

27 September 2023

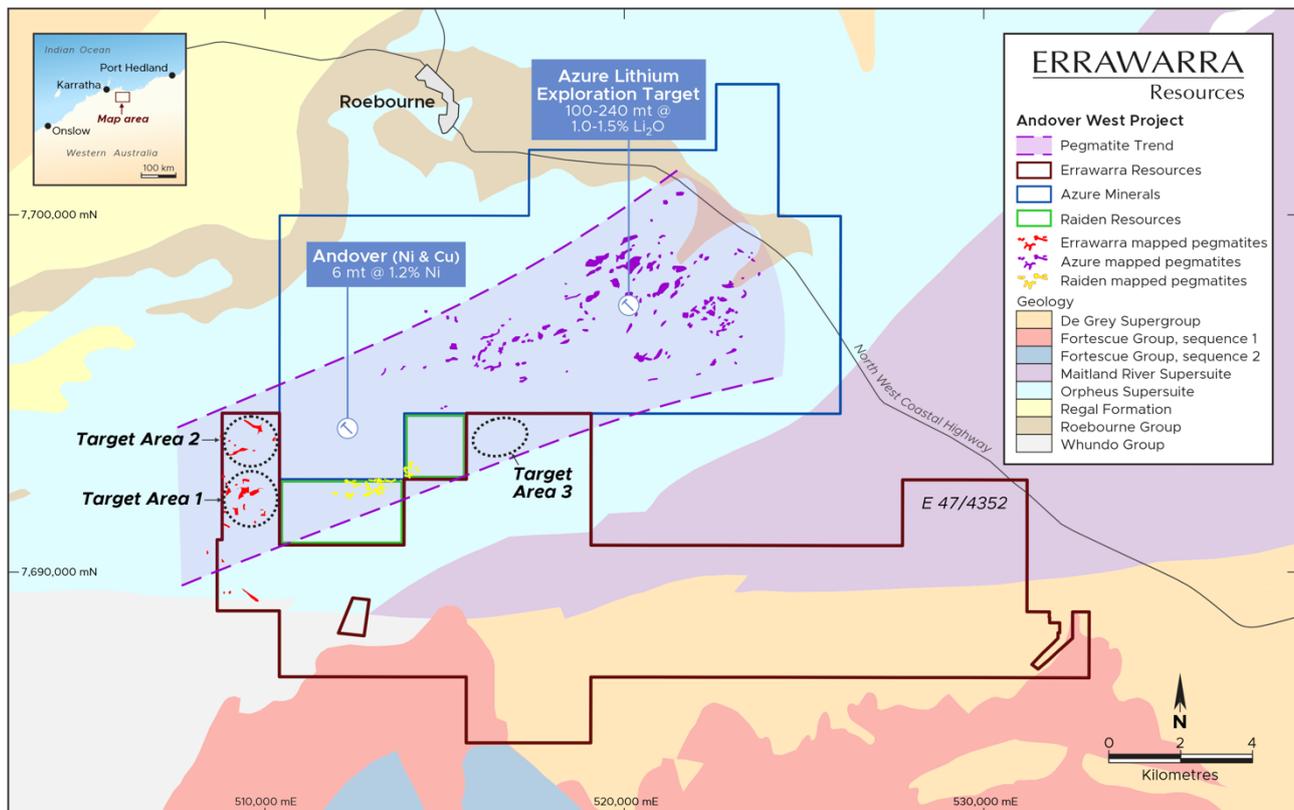

GROUND RECONNAISSANCE UNDERWAY TRANCHE ONE PLACEMENT COMPLETED

- ✚ **Ground reconnaissance underway at the Andover West project**
- ✚ **Focus is on exploration for lithium pegmatites**
- ✚ **Tranche one of the placement completed and funds recently received**

Errawarra Resources Ltd (ASX:ERW) (**Errawarra** or the **Company**) wishes to update the market in respect of the recent placement of funds.

As per the placement as announced on 6 September 2023, the Company wishes to confirm that funds from the first tranche of the placement have been received. Errawarra was pleased to see the strong support received from current and new shareholders and will be accelerating its exploration activities for the discovery of lithium pegmatites.

Executive Director Thomas Reddicliffe commented "We are pleased with the results of the recent placement in Errawarra. It is a testament to the work previously completed and the growing prospectivity of the region demonstrated by the multiple discoveries already made. We have moved quickly to get boots on ground to continue our exploration activities aimed at identifying lithium pegmatites on our Andover West tenement".

EXPLORATION

The Andover West project is situated approximately 40m from Karratha and to the south of Azure Mineral's Andover project. The tenement is largely underexplored for all commodities with minimal drilling having been completed to date.

Errawarra has deployed an exploration team to undertake ground work including aerial drone reconnaissance, mapping and rock chip sampling.. The Andover West tenement covers an area of more than **110km²** with only a small proportion having been explored to date, approximately less than **5%**.
