

Exploration activities update – Quebec fire situation

Cosmos Exploration Limited (ASX: C1X) (“Cosmos” or “the Company”) provides the following update on work programs and exploration activities at its Corvette Far East and Laselle Lithium Projects in the James Bay region of Quebec, Canada in light of the current forest fire situation in Quebec.

The Province of Quebec has requested that all exploration companies cease field activities due to the very high forest fire risk over a large part of the province, which includes the Corvette Far East and Laselle Properties.

Cosmos Exploration’s in-country geology team was in the process of mobilising to the Company’s exploration camp located in close proximity to both Projects in Northern James Bay area of Quebec, with helicopters scheduled to arrive later this week.

To ensure the safety of all of its personnel and in compliance with the Provincial Government’s instructions, Cosmos has delayed mobilisation to site.

The Company continues to closely monitor the situation to ensure that all Company activities are compliant with relevant governmental decrees and to ensure the safety of personnel associated with the Property.

The Company remains closely engaged with contractors with a view to re-commencing exploration activities as soon as possible and will provide further updates as information becomes available.

This announcement has been authorised by the Board of Cosmos Exploration Limited.
