

COVID-19

THIS YEAR IS DEDICATED
TO **OUR PEOPLE.**
TEAMWORK NEVER
MATTERED MORE.

Mineral Resources has a proud history of innovating and adapting to the changing environment in which we live and operate.

But no one could have predicted that the outbreak of a bug named COVID-19, a long way away from Western Australia, would threaten to stop the world – including the world MRL operates in.

It was clear to the MRL leadership team that this dangerous and insidious virus would become a global issue – and that we needed to do everything possible to minimise the impact on our people and, therefore, our business.

From the very beginning, our guiding principle that would drive our actions – and continues to drive everything we do – was to keep all our people in their jobs. We needed to make sure that everyone kept collecting their normal pay to enable them to support their family with certainty and have the knowledge their home was safe and secure.

Everything else to us was secondary.

With a global issue like the coronavirus pandemic, there was always going to be a limit to the steps we could take and the actions we could control.

The success of MRL's response to the coronavirus pandemic has been extraordinary and is the result of the discipline displayed by each and every member of the MRL family.

What we have done has not been easy. But every action taken was with a single goal in mind – to keep every MRL person employed.

Together, we have saved lives, avoided hardship and ensured we have a bright economic future.

So very early on, before COVID-19 took over Australia, we were alert to the warning signs and devised a response plan and started implementing the necessary actions.

Central to our plan was to launch what has arguably become the largest and most sophisticated private sector PCR COVID-19 swab screening program in Australia.

At the outset, we secured world-class, US-made, gold standard COVID testing equipment capable of performing PCR-SARS-CoV-2 tests – it is the most accurate test in the world today. We engaged two independent National Association of Testing Authorities (NATA) accredited pathology laboratories, we have more than 40 nurses and collectors trained in the swab - screening process, and we opened up seven screening facilities – two in the Perth metropolitan area and five in regional areas in the north, south and east of the State.

In line with our sole focus on protecting the jobs of the MRL team of more than 3,100 men and women, we made COVID-19 swab screening a mandatory part of our fit-for-work regime for anyone attending one of our mine sites or working for MRL on a client site.

We have offered the screening service to other resource companies to ensure this pandemic does not force the closure of Western Australia's mining industry. We have partnered with Curtin University's Faculty of Health Sciences to provide our results for a study into incidence of asymptomatic infection within the FIFO worker population of Western Australia. The data obtained through this research study is expected to be invaluable to the Government and the public health officials responsible for managing the response to this crisis and beyond.

Since April, more than 50,000 men and women have been swab-screened. In fact, our program has become so important to Western Australia that more than 60 companies working in the resources sector are now sending their FIFO teams to our swab screening facilities prior to shift start.

What that means is our teams can continue to safely go about their work, confident with the knowledge they, and their work mates, are healthy and there is no risk to their families.

Since January 2020, we have continuously monitored developments around the world along with guidelines introduced by the federal and state governments and the health authorities.

Very early on, across all of our sites, the discipline of our people was extraordinary. They immediately adapted to all government guidelines. Some relocated, being separated from their families for long periods, not knowing how long for.

To support our people through this period, we knew we had to do more for them.

We introduced new technology to help keep us all connected and up-to-date with the ever-changing situation.

As a major partner of the West Coast Eagles, when we heard that the Australian Rules Football League (AFL) season was suspended, we acted immediately. We engaged six of the club's high-performance coaching team, who were temporarily stood down, to work with our employees on site to help combat the psychological issues attributed to longer rosters, isolation and distancing protocols. The West Coast Eagles coaches provided our people on site with additional support and guidance during these difficult times with one-on-one sessions focussed on motivation and mental and physical health including mindfulness, nutrition and wellbeing.

We launched a weekly live online comedy series, exclusive to our employees, featuring Australian comedian Peter Rowsthorn. Each week, Peter hosted his fellow comedian and celebrity friends, broadcasting into the homes and dongas of our people wherever they were. This interactive series provided some light-hearted entertainment to help counteract the isolation impacts to our people, particularly on our mine sites.

We increased our hygiene measures, employed additional cleaners, and increased the cleaning schedules at our sites and offices, and continue this rigorous schedule today.

Although restrictions in Western Australia have eased, we remain committed to keeping our people healthy and well, and will continue screening our workers until COVID-19 is no longer a threat.

We are in regular contact with others in our industry and government departments, sharing knowledge and working together to find solutions. We actively contribute to the Western Australian Chamber of Minerals and Energy COVID-19 working group to ensure a coordinated response from the resources industry.

As an important contributor to the Western Australian and Australian economies, we will continue to work with government to do what we can to ensure our operations contribute positively to the economy and society through these challenging times.

ABOUT THIS REPORT

This annual report is a summary of Mineral Resources Limited's operations and financial results for the financial year ended 30 June 2020. All references to 'Mineral Resources', 'MRL', 'the Company', 'the Group', 'we', 'us' and 'our' refer to Mineral Resources Limited (ABN 33 118 549 910) and the entities it controlled, unless otherwise stated.

References in this report to a 'year' are to the financial year ended 30 June 2020 unless otherwise stated. All dollar figures are expressed in Australian dollars (AUD) unless otherwise stated. All references to 'Indigenous' people are intended to include Aboriginal and/or Torres Strait Islander people.

WHO WE ARE
MINERAL RESOURCES
IS AN INNOVATIVE AND
LEADING MINING SERVICES
COMPANY, WITH A
GROWING WORLD-CLASS
PORTFOLIO OF MINING
OPERATIONS ACROSS
MULTIPLE COMMODITIES,
INCLUDING IRON ORE
AND LITHIUM.

MINERAL RESOURCES
WE'RE DIFFERENT

VISION

To be recognised as one of the great Australian companies and a leading provider of innovative and sustainable mining services.

PURPOSE

To provide innovative and low-cost solutions across the mining infrastructure supply chain, by operating with integrity and respect, working in partnership with our clients, our customers, our people and our community.

THE WAY WE WORK

WE ARE ONE TEAM

- The safety and wellbeing of our people is at the forefront of all that we do
- We work together to achieve the best results for our people, clients and stakeholders
- We care for, respect and invest in our people, the environment and the communities in which we operate

WE ARE HIGH PERFORMING

- We achieve exceptional results through a disciplined and professional approach
- We plan and take ownership of our areas of responsibility
- We always deliver and that sets us apart

WE ARE ENTREPRENEURIAL

- We empower our people to challenge the status quo and actively explore new ideas and opportunities
- We look for better ways to mitigate risk, deliver on commitments and create long-term value
- We recognise, support and harness the diverse talents of our people and partners

ON BEHALF OF THE BOARD, IT GIVES ME GREAT PLEASURE TO PRESENT THE **ANNUAL REPORT** FOR THE 2020 FINANCIAL YEAR.

If the past year has taught us one lesson only, then it is that good systems and practices and strong leadership will prevail even during unprecedented times, which is why I am so extraordinarily proud of the achievements of the entire MRL team.

No business continuity management manual could have prepared us for COVID-19. Yet the speed at which MRL adapted its business practices to protect the health and jobs of the 3,100 men and women we employ, and the successful outcomes we achieved, were remarkable.

It is sometimes hard to fathom that MRL, notwithstanding its proud history of using an innovative approach to deliver exceptional outcomes, could have organised what is arguably the largest private-sector PCR COVID-19 swab screening operation in Australia. So far, MRL's screening operations spread across Western Australia have tested more than 50,000 resource sector workers. These workers were not just MRL employees but those employed by our clients as part of a very deliberate pan-industry approach led by the Company to ensure the Western Australian resources sector – the backbone of the Australian economy – remains fully functioning and free of COVID-19.

I am confident MRL will remain vigilant and stay ahead of this insidious virus. MRL's leadership has been exemplary and a credit to our entire team – as Shareholders, you should be immensely proud.

Globally, it has been an interesting year as the world reacted to the onset of the pandemic. Despite the challenges brought about by COVID-19, MRL delivered a record year of operational and financial performance. The results demonstrate MRL's core strength of having the ability and agility to deal with the shifting sands of the resources sector.

Iron ore prices were up 16 per cent compared to last year and the US dollar exchange rate provided favourable support. It is not often that the USD/AUD exchange rate improves at the same time as the iron ore price increases and MRL was able to respond, which contributed to record earnings.

Lithium prices were under sustained pressure from the outset of 2020 and then came COVID-19, prolonging weakness in the market as supply chains were de-stocked. As a result of COVID-19, the global economy is forecast to contract in 2020/21 and

industrialised countries to suffer economically. With industrial usage for lithium representing a significant portion of demand, this is expected to contract throughout 2020/21. Notwithstanding this, lithium is approaching a transition as long-term demand remains high and challenges for supply will become more pronounced. The lithium portfolio that MRL has developed with its partners positions the Company extremely well for when the market rebounds. MRL remains confident in the lithium market and the Company's decision to invest in world-class, long-life operations.

While FY19 was a period of investment to build a 20 to 50-year operating horizon, the past year was about banking some of the early rewards, including from the sell-down of the Wodgina Lithium Project.

The Company generated record statutory earnings before interest, tax, depreciation and amortisation (EBITDA) of \$2 billion, including a \$1.3 billion gain on the sale of 60 per cent of Wodgina to Albemarle, and a statutory net profit of \$1 billion, up 507 per cent on the prior year.

A strong balance sheet and confidence in the Company's outlook allowed the Board to declare a fully

franked final dividend of 77 cents per share. This brings the full-year payout to shareholders to \$1 a share and continues MRL's proud history of uninterrupted dividend payments since our listing in 2006. It is worth reminding shareholders that since MRL's ASX listing in 2006, at 90 cents a share, the Company has paid out a cumulative \$5.81 per share, on top of an industry leading share price performance.

Pleasingly, during the past year we also delivered success in other key areas with improved safety performance, a further reduction in our greenhouse gas emissions intensity and increased diversity right across our workforce, including the employment of 15 apprentices at our Kwinana workshop, an increase on the FY19 intake. It is testament to MRL's passion to develop careers for young people and invest in a highly skilled and committed workforce.

FY20 has been an extraordinary year for all involved with MRL. I sincerely thank my fellow Directors for their efforts and dedication. On behalf of the Board, I also extend my gratitude to our Managing Director, Chris Ellison, and his leadership team for delivering such a tremendous outcome in a year dominated by the coronavirus pandemic.

I thank you, our shareholders, for your continued support of MRL and, if conditions allow, I look forward to meeting you at the AGM in November.

Peter Wade
Chairman

THIS HAS BEEN AN
**EXTRAORDINARY
YEAR.** COVID-19 HAS
CHANGED THE WAY
WE WORK AND HOW WE
ARE LIKELY TO OPERATE
FOR SOME TIME TO COME.

Our priority response to COVID-19 was to ensure everyone kept their job so they could support their families with absolute certainty.

This Annual Report highlights some of the steps we took, including introducing world-class, gold-standard PCR COVID-19 swab screening into our fit-for-work regime. We offered it to other companies in the resources sector and our approach has been so successful that over 60 companies are now using MRL's screening facilities to test their workers.

The performance of our people through this pandemic has been extraordinary. The MRL culture has always been strong but it went to a whole new level, something I am incredibly proud of and grateful for.

This tremendous team performance allowed us to carry through the operational and financial strategies we had set ourselves for the year.

FY20 delivered the best full-year result in MRL's history as a listed company.

Revenue was up 41 per cent to a record \$2.1 billion while underlying EBITDA – after normalising to strip out items such as the profits from our Wodgina sell-down to Albemarle – was \$765 million, up 77 per cent. This gave us an underlying net profit after tax of \$334 million, up 63 per cent, while MRL's Return On Invested Capital was 49.6 per cent.

MRL was able to generate \$595 million in operating cash flow, up \$409 million, to end the financial year with net cash of \$231 million and a strong balance sheet as we entered FY21.

Mining Services production volumes increased by 65 per cent and revenue was up 50 per cent on the back of several new external contracts and an increase in internal volumes. We are on track to double this business over a three-year period, as I outlined at the 2019 Annual General Meeting.

In the Commodities business, MRL was able to maximise volumes to capitalise on strong iron ore prices. Production across Koolyanobbing and Iron Valley was increased, enabling MRL to export 14.1 million tonnes. Iron Valley's output was steady at 6.7 million, with the growth coming from Koolyanobbing, where operations had ramped up to an annualised rate of 12.7 million tonnes by June 2020.

During the year MRL enhanced the scale of its Pilbara and Yilgarn iron ore operations through the well-timed acquisition of additional resources.

The operational performance at the Mt Marion Lithium Project has been exceptional and a credit to the operational management team. Spodumene production was up 17 per cent despite the challenging lithium market conditions.

In November 2019, MRL completed the partial sale of its world-class lithium project at Wodgina to US-based Albemarle Corporation. This transaction saw the formation of the MARBL Lithium Joint Venture, a joint venture between MRL (40 per cent) and Albemarle (60 per cent), which decided to place that project on care and maintenance given the state of the lithium market. At this point, it is too early to predict when the MARBL Lithium Joint Venture will resume operations at Wodgina. As with our Mt Marion partner Ganfeng, who has been an incredible partner through the years, MRL is delighted to have a great and aligned partner in Albemarle. Our investment in the MARBL Lithium Joint Venture gives us a fast-tracked entry into lithium hydroxide production at Kemerton, currently being built by Albemarle and targeting commissioning late next year.

Our workforce continues to grow – to 3,100 dedicated men and women – yet we have delivered another year of zero Lost Time Injury incidents while our Total Recordable Injury Frequency Rate continues to fall. This is a never-ending journey and we will keep working on eliminating incidents affecting our team.

The number of female and Indigenous employees is growing steadily and we continue to invest in apprentices, trainees and graduates. MRL is also attracting a rising number of second-generation employees, who come into the business with a good sense of our culture handed down by their parents.

During the year, MRL further reduced the Company's greenhouse gas emissions by replacing diesel with gas and LNG wherever possible. The Company advanced its ambitions to establish a domestic gas business in the Perth Basin that will help reduce our emissions intensity. MRL is also working on adding solar power to our mine sites.

In FY20, we paid \$185 million in royalties and taxes and continued our support of WA charities and community organisations – because we are part of the community.

COVID-19 tested our business, and it showed that our business is strong and resilient. None of our sites had to be shut and all continued to operate exceptionally well.

The ownership taken by the MRL leadership team has been transformational for the business. It has delivered an unbelievable culture and a business buy-in across the entire workforce.

I thank the MRL Board for their guidance and support, my leadership team for their commitment and each and every one of MRL's men and women for helping to maintain this exceptional business.

Chris Ellison

¹ 2012 Financial Year NPAT and Earnings Per Share exclude the Deferred Tax Asset arising on the introduction of Minerals Resource Rent Tax (MRRT). NPAT for the 2012 Financial Year would be \$242 million and Diluted EPS 131.1c/share if the impact of MRRT were to be included.
² 2015 Financial Year NPAT and Earnings Per Share exclude the impact of the reversal of Deferred Tax Asset on the abolition of the Minerals Resource Rent Tax (MRRT). NPAT for the 2015 Financial Year would be \$13 million and Diluted EPS 6.85c/share if the impact of MRRT were to be included.
³ Total Shareholder Return is calculated as the cumulative share price appreciation and dividends paid per share since listing.

FY20 SNAPSHOT

INPUTS

HUMAN CAPITAL:

Our employees and contractors (3,100+ as at 30 June 2020) that provide the skills, experience and manpower required to undertake our business activities.

NATURAL CAPITAL:

The natural resources such as water, land, materials and energy required to undertake our business activities.

SOCIAL AND RELATIONSHIP CAPITAL:

The relationships we have with communities, government agencies and other stakeholders, as well as our reputation and brand that are essential to our social license to operate and the long-term sustainability of our business.

FINANCIAL CAPITAL:

The pool of funds provided by shareholders, bondholders and banks, or generated through investments and operations that are required to undertake our business activities.

MANUFACTURED CAPITAL:

The manufactured tangible objects such as buildings, plant, equipment and infrastructure that are required to undertake our business activities.

INTELLECTUAL CAPITAL:

Intangible aspects such as intellectual property, organisational knowledge, systems and processes required to undertake our business activities.

VALUE CREATION BUSINESS MODEL

LEVERAGING OFF OUR EXISTING FOOTPRINT, INFRASTRUCTURE AND SKILL SET, WE HAVE BUILT A **STRONG AND DIVERSIFIED PORTFOLIO** IN MINING SERVICES AND MINING OPERATIONS, PROVIDING **LONG-TERM SUSTAINABLE GROWTH**, WITH 20-50 YEAR BUSINESS HORIZONS.

We achieve this by:

- Targeting stranded deposits and partnering with junior miners
- Acquiring a project stake and developing it at the lowest cost in an expedited time-frame
- Optimising the mine plan, increasing efficiency and maximising profitability
- Monetising the asset and divesting for maximum capital gain
- Retaining the life-of-mine, build-own-operate mining services contracts

FY20 OUTPUTS

OPERATIONAL REVIEW

MINERAL RESOURCES IS AN **INNOVATIVE AND LEADING** MINING SERVICES COMPANY WITH A WORLD-CLASS PORTFOLIO OF MINING OPERATIONS ACROSS LITHIUM AND IRON ORE.

MRL has been successfully providing safe, high-quality, low-cost mining, mining construction and mining infrastructure services for more than 25 years. The experience gained through the mining services business has enabled MRL to successfully transition to owning and operating commodity projects.

MRL is committed to creating long-term, diverse annuity earnings through the mining services business and mining operations. Our business spans multiple commodities across different geographical locations and services a range of major Tier 1 mining companies.

MRL provides mining services to clients throughout Western Australia and the Northern Territory, and operates mines in the Pilbara and Yilgarn regions, shipping product through Utah Point (Port Hedland) and the Port of Esperance.

MRL's business is structured into two core groups, supported by shared corporate functions:

- Mining Services
- Commodities

MINING SERVICES

MRL provides full pit-to-port solutions with the aim of continually improving operational efficiencies and generating a highly favourable return on investment. In addition, Mining Services specialises in Build, Own, Operate (BOO) projects where MRL provides both the capital infrastructure and operational expertise.

Crushing, screening and processing services are offered through MRL's wholly-owned company, CSI Mining Services (CSI). CSI provides world-class, tailored crushing, screening and processing solutions for some of the world's largest mining companies.

CSI's service offering also includes design, manufacture, commissioning and on-site operation and maintenance of plant facilities as well as the provision of specialised mine services such as materials handling, plant and equipment hire and maintenance, tails recovery, aggregate crushing and mine design, engineering and construction.

CSI's BOO business model, together with CSI's trusted, longstanding relationships with its clients, has led to an exceptionally strong performance during FY20 with a 65 per cent increase in volumes year-on-year. CSI had 22 crushing and processing plants in operation during the year and experienced very high client retention, with four contracts renewed, two new contracts being awarded and one existing contract completing due to the end of the mine life.

By partnering with CSI, MRL's blue-chip clients realise tangible and quantifiable cost and time benefits associated with working with the industry-leading materials handling specialist in this field of mine operations. In addition, MRL leverages the experience and skills of CSI when developing and operating MRL's own profit-share projects. In doing so, MRL develops a pipeline of future work for its core business as a mining services provider.

During FY20, CSI's experienced construction team completed the Wodgina Lithium Project and commenced work on the Kemerton Lithium Hydroxide plant. The team also successfully managed the construction of the first 15Mtpa NextGen 2 crushing plant and prepared for its mobilisation in early FY21, as well as constructing 120 kilometres of off-highway roads as part of the expansion of MRL's Yilgarn iron ore operations.

