## 30 June 2023 Quarterly Report

### HIGHLIGHTS

- A high priority, 900m long zone grading 0.15 g/t+ gold has been delineated within the Poku Trend, which returned a peak gold in auger value of 0.85 g/t on the Didievi Project, Cote d'Ivoire.
- Gold anomalism has been identified across a significant strike length of 6km at a consistent 50ppb+ gold in auger.
- The Poku Trend is a regional-scale structure with a 10km strike length contained within the Didievi exploration permit, highlighting the large-scale potential of the Didievi Project.
- The Poku Trend continues to the southwest, passing into an adjacent permit over which African Gold holds a first right of refusal.
- Follow up RC drilling to commence on Didievi following the wet season.
- A new Abidjan-based Exploration Manager has been appointed to drive exploration forward.

African Gold Ltd (**African Gold** or the **Company**) (**ASX: A1G**) is pleased to report on the Company's activities for the quarter ended 30 June 2023.

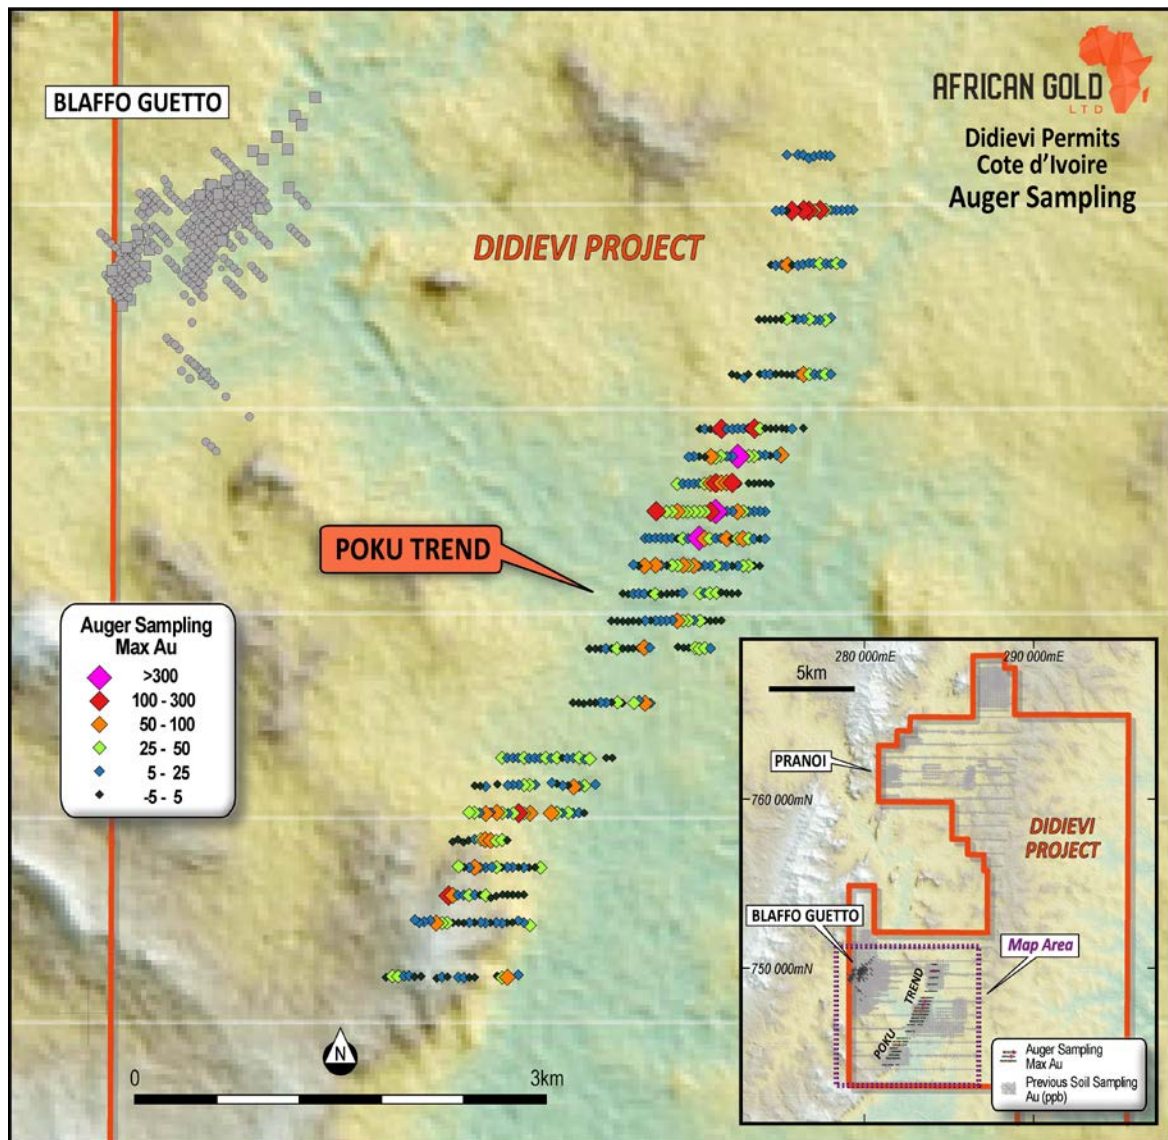

### Didievi Project, Cote d'Ivoire

Following the completion of a 2,000m auger drilling campaign earlier in the year on the 11km Poku Trend soil anomaly, located approximately 2km to the east of the high grade Blaffo Gueto prospect, the Company was pleased to announce results which further confirmed the gold potential across the Didievi Project.

*Figure 1: Auger drilling on the Poku Trend, Didievi Project*

