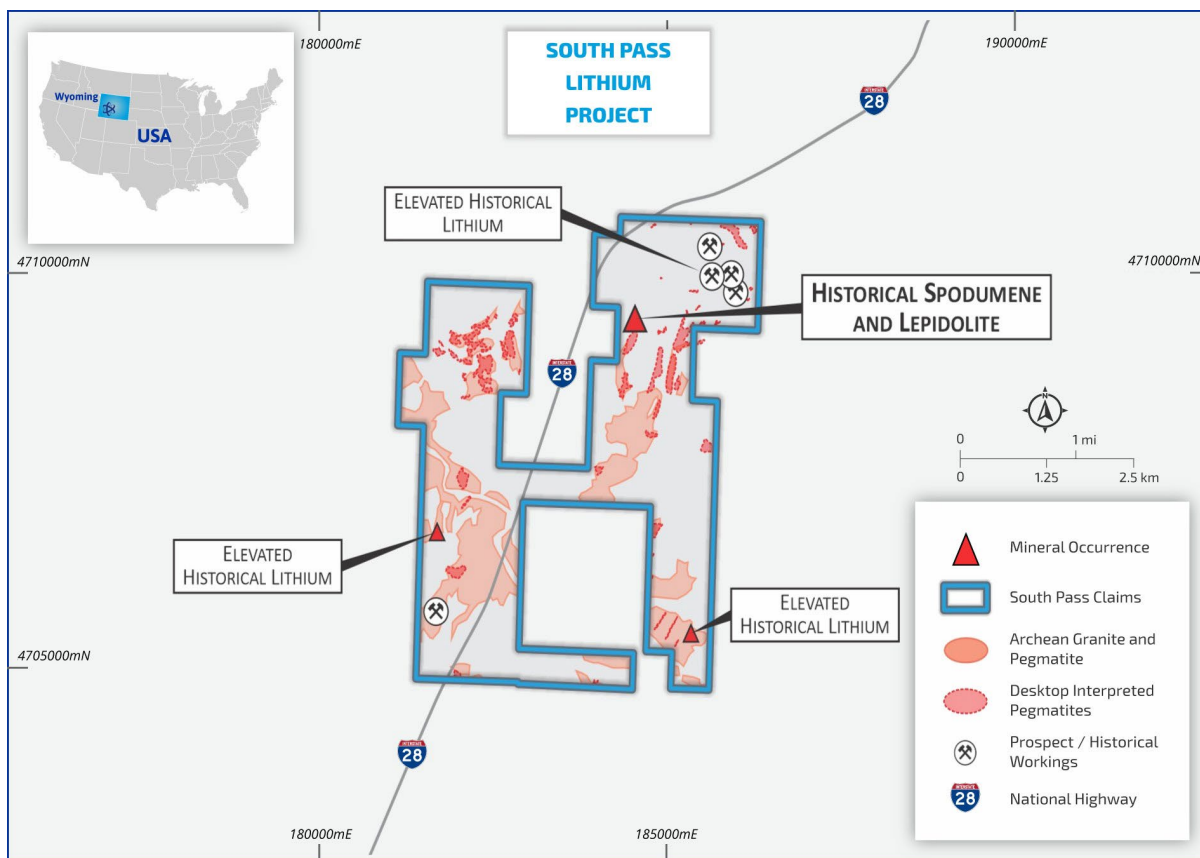

Figure 6. South Pass Lithium Project geology map showing spread of Archean granites and pegmatites.

Picture 3. Outcropping pegmatite within the South Pass Lithium Project area showing power lines and communications tower in the background. The terrain is relatively undulating with sparse vegetation.

Picture 4: Outcropping pegmatite within the South Pass Lithium Project area.

Picture 5. Highway WY-28 which intersects the Project area providing excellent access. Wind River Range in background.

Uvre believes the South Pass Lithium Project has large scale potential due to the extensive exposures of outcropping pegmatites visible from satellite imagery, including in Google earth and confirmed during field reconnaissance. Pegmatites were observed up to several hundred metres long in the vicinity of nearby faults and the South Pass greenstone belt. Similar pegmatites in the district have been found to be enriched in columbite, tantalite, microline, tourmaline, beryl and garnet, with accessory minerals including **lithium bearing lepidolite and spodumene**, which illustrates the potential for pegmatites within the South Pass Lithium Project to be fertile for lithium mineralisation.

There has been no or little prior recorded systematic exploration for LCT pegmatites in the South Pass area and scant prior work was limited to regional mapping and sampling, mainly focussed on gold occurrences.

Prior reported spodumene and lepidolite occurrence was noted by gold geologists from the northern area of the South Pass Lithium Project where small scale prior pegmatite mining has taken place, provides Uvre with encouragement that lithium minerals occur on the mining claims.

The presence of numerous pegmatite outcrops alongside dykes and granites suggests that the deeper crust may harbor a mixture of rocks derived from the mantle. This mixture appears to be mature enough in its development to host lithium and comprise LCT pegmatites.

Reconnaissance exploration sampling program was completed at the Project during the quarter with baseline geochemical rock chip sampling conducted over circa half of the swarms of untested pegmatites. Rock chip and soil samples were dispatched for laboratory analysis for Lithium (Li) and Rare Earths Elements (REE) with results anticipated imminently.

New Project Opportunities

The Company assessed, reviewed and evaluated several strategic and complementary asset opportunities during the quarter.

As outlined in the IPO prospectus and Company announcements since, together with its exploration strategy, the Company intends to continue to seek out and assess potential exploration, acquisition, joint venture, or other strategic opportunities that are complementary to existing assets and create further value for the Company's shareholders.