CSI owns Australia's largest inventories of crushing and mineral processing equipment, parts and rotatable spares. As such, CSI is uniquely placed to quickly and efficiently design and construct plants, utilising new and/or refurbished components, thereby capitalising on opportunities that are out of reach of MRL's competitors.

CSI's Kwinana Workshop and Logistics Hub is the largest facility of its kind in Western Australia. Having its own in-house workshop enables MRL to provide innovative and low-cost solutions for all MRL projects, ensuring expedited development time frames and in-house testing capabilities.

The Workshop undertakes fabrication of mining and processing plants and is the primary support and service centre for MRL's operational crushing and processing sites. The Workshop, combined with MRL's Asset Management Group, services remote operations throughout Western Australia, for both MRL owned and operated sites as well as MRL's BOO operations on client-owned sites. MRL's field service crews provide high-performance resources for scheduled fixed and mobile plant and equipment maintenance, shutdowns, annual leave coverage, site special projects, plant upgrades, rotatable spares and urgent breakdown support.

Located south of Perth on 10 hectares of land, the Workshop provides employment for more than 150 people and serves as a training ground for MRL's apprentices before they are deployed to the mining operations. During FY20, MRL employed 15 new apprentices, an increase of 36 per cent over FY19.

In FY20, MRL completed the acquisition of Mining Wear Parts (MWP), a provider of specialist parts to the mining, quarrying and recycling industries across Australia. MWP supplies replacement parts used in crushing, milling, slurry pumps, mobile equipment and various consumable products such as castings. The acquisition is a logical addition to support CSI and allows MRL to further vertically integrate its supply chain.

SITE SERVICES

MRL manages its own accommodation villages. By offering its own integrated services, MRL is able to focus on making life better for its contractors and employees who work in very isolated and extreme environments. This year, with the onset of COVID-19, the rules for critical services, particularly for close quarters living in remote locations, were rewritten.

In response to the spread of the pandemic and the rapidly changing government guidelines, MRL redesigned its services, immediately introducing additional disinfection and cleaning practices, offering flexible dining options, rearranging exercise facilities, introducing temperature monitoring and ensuring the availability of adequate supplies of sanitisation products for all village residents.

To ensure that MRL abided by all government guidelines and that contractors and employees were well looked after while in MRL's care, an additional 40 people were added to the Site Services team. Additional village managers, chefs and utilities staff were employed as increased hygiene and cleaning regimes were implemented through all villages. These measures changed the way employees and contractors live and work on site.

Despite the additional challenges brought about by COVID-19, during FY20, the Sites Services team added two exploration camps to its portfolio to bring

the total number of accommodation villages under MRL's management to seven. These two new camps support MRL's exploration work in the Pilbara. With the addition of the new camps, the total number of accommodation rooms under management in FY20 was 2,213, representing an increase of 13 per cent over FY19. Work also commenced on the construction of a 99-person mining camp at Parker Range to support mine development in the Yilgarn region of Western Australia.

SUPPLY CHAIN LOGISTICS

MRL manages its own mine-to-port logistics for all MRL-owned and/or operated mine sites, including Iron Valley, Koolyanobbing, Mt Marion and Wodgina, which is in care and maintenance.

For FY20, Total Material Movement (TMM) in MRL's mining pits was 92.2Mt. A total of 14.2Mt of product was transported to export facilities, which included 6.7Mt via 81 on-highway road trains and 7.5Mt via 23 rail locomotives and 844 rail wagons. A total of 14.5Mtpa of product was shipped through Utah Point and the Port of Esperance to customers throughout Asia.

ENERGY

MRL is looking at ways to provide long-term energy security to achieve lower-cost energy and a reduced carbon footprint. The Energy team is focussed on supporting future business growth opportunities by integrating gas, LNG and renewable energy solutions where possible.

Energy Resources Limited (ERL) is a wholly owned subsidiary of MRL, holding interests in nine exploration permits (and is the operator of seven of them) across five locations in the onshore Perth Basin. The locations extend from south of the Perth metropolitan area to the Mingenew Shire in the north.

In December 2019, MRL acquired a 19.9 per cent shareholding in Norwest Energy NL as part of MRL's aims to be self-sufficient in gas to provide energy security, reduce reliance on diesel and lower carbon emissions¹. Norwest is a joint venture partner of ERL in two Perth Basin exploration permits.

COVID-19 delayed the Perth Basin drilling and seismic programmes. However, MRL's Perth Basin assets remain highly prospective and sought after and MRL is currently evaluating options for the next stage of the exploration programme.

INNOVATION

MRL fosters an environment for pioneering innovation, investing in patented technology to create lower-cost mining services solutions with high barriers to entry. It is through this approach that a range of innovative products and processes have been developed, all of which are designed to facilitate increases in efficiency and lower costs to provide MRL a distinct competitive advantage.

NEXTGEN 2 CRUSHING PLANT

Following on from the success of the installation of the innovative NextGen 2 crushing plant in the Pilbara in FY19, MRL entered into a partnership with Metso Minerals (Metso) to develop modular crushing and screening plants. The modular design is scalable, allowing additional modules to be added in 5Mt increments. This provides the flexibility to manufacture plants ranging from 5Mt to 30Mt crushing capacity.

The new modular NextGen 2 crushing plants are suitable for a range of applications, from stemming through to hard-rock processing. MRL will market and operate these under a BOO model in Australia, and Metso will market the NextGen 2 crushing plants globally. MRL will retain the Intellectual Property (IP) rights.

NextGen 2 is a revolution in relocatable crushing plants. The modular design is capable of rapid deployment requiring minimal in-ground services and concrete. It is assembled in modules and, compared with fixed crushing plants, provides for sustained reliable performance over time with the flexibility to meet clients' changing and challenging production demands.

The first NextGen 2 crushing plant has a capacity of 15Mtpa and manufacture was completed during FY20 in preparation for mobilisation to a client site in the Pilbara. It will replace an existing 7Mtpa capacity crushing plant.

CARBON FIBRE TECHNOLOGY

For a number of years, through its 60 per cent ownership in CarbonArt, MRL has explored the potential of developing carbon fibre dump truck trays. In August 2020, MRL granted its partner in CarbonArt a licence to progress the development of dump truck trays and rail wagons.

In line with MRL's vision to provide innovative and low-cost solutions across the mining infrastructure supply chain, MRL will pursue the development of other carbon fibre products for the mining industry.

RAIL TRANSPORT SYSTEMS

MRL has been exploring the opportunity to bring innovation to the design and manufacture of rail solutions within the resources sector with the objective to develop a system that is capital efficient with low operating costs. A number of alternatives have been evaluated, including the Bulk Ore Shuttle System.

MRL's current development projects lend themselves to alternative transport solutions, however, MRL remains committed to progressing a rail solution for future opportunities in the sector.

MINING SERVICES OPERATIONAL PERFORMANCE

Mining Services generated EBITDA of \$359 million, an increase of 72 per cent compared to FY19. Mining Services FY20 production volumes increased by 65 per cent. This increase can be attributed to the ramp-up of the Koolyanobbing iron ore project and growth in external contracts, including haulage and external mining.

FY20 Mining Services revenue was \$1,275 million, which is \$425 million (50 per cent) higher than FY19. During the year, two new contracts were secured and operations at a number of existing sites were extended.

The long-term growth of our Mining Services business has averaged 19 per cent per annum and margins have been consistent through the cycles. The business provides predictable cash flows and returns, creating long-term annuity income streams as illustrated in Figure 1 and Figure 2 below.

Figure 1: Mining Services volume growth

1. Contract volumes include production-related Ore Mined, Crushed, Processed and other mining services where MRL owns the underlying assets delivering the service.
2. CAGR since 1H15 calculated as the CAGR for the successive 6-month periods from 1H15 to 2H20 multiplied by 2.
3. Mining Services less construction EBITDA reflects MRL's annuity style production-related earnings.
4. Mining Services less construction EBITDA divided by contract tonnes rebased to 100 in 1H15.

Figure 2: Mining Services less construction EBITDA

COMMODITIES

MRL has ownership in, and operates, mine sites in the Pilbara and Goldfields regions of Western Australia:

Iron Ore

- Iron Valley
- Koolyanobbing

Lithium

- Mt Marion
- Wodgina

IRON ORE

IRON VALLEY

Located in the Pilbara region, Iron Valley shipped 6.7Mt during FY20, which is slightly down on FY19. Iron Valley remains a high-cost mine but favourable market conditions during FY20 provided the opportunity for blending previously uneconomical ore. A low-cost capital solution for the processing plant was implemented to assist with the fines content and wet ore, providing the capacity and flexibility to ship more ore while iron ore prices were elevated. During the year, MRL was also able to redeploy capital due to the semi-mobile design and construct of equipment, demonstrating the value of MRL's diverse and integrated business model.

KOOLYANOBING

Koolyanobbing iron ore is located in the Yilgarn Shire in the Goldfields region. MRL originally targeted a 6-6.25Mt per annum run rate when the Company acquired the asset in 2018. However, Koolyanobbing operations ramped up to an annualised run rate of 12.7Mtpa by the end of FY20 with both the Deception and Jackson pits successfully transitioning to lower-strip ore delivery phases. Rail and shipping also ramped up ahead of schedule to 12.7Mtpa by the end of the financial year, resulting in total shipped tonnes of 7.4 million wet metric tonnes (Mwmt) for FY20.

Koolyanobbing iron ore has 10 pits in operation within a 200 kilometre area, allowing for blending of ore to extract maximum value while achieving market specification. The ramp-up of Koolyanobbing under MRL's ownership demonstrates the Company's capability to manage complexity and develop solutions as well as the ability to execute quickly to take advantage of favourable market conditions.

During FY20, MRL released an initial resource statement that reported Mineral Resources of 108.6Mt of iron ore at 56.8 per cent Fe².

IRON ORE OPERATIONAL PERFORMANCE

Iron ore produced EBITDA of \$479 million, an increase of \$264 million (123 per cent) compared to FY19. This is attributed to an increase in the total tonnes shipped as

well as higher prices due to strong market conditions. Iron ore revenue of \$1,553 million was \$599 million (63 per cent) higher than the previous year.

Iron ore exports in FY20 of 14.1Mwmt were higher than FY19 as a result of a 134 per cent increase in the tonnes shipped from Koolyanobbing, offset by a 10 per cent reduction in Iron Valley exports.

MRL achieved an average iron ore price for FY20 of A\$110.3 per wet metric tonne, which is an increase of 22 per cent compared with FY19. This was driven by strong Platts pricing combined with a weaker Australian dollar, along with a further narrowing of discounts in the second half of the year.

IRON ORE DEVELOPMENT PROJECTS

PARKER RANGE PROJECT

In August 2019, MRL acquired the assets that comprised the Parker Range Project from Cazaly Iron Pty Ltd, including tenements, mining information, contracts and authorisations². The Parker Range Project is located in the Yilgarn Shire. The acquisition expands MRL's iron ore presence in the region.

Mine development and site mobilisation commenced in FY20 in preparation for first ore production expected in FY21. Bringing Parker Range online will see the existing Carina assets, currently on care and maintenance, restart, demonstrating MRL's ability to recycle capital by redeploying assets across its operations. Due to the locational spread of the pits in the Yilgarn, two processing hubs in operation will be more cost efficient than transporting ore from Parker Range to the Koolyanobbing processing plant.

KUMINA PROJECT

MRL acquired the Kumina Iron Ore Project, located in the West Pilbara region, from BCI Minerals Limited (BCI, ASX:BCI) in December 2018. The acquisition of Kumina is consistent with MRL's strategy of identifying new value-adding development opportunities and will enable MRL to leverage its existing workforce and logistics supply chain in the Pilbara.

Following on from initial exploration and a drill out in the first half of FY20, a follow-up drill campaign for Kumina that was planned for Q4 FY20 was delayed because of COVID-19 and rescheduled to Q2 FY21.

MARILLANA PROJECT

During FY19, MRL entered into an agreement with Brockman Iron Pty Ltd, a subsidiary of Brockman Mining Limited, in relation to the Marillana Iron Ore Project in the Pilbara. As part of the agreement, and subject to certain terms and conditions, MRL may farm-in by satisfying the farm-in obligations to earn a 50 per cent interest in the Marillana Iron Ore Project.

The terms and conditions of the farm-in obligations include spend on exploration and development

activities on the Marillana tenements, completing the process design criteria of the processing plant(s), optimising the mine plan study and finalising the mine development layout plan. In July 2019, both companies agreed that the farm-in obligations may take up to a further 12 months to complete and agreed to extend the key dates for commencing construction and operations of the rail and port system by 12 months from the originally specified dates⁴.

During FY20, MRL progressed drilling and metallurgical test work at Marillana in line with the Farm-in and Joint Venture Agreement (FJVA). Initial metallurgical tests indicate that the ore quality is in line with expectations. The most cost-effective approach to transport ore to port is being evaluated.

The farm-in obligations are expected to be completed in the second half of CY20. On successful completion of the farm-in obligations, a decision to progress with development of an iron ore facility with production capacity up to 25Mtpa will be made.

WEST PILBARA PROJECT

At the end of March 2020, MRL completed the transaction to purchase the Buckland Project encompassing the Bungaroo South ore reserve, relevant haul road licences, designs, approvals and agreements under a series of arrangements with BCI for cash consideration of up to \$20 million and the optimisation of the existing Iron Valley Agreement⁵. Under this agreement BCI will contribute to the capital investment required to extend the life of mine at Iron Valley through a partial rebate of MRL's payments to BCI. These agreements build on MRL's long-term relationship with BCI and will enhance MRL's iron ore footprint in the Pilbara region and provide further opportunity for our Mining Services business to create value from stranded iron ore deposits in the Pilbara.

During the year, significant environmental surveys and monitoring programmes were completed as part of the approvals process for developing the project. MRL continued working with the Western Australian Government and other parties to develop additional iron ore export capacity in the Pilbara.

³ ASX MIN 30 August 2019

⁴ ASX MIN 22 July 2019

⁵ ASX MIN 31 March 2020

LITHIUM

MT MARION LITHIUM

Mt Marion Lithium Project is located in the Goldfields region, producing lithium spodumene concentrate. Mt Marion is operated by MRL under a life-of-mine BOO mining services contract and is jointly owned by MRL (50 per cent) and one of the world's largest lithium producers, Jiangxi Ganfeng Lithium Co. Ltd (50 per cent).

With the downturn in the lithium market, there was an increased focus on mine optimisation during FY20. Through optimising the mine plan and a robust integrated supply chain, in the final quarter of FY20, Mt Marion was running at more than 90 per cent recovery on lithium units and achieved record production and shipments of spodumene concentrate. Improved blasting performance and fragmentation led to better dig rates that, ultimately, contributed to lowering the ore cost per tonne. Greater efficiency in mining fleet and maintenance, combined with the greater volume in spodumene concentrate production, has led to achieved operating costs in FY20 being lower than achieved FY19 operating costs.

With the border closures brought about by COVID-19, the labour market is tightening. By achieving efficiencies throughout the supply chain at Mt Marion, MRL has been able to redeploy resources, both equipment and operators, to other Company operations to assist with expansion plans, demonstrating the strength of MRL's diverse portfolio and ability to quickly adapt to changing circumstances.

MT MARION OPERATIONAL PERFORMANCE

Mt Marion produced EBITDA of \$16 million, which is a decrease of 78 per cent compared with FY19. This was due mainly to:

- The achieved price for 6 per cent and 4 per cent spodumene products averaging A\$597 per wet metric tonne for all tonnes exported, representing a decrease of 43 per cent compared to FY19
- An increase in total sales volumes in FY20 to 408,000wmt, which is 8 per cent higher than FY19, an outcome of higher yields and recoveries
- A reduction in Cost and Freight (CFR) cost in the second half of the year to A\$540 per wet tonne as the mine plan was optimised.

Spodumene concentrate is not exchange traded and the pricing for Mt Marion output is linked to Chinese domestic and import lithium carbonate and hydroxide prices, with the pricing agreement making provision for periods of low lithium pricing.

MARBL LITHIUM JOINT VENTURE

In November 2019, MRL announced the completion of the sale of 60 per cent of the Wodgina Lithium Project and the establishment of the MARBL Lithium Joint Venture with US-based Albemarle Corporation, Inc.⁶ Under the terms of the sale, MRL received a cash payment of US\$820 million and a 40 per cent interest in the Kemerton Lithium Hydroxide plant currently under construction by Albemarle in Western Australia. The MARBL Lithium Joint Venture has been established with MRL and Albemarle holding a 40 per cent and 60 per cent interest respectively.

This transaction, the largest in MRL's history, demonstrates the Company's ability to create long-term value for shareholders. It enables MRL to participate in the high-margin lithium hydroxide market on an accelerated basis through partial ownership in the Kemerton Lithium Hydroxide plant while preserving all the upside potential of Wodgina. Albemarle will fund 100 per cent of the capital expenditure and other costs at the Kemerton facility, transferring a 40 per cent share to MRL on commissioning.

The MARBL Lithium Joint Venture will operate the Wodgina Lithium Project and the Kemerton Lithium Hydroxide plant. The MARBL Lithium Joint Venture Board comprises two MRL representatives and three Albemarle representatives. Albemarle will manage the marketing and sales of spodumene concentrate produced at the Wodgina Lithium Project and the lithium hydroxide produced at the Kemerton Lithium Hydroxide plant.

In line with MRL's business model of investing in profit-share projects to create long-term annuity style earnings for its core business, MRL's Mining Services division is contracted to provide life-of-mine crushing and camp services at the Wodgina Lithium Project operation.

WODGINA LITHIUM

Wodgina is the largest known hard-rock lithium deposit in the world with a forecast production life of more than 30 years. During FY20, construction on the three-train 750ktpa capacity spodumene concentrate beneficiation plant was completed by MRL.

When ownership of the Wodgina Lithium Project transferred to the MARBL Lithium Joint Venture, the decision was made to place Wodgina on care and maintenance due to the challenging global lithium market conditions, and to preserve the world-class orebody for future periods of higher prices.

The MARBL Lithium Joint Venture will regularly review market conditions with a view to resuming spodumene concentrate production when market conditions improve. MRL remains confident in the Wodgina operation as a world-class asset and the decision to partner with Albemarle to help MRL drive sustainable and lasting value for shareholders.

WODGINA LITHIUM OPERATIONAL PERFORMANCE

Following the completion of the sale of 60 per cent of the Wodgina Lithium Project to Albemarle and the establishment of the MARBL Lithium Joint Venture in November 2019, MRL recognised a pre-tax gain on disposal of \$1,298 million (post-tax \$909 million) during the year.

KEMERTON LITHIUM HYDROXIDE

Albemarle is constructing two 25ktpa lithium hydroxide processing trains at Kemerton, located in the south-west of Western Australia near the regional town of Bunbury.

Once constructed, the plant will provide lithium hydroxide to battery makers globally. The Kemerton Lithium Hydroxide plant will be commissioned in stages, currently planned to commence in the second half of CY21. Full production is anticipated in CY22.

⁶ ASX MIN 1 November 2019

COMMODITIES OPERATIONAL PERFORMANCE

Commodity volumes and price impacts on financial performance for FY20 were:

- Iron ore pricing continued the strong position encountered in the second half of FY19, with added production stemming from the ramp-up of Koolyanobbing to end the year with an annualised shipped tonnes run rate of over 12Mwmt in June 2020
- Spodumene volumes strengthened in FY20 as the mine plan at Mt Marion was optimised. The Wodgina operation was placed into care and maintenance.