The 422-hole auger drilling campaign (for 2,016m) was designed to identify high priority drill targets across a 9km long gold in soil anomaly coincidental with a major 10km structure observable in the regional aeromagnetic data.

*Figure 2: Location of the auger drilling program on the Poku Trend*

The auger drilling has identified consistent 50ppb+ gold anomalism across a strike length of 6km on the Poku Trend of the Didievi Project. Within the strike length, a high priority 900m-long zone grading  $\geq 0.15$  g/t Au was identified, with a peak value of 0.845 g/t Au. In total, 15 holes returned peak gold values  $\geq 0.1$  g/t Au which is considered highly anomalous in auger drilling.

The Poku Trend lies on a regional-scale geological structure observable in the aeromagnetic imagery with a 10km strike length. Contained within the Didievi exploration permit along with the high-grade Blaffo Gueto and Pranoi prospects, this further highlights the large-scale potential of the Didievi Project. Furthermore, this structure continues to the southwest, passing into a neighboring permit over which African Gold has a first right of refusal agreement with the original vendors of the Didievi Project.

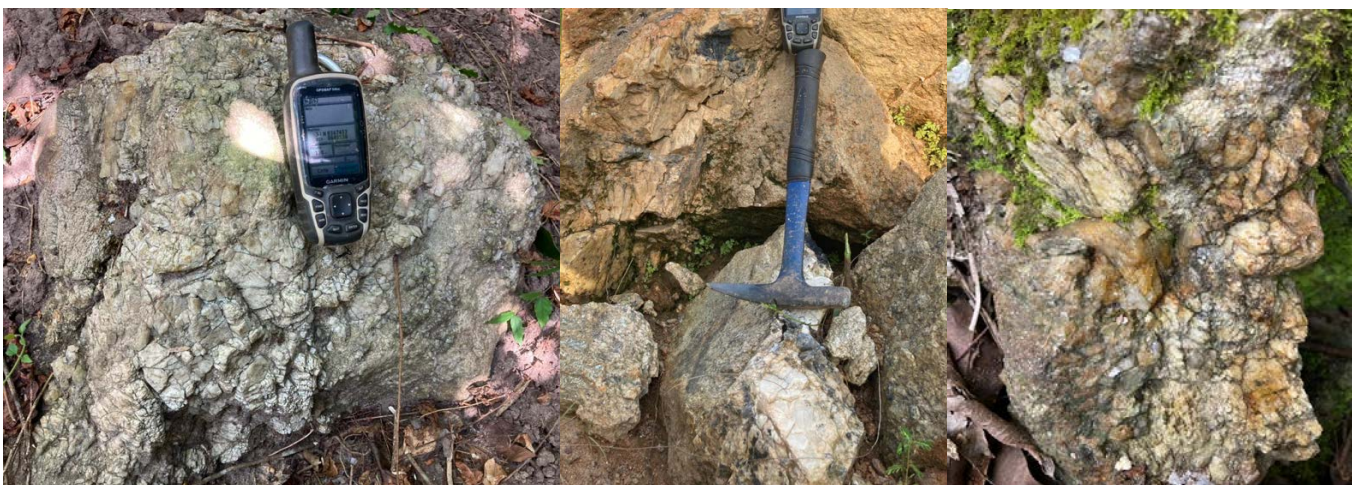

The Poku auger samples will be analysed in-house by the Company's portable X-ray fluorescence (pXRF) machine. This will provide multi-element geochemical data to further enhance understanding of the geology and mineralization at Poku and feed back into the drill targeting process.

