In preparing this Prospectus, regard has been had to the fact that the Company is a disclosing entity for the purposes of the Corporations Act and that certain matters may reasonably be expected to be known to investors and their professional advisers. This Prospectus is issued pursuant to section 713 of the Corporations Act. Section 713 allows the issue of a more concise prospectus in relation to an offer of continuously quoted securities (as defined in the Corporations Act). This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all information that would be included in a prospectus for an initial public offering.

This document is important and it should be read in its entirety. The Shares to be issued pursuant to this Prospectus should be viewed as a speculative investment and investors should refer to Section 2 for details of certain risk factors which are considered to be relevant for the purposes of the Offer. Any failure to comply with any such restrictions may constitute a violation of the applicable securities law.

Accordingly, before deciding to invest in the Company, investors should read this Prospectus in its entirety and should consider all factors in light of their individual circumstances and seek appropriate professional advice.

The Board aims to manage these risks by carefully planning its activities and implementing risk control measures. Some of the risks are, however, highly unpredictable and the extent to which they can be effectively managed is limited.

Risks of investing in the Company's existing assets and general risks are set out in Section 2 of this Prospectus.

Careful consideration should be given to all matters raised in this Prospectus and the relative risk factors prior to applying for Shares offered under this Prospectus. The Company operates an electronic CHESS sub-register and an electronic issuer sponsored sub-register. These two sub-registers make up the Company's register of securities. The Company will not issue certificates to investors. Rather, holding statements (similar to bank statements) will be dispatched to investors as soon as practicable after issue.

Holding statements will be sent either by CHESS (for new investors who elect to hold their securities on the CHESS sub-register) or by the Company's Share Registry (for new investors who elect to hold their securities on the Issuer sponsored sub-register). The statements will set out the number of Shares issued under the Prospectus and provide details of a Holder Identification Number (for new investors who elect to hold their securities on the Chess sub-register) or Security holder Reference Number (for new investors who elect to hold their securities on the issuer sponsored sub-register). Updated holding statements will also be sent to each new investor following the month in which the balance of their holding of Securities changes, and also as required by the Listing Rules or the Corporations Act.

1.12 Restrictions on the distribution of the Prospectus

The distribution of this Prospectus outside of Australia may be restricted by law. This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

Residents of countries outside Australia should consult their professional advisers as to whether any government or other consents are required, or whether any formalities need to be observed should they wish to make an application to take up Securities on the basis of this Prospectus. The return of a duly completed Application Form will be taken to constitute a representation and warranty that there has been no breach of such laws and that all approvals and consents have been obtained.

1.13 Taxation

It is the responsibility of all persons to satisfy themselves of the particular taxation treatment that applies to them by consulting their own professional tax advisers. Taxation consequences will depend on particular circumstances. Neither the Company nor any of its officers accept any liability or responsibility in respect of the taxation consequences of the matters referred to above or any other taxation consequences connected with an investment in the Securities of the Company.

1.14 Privacy Disclosure

Persons who apply for Shares pursuant to this Prospectus are asked to provide personal information to the Company, either directly or through the Share Registry. The Company and the Share Registry collect, hold and use that personal information to assess applications for securities to provide facilities and services to Shareholders, and to carry out various administrative functions. Access to the information collected may be provided to the Company's agents and service providers and to ASX, ASIC and other regulatory bodies on the basis that they deal with such information in accordance with the relevant privacy laws. 2. RISK FACTORS

2.1 Introduction

The Shares offered under this Prospectus should be considered speculative because of the nature of the Company's business.

Whilst the Directors recommend that Shareholders take up their Entitlement, there are however numerous risk factors involved. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which the Shares will trade.

The following is a summary of the more material matters to be considered and should be read in conjunction with specific matters referred to in the Company's announcements and reports. However, the summary is not exhaustive and potential investors should examine the contents of this Prospectus in its entirety and consult their professional advisors before deciding whether to apply for the Shares.

2.2 Company specific

2.2.1 Additional requirements for capital

The Company's ability to raise further capital (equity or debt) within an acceptable time, of a sufficient amount and on terms acceptable to the Company will vary according to a number of factors, including prospectivity of projects (existing and future), feasibility studies, development of its technology, stock market and industry conditions and the price of relevant commodities and exchange rates.

No assurance can be given that future funding will be available to the Company on favourable terms (or at all). If adequate funds are not available on acceptable terms the Company may not be able to further develop its project and it may impact on the Company's ability to continue as a going concern.

2.2.2 Environmental Rehabilitation

Legislation in Queensland has recently been amended to enshrine progressive rehabilitation of mining projects in law, including providing for alternative forms of surety. Previously holders of an environmental authority (**EA**) were required to provide to the Department of Environment and Science financial assurance (as security) for compliance with the environmental authority. The concept of financial assurance has now been replaced with an Estimated Rehabilitation Cost (**ERC**) which is advised by the Department.

The Company has recalculated its rehabilitation provision for Golden Ant under the ERC calculator provided by the Queensland Department of Environment and Science. Rehabilitation provision requires significant estimates and assumptions as there are many transactions and other factors that will ultimately affect this liability to rehabilitate the exploration sites. Factors that will affect this liability include changes in regulations, prices fluctuations, changes in technology, changes in timing of cash flows which are based on life of the site or the term of the exploration licence and changes to discount rates. When these factors change or are known in the future, such differences will impact rehabilitation provision in the period in which it becomes known or becomes certain.

2.2.3 In-Country Risks – Finland

The Company intends to carry out exploration and development activities in Finland. Economically, the Finnish real GDP growth rebounded by 3.0% in 2021. However, with the geopolitical crisis in Ukraine, it has been forecasted that Finland's growth in GDP will be lower as compared with previous years. The slower GDP growth has primarily stemmed from surging energy prices and weaker export demand from Russia and the country's primary European trading partners. Any material changes in government policies or legislation may further adversely affect the viability and profitability of the Company's assets and operations.

