CTI Logistics Limited – A.R.M. Security Monitoring A1 AS 2201.2 2022 Certification

CTI Logistics Limited is pleased to advise that its security alarm monitoring business A.R.M. Security has achieved Grade A1 certification to the new Australian Standard AS 2201.2 2022. A.R.M. Security is currently one of only three security monitoring businesses in Australia to have achieved this certification following a comprehensive audit undertaken by the Australian Security Industry Association Limited (ASIAL).

Grade A1 certification confirms compliance with the new standard AS 2201.2 2022, which replaced the previous standard issued in 2004. The new standard encompasses new requirements for cyber security, IT infrastructure, document management, ISO compliance, maintenance, building structure and staff training.

With the significant changes in the electronic security industry over the last twenty years and the increased vulnerability for IT infrastructure, the new AS 2201.2 2022 requirements ensure industry best practice and are essential in delivering future reliable security monitoring services.

Yours faithfully

David Watson
EXECUTIVE CHAIRMAN

This announcement was authorised to be given to the ASX by the CTI Logistics Limited board.
