ACTIVITIES REPORT FOR THE QUARTER ENDING 30 JUNE 2023

KALiNA Power Limited (“KALiNA” or the “Company”) (ASX: KPO) is pleased to provide this Quarterly Activities Report and Appendix 4C for the period ended 30 June 2023 (the ‘quarter’).

During the quarter, KALiNA continued to make key advancements with respect to the commercial development plans of its wholly owned Canadian subsidiary KALiNA Distributed Power (‘KDP’).

Quarterly operations were highlighted by the formal engagement of PricewaterhouseCoopers Corporate Finance Inc. (‘PwC CF’) as the strategic advisor to KDP (*refer ASX Announcement 1 May 2023*). The scope of the engagement comprises the initial priority of funding KDP with equity to complete the project development phase of its projects and to subsequently establish a process to raise the debt and equity funding for the KDP projects once fully permitted.

PwC CF has worked the past few months with the KDP team to prepare for the marketing efforts commence. KDP’s growing portfolio includes ~200MW projects deploying natural gas-fired Combined Cycle Power Plants integrated with Carbon Capture and Sequestration (‘CC-CCS’). With 95% of the CO₂ captured and sequestered these projects will be meeting a growing demand to provide the grid with stable, near-zero emissions baseload power.

CC-CCS solutions are in direct alignment with the evolving regulatory environment for power generation in Canada and KDP is actively engaged in securing several sites for the rollout of its CC-CCS strategy.

PwC CF’s remit also includes equity funding for KALiNA’s Saddle Hills project which is permitted to construct and operate a combined cycle plant generating up to 64MW. KDP will determine whether to initially deploy this project in a simple cycle peaker configuration or expand this project to incorporate carbon capture and sequestration once the details of Canada’s Clean Electricity Regulation are published in the coming months.

Also during the quarter, KALiNA confirmed its involvement in a CA\$3 million research program with the University of Calgary, focused on improving the efficiency of innovative heat-to-power systems (*refer ASX Announcement 4 May 2023*). Initiated by KALiNA, the research program will include collaboration with major energy companies such as ConocoPhillips, Ashaw Energy, Suncor, Telsec and Terrador Energy. The program will include further detailed appraisal of the KALiNA Cycle technology, which is particularly efficient at harvesting energy from geothermal sources at low temperatures.

The research program provides KALiNA with a unique opportunity to apply its technology as part of broader industry solutions to reduce carbon emissions, in direct collaboration with university research partners and multinational energy groups.

Management Commentary

KALiNA’s Managing Director, Ross MacLachlan, commented: “KALiNA continued during the June quarter to execute on our long-term strategy to establish a commercial foundation on which to provide energy solutions at scale, that are aligned with the transition to net-zero economies globally.

Our progress was highlighted by the formal engagement of PwC CF as funding advisor for our wholly owned subsidiary, KDP. Our teams have worked extensively in preparation to seek funding that aligns with our portfolio development strategy. We would expect that a successful funding of KDP in this regard will position KPO as an attractive opportunity for those investors seeking investment exposure to the burgeoning power- carbon capture and sequestration ('CCS') sector."

Financials

KALiNA held \$689,000 in cash held at the end of the quarter. Cash out flows from the Group's operating activities for the quarter amounted to \$1,121,000. Of this, \$564,000 was for Alberta project development, while non-Alberta project development was \$113,000. Corporate staff, investor relations and project finance totalled \$318,000 and patent maintenance of the KALiNA intellectual property portfolio \$3,000.

Payments to related parties

During the quarter directors were paid \$202,000 for services rendered under normal commercial terms. Apart from this there were no other related party transactions during the quarter.