2.3 Industry specific

2.3.1 Exploration and mining operations and drilling risk

The Company's exploration activities on gold projects in Queensland may be subject to a number of risks inherent in such operations, including:

- (a) mining regulation by state and local governments; and
- (b) costs of complying with environmental laws and regulatory requirements in Queensland.

Additionally, the Company's drilling activities in Queensland carry risk as such activities may be curtailed, delayed or cancelled as a result of weather conditions, mechanical difficulties, shortages or delays in the delivery of drill rigs or other equipment and the effects of geographical remoteness.

2.3.2 Operations

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant break down, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

2.3.3 Health, safety and environmental matters

Exploration, development and production of gold and other minerals involves risks which may impact the health and safety of personnel, the community and the environment. Industry operating risks include fire, explosions, blow outs, pipe failures, abnormally pressured formations and environmental hazards such as accidental spills or discharge of toxic substances. Failure to manage these risks could result in injury or loss of life, damage or destruction of property and damage to the environment. Losses or liabilities arising from such incidents could significantly impact the Company's financial results.

2.3.4 Competition risk

The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the

activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

2.3.5 Commodity and currency price risk

Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors. Fluctuations in the price of gold and other minerals may have an impact on the economic viability of the Company's projects.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

2.3.6 Government policy changes

Adverse changes in government policies or legislation may affect the Company's ability to develop its technology, availability of research and development credits, taxation, royalties, ownership of mineral interests, land access, labour relations, and mining and exploration activities of the Company. Any material adverse changes in relevant government policies or legislation of Australia may affect the viability and profitability of the Company, and consequent returns to investors. The activities of the Company are subject to various federal, state and local laws governing prospecting, development, production, taxes, labour standards and occupational health and safety, and other matters.

2.3.7 Grant of applications

The Company has exploration licenses in Queensland, as announced in its recent ASX announcements, there can be no assurance that tenement applications that are currently pending will be granted. There can also be no assurance that when the tenement is granted, it will be granted in its entirety. Some of the tenement area applied for may be excluded.

Interests in tenements in Queensland are governed by the mining acts and regulations that are current in that State and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, if the exploration licence is granted, the Company could lose title to or its interest in its tenement if license conditions are not met or if insufficient funds are available to meet expenditure commitments.

2.4 General risks

2.4.1 General economic and political risks

Changes in the general economic and political climate in Australia and on a global basis may impact on economic growth, interest rates, the rate of inflation, taxation and tariff laws, domestic security which may affect the value and viability of any activities that may be conducted by the Company.

2.4.2 Equity market conditions

Securities listed on the stock market can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price

of Securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general.

General factors that may affect the market price of Securities include economic conditions in both Australia and internationally (particularly Australian, US and Chinese economic conditions), investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

2.4.3 Litigation risks

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

2.4.4 Potential acquisitions

As part of its business strategy, the Company may make acquisitions of, or significant investments in, complementary companies or prospects although no such acquisitions or investments are currently planned. Any such transactions will be accompanied by risks commonly encountered in making such acquisitions.

2.4.5 Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

2.4.6 Insurance

Insurance against all risks associated with the Company's business is not always available or affordable. The Company maintains insurance where it is considered appropriate for its needs however it will not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

2.4.7 Unforeseen expenditure risks

Expenditure may need to be incurred which has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, however if such expenditure is subsequently required or incurred, this may adversely impact budgeted expenditure proposals by the Company.

2.5 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus.

Therefore, the underlying Shares carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

3. PURPOSE AND EFFECT OF THE OFFER

5. ADDITIONAL INFORMATION

5.1 Company Update

Details of the Company's current activities are set out in the announcements made by the Company to the ASX and are available from the ASX, or the Company's website at www.greatnorthernminerals.com.au.

5.2 Nature of this Prospectus

The Shares to be issued pursuant to this Prospectus are continuously quoted securities. This Prospectus is issued under the special prospectus content rules for continuously quoted securities in section 713 of the Corporations Act. This enables listed disclosing entities, such as the Company, to issue a prospectus for continuously quoted securities with modified disclosure requirements if they satisfy certain requirements.

The information in this Prospectus principally concerns the terms and conditions of the Offer and the information reasonably necessary to make an informed assessment of:

- (a) the effect of the Offer on the Company; and
- (b) the rights and liabilities attaching to the Shares offered pursuant to this Prospectus.

The Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore also have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest in the Company.

5.3 Continuous Reporting and Disclosure Obligations

As the Company is admitted to the official list of ASX, the Company is a "disclosing entity" for the purposes of the Corporations Act. As such, it is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose to the market any information it has which a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

Price sensitive information is publicly released through ASX before it is disclosed to Shareholders and market participants. Distribution of other information to Shareholders and market participants is also managed through disclosure to ASX. In addition, the Company posts information on its website after the ASX confirms an announcement has been made, with the aim of making the information readily accessible to the widest audience.

Investors are encouraged to check and monitor any further announcements made by the Company to ASX prior to securities being issued under the Offer. To do so, please refer to the Company's ASX announcements platform via www.asx.com.au.

By virtue of section 713 of the Corporations Act, the Company is entitled to issue a "transaction-specific" prospectus in respect of the Offer.

In general terms, a "transaction-specific prospectus" is only required to contain information in relation to the effect of the issue of securities on the Company and the rights and liabilities attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position and performance, profits and losses or prospects of the issuing company.

As a disclosing entity under the Corporations Act, the Company states that:
