

QUARTERLY ACTIVITIES REPORT ENDED 31 MARCH 2023

Nelson Resources Limited ("Nelson" or "the Company") is pleased to provide shareholders its Activities Report for the quarter ended 31 March 2023.

Highlights:

- ① The Company is planning to undertake a ~5,000m aircore drilling program at its 100% Fortnum gold project.
- ① The 50-hole program will test anomalous gold in basement intersected by previous explorers where the results were not adequately followed up.
- ① Historical gold intercepts at Fortnum include:
 - 3m @ 2.43 g/t from 2m and 5m @ 4.71 g/t from 35m in FRB3032
 - 8m @ 2.41 g/t from 52m in FRB1117
 - 2m @ 5.31 g/t from 2m in FRB1068
 - 9m @ 1.07 g/t from 33m in FRB3038
- ① The proposed aircore drilling program at Fortnum will likely commence during Q2, with a follow-up program depending on results to define targets for RC drilling.
- ① The Company has entered into a heritage agreement with the Jidi Jidi people relating to E52/3695 (Fortnum Project). A PoW has been submitted for the planned 50-hole ~5,000m aircore drilling program.
- ① The Company is also reviewing a number of new project opportunities, both in Australia and overseas, to complement existing projects and to drive value to shareholders.
- ① The Company ended the March quarter with \$1.065 million cash at bank and nil debt.

PROJECT ACTIVITY

Woodline Project

In December 2022, several new tenements were granted in the Woodline project, as shown by Figure 1.

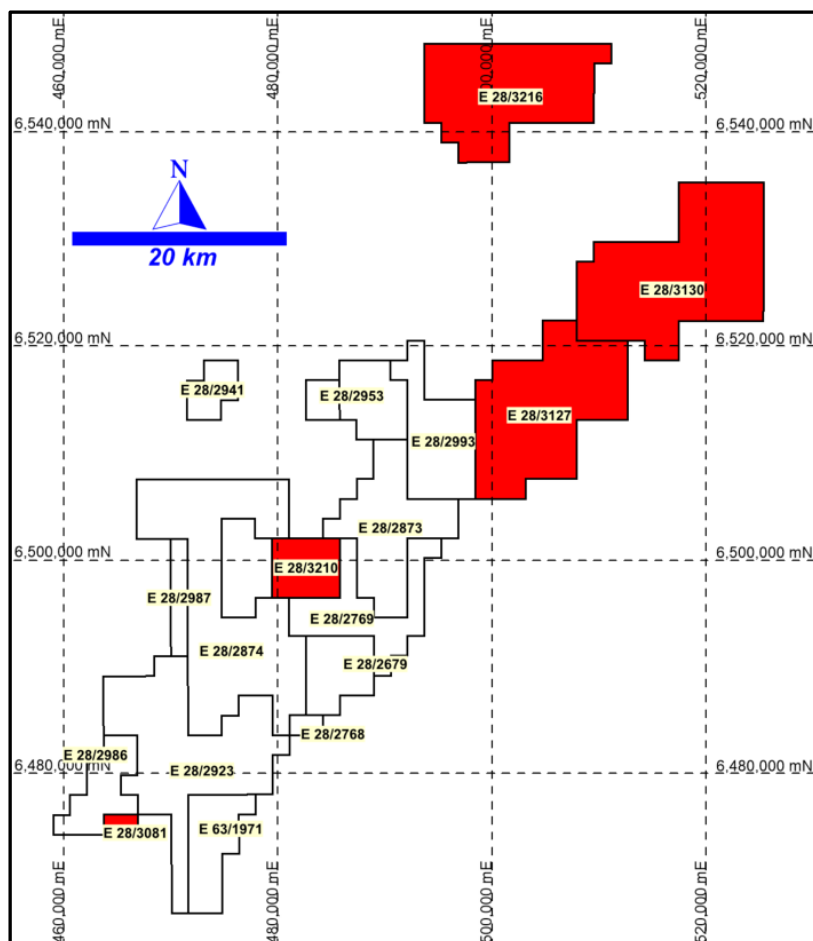

Figure 1: Woodline tenure showing newly granted tenements in red.

The Company will complete the compilation of previous work for these projects and commence prospect targeting during the coming quarter.

Tempest Project

Work continued on evaluation of the Tempest project during the March quarter.