Commodity exports ('000 wet metric tonnes)	1H20	2H20	Total FY20	1H19	2H19	Total FY19
Iron Ore						
Iron Valley	3,590	3,106	6,696	3,673	3,733	7,406
Koolyanobbing	3,158	4,221	7,379	292	2,864	3,156
Total Iron Ore	6,748	7,327	14,075	3,965	6,597	10,563
Spodumene						
Mt Marion ¹	194	213	407	186	192	378
Wodgina ²	3	-	3	-	-	-
Total Spodumene	197	213	410	186	192	378
Lithium Direct Shipping Ore (DSO)						
Wodgina ²	-	-	-	422	-	422
Total DSO	-	-	-	422	-	422
Total Commodity Exports						
	6,945	7,540	14,485	4,573	6,790	11,362

¹ Volumes presented as 100 per cent for the Mt Marion Lithium Project. MRL operates 100 per cent of the project, in which it owns a 50 per cent interest.
² Volumes presented as 100 per cent for the Wodgina Lithium Project. The project is structured as an unincorporated joint venture from 1 November 2019 with MRL holding a 40 per cent interest. The project is currently on care and maintenance.

Table 1: FY19-FY20 Commodity performance

MANGANESE

In the latter half of FY20, MRL completed the restructure of its non-core manganese assets under an Asset Sale Agreement with Resource Development Group Limited (RDG)⁷. Under the terms of the transaction, RDG acquired a 100 per cent interest in the Ant Hill and Sunday Hill manganese tenements and, in return, MRL was issued with fully paid RDG ordinary shares, equivalent to a 75 per cent shareholding in RDG on a fully diluted basis.

This transaction with RDG will allow MRL to realise value from its non-core manganese assets in the near-term while preserving long-term optionality. MRL will support RDG in its aspirations to grow the volume and value of project work within the mining, energy and infrastructure sectors at a level that is complementary to MRL's own contracting and mining services focus.

GRAPHITE

MCINTOSH GRAPHITE PROJECT

In October 2019, MRL withdrew its 51 per cent interest in the McIntosh Graphite Project (McIntosh Project) and terminated the McIntosh Joint Venture (MJV) that it had established with Hexagon Resources Limited (Hexagon, ASX: HXG)⁸.

As a result, the MJV tenements covering the McIntosh Project in northern Western Australia reverted 100 per cent to Hexagon. MRL originally entered into the MJV to increase its exposure to battery materials with the inclusion of graphite as well as to create additional mining services contracting opportunities. However, MRL determined that any future investment in the McIntosh Project would not meet the Company's minimum investment return threshold when compared to other significant projects currently undergoing evaluation that would require development capital. MRL's investment in the McIntosh Project was less than \$5 million, and was subsequently written off during FY20.

SYNTHETIC GRAPHITE PRODUCTION

As part of the agreement between MRL and Hazer Group Ltd (ASX: HZR), MRL secured an exclusive worldwide IP licence to utilise the Hazer process for the primary purpose of producing synthetic graphite from natural gas and iron ore.

The design and construction of a continuous feed pilot plant was completed and commissioned during FY19 and successfully produced its first run of synthetic graphite. The initial results were better than expected with the synthetic graphite exceeding 96 per cent Total Graphitic Carbon (TGC). The product certification process is expected to take 12 months and MRL continues to assess options to develop a commercial synthetic graphite plant. However, with the onset of COVID-19, MRL made the decision to focus on its core business and, as a result, has not made any further progress towards the commercial plant.

⁷ ASX MIN 17 June 2020
⁸ ASX MIN 02 October 2019

FINANCIAL REVIEW

FY20 HAS DELIVERED **EXCEPTIONAL FINANCIAL PERFORMANCE** WITH UNDERLYING EBITDA UP 77 PER CENT ON THE PRIOR CORRESPONDING PERIOD.

MRL generated statutory EBITDA of \$2,006 million and an underlying EBITDA of \$765 million for the financial year ended 30 June 2020 (FY20). The underlying result was up \$332 million (77 per cent) on FY19. Underlying EBITDA has been derived by excluding from statutory EBITDA the gain on disposal of 60 per cent interest in the Wodgina Lithium Project of \$1,298 million, along with \$40 million of unrealised fair value losses on listed investments (\$42 million loss in FY19) net \$21 million foreign exchange losses on the translation impact of the MRL's US dollar denominated notes and cash holdings (\$4 million loss in FY19) and a \$4 million gain on acquisition of an investment.

Statutory net profit after tax (NPAT) was \$1,002 million which was up \$837 million (507 per cent) on FY19. Statutory NPAT included \$200 million of post-tax impairment charges (\$286 million pre-tax) in relation to capitalised exploration and mine development expenditure, intangibles, plant and equipment, and stockpiles.

Group revenue for the year ended 30 June 2020 was \$2,125 million, up \$613 million (41 per cent) on FY19. FY20 was a year of significant growth with Mining Services volume growth of 65 per cent and Commodity tonnage exports growth of 27 per cent. Volatility in commodity prices saw lithium prices fall a further 50 per cent during the year, while the Platts Iron Ore 62 per cent Fines Index (Platts) increased by 7 per cent during the same period.

COVID-19 did not materially impact MRL in FY20. Following the outbreak in January 2020, MRL moved quickly to implement preventative action and continuously monitored developments around the world. As a minimum, this included the adoption of all guidelines introduced by the Australian Federal and State Government health authorities to minimise health risks presented by COVID-19.

In April 2020, MRL began testing all workers and visitors to operational sites with world-standard, gold-class PCR testing equipment from the US. These actions and initiatives assisted MRL in achieving a strong result, with growth in both the Mining Services and Commodities operations, despite the challenging lithium market and changes to operational conditions to mitigate the risks brought about by COVID-19.

Further highlights during the period include:

- The sale of a 60 per cent interest in the Wodgina Lithium Project to Albemarle resulting in the recognition of a pre-tax gain on disposal of \$1,298 million (post-tax \$909 million) and the establishment of the 60:40 Albemarle/MRL unincorporated MARBL Lithium Joint Venture. As part of the transaction, MRL also owns a 40 per cent interest in the lithium hydroxide modules being built by Albemarle in Kemerton. MARBL Lithium Joint Venture placed the Wodgina Lithium Project on care and maintenance during the first half of FY20 to preserve the world class orebody for future periods of higher prices
- Iron ore revenue sales growth of 63 per cent to \$1,553 million, due to a 33 per cent increase in sales volumes and a 22 per cent increase in average price received, with further growth expected in FY21 as Koolyanobbing achieved an annualised shipped tonnes run rate of over 12Mwmt in June 2020
- An increase in Mt Marion Lithium Project plant output of 17 per cent, despite the challenging lithium market.

Following the exceptional financial performance in FY20, and given its strong balance sheet at 30 June 2020, the Board resolved on 19 August 2020 to declare

a fully franked final dividend of 77.0 cents per ordinary share for shareholders as at 26 August 2020 to be paid on 15 September 2020. Inclusive of the fully franked interim dividend of 23.0 cents per ordinary share paid in March 2020, total dividends declared in respect of FY20 amount to 100.0 cents per ordinary share.

CASH AND CAPITAL MANAGEMENT

At 30 June 2020, MRL held cash and cash equivalents of \$1,522 million, an increase from \$265 million at 30 June 2019. In addition to its 30 June 2020 cash holdings, MRL has access to substantial undrawn debt facilities to support business development activities (\$286 million as at 30 June 2020).

Completion of the Wodgina transaction with Albemarle during the year resulted in MRL moving back to a net cash positive position with cash inflow of \$1,206 million in proceeds from the transaction.

Strong underlying EBITDA of \$765 million contributed to net cash from operating activities of \$595 million, an increase of \$409 million from FY19.

Cash generated by investing activities of \$844 million in FY20 included proceeds from the completion of the Wodgina transaction of \$1,206 million, less expenditure on maintenance and growth capex that included:

- Completion of the construction of the Wodgina spodumene concentrate plant and related infrastructure
- Growth in the Yilgarn region
- Investment in the Group's Pilbara iron ore strategy.

SUSTAINABILITY REVIEW

This Sustainability Review is a summary of our sustainability performance in FY20.

For the full Sustainability Report visit www.mrl.com.au.

WE STRIVE TO GENERATE VALUE WHILE **MANAGING** OUR **SUSTAINABILITY TOPICS** AND MAINTAINING OUR LICENCE TO OPERATE.

SUSTAINABILITY OVERVIEW

Our sustainability reporting covers operations where MRL and its subsidiaries have operational control and is prepared in accordance with the Global Reporting Initiative (GRI) Standards: Core option. We have obtained external assurance for six of our sustainability performance indicators (refer to the MRL 2020 Sustainability Report for a copy of the Independent Limited Assurance Statement).

This year we made significant strides in our management of sustainability. We developed a Sustainability Policy that outlines our commitment to sustainability risk and opportunity identification, management, performance measurement and reporting. A suite of new policies supports the new Sustainability Policy, including:

- An Anti-Bribery and Corruption Policy which outlines our commitment to fair and legal business practices, anti-bribery and corruption
- A Human Rights Policy to outline our commitment to human rights and our joint responsibility to ensure that our business activities respect the rights and dignity of all people
- A Supplier Code of Conduct to set out our expectations of our suppliers’ conduct with regard to business integrity, health and safety, environmental, labour and human rights issues.

MRL has a cross-functional Sustainability Working Group to support and advise the business on the management and monitoring of key sustainability topics, as well as a FY20 Sustainability Plan focusing on sustainability governance, performance and reporting.

OUR MATERIAL SUSTAINABILITY TOPICS

MRL applied the GRI reporting principles to define report content by undertaking a thorough materiality assessment process to identify the most pressing sustainability issues that influence the Company's ability to create and sustain value in the short, medium and long-term. Stakeholder engagement is an important mechanism to inform our materiality assessment and understand the broader impact of our business.

We identified six material topics across the themes of business ethics and integrity, health and safety, people, environment, climate change and social. A summary of MRL's performance against each of these material sustainability topics is provided in the table below.

Theme	Material Topic
Business Ethics and Integrity	1. Conducting our business with ethics and integrity
Health and Safety	2. Maintaining a safe working environment that promotes health and wellbeing
People	3. Attracting and retaining talent while developing a diverse, inclusive and fair workplace
Environment	4. Managing environmental impacts and enhancing resource efficiency
Climate Change	5. Understanding and managing our climate-related obligations, risks and opportunities under a changing climate
Social	6. Developing and maintaining strong community and stakeholder relationships

Table 2: MRL's Sustainability material topics

BUSINESS ETHICS AND INTEGRITY

We are committed to operating with ethics and integrity in all business activities and stakeholder relationships.

We believe that consistent and proper business conduct creates loyalty and trust with our stakeholders and we are committed to promoting a culture of ethical corporate behaviour.

MRL has a Code of Conduct and Business Integrity that defines the way we do business. It is based on our Values and represents our commitment to uphold the highest standards of ethics in our business practices. In FY20, an e-learning package on the Code of Conduct and Business Integrity was developed and implemented throughout the business. Over 75 per cent of our employees and a number of our contractors completed this training in FY20. We are aiming for full completion by the end of FY21.

During FY20, MRL implemented a Whistleblower Policy, supported by a Whistleblower Procedure, which outlines the processes by which stakeholders can report matters that they genuinely believe are in breach of MRL's Code of Conduct and Business Integrity or are illegal. The Company also established an independent external whistleblowing service, MinRes Integrity Assist, to allow stakeholders to raise concerns of suspected or actual misconduct in the workplace.

Modern Slavery is an important issue for MRL and a key aspect of our sustainable procurement programme. In FY20, MRL:

- Held awareness sessions on sustainable procurement and modern slavery
- Developed a Supplier Code of Conduct and Human Rights Policy
- Formalised the Sustainability and Business Conduct evaluations as part of our tender processes
- Joined the Western Australian Industry Collaborative Working Group on Modern Slavery
- Developed a process to identify suppliers that are at higher risk of modern slavery incidents
- Implemented a requirement for high-risk suppliers to complete a Modern Slavery Self-Assessment Questionnaire (SAQ)
- Developed a process to assess Modern Slavery SAQs and engage with suppliers on red flag responses.

During FY20, we requested 35 potentially high-risk suppliers to complete the Modern Slavery SAQ. We continue to identify potentially high-risk suppliers and engage in modern slavery risk identification, assessment and monitoring activities. In FY21, MRL will release its first Modern Slavery Statement as part of the reporting obligations under the *Modern Slavery Act 2018 (Cth)*.

HEALTH AND SAFETY

We strive to maintain a healthy and safe working environment for our employees, contractors and visitors, and enhance the wellbeing of our people.

MRL promotes health and safety as a core business value that underpins everything that we do. We work to identify and control hazards, protect our people from exposure to health and safety risks, and support the health and wellbeing of our people. MRL views safety performance as fundamental to our overall success and our social licence to operate.

Our response to COVID-19 was a significant part of our health and safety activities in FY20. MRL takes a responsible and pro-active approach to managing the risks of COVID-19. Our response centres on:

- Keeping our people safe and well
- Maintaining safe and reliable operations and providing continuous support to our customers
- Supporting the Western Australian economy and communities.

We continue to implement and improve our occupational health and safety system, which applies to all of our employees, contractors, sub-contractors and visitors. In FY20, we developed the MRL Critical Risk Management Programme following a detailed analysis of historical high-risk activities that presented the greatest risk of high-consequence injury.

We also launched an updated corporate safety induction training module to provide all employees, contractors, sub-contractors and visitors with an overview of MRL, our Vision and Values, key MRL policies and procedures, and critical health, safety and environmental information.

MRL has a dedicated Health Services team responsible for our Health and Wellbeing Programme. This programme covers physical and mental wellbeing, injury and prevention management, as well as lifestyle and social wellbeing. We increasingly focus on the mental health and wellbeing of our workforce. In FY20, MRL undertook a number of initiatives focussed on mental health including engaging a full-time in-house psychologist and sending psychologists out to our mine sites to hold information sessions on mental health awareness and leadership. As part of our partnership with the West Coast Eagles, an Australian Rules Football League (AFL) team, we recruited some of its high-performance coaching team to provide one-on-one motivation and advice on personal health, nutrition and wellbeing. For further information on our mental health initiatives, refer to the MRL 2020 Sustainability Report.

Measuring our health and safety performance is a critical part of our safety management framework. MRL's injury frequency rates include both employees and contractors. Both our Lost Time Injury Frequency Rate (LTIFR) and Total Recordable Injury Frequency Rate (TRIFR) , shown in Figure 3, decreased during FY20, demonstrating our commitment to health and safety management.

Figure 3: Historical trends in LTIFR and TRIFR (employees and contractors)

FY20 Safety Metric per 1,000,000 hours worked	Employees	Contractors	Combined Employees & Contractors	FY20 Target
Work-related Fatality Rate	0.00	0.00	0.00	Zero Meets Target
Lost-time Injury Frequency Rate	0.00	0.00	0.00	<0.25 Exceeds Target
Total Recordable Injury Frequency Rate	3.36	3.10	3.29	<3.00
High-consequence Work-related Injuries Rate ¹	0.00	0.00	0.00	
All Incident Rate ²	-	-	180.66	
Near Miss Frequency Rate	-	-	40.19	

Hours worked 5,057,163 1,933,845 6,991,008

¹ High consequence injuries are defined as significant injuries, which include LTIs and fatalities

² All Incident Rate excludes non-work related injuries

Table 3: FY20 Safety Performance

For further information on MRL's historical injury rate performance, as well as for frequency rates calculated on 200,000 hours worked, refer to the Performance Data Tables in the MRL 2020 Sustainability Report.

PEOPLE

We are committed to creating a fair, diverse and inclusive workplace that supports us in attracting and retaining talent.

Our people are the foundation of our business and instrumental in our success. As at 30 June 2020, we had 2,347 employees⁹. It is critical that we are able to identify, attract and retain the right people in the right roles to help us meet our business objectives.

While employee attraction and recruitment are important, retaining talent is crucial to the success of our business. Our Human Resources team works to build organisational capability by ensuring that our people are fairly treated and have access to career development opportunities.

In FY20, we undertook a number of initiatives to promote employee attraction and retention, including:

- Launching the 'MRL Be Different' campaign across social media and recruitment sites
- Attending and sponsoring several career development events
- Strengthening our apprenticeship programme and continuing our partnership with the Kwinana Industries Council (KIC)
- Developing an entry level dump truck operator training programme and supporting the upskilling of Light Vehicle Mechanics to Heavy Diesel Fitters
- Amending some of our mining rosters to be more family friendly
- Reviewing remuneration to ensure that we remain competitive in the market
- Enhancing talent management and succession planning
- Monitoring employee terminations and using feedback to inform employee retention initiatives.

We also developed a series of COVID-19 related retention initiatives, including:

- Screening all employees, contractors and visitors for COVID-19 before allowing entrance to our sites, as well as offering COVID-19 screening for all non-site based employees and their families
- Offering a monetary bonus and additional leave entitlements to all employees who worked a 4/2 roster during the lockdown of COVID-19
- Supporting all interstate employees who travelled to WA for an extended period due to the border closure, through accommodation and meal allowances during rest and recreation periods
- Offering financial assistance to interstate employees and their families who are willing to relocate to WA indefinitely.

We understand that developing a diverse, inclusive and non-discriminatory workplace brings many benefits to our business including improved organisational performance as well as positive impacts on organisational culture, reputation, employee attraction and retention. Our Diversity and Inclusion Committee steers our activities, with FY20 seeing the update of our Diversity and Inclusion Policy and a new Board approved target for overall female representation.

As at 30 June 2020, 15.4 per cent of MRL's workforce identified as female, which is slightly under our Board approved target and the resource industry average of 16.1 per cent¹⁰. Our Board of Directors as at 30 June 2020 includes four male members (80 per cent) and one (20 per cent) female member. Table 4 shows our overall female representation for the past three years.

	As at 30 June 2018	As at 30 June 2019	As at 30 June 2020	Industry average
Overall Female Representation	14.8%	13.2%	15.4%	16.1%

Table 4: Overall female representation

While the overall MRL female representation is just short of the industry average, the following business units exceeded the industry averages for overall female representation as at 30 June 2020:

- Corporate services: 42.1 per cent female representation
- Transport and Site Services: 23.4 per cent female representation
- Commodities: 17.9 per cent female representation.

Refer to the MRL 2020 Sustainability Report for more information about our diversity and inclusion performance based on age, gender and Indigenous representation using the Workplace Gender Equality Agency (WGEA) employee categories.

⁹ This figure does not include contractors or Non-Executive Directors.

¹⁰ In line with the 2019 Workplace Gender Equality Agency (WGEA) average female representation in the Metal Ore Mining Industry for organisations with 1000-4999 employees.

ENVIRONMENT

We are committed to environmental management that maintains our licence to operate in an environmentally responsible and sustainable manner.

Environmental management is an essential part of maintaining our social licence to operate. We adopt a systematic approach to mitigate risk and identify management strategies to ensure that our operations do not result in unacceptable environmental impacts.

In FY20, we updated the MRL Environment Policy, which covers emissions to air and water, operational Greenhouse Gas (GHG) emissions, water use, waste generation, biodiversity, land management and rehabilitation. We implement our Environmental Policy through our Environmental Management System (EMS), which aligns with the ISO 14001:2015 - Environmental Management Systems standard.

Air Quality

During the course of our operations, we operate equipment and undertake activities such as drilling, blasting, haulage and transportation, which generate dust and other air emissions. We reduce and suppress dust through the use of water carts on high traffic areas, roads and tracks, sprinkler systems at crushing transfer points, site-specific traffic management plans and posted speed limits. We have disclosed historical air quality emissions data in the MRL 2020 Sustainability Report.

Water

Water is a key input into our operations. We use water for dust suppression, domestic use in our camps and offices, washing vehicles and infrastructure, as well as in the spodumene concentrate beneficiation plants at our Wodgina and Mt Marion lithium operations. MRL operates in the Pilbara and Yilgarn regions of Western Australia, which have varying climatic conditions and water risks. The World Resources Institute (WRI) 2019 Aqueduct Water Risk Atlas provides an indication of overall water risk¹¹ in the location of our operations.

