GTI Energy to Webcast Live at VirtualInvestorConferences.com November 8th

GTI Energy Ltd (GTI Energy or Company) (ASX:GTR & OTCQB:GTRIF) invites individual and institutional investors, as well as advisors and analysts, to attend real-time, interactive presentations on VirtualInvestorConferences.com

GTI Energy is currently drilling at its ISR Uranium Projects in Wyoming's Great Divide Basin and Bruce Lane, Executive Director, will present on progress to date live at VirtualInvestorConferences.com on November 8th, 2022, US Eastern Time.

DATE: November 8th, 2022

TIME: 10:00 AM, US Eastern Time

LINK: <https://bit.ly/3C7y59u>

Available for 1x1 meetings: November 9-11th

This will be a live, interactive online event where investors are invited to ask the Company questions in real-time. If attendees are not able to join the event live on the day of the conference, an archived webcast will also be made available after the event.

It is recommended that investors pre-register and run the online system check to expedite participation and receive event updates.

Learn more about the event at www.virtualinvestorconferences.com.

Recent Company Highlights¹

- Drill rigs are operating at GTI's Great Divide Basin ISR uranium project in Wyoming.
- Part way through a planned ~100,000ft (~30,000m) drill program.
- A new and strongly mineralised trend encountered within state lease Section 29.
- Best hole to date with a sum 71.5 feet of average 0.034% (range 0.021%-0.142%) eU₃O₈ with a total hole GT of 2.55, mineralized depths between 270 – 494 feet.
- 4,593 ft of new roll front trends found to date for a total of 22,233 ft (4.21 miles).
- On track for maiden resource definition in Q1 2023

About GTI Energy Ltd

CLEAN FUEL FOR A CLEAN ENERGY FUTURE

Focussed on exploring for, defining and developing economic ISR uranium resources – GTI Energy is part of Wyoming's Insitu Recovery (ISR) uranium mining renaissance.

GTI aims to respond to the coming surge in demand for US produced uranium as a core component of America's drive for homegrown, sustainable clean energy solutions. GTI is targeting definition of a resource that can be mined using ISR, the lowest-cost and cleanest method of uranium mining.

About Virtual Investor Conferences®

Virtual Investor Conferences (VIC) is the leading proprietary investor conference series that provides an interactive forum for publicly traded companies to seamlessly present directly to investors.

Providing a real-time investor engagement solution, VIC is specifically designed to offer companies more efficient investor access. Replicating the components of an on-site investor conference, VIC offers companies enhanced capabilities to connect with investors, schedule targeted one-on-one meetings and enhance their presentations with dynamic video content. Accelerating the next level of investor engagement, Virtual Investor Conferences delivers leading investor communications to a global network of retail and institutional investors.

GTI ENERGY LTD – PROJECT PORTFOLIO

GREAT DIVIDE BASIN/GREEN MOUNTAIN ISR URANIUM, WYOMING, USA

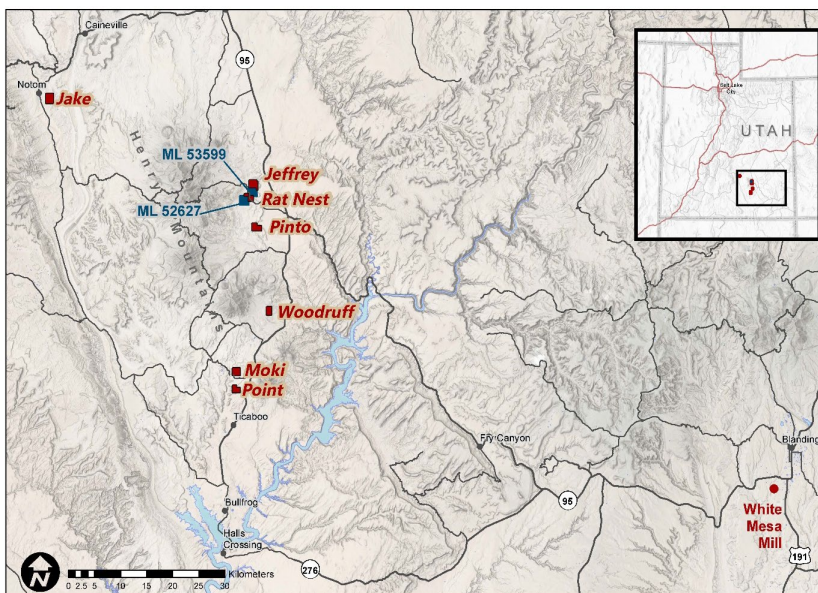

GTI Energy holds 100% of ~35,000 acres (~14,000 hectares) over several groups of strategically located and underexplored mineral lode claims (**Claims**) & 2 state leases (**Leases**), prospective for sandstone hosted uranium that is amenable to low cost, low environmental impact ISR mining. The properties are located in the Great Divide Basin (**GDB**) and at Green Mountain², Wyoming, USA. The properties are located in proximity to UR-Energy's (**URE**) operating Lost Creek ISR Facility & Rio Tinto's (**RIO**) Sweetwater Mill & the GDB roll front REDOX boundary. The Green Mountain Project contains a number of uranium mineralised roll fronts hosted in the Battle Springs formation near several major uranium deposits.

The Green Mountain Project contains a number of uranium mineralised roll fronts hosted in the Battle Springs formation near several major uranium deposits.

HENRY MOUNTAINS URANIUM/VANADIUM, UTAH, USA

The Company has ~1,800 hectares of land holdings in the Henry Mountains region of Utah, within Garfield & Wayne Counties. Exploration has focused on approximately 5kms of mineralised trend that extends between the Rat Nest & Jeffrey claim groups & includes the Section 36 state lease block. Uranium & vanadium mineralisation in this location is generally shallow at 20-30m average depth. The region forms part of the Colorado Plateau. Sandstone hosted ores have been mined here since 1904 and the mining region has produced over 17.5Mt @ 2,400ppm U₃O₈ (92Mlbs U₃O₈) & 12,500ppm V₂O₅ (482Mlbs V₂O₅)³.
