Drilling Recommences at Fields Find and Golden Range

Warriedar Resources Limited (ASX: WA8) (**Warriedar** or the **Company**) is pleased to advise that drilling has recommenced at its Fields Find and Golden Range Projects in the Murchison region of Western Australia.

HIGHLIGHTS:

- Drilling underway at Rothschild on the eastern side of the Fields Find Project, targeting parallel gold lodes north and south of the existing Rothschild Main Lode.
- Drill rig then scheduled to head west to test further high-potential base metal and gold targets at Fields Find, including the EM-35 target.
- The remainder of the program will then be drilled at Golden Range, encompassing both metallurgical test holes at Ricciardo and brownfields gold targets in the Riley deposit area.

The planned 2,200m RC drilling program commenced earlier this week at the Fields Find and Golden Range Projects. This drill program will be the Company's sixth drill campaign at the Project in CY2023 (since acquiring the Project in February 2023). This program has been designed to enable testing of high-potential base metal and gold targets, and support fast-tracking of key prospects during CY2024. It is also expected to provide a strong pipeline of assay results through Q1 CY2024.

Specific program goals include (see Figure 1 for locations):

- De-risk further drilling at the high-grade Ricciardo deposit cluster by collecting samples that can be used within a pending metallurgical study; 3 holes planned.
- Increase confidence of the Rothschild gold deposit by better defining parallel lodes to the north and south of the central Main Lode; 6 holes planned.
- Continue testing the base metal potential of the central corridor at Fields Find West by drilling the high-conductance and well-modelled Electromagnetic (EM) target, EM-35; 2 holes planned.
- Drill key gold resource extension and brownfields targets to progress the pipeline of advanced targets; 2 holes planned in the Riley deposit area.

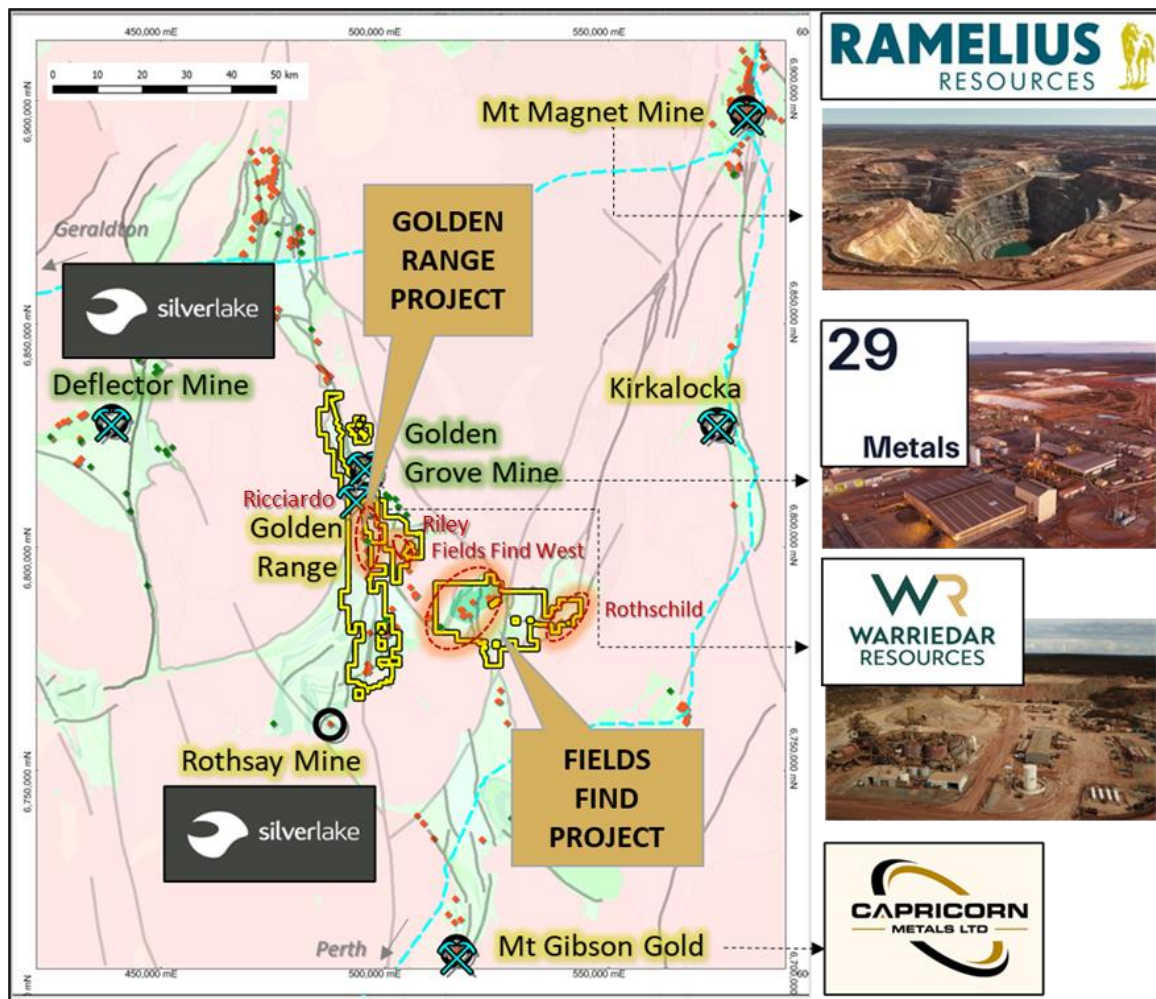

Figure 1: The location of the Golden Range and Fields Find Projects within the southern Murchison province. Specific prospect areas discussed in this release are highlighted in red.

Figure 2: Drilling currently underway at Rothschild.

This announcement has been authorised for release by: Amanda Buckingham, Managing Director.

Competent Person Statement

The information in this report that relates to Exploration Result is based on information compiled by Dr. Amanda Buckingham and Dr. Peng Sha. Buckingham and Sha are both employees of Warriedar and members of the Australasian Institute of Mining and Metallurgy and have sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr. Buckingham and Dr. Sha consent to the inclusion in this report of the matters based on his information in the form and context in which they appear.