Region	Operation	WRI Aqueduct Water Risks Atlas overall water risk rating ¹
Yilgarn	Koolyanobbing iron ore	High
	Mt Marion lithium	High
Pilbara	Iron Valley iron ore	Medium-high
	Wodgina lithium	Extremely high

¹ Based on the World Resources Institute (WRI) 2019 Aqueduct Water Risk Atlas, an open data tool available for use under the Creative Commons Attribution International 4.0 Licence.

Table 5: WRI Aqueduct overall risk rating

The management of water is a key focus for MRL and we continue to develop and enhance our risk mitigation strategies. We abstract groundwater at all of our operations, which often has to be treated before use. We have reported historical groundwater abstraction data for the first time this year in Table 6.

	FY18 (KL)	FY19 (KL)	FY20 (KL)
Mt Marion	281,865	2,279,694	1,512,176
Koolyanobbing	-	673,210	878,842
Iron Valley	14,281	15,709	25,363
Wodgina	751,914	1,191,100	500,865
Total	1,048,060	4,159,713	2,917,246

Table 6: FY18 - FY20 Groundwater abstraction data per site

¹¹ Overall water risk measures all water-related risks, by aggregating all selected indicators from the Physical Quantity, Quality and Regulatory & Reputational Risk categories. Higher values indicate higher water risk.

Waste and Tailings

During the course of our operations, we generate non-mineral waste as well as mining-related waste streams in the form of waste rock and tailings.

During FY20, MRL had two active Tailings Storage Facilities (TSFs):

- Wodgina TSF3E, a landform TSF located at the Wodgina operation
- Mt Marion GCB, in-pit tails located at the Mt Marion operation.

Our TSFs are planned, designed, constructed, operated, maintained and decommissioned in a safe and compliant manner, consistent with regulatory requirements and applicable guidelines and standards. At our Mt Marion operations, we have added a solids extraction process to dry stack more than 60 per cent of the total tailings. This has reduced the operational water footprint by significantly reducing the amount of water associated with overall tailings disposal. These in-pit tails represent a reduced environmental risk, when compared to a TSF, as they have a lower risk of failure and are easier to rehabilitate and close.

We have disclosed our tailings waste data for the first time this year in Table 7.

Operation	FY18 (Tonnes)	FY19 (Tonnes)	FY20 (Tonnes)
Mt Marion	508,132	736,563	935,020
Wodgina ¹	-	131,591	414,879
Total	508,132	868,154	1,349,899

¹ No tailings generated at Wodgina operation in FY18

Table 7: FY18-FY 20 Tailings waste (tonnes) for Mt Marion and Wodgina operations

Biodiversity and land management

Biodiversity, land management and rehabilitation are important parts of responsible mining across the life of a mining operation. Table 8 provides a summary of land disturbance and rehabilitation information for FY19 and FY20, consolidated for all MRL tenements, as reported to the Mining Rehabilitation Fund.

	Land disturbed (ha)		Land under rehabilitation (ha)	
Operation	FY19	FY20	FY19	FY20
Mt Marion	573	628	-	33
Koolyanobbing	2,378	2,484	463	507
Iron Valley	468	494	3	3
Wodgina	938	1,228	119	152
Total	4,357	4,835	585	695

Table 8: FY19-FY20 Total land disturbed and under rehabilitation (ha)

All of our sites have Mine Closure Plans to ensure that mining operations are closed, decommissioned and rehabilitated in an ecologically sustainable manner.

CLIMATE CHANGE

We are committed to understanding and managing our climate-related obligations, risks and opportunities as we operate within an increasingly carbon-constrained and changing climate.

It is clear that changes in climate patterns incur costs to business through impacts on physical assets, business continuity and supply chain resilience. There is a growing expectation from investors and stakeholders that companies understand and manage the climate-related risks and opportunities that affect their business.

This year we have taken the first step on our Taskforce on Climate-Related Financial Disclosures (TCFD) journey by engaging an independent professional services firm, KPMG, to undertake an assessment of our alignment to the TCFD recommendations and to facilitate a process to identify and assess our key climate-related risks and opportunities. This process involved the assessment of two future scenarios, which describe a combination of possible future physical and socioeconomic impacts to which MRL may be exposed.

The top climate-related risk in terms of overall risk rating is associated with cost of capital. As the global economy seeks to address climate change, there is a risk that organisations unable to manage climate risk and decarbonise will be subject to increased costs of capital as investors and financial organisations seek to manage climate risk within their portfolio. Other key risks relate to natural gas exploration and development, government and regulatory expectation, emission intensive resources, carbon pricing and physical risks associated with extreme acute events.

The top climate-related opportunity relates to energy source. As the focus on addressing climate change increases, emission intensive fuels, such as diesel, will be increasingly under the spotlight. The current industry reliance on diesel for remote mining operations provides a specific opportunity for the more extensive use of lower emission energy sources. This presents an opportunity for MRL to develop solutions for its own operations and customers and alternative revenue streams. Other key opportunities relate to developing innovative lower carbon mining services and infrastructure.

During FY21, MRL will develop appropriate mitigation and management strategies for our key climate-related risks and opportunities and will consider the resilience of our strategy under various scenarios to ensure that our business continues to generate and sustain value under a changing climate. Table 9 shows our FY16 to FY20 Scope 1 and 2 GHG emissions in metric tonnes of CO₂ equivalent.

Our progress against the recommended TCFD climate disclosures is shown in the MRL 2020 Sustainability Report.

	FY16	FY17	FY18	FY19 ¹	FY20 ¹
Scope 1 (tCO ₂ e)	108,427	181,475	215,726	218,432	270,278
Scope 2 (tCO ₂ e)	1,898	3,007	2,222	2,373	1,917
Total (tCO ₂ e)	110,325	184,482	217,948	220,805	272,194

¹ GHG emissions may be materially lower for FY19 by 11 per cent and FY20 by 16 per cent as the legal position relating to the delineation for inclusion or exclusion of rail operator emissions has not yet been clearly defined, as at the date of reporting.

Table 9: FY16 - FY20 Scope 1 and 2 GHG emissions

Our GHG emissions are directly related to our energy use and growth of our operations. Between FY19 and FY20, our total energy consumption increased by 22 per cent, largely driven by a 30 per cent increase in our diesel consumption and 53 per cent increase in TMM.

While our absolute GHG emissions continue to increase as our business grows, we are actively working on reducing the GHG emissions intensity of our operations. For the first time, we have assessed the GHG emissions intensity of our operations per TMM¹² shown in Table 10. From FY19 to FY20, there has been a 19 per cent reduction in our GHG emissions intensity.

	FY19	FY120	Change
GHG intensity ¹ : tCO ₂ e/ TMM (wet metric kt)	3.6	2.9	Year on year reduction of 19 per cent

¹ The GHG emissions included in the intensity metrics are Total Scope 1 and 2 GHG emissions, which include the greenhouse gases CO₂, CH₄, N₂O and SF₆.

Table 10: FY19 and FY20 carbon intensity of our operations (tCO₂e/TMM)

MRL continues to invest in activities that reduce the carbon intensity of its operations. We have developed a three-stage Energy Roadmap, which progressively incorporates gas, LNG, renewable energy technologies and other emerging technologies over time, to reduce our carbon intensity.

Gas will be an important part of our short-term decarbonisation efforts. MRL's Energy team is working on the development of low-cost and secure gas solutions to support the growth and development of MRL and the broader resource industry in Western Australia. Renewable energy technologies, such as solar and wind generated electricity, will become an increasingly significant part of our energy mix going forward.

Batteries are a significant part of the low-carbon global energy transition as they are critical for storing excess energy in renewable grid technologies and in the electrification of transport and industry. MRL plays an important part in the battery value chain through its lithium assets and will continue to look for opportunities to develop innovative and lower-carbon mining services and infrastructure as part of the transition to a lower carbon economy.

SOCIAL

We strive to develop and maintain strong community and stakeholder relationships as part of our social licence to operate.

An important part of our social licence to operate is the value that we create for society, which we do through developing strong community and stakeholder relationships, and creating opportunities for skills development.

In FY20, we developed a new stand-alone Community Policy, where we outlined our commitment to building sustainable partnerships with business partners, governments, non-government organisations, host communities and other stakeholders to support mutually beneficial outcomes.

We also developed a MRL Stakeholder Engagement Management Plan to ensure that we engage effectively with local communities, government and other key stakeholders on environmental, land access, heritage and community matters during all phases of our operations.

Heritage and Indigenous Participation

The Joint Standing Committee on Northern Australia's inquiry into the destruction of the Juukan Gorge rock shelters highlights the critical importance of managing Australia's Indigenous heritage. MRL has a dedicated Communities and Stakeholder Engagement team that manages our engagement with local communities, pastoralists, private landowners, Traditional Owner groups and local government as part of tenement applications, regulatory approval processes and our ongoing operations.

Our Heritage team carries out heritage surveys across our operations in alignment with the individual heritage agreements with Traditional Owner groups and within the guidelines of the *Aboriginal Heritage Act (1972)*. These surveys inform the location and design of our activities to avoid damaging areas of heritage significance.

MRL has several agreements with Traditional Owners, which include a range of obligations such as heritage protocols, employment and business opportunities, community engagement, cultural awareness training, health and education initiatives, and work-ready programmes. Regular meetings are held with Traditional Owner groups during the year and we are looking to develop further community programmes moving forward. We are actively seeking to increase Indigenous participation in the business through our apprentice, trainee and graduate programmes as well as through Indigenous business opportunities.

Community Contributions

We support communities through voluntary financial contributions that have a positive community benefit. We have four categories of community contributions, namely:

- Community partnerships - multi-year commitments that focus on creating positive health, wellbeing, educational and employment outcomes. During FY20, we had partnerships in place with Shooting Stars, Youth Focus, Starlight Children's Foundation, Lucy Saw Centre, Harry Perkins Institute of Medical Research, Telethon 7 and Ronald McDonald House Charities
- Community donations to charity fundraisers and not-for-profit organisations
- Community education support through contributions to primary and high schools
- Contributions to community facilities and events.

In FY20, we contributed \$2.6 million to communities, a 30 per cent increase from FY19. Figure 4 shows our community contributions since FY16.

Figure 4: Community contributions (\$ million)

Skills Development

MRL offers apprenticeships, traineeships and a graduate programme that focus on introducing new talent to the organisation. MRL also provides work experience opportunities and actively promotes careers in the mining industry.

MRL increased its FY20 intake of apprentices to bring the total number of apprentices across the business to 34, a 48 per cent increase compared to FY19. We also attracted a record number of second-generation MRL employees, with 13 second-generation employee apprentices joining our programme this year. The diversity of our apprentices has also improved. FY20's apprentice intake included:

- Three female apprentices, up from zero in FY18 and FY19
- Two Indigenous apprentices.

In addition to our apprentice programme, MRL offers 12-month trainee programmes with Registered Training Organisations and graduate programmes. During FY20, the Company recruited:

- Five trainees¹³, four of which (80 per cent) identify as female
- Six graduates to partake in a 24-month, internally developed and assessed, structured graduate programme across the disciplines of finance, geology, electrical engineering, mechanical engineering, mining engineering and instrumentation and controls engineering.

Promoting careers in the mining industry

During FY20, we continued our relationship with the KIC through:

- Providing work experience rotations at our Kwinana Workshop for Year 11 and 12 students participating in the Metals & Engineering School-based Traineeship
- Providing Year 11 KIC Metals and Engineering School-based trainees their own toolboxes
- Sponsoring the 2020 'iWomen Projects', which provide awareness of career opportunities in the mining sector to Year 10 female students from KIC collaborating schools in the region.

¹³ This excludes the two intakes of the Entry Level Operator Training Programme.

ANNUAL FINANCIAL REPORT

GENERAL INFORMATION

The financial statements cover Mineral Resources Limited as a group consisting of Mineral Resources Limited (the 'Company' or 'Parent Entity') and the entities it controlled at the end of, or during, the year (the 'Group'). The financial statements are presented in Australian dollars, which is the Group's functional and presentation currency.

Mineral Resources Limited is a listed public company limited by shares, incorporated and domiciled in Australia. Its registered office and principal place of business is:

1 Sleat Road
Applecross WA 6153

The financial statements were authorised for issue, in accordance with a resolution of directors, on 19 August 2020.

DIRECTORS’ REPORT

The Directors present their report, together with the financial statements, for the Group for the financial year ended 30 June 2020.

DIRECTORS

The following persons were Directors of Mineral Resources Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Peter Wade
Chris Ellison
Kelvin Flynn
James McClements
Xi Xi

The remuneration of Directors and Key Management Personnel are detailed in the Remuneration Report, which forms part of the Directors’ Report, on pages 48 to 72.

PRINCIPAL ACTIVITIES AND REVIEW OF OPERATIONS

During the financial year, the principal continuing activities of the Group consisted of the integrated supply of goods and services to the resources sector.

The overview of the Group's operations, and a review of the operational performance, financial performance and cash and capital management are contained in the following sections of the Annual Report: Overview on pages 7 to 12, Operational Review on pages 16 to 26 and Financial Review on pages 28 to 30.

DIVIDENDS

Dividends paid during the financial year were as follows:

	Cents	Franked %	\$’000
2020 Financial Year final dividend – declared 19 August 2020	77.00	100%	144.6
2020 Financial Year interim dividend – paid 26 March 2020	23.00	100%	43.4
2019 Financial Year final dividend – paid 4 October 2019	31.00	100%	58.1
2019 Financial Year interim dividend – paid 17 April 2019	13.00	100%	24.4

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

There were no significant changes in the state of affairs of the Group during the financial year.

MATTERS SUBSEQUENT TO THE END OF THE FINANCIAL YEAR

The following significant events have arisen since the end of the financial year

Dividend

On 19 August 2020, the Directors declared a final fully franked dividend for the year ended 30 June 2020 of 77.0 cents per share to be paid on 15 September 2020, a total estimated distribution of \$144.6 million based on the number of ordinary shares on issue as at 26 August 2020.

Purchase of corporate headquarters

On 30 July 2020, the Group executed a contract for the sale and purchase of land and buildings intended for the Group's new corporate headquarters in Osborne Park approximating \$65.0 million inclusive of purchase price, duty and other transactional costs.

Subsequent to the reporting date, the Group terminated the lease agreement for corporate headquarters in Subiaco, which has been recognised as a right-of-use asset with a corresponding lease liability on the balance sheet as at 30 June 2020. The parties are in dispute over the termination. Given the proximity of the matter to the reporting date, the legal costs or potential claims cannot be reliably estimated as at the date of this report.

COVID-19 pandemic

The impact of the COVID-19 pandemic is ongoing and has not had a material impact for the Group's operations during the year ended 30 June 2020. It is not practicable to estimate the potential impact, positive or negative, after the reporting date. The challenges presented by COVID-19 are fluid and continue to change. The Group will continue to assess and update the Group's response to the COVID-19 pandemic.

No other matter or circumstance has arisen since 30 June 2020 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

Information on likely developments in the operations of the Group and the expected results of operations have not been included in this Report as the Directors believe it would be likely to result in unreasonable prejudice to the Group.

ENVIRONMENTAL REGULATION

The Group is subject to environmental regulation of its operations, including exploration and mining activities. The Directors are not aware of any significant known breaches of environmental regulations to which the Group is subject.

The Group is registered under the *National Greenhouse and Energy Reporting Act 2007*, under which it is required to report annual energy consumption and greenhouse gas emissions for its Australian facilities. The Group has systems and processes in place for the collection and calculation of associated data. Further information on the reporting and results under the Act can be found on the Group's website.

DIRECTOR'S REPORT (CONTINUED)

INFORMATION ON DIRECTORS

PETER WADE

Title: Non-Executive Chairman
Appointment: 27 February 2006
Qualifications: BE (Hons) LGE

Experience and expertise: Peter has over 46 years of experience in engineering, construction, project management, mining and infrastructure services. He started his career with the NSW Public Service managing the construction of significant infrastructure projects in NSW including the Port Kembla coal loader and the grain terminals at Newcastle and Wollongong and was also the Deputy Director for the Darling Harbour Redevelopment construction project.

Following his period of employment with the NSW Public Service, Peter joined the executive team of the Transfield Group. Throughout the 1980s and 1990s he was General Manager of Sabemo Pty Ltd, Transfield Construction Pty Ltd, and Transfield Power Technologies and subsequently became Transfield Chief Operations Officer (Southern). During this period Peter was responsible for significant build, own, operate projects including the Melbourne City Link, the Airport Link, the Northside Storage Tunnel and the Collinsville and Smithfield Power Plants.

Peter became Managing Director of Crushing Services International Pty Ltd and PIHA Pty Ltd in 1999, and subsequently Process Minerals International Pty Ltd in 2002 (now wholly owned subsidiaries of Mineral Resources Limited). He managed the companies through a sustained period of growth and development prior to the formation and listing of Mineral Resources Limited in 2006 at which time he was appointed Managing Director of the Group. He was subsequently appointed Executive Chairman in 2008 and Non-Executive Chairman in 2012.

Other current directorships: None
Former directorships (last 3 years): SRG Global Limited (ASX: SRG) (ceased 26 November 2019)
Special responsibilities: Chairman of Board of Directors
Interests in shares: 344,710
Interests in rights: None
Interests in options: None

CHRIS ELLISON

Title: Managing Director
Appointment: 27 February 2006

Experience and expertise: Chris is the founding shareholder of each of the three original subsidiary companies of Mineral Resources Limited (Crushing Services International Pty Ltd, PIHA Pty Ltd and Process Minerals International Pty Ltd) and has over 36 years of experience in the mining contracting, engineering and resource processing industries. In 1979, Chris founded Karratha Rigging and was Managing Director until its acquisition by Walter Wright Industries in 1982. Chris was subsequently appointed as the General Manager, Walter Wright Industries for the Western Australia and Northern Territory regions.

In 1986, Chris founded Genco Ltd and following two years of considerable growth, Genco Ltd merged with the Monadelphous Group in 1988. In September 1988, receivers and managers were appointed to the Monadelphous Group. At this time, Chris was appointed the Managing Director and under his careful management, Monadelphous Group successfully traded out of its financial difficulties and eventually relisted on the ASX in late 1989. In 1992, Chris founded PIHA Pty Ltd, a company focused on the provision of specialised pipe lining and general infrastructure.

Other current directorships: None
Former directorships (last 3 years): None
Special responsibilities: Managing Director
Interests in shares: 22,191,729
Interests in rights: 425,910
Interests in options: None

KELVIN FLYNN

Title: Independent Non-Executive Director
Appointment: 22 March 2010
Qualifications: B Com, CA

Experience and expertise: Kelvin is a qualified Chartered Accountant with over 29 years’ experience in investment banking and corporate advisory roles, including private equity and special situations investments in the mining and resources sector. He has held various leadership positions in Australia and Asia, having previously held the position of Executive Director/Vice President with Goldman Sachs and Managing Director of Alvarez & Marsal in Asia. He has worked in complex financial workouts, turnaround advisory and interim management.

Kelvin is the Managing Director of the specialist alternative funds manager Harvis, which focuses on investments and financing in the real estate and real assets sectors. Kelvin is currently a Director of privately held Global Advanced Metals Pty Ltd and a Non-Executive Director of Silver Lake Resources Limited.