Corporate

Material outflow during the quarter comprised ~\$147,000 in acquisition costs to secure the mining claims that form the new South Pass Lithium Project in Wyoming. The Company also used funds for geological consulting, database management and tenement management during the quarter across both projects.

Uvre held cash reserves of ~\$2.895M as at 31 December 2023.

In accordance with ASX Listing Rule 5.3.2, the Company advises that no mining development or production activities were conducted during the quarter.

Related Party Transactions

In accordance with ASX Listing Rules 4.7C.3, payments to related parties of the entity and their associates outlined in the Company's Appendix 5B for the quarter relate to Directors fees of \$80,000 and professional and consulting fees of \$24,000 paid to Grange Consulting for company secretarial and financial management services.

IPO Prospectus - Proposed Use of Funds

In accordance with ASX Listing Rule 5.4.4, the Company provides the following comparison of its actual expenditure on the individual items in the "use of funds" statement in its IPO Prospectus since the date of its admission to ASX against the estimated expenditure on those items in the "use of funds" statement in the IPO Prospectus and an explanation of any material variances.

Item	Proposed Use of Funds ¹	Actual Use of Funds	Variance Under /(Over) ²
Exploration at East Canyon	\$3,500,000	\$1,155,011	\$2,344,989
Exploration at South Pass ³	-	\$228,166	(\$228,166)
Administration costs & working capital	\$1,822,928	\$1,121,983	\$700,945
Payment to Red Dirt	\$225,000	\$225,000	-
Project Evaluation	\$100,000	\$38,540	\$61,460
Expenses of the Offer	\$653,072	\$596,518	\$56,554
Total	\$6,301,000	\$3,365,217	\$2,935,783

¹ Proposed Use of Funds for the first two years following Admission as outlined in the Company's IPO Prospectus dated 12 April 2022.

² The material variances are partly attributable to the Company being only part way through the 2 year use of funds budget as set out in the Company's IPO Prospectus dated 12 April 2022.

³ New project acquired during the quarter. This did not form part of the Proposed Use of Funds included in the Company's IPO Prospectus dated 12 April 2022.

Performance Rights

A summary of the Performance Rights (allotted prior to the Company's ASX admission) on issue at the end of the quarter is outlined below.

1,400,000 Class A Performance Rights vested as a result of the drilling results announced on 17 February 2023 titled "Further Assays Received From East Canyon", specifically the achievement of condition (B) at least two metres of an ore grade of greater than or equal to 0.1% U₃O₈ on any of the East Canyon Project claims. Further detail on the terms and conditions of the performance rights is set out in the Company's Prospectus dated 12 April 2022. The Performance Rights (and any shares issued as a result of the conversion of the vested performance rights) remain subject to ASX escrow provisions.

Class	Milestone	Expiry	Number	Vested (Yes/No)
Class A Performance Rights	Each Class A Performance Right will vest and convert (at the election of the holder) into one Share upon a JORC compliant report being published by the Company detailing drill holes which have been drilled by the Company intersecting: (A) at least one metre of an ore grade of greater than or equal to 0.2% U ₃ O ₈ on any of the East Canyon Project claims, or (B) at least two metres of an ore grade of greater than or equal to 0.1% U ₃ O ₈ on any of the East Canyon Project Claims.	Five (5) years from the date of issue.	1,400,000	Yes
Class B Performance Rights	Each Class B Performance Right will vest and convert (at the election of the holder) into one Share upon the Company achieving a 20 Day VWAP of \$0.30.	Five (5) years from the date of issue.	950,000	No
Total			2,350,000	

There are 9,500,000 Options on Issue. No options were converted or cancelled during the quarter.

TENEMENT SCHEDULE

Uvre's tenement/claim holding at December 2023 quarter end is set out below as required by listing rule 5.3.3.

East Canyon Project

All the claims that relate to the East Canyon Project (100% ownership) are held by Vanacorp USA LLC (a wholly owned subsidiary company of Uvre Limited).

ABOUT UVRE

Uvre Limited (ASX Code: UVA) is a new critical minerals exploration company based in Perth, Western Australia with a focus on minerals anticipated to play a key role in the generation and storage of low carbon energy. Uvre's initial evaluation and exploration efforts are centred around the East Canyon Uranium and Vanadium Project in Utah, and the South Pass Lithium Project in Wyoming, USA. Both projects are situated in close proximity to existing infrastructure and previous mining operations. Where appropriate, the Company intends to generate, earn into, or acquire new projects with the aim of creating value for Uvre shareholders.

Competent Person's Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Charles Nesbitt, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy (AusIMM). Mr Nesbitt has sufficient experience relevant to the style of mineralisation and the type of deposits under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Nesbitt is the non-executive Technical Director for Uvre Ltd and consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

Additionally, the information in this report that relates to Exploration Results is extracted from the Company's prospectus dated 12 April 2022 and released to the ASX Market Announcements Platform on 17 December 2022, 17 February 2023, 15 August 2023, 13 September 2023, 28 September 2023, 9 October 2023, 8 November 2023, 16 November 2023, 21 November 2023, 6 December 2023 and 7 December 2023 (the Announcements). The Company confirms that it is not aware of any new information or data that materially affects the Exploration Results information included in the Announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the Announcements.

5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	2,895	3,287

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	80
6.2	Aggregate amount of payments to related parties and their associates included in item 2	24

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i> <i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	N/A	N/A
7.2	Credit standby arrangements	N/A	N/A
7.3	Other (please specify)	N/A	N/A
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	N/A		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(235)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(148)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(383)
8.4	Cash and cash equivalents at quarter end (item 4.6)	2,895
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	2,895
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	7.57
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	N/A	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – e.g. Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