Fortnum Project

The Fortnum Project consists of two exploration licences, Billara (E52/3695, granted 2019) and Billara Bore (E52/4133, granted 2022), 100% owned by Nelson Resources (Figure 2). Previous work at Nelson's Fortnum project includes surface sampling and drilling programs that date back to the 1980's. The initial work completed in the early-1990's identified a gold-in-soil anomaly across the central-north of what is now Nelson's Fortnum Project. These surface soil anomalies were drilled with RAB drilling up to the mid-1990's and a number of anomalous intersections were returned (Figure 3).

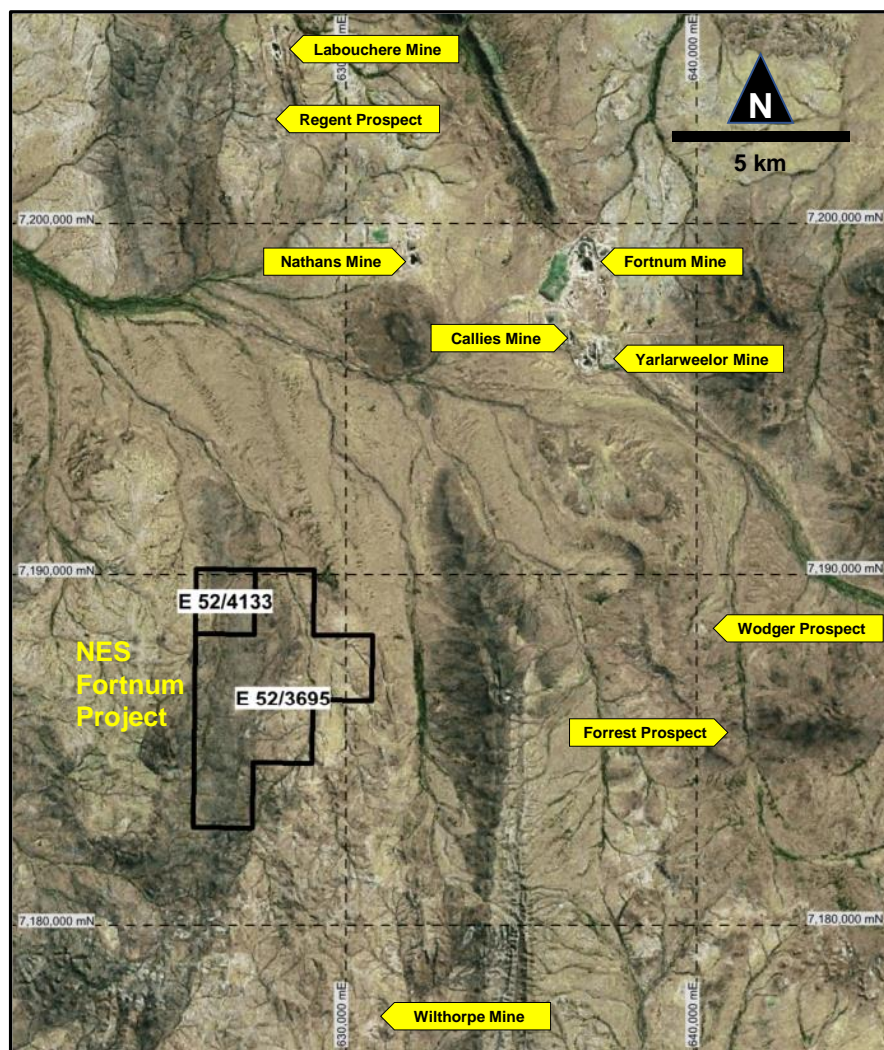

Figure 2: Nelson Resources, Fortnum Project location on aerial photograph showing regional mines and reported resources.