Other current directorships: Silver Lake Resources Limited (ASX: SLR)
Former directorships (last 3 years): None
Special responsibilities: Chair of Audit Committee, Member of Nomination Committee, Member of Remuneration Committee
Interests in shares: 15,987
Interests in rights: None
Interests in options: None

INFORMATION ON DIRECTORS (CONTINUED)

JAMES MCCLEMENTS

Title: Lead Independent Non-Executive Director
Appointment: 29 May 2015
Qualifications: B Econ (Hons)
Experience and expertise: James has 35 years’ experience in the mining industry as a banker and fund manager financing projects globally. He was raised and educated in the Pilbara region of Western Australia and began his professional career with BHP Limited before joining Standard Chartered Bank in Perth and N.M. Rothschild & Sons in Sydney then Denver. James also spent 11 years in the USA and co-founded Resource Capital Funds during that time. James is currently the Managing Partner of Resource Capital Funds (RCF) and has extensive Board experience having served as a Director of 12 RCF portfolio companies.
Other current directorships: None
Former directorships (last 3 years): None
Special Responsibilities: Member of Audit Committee, Member of Nomination Committee, Chair of Remuneration Committee
Interests in shares: 15,987
Interests in rights: None
Interests in options: None

XI XI

Title: Independent Non-Executive Director
Appointment: 11 September 2017
Qualifications: MAIR, BS. CPR
Experience and expertise: Xi Xi has extensive experience in the global natural resources sector having served as a director of Sailing Capital, a US\$2 billion private equity fund founded by the Shanghai International Group in 2012. She has worked with numerous Chinese state owned and privately owned enterprises, advising on international acquisitions and investments overseas. Xi Xi has previously served as an analyst and portfolio manager for the Tigris Financial Group in New York, focused in the oil and gas and mining sector. Xi Xi currently serves as a non-executive director of Zeta Resources, a closed-end investment company with a broad portfolio of oil and gas, as well as mining assets.
Xi Xi has an MA in International Relations (China Studies & International Finance) from Johns Hopkins University, and holds a double BS in Chemical Engineering & Petroleum Refining, as well as Economics, from the Colorado School of Mines.
Other current directorships: None
Former directorships (last 3 years): Galaxy Resources Limited (ceased 11 September 2017)
Special responsibilities: Chair of Nomination Committee
Interests in shares: 14,607
Interests in rights: None
Interests in options: None

‘Other current directorships’ quoted above are current directorships for listed entities only and excludes directorships of all other types of entities, unless otherwise stated.

‘Former directorships (in the last 3 years)’ quoted above are directorships held in the last 3 years only for listed entities and excludes directorships of all other types of entities, unless otherwise stated.

‘Interest in shares’ quoted above are as at the date of this report.

COMPANY SECRETARIES

MARK WILSON joined Mineral Resources Limited as Chief Financial Officer in August 2018. Mark is an experienced senior executive with a strong track record in development and implementation of business strategy, balance sheet management, organisational design, project management, and transaction execution. Mark has held senior positions in a number of Australian and international companies, including Laing O’Rourke, Multiplex and Brookfield Multiplex, where he led Multiplex’s listing on the ASX. Mark holds a Bachelor of Commerce (Finance) and Bachelor of Laws from the University of New South Wales, and has a Graduate Diploma in Applied Finance and Investment from the Securities Institute of Australia (FINSIA).

DEREK OELOFSE has over 35 years financial and commercial management experience in large private, governmental and listed entities based within Australia, South Africa and the United Kingdom. Derek has a Bachelor of Accounting and Bachelor of Commerce degree from the University of the Witwatersrand in South Africa, a Master of Business Administration from Henley Management College in the United Kingdom, and is a Fellow of the Institute of Chartered Accountants Australia and New Zealand. Derek joined Mineral Resources Limited in 2012 as Group Financial Controller and was appointed joint Company Secretary on 4 October 2018.

MEETINGS OF DIRECTORS

The number of meetings of the Company’s Board of Directors (the Board) and of each Board committee held during the year ended 30 June 2020, and the number of meetings attended by each director while they were a member of the Board/committee were:

	Full Board		Audit Committee		Remuneration Committee		Nomination Committee	
	Attended	Held	Attended	Held	Attended	Held	Attended	Held
Peter Wade	14	15	n/a	n/a	3*	6	n/a	n/a
Chris Ellison	15	15	n/a	n/a	n/a	n/a	n/a	n/a
Kelvin Flynn	15	15	2	2	6	6	2	2
James McClements	15	15	2	2	6	6	2	2
Xi Xi	14	15	n/a	n/a	n/a	n/a	2	2

* A third member is currently being sought as part of the review of the Board composition, with the Chairman, Peter Wade, assisting as a member of the Committee in the interim

INDEMNITY AND INSURANCE OF OFFICERS

The Company has indemnified the Directors and executives of the Company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the Company paid a premium in respect of a contract to insure the Directors and executives of the Company against a liability to the extent permitted by the *Corporations Act 2001*. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

INDEMNITY AND INSURANCE OF AUDITOR

The Company has not, during or since the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

PROCEEDINGS ON BEHALF OF THE COMPANY

No person has applied to the Court under section 237 of the *Corporations Act 2001* for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

NON-AUDIT SERVICES

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 35 to the financial statements.

The Directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor’s behalf), is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*.

The Directors are of the opinion that the services as disclosed in note 35 to the financial statements do not compromise the external auditor’s independence requirements of the *Corporations Act 2001* for the following reasons:

- all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 *Code of Ethics for Professional Accountants* issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor’s own work, acting in a management or decision-making capacity for the Company, acting as advocate for the Company or jointly sharing economic risks and rewards.

OFFICERS OF THE COMPANY WHO ARE FORMER PARTNERS OF RSM AUSTRALIA PARTNERS

There are no officers of the Company who are former partners of RSM Australia Partners.

ROUNDING OF AMOUNTS

The Company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to ‘rounding-off’. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest hundred thousand dollars, unless otherwise stated.

AUDITOR'S INDEPENDENCE DECLARATION

A copy of the auditor’s independence declaration as required under section 307C of the *Corporations Act 2001* is set out immediately after this Directors’ report.

AUDITOR

RSM Australia Partners continues in office in accordance with section 327 of the *Corporations Act 2001*.

This report is made in accordance with a resolution of Directors, pursuant to section 298(2)(a) of the *Corporations Act 2001*.

On behalf of the Directors

Chris Ellison
Managing Director

19 August 2020
Perth

REMUNERATION REPORT

REMUNERATION REPORT

LETTER FROM THE RENUMERATION
COMMITEE CHAIR

Dear Shareholder,

I am pleased to present the 2020 Financial Year (FY20) Remuneration Report (Remuneration report) for Mineral Resources Limited (MRL or the Company) on behalf of the Remuneration Committee (the Committee). The Committee was pleased with shareholder support for our 2019 Financial Year (FY19) Remuneration report. We have sought to build on that support, and implemented the changes for FY20 that were outlined in the FY19 Remuneration Report. No further changes, other than those outlined in the FY19 Remuneration report, were implemented in FY20.

FY20 has been the most successful year in the Company's history. The year saw record iron ore shipments, successful completion of the disposal of 60 per cent of Wodgina leading to the formation of the MARBL Lithium Joint Venture with Albemarle, significant progress made on our growth plans for iron ore in the Pilbara region, and record lithium spodumene production from Mt Marion. Most notably, however, the Company has continued to strengthen its unique identity and culture whilst successfully navigating the early stages of the COVID-19 pandemic.

The Committee is particularly pleased with the Company's response to the COVID-19 pandemic. The Company moved very quickly in response to the pandemic; it determined the importance of ensuring its sites remained virus-free, as far as possible, by testing all staff prior to mobilisation to site, and quickly secured molecular-level PCR gold standard testing equipment capable of conducting approximately 8,000 tests per day. It also secured the delivery of scarce reagents and testing kits accredited by the Therapeutic Goods Administration, and for the equipment to be installed in two accredited laboratories in Perth. It established collection facilities in seven locations around Western Australia. These measures enabled the Company to maintain employment levels during the pandemic and avoid any forced reductions as a result of the pandemic.

By taking these and other steps, the Company was able to ensure the risk of interruption to production was minimised as far as possible. In addition, the Company was also able to offer the testing service to others in the WA resource industry at cost, and in doing so the Company played a key role in enabling the resource industry in Western Australia to continue with minimal disruption over this period. Importantly, after an initial short stint of extended shifts, rosters were able to return to normal, further minimising the disruption to family life for its employees.

During the early stages of the pandemic, the Company took a number of additional steps to address the physical and mental health of its workers, and has since worked to continue the significant progress made to date.

FY20 changes have been made while remaining cognisant of a very competitive executive labour market within the Western Australian resources industry.

CHANGES TO MANAGING DIRECTOR
REMUNERATION

As noted in the FY19 Remuneration Report, the Managing Director agreed to reduce his Fixed Annual Remuneration (FAR) to \$1.2 million in FY20 from \$1.5 million in FY19. The result has been a net reduction in his realisable remuneration despite the ongoing strategic and financial success of the Company.

The Managing Director's FAR is now close to the median of the Comparator Businesses selected by the Committee, rather than at the 75th percentile, with more remuneration 'at risk' and able to be earned only through performance (see Section 3.3 for further detail on the Comparator Businesses). To ensure the Comparator Businesses remain relevant for remuneration comparison purposes the Remuneration Committee reviewed its composition again in FY20, removing two companies, at the bottom and top end of the target filter range (revenue and enterprise value) and adding two others that fit more closely within the target filter range. Details of the revised Comparator Businesses are included in the body of the report.

In addition to the change in his FAR, the Company identified that the Managing Director's Short Term Incentive (STI) opportunity in FY19 was well below that offered at Comparator Businesses. As advised in the FY19 Remuneration Report, in FY20 the STI opportunity for the Managing Director was increased from 50 per cent to 100 per cent of FAR, with any amounts declared under the STI programme above 50 per cent of FAR settled in equity over the following two years (FY21 and FY22) subject to ongoing service and malus. The Managing Director's STI Key Performance Indicators (KPIs) have also been reweighted such that financial KPI weights have almost doubled, to 40 per cent of scorecard outcomes, up from 25 per cent.

CHANGES TO DIVISIONAL REPORTING
STRUCTURES

To ensure we have the right level of focus to execute the large growth opportunities that lie ahead of us, we have changed the operating structure of MRL, aligning a Chief Executive with each of our core operating segments; Mining Services and Commodities. Mike Grey has been appointed Chief Executive, Mining Services, and Paul Brown has been appointed Chief Executive, Commodities.

Mike's responsibilities cover the full scope of the Company's mining services, including CSI, Construction, PMI and Energy. In addition, Mike has responsibility for business development, focusing on ensuring we successfully deliver the major new resources projects currently under development.

Paul Brown has been appointed Chief Executive, Commodities, reporting to the Managing Director. Paul will continue the focus that he has had on the safe and profitable operations of all of our mines over a number of years, and has also assumed responsibility for Health and Safety and Project Services (Exploration, Evaluation and Tenement Management) across the Group. Paul will oversee our planned mining operations expansion and growth, including opening up new mining areas in FY21 in the Pilbara and the Yilgarn.

CHANGES TO DIVISIONAL CHIEF EXECUTIVE
AND CHIEF FINANCIAL OFFICER SHORT TERM
INCENTIVES (STI)

The Company identified that the level of STI opportunity offered to the Divisional Chief Executives and Chief Financial Officer in FY19 was well below the average offered at Comparator Businesses. As advised in the FY19 Remuneration Report, in FY20 the STI opportunity for KMP was increased from 40 per cent to 80 per cent of FAR. In addition, any amounts declared under the STI programme above 40 per cent of FAR for the Divisional Chief Executives and Chief Financial Officer is settled in equity over the following two years (FY21 and FY22) subject to ongoing service and malus.

Combined, these changes mean all KMP had a greater proportion of 'at-risk' pay as part of their total remuneration opportunity, delivered for alignment with shareholder interests, and accompanied by governance mechanisms for enhanced risk management and retention.

CHANGES TO LONG TERM INCENTIVE (LTI)
ARRANGEMENTS

As noted in the FY19 Remuneration Report, we have simplified the LTI plan while maintaining a focus on longer term, sustainable Return on Invested Capital (ROIC). We feel it is important to highlight that we measure ROIC on a post-tax basis, and the 12 per cent ROIC hurdle is materially above the Company's nominal post-tax Weighted Average Cost of Capital (WACC).

After a review of alternative structures, the Company implemented the changes it outlined in the FY19 Remuneration Report, with the adoption of a new scheme. The new scheme sees grants made to participants annually that will vest after four years, subject to the Company's average ROIC exceeding the 12 per cent hurdle through that period. At 12 per cent to 18 per cent the ROIC hurdle rates remain unchanged, recognising that rate reflects a long term requirement to achieve a sustainable return through commodity cycles. While the outstanding results achieved in FY20 are expected to underpin the average ROIC over the next few financial years, they represent an outcome of strategies implemented and executed over a number of years, and are an outcome of the innovative culture of this business.

FY20 OUTCOMES AND ALIGNMENT

FY20 has been an exceptional year for the Company, with a record result for shareholders. The result is all the more exceptional given it was delivered despite the unprecedented business conditions created by the COVID19 pandemic. Due to the actions of management, Mineral Resources was able to not only maintain operations and continue to meet customer expectations, but the Company was also able to offer vital assistance to others in our sector to ensure production and delivery to end-customers continued unabated. In a period where redundancies and job uncertainty has been widespread, not one Mineral Resources position has been made redundant, indeed the Company had been able to expand its workforce over the past six months.

In such circumstances, the Committee is pleased that the incentive program in place have assisted in delivering outstanding results for Shareholders.

Consistent with the design of the STI programme, a significant portion of rewards will be deferred and settled in equity to further align management and shareholder interests. Further detail of these outcomes can be found in Section 5 of the Remuneration Report.

In addition to the deferral and settlement via equity of a major portion of the STI plan, the majority of at-risk rewards available under the Company's remuneration

structure arise through the LTI plan, which is based on the Company's ROIC performance. While ROIC for FY20 was an outstanding 49.6 per cent, under the LTI plan adopted in FY20, KMP's LTI will be awarded in full only if the four year average of ROIC exceeds 18 per cent, with FY20 being the first of those four years. In other words, the LTI programme will make significant rewards to managers only if strong performance persists.

With respect to LTI grants made in previous years, the significant investments made in the Company's lithium portfolio meant ROIC in FY19 was 9.7 per cent. Under the LTI plan rules in place for FY19, this result saw no LTI grant for FY19. The Company's LTI scheme for FY18 also did not vest in FY19. However, the average ROIC for FY19 and FY20 is 29.4 per cent and as a result, Tranche 1 of the FY18 LTI award, suspended due to FY19's ROIC being less than 12 per cent, now vests, along with Tranche 2 of the FY18 LTI award.

Pleasingly, while many organisations have been laying off staff and furloughing workers with the support of government grants, our Company has continued to grow, taking on 300 staff since the beginning of January 2020. This is a 15 per cent growth in the number of employees since December 2019, i.e. the worst period of the pandemic in Western Australia, with no positions made redundant as a result of the pandemic.

In conclusion, we are satisfied that the FY20 remuneration outcomes reflect and support the Company's strategic and financial performance.

Our Chairman Peter Wade, newly appointed Head of Investor Relations, James Bruce, and I met with a number of Institutional Investors and Proxy Advisors over the last few months. It was pleasing to note at these sessions the level of support that the changes to our Remuneration arrangements, outlined above, has received; this feedback is sincerely appreciated and we continue to value any further feedback you may have in this regard.

I invite you to review the full report laid out over the following pages and thank you for your interest in our Company.

Yours faithfully

A handwritten signature in dark ink, appearing to read 'James McClements'. The signature is fluid and cursive, with a prominent initial 'J'.

James McClements
Lead Independent Non-Executive Director
Chairman, Remuneration Committee

REMUNERATION REPORT CONTENTS

This Remuneration Report forms part of the Directors’ Report for the year ended 30 June 2020 and has been audited in accordance with section 300A of the *Corporations Act 2001*.

The report addresses the following key areas:

1. KEY MANAGEMENT PERSONNEL	52
2. REMUNERATION GOVERNANCE	52
3. REMUNERATION STRATEGY	52
4. REMUNERATION FRAMEWORK FOR FY20	54
5. REMUNERATION OUTCOMES FOR FY20	60
6. KEY CHANGES TO REMUNERATION FOR FY21	67
7. SUMMARY OF KMP EMPLOYMENT CONDITIONS	67
8. KMP STATUTORY REMUNERATION SCHEDULES	68
9. SHARE RIGHTS GRANTED, VESTED AND POTENTIAL FUTURE VESTING	70
10. EQUITY INSTRUMENTS HELD BY KMP	71
11. TRANSACTIONS WITH RELATED PARTIES	72

REMUNERATION REPORT

1. KEY MANAGEMENT PERSONNEL

Key Management Personnel (KMP) comprise those persons that have responsibility, authority and accountability for planning, directing and controlling the activities of the entity, directly or indirectly, including any director of that entity. In this report, a reference to an “Executive” or “Executives” is a reference to a KMP executive, including the Managing Director.

The following table outlines the KMP of the Group during the whole of FY20 and up to the date of this report, unless otherwise stated:

EXECUTIVE KMP	
Current	
Chris Ellison	Managing Director (MD)
Paul Brown	Chief Executive – Commodities
Mike Grey	Chief Executive - Mining Services
Mark Wilson	Chief Financial Officer
Former	
Rohan O’Grady	Chief Operating Officer – Mining Services (Ceased employment on 13 September 2019)

NON-EXECUTIVE KMP	
Current	
Peter Wade	Non-Executive Chairman
Kelvin Flynn	Non-Executive Director
James McClements	Lead Independent Non-Executive Director
Xi Xi	Non-Executive Director

2. REMUNERATION GOVERNANCE

2.1 REMUNERATION COMMITTEE INDEPENDENCE

The Remuneration Committee continued to be comprised solely of independent Non-Executive Directors:

- James McClements, Committee Chair
- Kelvin Flynn, Committee Member

The third position on the Remuneration Committee remains vacant following the departure last year of Tim Roberts, who has not yet been replaced on the Board. The intention is to appoint another member that will enhance the independence of the Committee and the search for the additional appointee remains underway. Until then, the Board is satisfied that the Remuneration Committee is independent and has sufficient expertise to undertake its mandate.

2.2 ROLE OF THE REMUNERATION COMMITTEE

The Remuneration Committee advises the Board on KMP remuneration by performing the following functions:

- making recommendations to the Board on remuneration structure, practices, policy and quantum for CEO, KMP, and NEDs
- determining the eligibility and vesting of long-term incentive (LTI) awards; and
- providing oversight of company diversity and gender pay equity and recommendations to the board on appropriate targets.

The Remuneration Committee convened regularly throughout FY20 and invited senior management and external consultants’ input as required. In addition, our Chairman, Head of Investor Relations, and the Chair of the Remuneration Committee conducted a number of engagements with Proxy Advisors and Institutional Investors in FY20 to assess feedback and obtain comments on their views relating to the remuneration levels and current structures.

2.3 EXTERNAL AND INDEPENDENT ADVICE

As with previous years, the Remuneration Committee engaged the services of independent external consultants to provide insights on KMP remuneration trends, regulatory and governance updates and market data.

No remuneration recommendations as defined in Section 9B of the *Corporations Act 2001* were obtained during FY20.

3. REMUNERATION STRATEGY

3.1 THE CONTEXT IN WHICH WE SET OUR REMUNERATION STRATEGY

The remuneration framework is designed to help achieve the Company’s vision to be recognised as a great Australian company that:

- is a leading provider of innovative and sustainable mining services;
- provides innovative and low-cost solutions across the mining infrastructure supply chain;
- operates with integrity and respect; and
- works in partnership with our clients, our customers, our people and our community to achieve these objectives.