Reverse circulation drilling will resume at Didievi after the current wet season, including the testing of these strong auger anomalies.

### Agboville Project, Cote d'Ivoire

During the previous quarter, the Company announced a discovery of large zones of outcropping pegmatite mineralisation on the Agboville Project area. The discovery was made as part of a detailed mapping and sampling campaign across the Project, focusing on the identified contact zones between the greenstone belt and granite contacts occurring on the Project.

The results from the stream sediment sampling identified two high priority zones of over 150km<sup>2</sup>. Rock chip samples from the recent mapping and sampling have been submitted for assay and the results remain pending.

## Syama Shear Zone Project, Mali

During the previous quarter, Resolute Mining Ltd (ASX: RSG) (**Resolute**) completed an initial aircore drilling campaign on the Syama Shear Zone Project located in southwestern Mali. The Syama Shear Zone Project is contiguous to Resolute's Syama Mine.

The results from the recent drilling are currently pending.

Resolute can earn up to an 80% interest in the Project by the completion of an agreed minimum exploration program in two years and the subsequent completion of a feasibility study over an eight year period. Resolute own and operate the neighboring Syama Gold Mine. Key terms of the agreement are:

- spending US\$500,000 on an agreed exploration program in 24 months following the execution of the agreement;
- commencing a Feasibility Study within 5 years and completing the study within 8 years of the execution of the agreement; and
- during the earn-in period, maintaining the permit in good standing.

Resolute will be transferred the 80% ownership of the Syama Project following a positive Decision to Mine, which must be made within 90 days following the completion of the Feasibility Study.

Following a positive Decision to Mine from Resolute, African Gold can elect to contribute to the project development to maintain its equity or dilute to a 1.5% Net Smelter Royalty.

## Appointment of Exploration Manager

African Gold is also pleased to announce the appointment of Dr Richard Tomlinson, Ph.D. as Exploration Manager of African Gold.

Dr Tomlinson has lived in Abidjan for the past 7 years and worked in senior geological exploration roles across West Africa since 2010. In the past seven years he has worked in senior geological exploration roles in Mali, Sudan, Gabon, Guinea and Cote d'Ivoire.

Dr Tomlinson's focus will be to drive the advancement of the Company's projects in Cote d'Ivoire and Mali, with a particular focus on delivering the maiden resource on African Gold's flagship Didievi Project. He has also commenced a detailed review of the Company's other projects in Cote d'Ivoire and Mali and the outcomes of the review will drive the Company's exploration strategy in the coming months.

## Appendix 5B Disclosures

In line with obligations under ASX Listing Rule 5.3.5, the Company notes that the payments to related parties of the Company, as advised in the Appendix 5B (Quarterly Cashflow Report) for the period ended 30 June 2023, pertain to director fees, salaries and wages (including superannuation), accounting services and serviced office rent.

During the quarter ended 30 June 2023, the Company spent a total of \$347,000 on project and exploration activities. The majority of the project and exploration expenditure relates to costs incurred in relation to the auger drilling campaign on the Didievi Project. This expenditure represents direct costs associated with these activities as well as capitalised wages which can be directly attributable to the exploration activities.

This announcement has been authorised for release by the Board of African Gold Ltd.

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
<b>Answer:</b> Yes, the Company expects to have the current net operating cash flows for the time being.	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
<b>Answer:</b> The Company will continue to monitor its available cash going forward. The Company has alternatives to raise further cash to fund its operations and will take those steps as and when appropriate. These include the potential for equity raisings to fund additional exploration as required. Given the Company's supportive shareholder base and historical ability to raise capital, the Company is confident of successfully raising further funds if and when required. The Company also retains full placement capacity under ASX Listing Rules 7.1 and 7.1A.	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

**Answer:** *Yes, the Company expects to be able to continue its operations and meet its business objectives on the basis that it expects to be able to secure funding if required as described in the answer to Question 2 above.*

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*