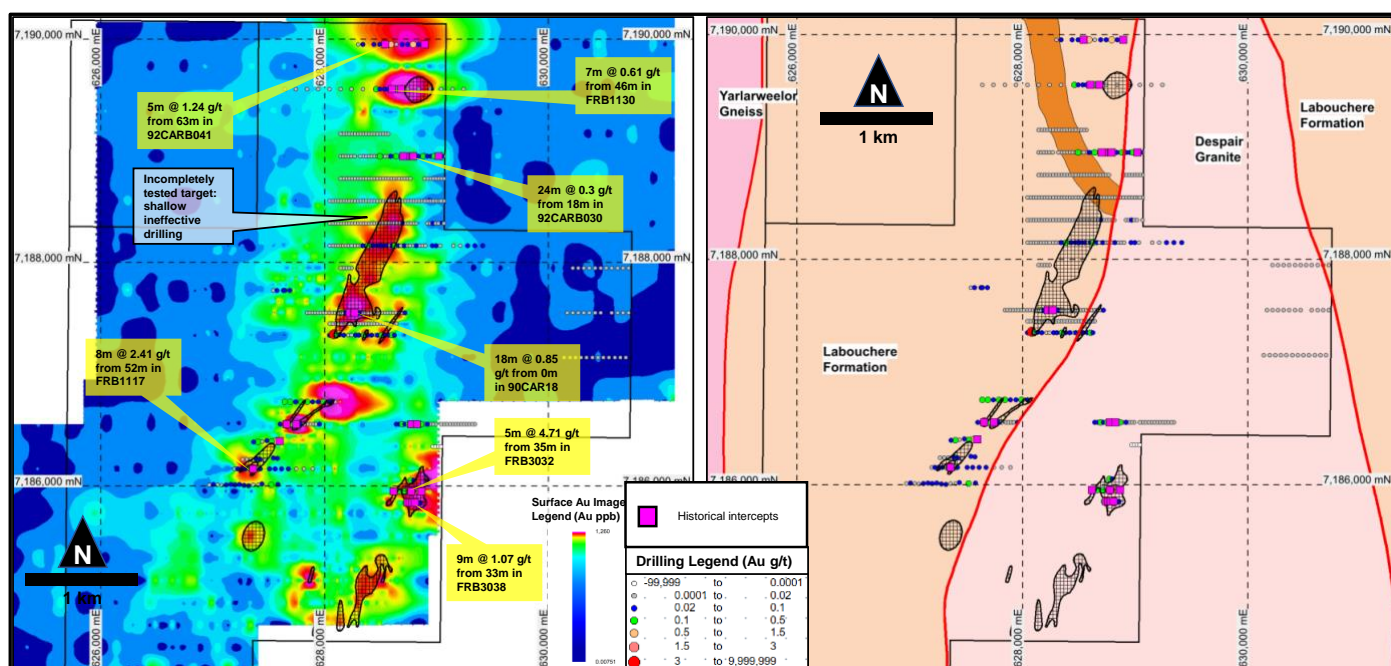

Figure 3: Comparison of significant drilling intersections on soil Au image against drill holes and soil Au targets on interpreted geology.

The work completed by previous explorers defined two corridors of anomalous gold-in-soil: in the centre and on eastern side of the tenement. Several RAB drilling programs tested under these areas, during the 1990's, and intersected anomalous gold in basement. Several areas were tested with set-depth, shallow holes which did not test the full depth of the weathered profile. These areas represent an opportunity to rapidly advance the project.

The Company is confident that the previous work is valid and that the work has defined a target area which is incompletely tested. The Company will complete a staged approach to drilling these targets commencing with a 50 hole, aircore drilling program (Figure 4).

The drilling is designed to extend and confirm the existing anomalous gold zones and provide the basis to develop RC drilling targets.

The Company has now signed a heritage agreement with the Jidi Jidi people and is engaging with them regarding a heritage clearance program for the proposed aircore drilling to proceed.

Yarri Project

During the March quarter, the Company has completed a review of the greater region geological and exploration data at Yarri. with a view to determining what future work can be undertaken to add value to this project.

Happy Jack

The Company has a retained 1% NSR on any future gold production on this tenement.

New Project Opportunities

The Company has allocated part of its working capital budget to the identification and evaluation of new mineral resource opportunities in Australia and overseas, undertaking a review of a range of opportunities during the March quarter. Discussions and due diligence are on-going with several opportunities but no decision has been made at this stage.

Cash Position

In accordance with Listing Rule 5.3.1, the Company reports that there was \$37K spent on exploration and evaluation of projects. Administration and corporate costs were \$106K. The Company's cash position including listed investments as at 31 March 2023 was approximately \$1.065 million. The Company retains sufficient funding to carry out its planned activities over the coming quarters.

Note 6 to Appendix 5B

Payments to related parties of the entity and their associates:

- Directors fees and wages of \$31,100.
- Company secretarial and accounting services fees of \$11,613.

Competent Persons Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Derek Shaw, a geologist employed by Nelson Resources Limited. Mr Shaw is a Member Australian Institute of Geoscientists and has sufficient experience that is relevant to this style of mineralisation and type of deposit under consideration and to the activity that is being reported on to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Shaw consents to the inclusion in the report of the matters in the form and context in which it appears.