To create wealth for shareholders, we task our management team with employing the capital entrusted to them to sustain attractive rates of return, that is, exceeding the long-term returns that could be achieved elsewhere at comparable levels of risk.

The Board has approved a strategy to deliver on this objective comprising:

- a core business as a mining services contractor;
- an owner and operator of mining-related infrastructure;
- an acquirer of significant profit share stakes in mineral projects with rights to operate the associated mines, for longer-term sustainability, higher capital efficiency and lower risk including from diversification;
- recycling of capital; and
- a flexible balance sheet to fund organic growth to its mining services and mining infrastructure businesses, while retaining a level of agility for opportunistic growth opportunities as they arise.

The ability to execute this strategy innovatively, sustainably and in a way that creates attractive returns for shareholders is highly dependent on the quality of MRL's culture, management and workforce.

The difficulty of attracting and retaining executives of the necessary calibre to realise the above vision and strategy varies depending on the current phase of Australia's resources industry. Presently, industry demand for executive talent is strong.

This requires the Company to have adequate and effective retention mechanisms in place (such as the newly introduced STI deferral) to ensure we maintain experienced and competent employees who are capable of innovating to promote growth that leads to attractive long-term rates of return. Mineral Resources' requirement that each of its KMP be an outperformer in terms of innovation and agile thinking, is also reflected in the low ratio between CEO and direct report fixed remuneration.

Long-term sustainable growth of the Company is promoted within the framework by the delivery of a significant portion of remuneration in equity, and equity holdings of the equivalent of at least one year's FAR for KMP, assisting in aligning the senior leadership team's interest with shareholders' interests.

3.2 REMUNERATION PRINCIPLES

The following principles guide the Company's KMP remuneration decisions:

- fairness and impartiality;
- transparency;
- promotion of a direct link between reward and performance;
- encouraging retention of key personnel over the longer term;
- alignment of employee, customer and shareholder interests;
- incentivising behaviour that optimises return on shareholder capital;
- flexibility to optimise returns via changes in investment strategy; and
- prioritisation of MRL culture and behaviours that continue to promote safety, social and environmental responsibility, innovation and risk management.

3.3 MARKET POSITION FOR REMUNERATION

The Company again conducted a review of its market position for KMP remuneration that included examination of common practice within comparable businesses, external advice and input from investors and their advisors. Changes introduced from FY20 resulted in fixed remuneration for the Managing Director targeted at the 50th percentile of comparable roles in Comparator Businesses (see below) while total remuneration, inclusive of fixed and at-risk remuneration, is targeted at the 75th percentile of Comparator Businesses.

Comparator Businesses

The Company's business model is not typical of peers in the resource sector due to its dual-pronged business operations – first in providing mining services to resources companies and secondly in the ownership and management of resource tenements. It is also unusual in the level of cash reserves it retains, along with undrawn debt facilities, which are to be quickly called on to support strategic investments that improve shareholder returns and provide long-term sustainable returns.

Therefore, in determining the amount and mix of remuneration to offer, the Board considers remuneration on offer in a broad group of ASX-listed companies of a comparable size in terms of enterprise value and revenue, with a particular focus on those in the commercial services and mining sectors (Comparator Businesses). Enterprise value provides a more complete valuation of a company than market capitalisation alone.

The list of Comparator Businesses was reviewed in FY20 to ensure it remains relevant. As a result of this review, Oceana Gold Corporation Limited and Newcrest Mining Limited were removed from the list of Comparator Businesses used in FY20, with both lying at the extremes of the Comparator Businesses from a revenue and enterprise value perspective.

In turn, Washington H. Soul Pattinson (ASX: SOL) an investment house with interests in energy, copper, gold and zinc mining and property, and NRW Holdings Ltd (ASX: NWH) a service provider to the resources and infrastructure industry sectors, have been added to the Comparator Businesses for FY20. The current Comparator Businesses therefore comprise:

ALS Limited
Evolution Mining Limited
Maca Limited
NRW Holdings Ltd
Regis Resources Limited
St Barbara Limited
Whitehaven Coal Limited
Perenti Global Limited
Iluka Resources Limited
New Hope Corporation Limited
OZ Minerals Limited
Resolute Mining Limited
Sims Limited
Worley Limited
Downer EDI Limited
IGO Limited
Northern Star Resources Limited
Qube Holdings Ltd
Saracen Mineral Holdings Limited
Washington H. Soul Pattinson

4. REMUNERATION FRAMEWORK FOR FY20

4.1 MARKET POSITION FOR REMUNERATION

The table below outlines the remuneration framework that applied in FY20.

Fixed remuneration		At-risk remuneration		
Element	Salary, superannuation & other fixed benefits	Short-Term Incentive (STI)		Long-Term Incentive (LTI)
Delivery format	Cash	Up to 40% of FAR (50% for MD) paid in cash after the financial year	Portion of award over 40% of FAR (50% for MD) deferred and awarded as Share Rights – the first half of which vest 12 months, and the second half 24 months, after grant date, subject to ongoing service and claw-back provisions	Rights will vest, subject to performance, 4 years after the grant date
Performance measures		Personal, business unit and corporate KPIs		Return on Invested Capital (ROIC)
Performance period		One year		Vesting subject to four-year average ROIC performance over the performance period (Starting 1 July in financial year of grant)
Link to MRL strategy		Serves to attract high-calibre people and motivate them to deliver on the business' immediate business objectives over a 12-month period		Recognises that we are a capital intensive business and management and shareholder wealth are created through achieving superior returns on capital deployed

The timeline below illustrates the timing of rewards under the FY20 remuneration arrangements for KMP. Details for each component are set out in section 4.3.

	FY20	FY21	FY22	FY23	FY24
FAR (Salary, superannuation & fixed benefits)	Paid throughout the year				
	Performance period (12 months)	STI less than 40% of FAR (50% for MD) paid Aug 2020. Any portion of award over 40% of FAR (50% for MD) deferred to Aug. 2021 and Aug. 2022	Half of deferred portion vests Aug. 2021, subject to ongoing service and claw-back provisions. Number of shares awarded based on value of award divided by VWAP up to and including to 30 June 2020	Half of deferred portion vests Aug 2022, subject to ongoing service and claw-back provisions. Number of shares awarded based on value of award divided by VWAP up to and including 30 June 2020	
STI					
LTI	Total Performance Period (4 years)				
	LTI rights granted July 2019. Number of shares awarded based on value of award divided by VWAP up to and including 1 July 2019				Aug 2023: Portion of LTI rights vest, subject to 4 year average ROIC and continuous service

4.2 REMUNERATION MIX

The mix of executive KMP fixed, short and long-term remuneration reflects the Company’s remuneration strategy of:

- Having substantial amounts of pay subject to service and performance so that remuneration can only be maximised by sustained high levels of performance over rolling 4-year periods.
- Rewarding strong performance by paying a significant portion in equity, to reduce cash remuneration costs, align executive and shareholder interests, and enable the enactment of malus provisions if Mineral Resources’ values of integrity and respect are not upheld.

The table below summarises the ‘on-target’ remuneration mix, with ‘on target’ being two thirds of maximum entitlement, applicable in FY20 for KMP.

* FAR for the purpose of the Remuneration Mix comprises base FAR and other long-term benefits, and excludes one-off benefits such as relocation allowances (refer to the Remuneration tables in section 8 for these details).

4.3 KEY COMPONENTS OF REMUNERATION

The tables below summarise the key components of executive KMP remuneration for FY20.

FIXED ANNUAL REWARD

Composition	Fixed Annual Reward (FAR) comprises salary, superannuation and other fixed elements of remuneration such as vehicle allowances.
Determination	Fixed remuneration is determined based on market comparisons for similar positions, taking into account the experience and skills of the manager involved.
Review	FAR is determined on appointment and reviewed annually.

SHORT-TERM INCENTIVE

The key elements of the FY20 STI plan are as follows:

Purpose	Focus participants on delivery of business objectives over a 12-month period.	
Participation	All KMP	
Opportunity	The STI opportunity is targeted at 100% of FAR for the MD and 80% for other KMP. This represents an increase from FY19, to bring executive STI opportunities in line with Comparator Businesses.	
Performance period	Performance is measured per financial year (1 July to 30 June).	
Performance measures	<p>Performance measure and link to remuneration framework:</p> <p><i>Safety, governance, ESG:</i> Safety is part of MRL’s DNA. It is how we do things, and is embedded into our systems and processes. Our continuing success depends on our people and our ability to deliver quality results safely for our customers, our shareholders and each other. Governance and ESG are critical drivers of shareholder value</p> <p><i>Strategic growth options:</i> Growth through acquisitions and transactions that maximise value creation for shareholders while maintaining a strong balance sheet</p> <p><i>Operational efficiency and performance measures:</i> MRL’s roots as a mining services contractor foster an environment focused on delivery and innovation. This culture drives industry-leading performance in efficiency and cost management</p> <p><i>Financial management and performance targets:</i> Ensuring MRL’s financial position is adequate to support the growth agenda will set MRL up for future success</p> <p><i>Organisational culture and development:</i> Providing a harmonious and nurturing environment will allow our employees to reach their full potential.</p> <p>Individual performance measures are designed to ensure alignment to business plans and to stretch levels of performance.</p> <p>The precise mix of metrics selected for each KMP is configured to ensure they are linked to and measurable against business outcomes that the KMP can influence, so that the assessment is both relevant and fair.</p>	<p>Example of metric used:</p> <p>Total Reported Injury Frequency Rate (TRIFR), Lost Time Injury Frequency Rate (LTIFR), Client feedback, Investor Feedback</p> <p>Identification and execution of investment transactions that increase MRL’s reserves or strengthen its balance sheet, and exceed the Group’s target ROIC</p> <p>Shipped tonnes and cost per tonne shipped</p> <p>NPAT, Net Cash</p> <p>Retention rate for key staff, Innovation and gender diversity</p>
Exercise of discretion	The Board has discretion, taking into account recommendations from the Remuneration Committee, to adjust overall STI awards or an individual’s final STI award. This discretion will be exercised in the case of extraordinary events, exceptional circumstances/business performance and/or individuals’ scorecard outcomes.	
Payment	For payments made in relation to FY20 onwards, awards made under the STI plan to KMP that exceed 50% of FAR for the Managing Director or 40% of FAR for other KMP, are deferred in the form of MRL shares that vest equally one and two years following the grant, subject to continued service and the application of clawback provisions. The quantity of MRL shares provided for each deferred portion is based on the deferred value for each financial year divided by the Volume Weighted Average Price for the five trading days up to and including 30 June 2020.	
Rights on termination	<p>To be eligible for payment, a participant in the STI must be employed by the Company on the date of payment and on the date at which, for amounts that exceed 50% of FAR for the Managing Director or 40% of FAR for other KMP, are deferred by way of a grant of MRL shares, subject to the application of the clawback provisions mentioned below.</p> <p>KMP whose employment is terminated before the date of payment/grant of shares for whatever reason are not eligible for any STI payment/grant of shares.</p>	
Clawback and malus policy	The Board may, at its discretion, reduce or rescind any awards made under the STI for a period of up to two years following cash payment/grant of shares in the event that it determines that the cash payment/grant of shares has been made inappropriately, including in the instance of fraud, dishonesty, breach of duties, or misstatement or manipulation of financial information.	

LONG-TERM INCENTIVE

The key elements of the FY20 LTI plan are as follows:

Purpose	To focus KMP on: <ul style="list-style-type: none">• achieving a high and sustained ROIC over the longer term, being a total of four years, including the current financial year (Grant Year)• encouraging agility and entrepreneurialism to seize opportunities for higher returns, contingent on rapid capital deployment within relatively short timeframes• alignment with shareholders’ interests through share rights that do not vest until the fourth financial year after the Grant Year.								
Payment vehicle	LTI grants provide rights to MRL shares (Rights). Subject to the Performance Measures mentioned below, Rights vest in the fourth financial year after the Grant Year. Participants have up until the fifteenth anniversary of the Grant Date (Expiry Date) to exercise Rights (convert Rights to MRL Shares) with no exercise price being payable. Any vested Rights not previously exercised are automatically exercised at the Expiry Date.								
Opportunity	The maximum LTI grant opportunity for the Managing Director is equal to 180% of FAR and up to 150% of FAR for other KMP. In absolute terms, the FY20 LTI opportunity for the MD is lower than that in FY19, due to the 20% reduction in FAR implemented at the start of the year.								
LTI grant allocation	An amount equal to the maximum LTI opportunity is granted to each LTI participant annually; being the Grant Year (e.g. FY20). Vesting takes place three full financial years after the Grant Year (e.g. following the end of FY23 for the FY20 award) subject to the Performance measure mentioned below. The number of Rights to be issued is determined using the following formula: $\text{LTI Rights issued} = (\text{FAR} \times \text{Maximum LTI Opportunity}) / \text{VWAP}$ Where ‘VWAP’ is the five-day Volume Weighted Average Price to the Grant date (in the case of the FY20 LTIP, 1 July 2019).								
Performance Period	Performance is measured over four consecutive years, being the Grant Year and the following three financial years. For grants made in FY20, the Performance Period is FY20 to FY23 inclusive, with Rights vesting in FY24.								
Performance measure	The number of Rights that vest is subject to the four-year average ROIC enjoyed by the Company over the Performance Period. The four-year average ROIC is determined as follows: $\text{Four-year average ROIC} = \text{Cumulative 4 year NOPAT} / \text{Cumulative 4 year Invested Capital}$ Further discussion of the calculation of ROIC is included in Section 4.4.								
Vesting hurdle	The amount of Rights that vest at the end of the Performance Period is determined by reference to the following hurdles: <table><thead><tr><th>4 year average ROIC achievement</th><th>% of maximum LTI opportunity</th></tr></thead><tbody><tr><td>Less than 12%</td><td>Nil</td></tr><tr><td>Between 12% and 18%</td><td>Pro-rata between 67% & 100%</td></tr><tr><td>18%+</td><td>100%</td></tr></tbody></table> The selection of 12% ROIC, being an after tax measure, as the minimum hurdle below which the LTI is zero, is materially above the Company’s nominal post-tax Weighted Average Cost of Capital and ensures that value destroying performance is not rewarded – i.e. that KMP’s focus is on achieving returns for shareholders in excess of the Company’s cost of capital.	4 year average ROIC achievement	% of maximum LTI opportunity	Less than 12%	Nil	Between 12% and 18%	Pro-rata between 67% & 100%	18%+	100%
4 year average ROIC achievement	% of maximum LTI opportunity								
Less than 12%	Nil								
Between 12% and 18%	Pro-rata between 67% & 100%								
18%+	100%								
Vesting period	All Rights vest, subject to performance and continued service, four years after the grant date.								
Holding lock	No holding lock applies to Rights that vest under the FY20 LTI plan, as Rights vest only at the end of the Performance Period, provided the Performance Measures has been achieved.								
Dividends	No dividends are received by executives on any unvested Performance Rights. To ensure alignment between shareholder and executive interests, each vested right entitles executives to one Share plus an additional number of Shares equal in value to the dividends paid on an MRL Share over the period from the Grant Date of the Share Rights to the date of exercise. Without this entitlement, executives might be motivated to seek growth to the detriment of dividend payments.								
Clawback and malus policy	The Board has the discretion to lapse awards that are on foot or claw back previously vested LTI awards in the event that the Board concludes that such awards should not vest or should not have vested due to: (a) fraud, dishonesty or fundamental breach of duties (including misstatement or manipulation of financial information) of any person; or (b) the intentional or inadvertent conduct of any person that the Board determines resulted in an unfair benefit being obtained by a participant.								
Hedging	Hedging, or the use of derivatives such as collars, caps or similar products in relation to MRL securities, including vested shares or unvested Rights, allocated under MRL incentive schemes, is strictly prohibited, as is the KMP providing share enlistments/Rights as security for loans that may result in margin calls.								
Cessation of employment	Cessation of employment prior to the Vesting date will result in automatic forfeiture of all unvested rights unless the Board exercises its discretion (e.g. for health reasons or Change of Control as set out below).								
Change of Control / Resignation / Retirement in the event of ill health	In the event of a change of control, resignation or retirement due to ill health, the Board may exercise its discretion to determining whether to vest any granted but unvested MRL share Rights.								
Board discretion	The Board retains the discretion to amend, vary, terminate or suspend the LTI Plan at any time. Any such variation, amendment, termination or suspension is not to adversely affect or prejudice rights of LTI participants holding MRL shares or Rights at that time.								

4.4 LTI PERFORMANCE MEASURES

CALCULATING RETURN ON INVESTED CAPITAL (ROIC)

ROIC is measured at a Group consolidated level, on the following basis:

$$\text{ROIC} = \text{NOPAT} / \text{Invested Capital}$$

Where: **Net Operating Profit After Tax (NOPAT)** is calculated as the Company’s statutory Earnings Before Interest and Taxes (EBIT) for the year, adjusted to remove the impact of changes to accounting policies (such as the treatment of operating leases or fair value adjustments for listed investments) whether favourable or unfavourable, and after applying the prevailing corporate tax rate.

Profits, arising on the monetisation of investments such as on the formation of joint ventures or the divestment of portion of the Group’s operations, are a standard part of the Group’s strategy and are therefore included in NOPAT.

Invested Capital is calculated as the sum of Net Assets and Net Interest Bearing Debt at balance date adjusted for accumulative accounting policy adjustments.

TREATMENT OF CASH BALANCES FOR THE PURPOSES OF CALCULATING ROIC

Strategic cash is defined as cash, over and above normal operational requirements, retained for future opportunities. The Board nominated strategic cash holdings (\$100 million) is excluded from the calculation of Invested Capital on the basis that retention of a strong cash balance, and available borrowing facilities, are required to enable strategic growth and investment. As retention of strategic cash holdings is a Board decision that senior executives and KMP are unable to influence, the Board has determined it is reasonable not to require KMP to earn a return on these facilities.

The quantity of the strategic cash holding will be reviewed in FY21 as the Board reviews the strategic growth plans for the business.

WHY ROIC HAS BEEN CHOSEN AS THE SOLE MEASURE TO DETERMINE LTI AWARDS

The Remuneration Committee continues to be of the view that:

- (a) ROIC remains the most appropriate measure for evaluating entitlement to an LTI award, as:
 - (i) it provides a clear and unambiguous link between Company performance and the creation of shareholder value;
 - (ii) it is the key value driver considered when management decides when and how to invest capital; and
 - (iii) the financial return earned on capital deployed is a true measure of value creation and a long-term representation of Company value.
- (b) MRL continues to be a highly capital intensive business. As such, it is vital that KMP ensure that maximum returns are generated on invested capital, which again supports utilisation of ROIC as the most appropriate measure for assessing senior executives and KMPs’ entitlement to LTI.
- (c) Any additional measure would dilute KMP’s focus on what is viewed by the Board as the Company’s key objective – i.e. the effective deployment of capital to ensure creation of long-term wealth.
- (d) Total shareholder return is already an implicit hurdle, due to the LTI being delivered as Rights, with dividend entitlements provided on vested equity. If KMP increase the share price and maintain dividends, like shareholders, they benefit via an increase in intrinsic value of the grant at vesting.
- (e) ROIC is a measure that is directly controlled by KMP and is not influenced by market sentiment which can result in alternate measures, such as Total Shareholder Returns (TSR), delivering volatile outcomes.

The use of ROIC and the target of 12 per cent, materially above the Company’s post-tax WACC, are designed to encourage strong longer-term performance of the Company.

ROIC for FY20 was 49.6%. This result was boosted by completion of the partial disposal of Wodgina during the year. The capital investment made in developing Wodgina, and the associated impact on Wodgina, was incurred in the period FY17 to FY20, with the majority of spend incurred in FY19.

\$ millions	FY16 Actual	FY17 Actual	FY18 Actual	FY19 Actual	FY20 Actual
NOPAT:					
EBITDA	278.2	473.5	575.2	385.9	2,006.1
Normalised ^(a)	-	-	(68.5)	46.8	35.4
EBITDA for ROIC	278.2	473.5	506.7	432.7	2,041.5
Less impairments	(186.2)	(16.7)	(65.4)	(9.8)	(285.8)
Less depreciation and amortisation	(134.0)	(160.2)	(112.9)	(108.6)	(193.6)
Net Operating Profit Before Tax	(42.0)	296.5	328.5	314.2	1,562.1
Less tax at 30%	12.6	(89.0)	(98.5)	(94.3)	(468.7)
NOPAT	(29.4)	207.6	229.9	220.0	1,093.4
Invested Capital:					
Net assets (per balance sheet)	1,008.7	1,132.1	1,304.6	1,380.2	2,295.6
Normalised (cumulative, net of tax) ^(a)	-	-	(47.9)	(14.8)	6.9
Net Assets for ROIC	1,008.7	1,132.1	1,256.6	1,365.4	2,302.5
Net Debt	136.1	-	98.9	997.1	-
Total invested capital	1,144.7	1,132.1	1,355.5	2,362.5	2,302.5
Strategic cash holding	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)
Net Invested Capital	1,044.7	1,032.1	1,255.5	2,262.5	2,202.5
ROIC %	-2.8%	20.1%	18.3%	9.7%	49.6%

^(a) Normalised for the impact of matters outside of the control of management, such as gains/losses on strategic investments where such investments are held at the discretion of the Board. Adjustments are also made to operating profits for the effect of new/revised accounting standards, where these adjustments are outside of management's day-to-day operational control.

The Company's focus on disciplined investment has, since listing, delivered outstanding returns on the capital invested in it, and in turn delivered outstanding returns for its shareholders.

5. REMUNERATION OUTCOMES FOR FY20

5.1 SUMMARY OF PERFORMANCE

FY20 has been an outstanding year for the Group. In particular, the Board was pleased with the foresight, agility and responsiveness demonstrated by Management in responding to the risk of COVID-19 on our workforce, production and our communities, and the reliability of services and production to our customers. This response enabled the Company to continue to operate its sites with significantly reduced risk of disruption, allowing it to continue to employ its workforce and ensure its employees would continue to bring home a pay packet during a period of significant economic uncertainty.

Examples include:

- Securing the early import of four top quality USA manufactured PCR testing machines to swab screen our FIFO workers to protect our workers their families and the community from any virus spread;
- Establishing accredited testing capabilities for up to 47,000 tests per week, with same-day turnaround, with collection facilities in multiple locations within Western Australia. We also provided this service at cost to other resources companies which were not able to secure the in-demand machines, reducing the risk to those companies;
- Ensuring additional focus on the mental and physical wellbeing of employees during the COVID-19 pandemic with numerous programs introduced over this period such as;
 - employing a full-time in-house psychologist
 - conducting welfare checks for any workers who were required to self-isolate or quarantine
 - participated in the Lifeline WA/CME Focus Groups to develop a mental health program for FIFO workers
 - holding several community events including R U OK Day, Mental Health Month, Movember and the Blue Tree Project
 - As part of our partnership with the West Coast Eagles Australian Football League (AFL) Team, we recruited some of its coaching crew to join our workers on site on their FIFO rosters, and provide one-on-one motivation and advice on personal health, nutrition and wellbeing. This was done while the AFL season was suspended due to COVID-19.

Other highlights included:

5.1.1 SAFETY, GOVERNANCE AND SUSTAINABILITY

The Company continued to drive safety improvements throughout the business, consistent with its record of being amongst the safest companies in its industry. It also made significant progress through the year with its sustainability agenda.

- Total Recordable Injury Frequency Rate (TRIFR) of 3.29 as compared to 3.99 in the prior year an improvement in safety performance of 18% year-on-year
- Lost Time Injury Frequency Rate (LTIFR) of 0.00 - an improvement from 0.12 in prior year
- Development of a Sustainability Policy, Human Rights Policy, Anti-Bribery and Corruption Policy and Supplier Code of Conduct
- Establishment of a cross functional Sustainability Working Group to support and advise the business with the management and monitoring of key sustainability topics
- Rollout of the Code of Conduct and Business Integrity e-learning training programme across the business

- Completion of a climate-related risk and opportunity identification and assessment exercise based on the Recommendations of the Taskforce on Climate Related Financial Disclosures (TCFD)
- Development of a sustainable procurement and modern slavery screening program to meet the requirements of the Modern Slavery Act, 2018 (Cth)
- Community contributions increased by 30% from prior year to \$2.6 million.

5.1.2 STRATEGIC GROWTH

Over the course of the year a new strategy was developed for the Company's operations in the Yilgarn region. This strategy resulted in the decision to target an increase in production in iron ore to 11 million tonnes per annum out of the Group's operations at Koolyanobbing. By year end, this operation had achieved this annualised rate of production and shipping. This assisted in providing an increase in iron ore shipments of 33% year-on-year to a record 14.1million tonnes.

In addition to the record Mining Services growth from Koolyanobbing ramp-up, the Company achieved:

- Higher tonnes in existing external contracts, and two new external contracts won in FY20, resulting in an increase in Mining Services contract volumes of 65% year-on-year
- An increase in Mt Marion spodumene shipments up 8% to 394,000 dry metric tonnes.

5.1.3 FINANCIAL MANAGEMENT AND PERFORMANCE

The Company achieved a number of record financial milestones during the financial year, including:

- Revenue of \$2.1 billion, up 41% year-on-year
- EBITDA of \$2.0 billion, including the successful completion of the partial sale of Wodgina and the formation of the MARBL Lithium Joint Venture with Albemarle
- Underlying EBITDA of \$765 million, up 77% year-on-year
- Cash at bank \$1.5 billion, with net cash on hand of \$231 million
- ROIC of 49.6%

5.1.4 ORGANISATIONAL CULTURE AND DEVELOPMENT

- A key element of employee attraction and retention is workplace culture; the Company embraced the “*We are different*” expression to express the ‘can do’ attitude and capabilities of the organisation
- MRL is invested in creating and maintaining an inclusive, inspiring and high-performing workplace enabled by a supportive culture; these efforts have created a greater number of clearer succession options throughout the business
- Recruitment efforts lead to a 47% increase in apprentices compared to the prior year, with a substantial number being second generation MRL employees
- MRL has a dedicated General Manager for Culture and Performance, who reports to the Managing Director.

A summary of the Group's financial performance over the past five years is set out in the tables below. The relationship between the Group's financial performance, return to shareholders and KMP remuneration reflects the direct correlation between financial performance, shareholder value creation and executive remuneration.

Financial Summary (\$millions unless otherwise stated)	2016	2017	2018	2019	2020
Earnings					
Revenue	1,178	1,458	1,624	1,512	2,125
EBITDA	278	473	575	386	2,006
NPAT	(26)	201	272	165	1,002
Return on Revenue	-2%	14%	17%	11%	47%
Return on Equity	-3%	18%	21%	12%	44%
ROIC	-2.8%	20.1%	18.3%	9.7%	49.6%
Diluted EPS (cents/share)	(13.31)	107.66	145.30	87.09	532.96

Financial Year Ended 30 June	2016	2017	2018	2019	2020
Final dividend for the preceding financial year	0.1500	0.2100	0.3300	0.4000	0.7700
Interim dividend for the current financial year	0.0850	0.2100	0.2500	0.1300	0.2300
Total dividend paid	0.2350	0.4200	0.5800	0.5300	1.0000
Share price	8.31	10.85	16.00	14.98	21.17
Total Shareholder Return (TSR) (cumulative)	10.38	13.34	19.07	18.58	25.31

5.2 STI PERFORMANCE OUTCOMES

KMP INDIVIDUAL PERFORMANCE OUTCOMES

In FY20 the weighting of financial to non-financial metrics was adjusted in response to investor feedback that significant bonuses could be paid in years where performance on financial measures is suboptimal. The tables below summarise the STI performance outcomes for KMP for FY20.

Managing Director					
STI element	Weight	Performance			Comments
		Threshold	Target	Max	
Safety, governance and ESG	20%			<div></div>	Continued delivery of better than industry safety performance, although at 3.29 TRIFR exceeds target, a 0 LTIFR is a positive lead indicator. While TRIFR still requires increased focus, the proactive and effective COVID-19 response, resulting in improved safety, wellbeing and financial security of our workforce and increasing safety outcomes for the industry by means on making testing available for all in the industry on a non-profit basis was viewed favorably by the Remuneration Committee. Rating 16 out of 20
Strategic growth	20%			<div></div>	Restructured and completed Albemarle transaction, other deals positioning MRL for future growth including increased resource base. Continued growth in Mining Services business Rating 20 out of 20
Financial management performance	40%			<div></div>	Strong outperformance driven by growth in external mining services tonnes, record iron ore production, record production at Mt Marion in a soft market, strong cost management Rating 40 out of 40
Organisational culture and development	20%			<div></div>	Retention of key staff, supporting continued strengthening of culture. Positive impact on site culture during COVID-19 through employment of third party professionals including AFL coaching staff and comedians. Introduction of internal clinical psychological capability to promote mental health programme. Introduction of new leadership and culture development programme Rating 20 out of 20
Total	100%			<div></div>	The Remuneration Committee determined that the MD's STI for FY20 would be set at 94% of his maximum opportunity.

Chief Financial Officer

STI element	Weight	Performance			Comments
		Threshold	Target	Max	
Safety, governance and ESG	25%			<div></div>	Establishment of COVID-19 testing capabilities. Performance in Company Secretary role including refreshed governance framework and strengthened Code of Conduct. Improved ESG reporting and external ratings. Strengthened investor relations engagement. Group TRIFR exceeded target while remaining better than industry Rating 21 out of 25 ¹
Strategic growth	25%			<div></div>	Completion of Albemarle and RDG transactions, maintenance and progression of strategic lithium relationships. Leadership of other strategic transactions and initiatives Rating 25 out of 25
Financial management performance	40%			<div></div>	Strengthened capital investment processes and reporting. Strong Group financial outcomes. Improved management reporting and development of new systems. Capital allocation planning for future investment and strengthened treasury policy Rating 40 out of 40
Organisational culture and development	20%			<div></div>	Development of organisation structure design, improved retention rates. Improved functional outcomes from Supply, Communications and Information Technology. Development of enterprise architecture capability Rating 20 out of 20
Total	100%			<div></div>	¹ Despite not maximizing the Safety, Governance and ESG KPI, the Board has applied its discretion in awarding the Chief Financial Officer's STI at 100% of his maximum opportunity in recognition of the proactive and effective COVID-19 response as noted above.

Chief Executive, Mining Services

STI element	Weight	Performance			Comments
		Threshold	Target	Max	
Safety, governance and ESG	20%			<div></div>	Continued delivery of better than industry safety performance, although at 3.29, TRIFR exceeds target, a 0 LTIFR is a positive lead indicator. Higher than target TRIFR offset by proactive and effective COVID-19 response, resulting in improved safety, wellbeing and financial security of our workforce and increasing safety outcomes for the industry by means on making testing available for all in the industry on a non-profit basis. 16 out of 20 ¹
Strategic growth	20%			<div></div>	Mining Wear Parts and RDG acquisitions. Increase in resource base. 20 out of 20
Operational efficiency and performance	10%			<div></div>	Continued industry-leading cost management and productivity 10 out of 10
Financial management performance	20%			<div></div>	Growth in tonnes shipped, growth in earnings from Mining Services and Commodities 20 out of 20
Organisational culture and development	30%			<div></div>	Strong leadership translating into higher retention rates Establishment of “We’re Different” campaign to reposition MRL Internal face of the business on MRL’s COVID response 30 out of 30
Total	100%			<div></div>	¹ Despite not maximizing the Safety, Governance and ESG KPI, the Board has applied its discretion in awarding the Chief Executive, Mining Services’ STI at 100% of his maximum opportunity in recognition of the proactive and effective COVID-19 response as noted above.

Chief Executive, Commodities

STI element	Weight	Performance			Comments
		Threshold	Target	Max	
Safety, governance and ESG	20%			<div></div>	Continued delivery of better than industry safety performance although at 3.29 TRIFR exceeds target, a 0 LTIFR is a positive lead indicator. Higher than target TRIFR offset by and effective COVID-19 response, resulting in improved safety, wellbeing and financial security of our workforce and increasing safety outcomes for the industry by means on making testing available for all in the industry on a non-profit basis. 16 out of 20 ¹
Strategic growth	20%			<div></div>	Developed Yilgarn iron ore strategy, driving substantial tonnes increase at Koolyanobbing. Improved efficiency and performance at Mt Marion. Continued strong performance at Iron Valley 20 out of 20
Operational efficiency and performance	10%			<div></div>	Continued strong performance across the mine sites and the haulage contracts. Plant management adapted to drive greater efficiencies and utilisation 10 out of 10
Financial management performance	20%			<div></div>	Strong cost management on portfolio. Substantial increase in tonnages driving revenue improvement 20 out of 20
Organisational culture and development	30%			<div></div>	Strong leadership and team development; development of new training programmes including second generation MRL employees 30 out of 30
Total	100%			<div></div>	¹ Despite not maximizing the Safety, Governance and ESG KPI, the Board has applied its discretion in awarding the Chief Executive, Commodities’ STI at 100% of his maximum opportunity in recognition of the proactive and effective COVID-19 response as noted above.

5.2.1 STI PERFORMANCE OUTCOMES: FY20 GRANT

While substantial weight is given to the scorecard results as outlined above in determining STI outcomes, consistent with the rules of the STI programme, the Board has discretion to adjust STI awards in the case of extraordinary events or circumstances.

Reflecting on the extraordinary outcomes achieved in all areas of the business in FY20, the Remuneration Committee recommended, and the Board Accepted, that the STI award to the CFO and the Divisional Chief Executives be at the maximum of their STI opportunity, being 80% of their FAR

In making this recommendation, the Remuneration Committee took into account, and the Board accepted, the following:

- business performance throughout FY20 was outstanding in each of the key focus areas, as outlined previously in this Report,
- that through their actions, management were able to not only retain the existing workforce, they grew employee numbers, during the biggest decline in GDP in recent history, and
- the extraordinary lengths to which management went to avoid the potentially devastatingly adverse impacts from COVID-19. These measures benefitted not only the Company’s operations, they also contributed towards the overall ongoing success of the Western Australian resource and extractives industries.

5.3 LTI PERFORMANCE OUTCOMES: FY20 GRANT

Consistent with the redesigned LTI programme, a grant equal to the maximum LTI opportunity has been made to FY20 plan participants. The LTI awards will vest in early FY24 with the amount vesting dependent on the Company’s average ROIC performance over the four year period FY20 to FY23.

Where average ROIC is less than 12 per cent no LTI award will vest. Where average annual ROIC is between 12 per cent and 18 per cent over the four year period the LTI will vest pro-rata from 67 per cent to 100 per cent of the LTI grant. Where average annual ROIC is greater than 18 per cent, 100 per cent of the LTI grant will vest.

5.4 LTI PERFORMANCE OUTCOMES: EARLIER GRANTS ON-FOOT

FY17 Grant

Although FY19’s ROIC was less than 12 per cent, the average ROIC over FY18 and FY19 was 12.8 per cent. Therefore, a total of 89,910 MRL shares vested on 22 August 2019, representing the third and final tranche of MRL share rights granted under the FY17 LTI scheme. Of the current KMP, only the Managing Director was eligible to receive an award under this scheme.

FY18 Grant

Due to FY19’s ROIC being less than 12 per cent, a total of 56,052 MRL shares, representing the first tranche of MRL share rights granted under the FY18 LTI scheme, became a Suspended Tranche subject to Performance Hurdle testing in FY20 and is eligible to vest in August 2020, along with Tranche 2 of the FY18 LTI scheme. With FY20’s ROIC being 49.6 per cent, the average ROIC for FY19 and FY20 is 29.4 per cent. Therefore Tranche 1 (56,052 MRL share rights) vest on 19 August 2020. In addition Tranche 2 (56,052 MRL share rights) will vest due to FY20 ROIC exceeding 12 per cent. Vested shares are subject to a holding lock until August 2021. The third tranche will vest in August 2021 based on ROIC performance in FY21.

FY19 Grant

As FY19’s ROIC was less than 12 per cent, there was no LTI grant for FY19.

5.5 REMUNERATION OUTCOMES SCHEDULES

The following tables provide a summary of remuneration received by KMP during the year, which may be useful in understanding current year pay and alignment with performance. These remuneration outcomes tables differ from the statutory remuneration tables in Section 8 which are prepared in accordance with Australian Accounting Standards.

FY20	FAR (cash) ⁴ \$	STI cash bonus ⁵ \$	LTI vesting ⁶ \$	NED fees (shares) ⁷ \$	Other benefits ⁸ \$	Total \$	LTI vesting share price growth ⁹ \$	Total including share price growth \$

¹ Current as at the date of this Remuneration Report (19 August 2020).
² Paul Brown regarded as KMP with effect from 1 January 2020. Remuneration disclosed is for the period 1 January 2020 to 30 June 2020.
³ Rohan O'Grady resigned as Chief Operating Officer - Construction & Development on 13 September 2019. Remuneration disclosed is for the period 1 July 2019 to 13 September 2019.
⁴ FAR is excluding superannuation contributions, which is reported within 'Other Benefits'.
⁵ 40% of the FY20 STI plan to KMP is paid in cash (50% for the Managing Director) and relates to the performance during FY20.
⁶ LTI awards that have vested during FY20, calculated as the number of rights vested multiplied by the face value at grant date. Vested shares may still be subject to trading restrictions and clawback provisions.
⁷ Equity component of Non-Executive Directors' (NED) remuneration. NED fees continue to be paid 50% in cash and 50% in MIN shares. Remuneration disclosed relates to the performance during FY20.
⁸ Other Benefits relate to non-monetary benefits, superannuation and termination benefits that are awarded for performance during FY20 or have vested during FY20.
⁹ The 'share price growth' amount is equal to the number of rights vested multiplied by the increase in the MIN share price over the period from grant date to vesting date.

¹ Current as at the date of FY19 Remuneration Report (22 August 2019).
² Tim Roberts resigned on 5 June 2019. Fees shown are for the period 1 July 2018 to 5 June 2019.
³ Michael Grey was appointed Chief Operating Officer - Mining Services on 6 May 2019. Remuneration disclosed is for period from appointment 6 May 2019 to 30 June 2019. Michael Grey's total STI for FY19 was \$237,346. The STI value shown in the table above represents a pro-rata portion of his FY19 STI for the period for which he was a KMP.
⁴ Rohan O'Grady commenced as Chief Operating Officer - Construction & Development on 3 September 2018. Remuneration is for the period 3 September 2018 to 30 June 2019.
⁵ Mark Wilson commenced as Chief Financial Officer on 27 August 2018. Remuneration is for the period 27 August 2018 to 30 June 2019.
⁶ Bruce Goulds retired as Chief Financial Officer on 6 December 2018. Remuneration is for the period 1 July 2018 to 6 December 2018.
⁷ Danny McCarthy resigned as Chief Operating Officer on 30 November 2018. The negative value shown for LTI equity represents the value of LTI forfeited on resignation. Remuneration is for the period 1 July 2018 to 30 November 2018.
⁸ Scott Winter commenced as Chief Operating Officer - Commodities on 9 October 2018. He resigned on 18 June 2019. Remuneration is for the period 9 October 2018 to 11 June 2019.
⁹ FAR is excluding superannuation contributions, which is reported within 'Other Benefits'.
¹⁰ Value of STIP cash relates to performance during FY19. Payments made to KMP under STI plans prior to FY20 were 100% cash and did not contain deferred equity components.
¹¹ LTI awards that have vested during FY19, calculated as the number of rights vested multiplied by the face value at grant date. Vested shares may still be subject to trading restrictions and clawback provisions.
¹² Equity component of Non-Executive Directors' (NED) remuneration. NED fees continue to be paid 50% in cash and 50% in MIN shares. Remuneration disclosed relates to the performance during FY19.
¹³ Other Benefits relate to non-monetary benefits, superannuation and termination benefits that are awarded for performance during FY19.
¹⁴ The 'share price growth' amount is equal to the number of rights vested multiplied by the increase in the MIN share price over the period from grant date to vesting date.

6. KEY CHANGES TO REMUNERATION FOR FY21

At the time of preparing this report, there are no changes planned for remuneration of KMP in FY21.

7. SUMMARY OF KMP EMPLOYMENT CONDITIONS

7.1 EXECUTIVES

The table below summarises the employment agreements in place with executive KMP as at the date of this report.

KMP	Term of agreement	FAR	Notice period: KMP and MRL	Termination entitlements ¹
Chris Ellison (MD)	Full time – permanent	\$1,200,000	12 months	Notice period per contract
Paul Brown (Chief Executive - Commodities)	Full time – permanent	\$850,000	12 months	Notice period per contract
Michael Grey (Chief Executive – Mining Services)	Full time – permanent	\$850,000	12 months	Notice period per contract
Mark Wilson (CFO)	Full time – permanent	\$950,000	12 months	Notice period per contract

¹ Should this amount be a value that requires shareholder approval then it can be reduced to maximum permissible amount without shareholder agreement.

7.2 NON-EXECUTIVE DIRECTORS

Non-Executive Director remuneration remains unchanged from the amounts set in FY17, and as disclosed in FY19, as follows:

Chairman	\$250,000 (plus superannuation)
Non-Executive Director	\$140,000 (plus superannuation)

Non-Executive Director (NED) remuneration is reviewed annually by the Remuneration Committee. Remuneration is based on the maximum total aggregate amount of fees payable (currently \$1,000,000) as approved by shareholders. It is proposed that a resolution be passed in the 2020 AGM to approve an increase in the maximum pool to \$2,000,000 to facilitate sufficient headroom in the pool to allow for the appointment of additional NEDs, an allocation of entitlements for participation in Board Sub-committees, and for an increase in NED fees should this be recommended by the Remuneration Committee.

NED remuneration is not linked to Company performance, however to create alignment with shareholders, Non-Executive Director fees continue to be paid 50% in cash and 50% in MIN shares. All Directors are subject to the Company's Security Trading Policy.

Since this policy's introduction on 1 July 2017, no Directors have sold their share allocations, such that Directors are aligned with shareholders.

8. KMP STATUTORY REMUNERATION SCHEDULES

The following tables detail the statutory remuneration disclosures prepared in accordance with Australian Accounting Standards. These tables differ from the remuneration outcomes tables in section 5.5, due to the accounting treatment of share-based payments.

		Short-Term Benefits			Post-Employment Benefits	Share-based payments

¹ Current as at the date of this Remuneration Report (19 August 2020).
² Paul Brown regarded as KMP with effect from 1 January 2020. Remuneration disclosed is for the period 1 January 2020 to 30 June 2020.
³ Rohan O’Grady resigned as Chief Operating Officer - Construction & Development on 13 September 2019. Remuneration disclosed is for the period 1 July 2019 to 13 September 2019.
⁴ Annual leave payout on termination of Rohan O’Grady and relocation allowance for Mark Wilson.
⁵ 40% of the FY20 STI plan to KMP is paid in cash (50% for the Managing Director) and relates to the performance during FY20.
⁶ Equity component of Non-Executive Directors’ (NED) remuneration. NED Remuneration is not linked to Company performance, however to create alignment with shareholders, Non-Executive Director fees continue to be paid 50% in cash and 50% in MIN shares.

¹ Current as at the date of FY19 Remuneration Report (22 August 2019).
² Tim Roberts resigned on 5 June 2019. Fees shown are for the period 1 July 2018 to 5 June 2019.
³ Michael Grey was appointed Chief Operating Officer - Mining Services on 6 May 2019. Remuneration disclosed is for period from appointment 6 May 2019 to 30 June 2019. Michael Grey's total STI for FY19 was \$237,346. The STI value shown in the table above represents a pro-rata portion of his FY19 STI for the period for which he was a KMP.
⁴ Rohan O'Grady commenced as Chief Operating Officer - Construction & Development on 3 September 2018. Remuneration is for the period 3 September 2018 to 30 June 2019.
⁵ Mark Wilson commenced as Chief Financial Officer on 27 August 2018. Remuneration is for the period 27 August 2018 to 30 June 2019.
⁶ Bruce Goulds retired as Chief Financial Officer on 6 December 2018. Remuneration is for the period 1 July 2018 to 6 December 2018.
⁷ Danny McCarthy resigned as Chief Operating Officer on 30 November 2018. The negative value shown for LTI equity represents the value of LTI forfeited on resignation. Remuneration is for the period 1 July 2018 to 30 November 2018.
⁸ Scott Winter commenced as Chief Operating Officer - Commodities on 9 October 2018. He resigned on 18 June 2019. Remuneration is for the period 9 October 2018 to 11 June 2019.
⁹ Termination entitlements for Bruce Goulds, Danny McCarthy and Scott Winter, and joining bonus for Mark Wilson.
¹⁰ Refer to section 4 for details of the long-term incentive (LTI) scheme. The amounts for the value of LTI equity represents the expense over the performance period calculated in accordance with Australian Accounting Standards and includes the FY16, FY17 and FY18 LTI schemes which continue to be expensed in FY19 based on the probability of vesting, as these shares are subject to performance and forfeiture conditions.
¹¹ Equity component of Non-Executive Directors' (NED) remuneration. NED Remuneration is not linked to Company performance, however to create alignment with shareholders, Non-Executive Director fees continue to be paid 50% in cash and 50% in MIN shares.

¹ Grant date is determined in accordance with AASB 2 Share Based Payments.
² FY16 LTI Plan vests in favour of participants provided participants remain employed with the Company over each of the Performance Periods.
³ FY17 was the Award Year for the LTI Plan (ROIC exceeded 12%). Each tranche of the FY17 LTI Plan vests in favour of participants provided participants remain employed with the Company over each of the subsequent Performance Years (FY18 to FY20) and ROIC for each subsequent Performance Years (FY18 to FY20) equals or exceeds 12%. As the average ROIC for FY18 and FY19 exceeds 12% (the average being 12.8%), Tranche 2 of the FY17 LTI Plan vests in favour of participants who remained employed for all of FY19.
⁴ FY18 was the Award Year for the LTI Plan (ROIC for FY18 exceeded 12%). Each tranche of the FY18 LTI Plan vests in favour of participants provided participants remain employed with the Company over each of the subsequent Performance Years (FY19 to FY21) and ROIC for each subsequent Performance Years (FY19 to FY21) equals or exceeds 12%. As ROIC for FY19 is less than 12%, Tranche 1 of the FY18 LTI Plan becomes a Suspended Tranche, subject to retesting if ROIC is equal to or exceeds 12% when averaged over the FY19 and subsequent (FY20 to FY21) Performance Years.
⁵ FY19 was the Award Year for the FY19 LTI Plan. As ROIC for FY19 is less than 12% there is no LTI award for FY19.
⁶ FY20 was the Award Year for the FY20 LTI Plan and the FY20 STI Plan.

10. EQUITY INSTRUMENTS HELD BY KMP

10.1 RIGHTS AWARDED UNDER INCENTIVE PLANS

The following table details share rights awarded under incentive plans that are subject to service conditions and performance hurdles that are yet to be tested and vested rights that have not yet been exercised and converted into shares. Non-executive Directors do not participate in incentive plans and do not hold unvested share rights.

Number of rights	Balance at the start of the year	Granted	Exercised and converted to shares	Other Additions ¹	Disposals /other ²	Balance at the end of the year	Balance vested and exercisable
Executive Director							
Chris Ellison	395,772	167,844	(137,706)	-	-	425,910	-
Other KMP							
Current							
Mark Wilson	-	112,245	-	-	-	112,245	-
Michael Grey	-	83,598	-	-	-	83,598	-
Paul Brown	-	68,846	-	39,376	-	108,222	-
Former							
Rohan O’Grady	-	-	-	-	-	-	-
Total							
Total	395,772	432,533	(137,706)	39,376	-	729,975	-

¹ Other additions include share rights on commencement as KMP.
² Disposals/other include share rights forfeited; and on cessation as KMP.

10.2 KMP SHAREHOLDINGS

The number of MRL shares held during FY20 by each Director and Other Executive of the Company, including their related parties, is set out below:

Number of shares	Balance at the start of the year	Issued as part of remuneration	Other Additions ²	Disposals /other ³	Balance at the end of the year
Non-Executive Directors					
Current					
Peter Wade	328,656	8,159	-	-	336,815
Kelvin Flynn ¹	6,997	4,569	-	-	11,566
James McClements ¹	6,997	4,569	-	-	11,566
Xi Xi ¹	5,617	4,569	-	-	10,186
Executive Directors					
Chris Ellison	22,032,591	137,706	21,432	-	22,191,729
Other KMP					
Current					
Mark Wilson	8,670	-	16,439	-	25,109
Michael Grey	-	-	-	-	-
Paul Brown	-	-	21,578	(10,789)	10,789
Former					
Rohan O’Grady	-	-	-	-	-
Total					
Total	22,389,528	159,572	59,449	(10,789)	22,597,760

¹ Shares paid to Non-Executive Directors disclosed in this table were part of their FY19 remuneration package. Shares for their FY20 remuneration package were issued post the financial year end.
The quantity of shares granted is based on the proportion of fees payable divided by the Volume Weighted Average price for the five trading days to the end of each quarter of the financial year.
² Other additions include shares on commencement as KMP and other shares purchased.
³ Disposals/other include shares sold; forfeited; and on cessation as KMP.

11. TRANSACTIONS WITH RELATED PARTIES

The following transactions occurred with related parties:

Key Management Personnel / Directors’ interests:	2020 \$	2019 \$
Properties from which some of the Group’s operations are performed are rented from parties related to Chris Ellison and Peter Wade.	(2,118,828)	(2,026,840)

Occupation of these premises date back prior to the Company’s listing in 2006. The ongoing need for occupation of these premises, as well as rental arrangements, are assessed periodically. The Group has a Related Party Transaction Policy that requires the review and approval of Related Party Transactions by the Audit and Risk Committee (the Committee). A resolution is required by the Company’s Board of Directors (where applicable, excluding those involved in the Related Party Transaction) to confirm that the transaction is on terms not materially less favourable than terms generally available from an unaffiliated third party under the same or similar circumstances. The Group is presently examining the feasibility of acquiring these properties in order to terminate these arrangements.

This concludes the Remuneration Report, which has been audited.

1. SIGNIFICANT ACCOUNTING POLICIES

1.1 BASIS OF PREPARATION

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

Historical cost convention

The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of financial assets and liabilities at fair value through profit or loss, certain classes of property, plant and equipment and derivative financial instruments.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

Rounding of amounts

The Company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investment Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest hundred thousand dollars, unless otherwise stated.

Foreign currency

The financial statements are presented in Australian dollars, which is Mineral Resources Limited's functional and presentation currency.

Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

1.2 PRINCIPLES OF CONSOLIDATION

(a) Subsidiaries

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of the Company as at 30 June 2020 and the results of all subsidiaries for the year then ended.

Subsidiaries are all those entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the Group are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

Where the Group loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Group recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

(b) Joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. The Group has recognised its share of jointly held assets, liabilities, revenues and expenses of joint operations. These have been incorporated in the financial statements under the appropriate classifications.

(c) Employee share trust

The Group has in place a trust to administer the Group's employee share and share option schemes. This trust is consolidated, as the substance of the relationship is that the trust is controlled by the consolidated entity. Shares held by the Mineral Resources Employee Share Trust are disclosed as treasury shares and deducted from contributed equity.

1.3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This note provides a summary of the accounting policies that are considered significant and relevant to the preparation of the financial statements, to the extent that they have not already been disclosed in other notes to the financial statements throughout the report. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) New or amended Accounting Standards and Interpretations adopted

The Group has adopted all of the new, revised or amending Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that are mandatory for the current reporting period. The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the Group.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

AASB 16 Leases

The Group has adopted AASB 16 *Leases* (AASB 16) from 1 July 2019. The standard replaces AASB 117 *Leases* (AASB 117) and for lessees, eliminates the classifications of operating leases and finance leases. Except for short-term leases and leases of low-value assets, right-of-use assets and corresponding lease liabilities are recognised in the balance sheet when a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Lease accounting policy (applied from 1 July 2019)

Right-of-use assets

Refer to note 15.

Lease liabilities

Refer to note 20.

Transition

Straight-line operating lease expense recognition is replaced with a depreciation charge for the right-of-use assets (included in operating costs) and an interest expense on the recognised lease liabilities (included in finance costs). In the earlier periods of the lease, the expenses associated with the lease under AASB 16 will be higher when compared to lease expenses under AASB 117. However, EBITDA results improve as the operating expense is now replaced by interest expense and depreciation in the income statement.

For classification within the statement of cash flows, the interest portion is disclosed in operating activities and the principal portion of the lease payments are separately disclosed in financing activities. For lessor accounting, AASB 16 does not substantially change how a lessor accounts for leases.

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

In accordance with the transition provisions of AASB 16, the Group has adopted the modified retrospective transition approach to implementing the new standard. Under this approach, comparatives are not restated. Instead, the reclassifications and adjustments arising from the new leasing rules are recognised in the balance sheet on 1 July 2019.

Adjustments recognised on adoption of AASB 16

On adoption of AASB 16, the Group recognised lease liabilities in relation to leases which had previously been classified as ‘operating leases’ under the principles of AASB 117. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee’s incremental borrowing rate as of 1 July 2019. The weighted average lessee’s incremental borrowing rate applied to these lease liabilities on 1 July 2019 was 4.7%.

For leases previously classified as finance leases the Group recognised the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right of use asset and the lease liability at the date of initial application. The measurement principles of AASB 16 are only applied after that date.

	\$m
Operating lease commitments disclosed 30 June 2019	44.2
(Exclude): Committed leases not commenced	(38.7)
(Less): Short-term leases recognised on a straight-line basis as an expense	(0.2)
Add: Adjustments as a result of different treatment of extension and termination options	4.2
Add: Contracts reassessed to contain leases	2.3
Add: Finance leases recognised at 30 June 2019	178.7
Discounted using the lessee’s incremental borrowing rate	(0.2)
Lease liability recognised at 1 July 2019	190.3

Right-of-use assets were measured on a retrospective basis as if AASB 16 had been applied since the commencement date, but discounted using the lessee’s incremental borrowing rate at the date of initial application.

The recognised right-of-use assets relate to the following types of assets:

	30 Jun 2020 \$m	1 Jul 2019 \$m
- Buildings	40.0	10.2
- Plant and equipment	271.3	159.1
- Plant and equipment (held for sale)	-	29.2
	311.3	198.5

The change in accounting policy impacted the following items in the balance sheet on 1 July 2019:

	1 July 2019 \$m
Property, plant and equipment - increase	10.3
Deferred tax asset - increase	0.4
	10.7
Borrowings (Lease liability) - increase	(11.7)
Net impact on retained earnings, tax effected	(1.0)

Impact of adoption on the current reporting period

The impact on the Group’s consolidated income statement, compared with the amount that would have been reflected under AASB 117, for the year ended 30 June 2020 is:

	30 Jun 2020 \$m
Decrease in operating lease expense	5.9
Increase in finance cost expense	(2.3)
Increase in right-of-use asset depreciation	(6.4)
Decrease in profit before tax	2.8
Increase in finance cost expense	0.8
Decrease in profit after tax	(2.0)

The impact of the adoption on segment disclosures was principally in the Central segment.

The Group’s earnings per share was not materially impacted.

Practical expedients applied

In applying AASB 16 for the first time, the Group has used the following practical expedients permitted by the standard:

- applying a single discount rate to a portfolio of leases with reasonably similar characteristics;
- accounting for operating leases with a remaining term of less than 12 months as at 1 July 2019 as short-term leases;
- using hindsight in determining the lease term where the contract contains options to extend or terminate the lease; and
- for contracts entered into before the transition date, the Group chose to ‘grandfather’ previous assessments made applying AASB 117 and Interpretation 4 *Determining whether an Arrangement contains a Lease*, instead of reassessing whether existing contracts were or contained a lease.

(b) Current and non-current classification

Assets and liabilities are presented in the balance sheet based on current and non-current classification.

An asset is current when it is expected to be realised or intended to be sold or consumed in normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

A liability is current when it is expected to be settled in normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

(c) Goods and Services Tax (GST) and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

(d) New Accounting Standards and Interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Group for the annual reporting period ended 30 June 2020. The Group’s assessment of the impact of these new or amended Accounting Standards and Interpretations, most relevant to the Group, are set out below.

AASB 2018-6 Amendments to Australian Accounting Standards – Definition of a Business

The amendments to AASB 3 *Business Combinations*, applicable to annual reporting periods beginning on or after 1 January 2020, clarifies the definition of a business, with the objective of assisting entities to determine whether a transaction should be accounted for as a business combination or as an asset acquisition. The amendments clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test.

New illustrative examples were provided along with the amendments.

The amendments will be applied prospectively by the Group to all business combinations and asset acquisitions for which the acquisition date is on or after 1 July 2020.

AASB 2018-7 Amendments to Australian Accounting Standards – Definition of Material

The amendments applies to annual reporting periods beginning on or after 1 January 2020 and is intended to address concerns that the wording in the definition of ‘material’ was different in the Conceptual Framework for Financial Reporting, AASB 101 *Presentation of Financial Statements* and AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors*.

The amendments address these concerns by:

- Replacing the term ‘could influence’ with ‘could reasonably be expected to influence’
- Including the concept of ‘obscuring information’ alongside the concepts of ‘omitting’ and ‘misstating’ information in the definition of material
- Clarifying that the users to which the definition refers are the primary users of general purpose financial statements referred to in the Conceptual Framework
- Aligning the definition of material across Australian Accounting Standards and other publications.

The adoption of these amendments from 1 July 2020 is not expected to have a material impact on the Group’s consolidated financial statements.

AASB 2019-1 Amendment to Australian Accounting Standards – References to the Conceptual Framework for Financial Reporting (Conceptual Framework)

Makes amendments to various Accounting Standards to reflect the issue of the revised Conceptual Framework. The Amending Standard updates references to, or quotations from, previous versions of the Framework contained in many Accounting Standards. This Amending Standard applies to for-profit sector entities that have public accountability and are required by legislation to comply with Australian Accounting Standards and other for-profit entities that elect to apply the Conceptual Framework, for annual reporting periods beginning on or after 1 January 2020.

Where the Group has relied on the existing framework in determining its accounting policies for transactions, events or conditions that are not otherwise dealt with under the Australian Accounting Standards, the Group may need to review such policies under the revised framework. At this time, the application of the Conceptual Framework by the Group from 1 July 2020 is not expected to have a material impact on the Group’s financial statements

2. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

COVID-19 pandemic

Judgement has been exercised in considering the impacts that the COVID-19 pandemic has had, or may have, on the Group based on known information. This consideration extends to the nature of the products and services offered, customers, supply chain, staffing and geographic regions in which the Group operates.

As at the date of this report, the Group’s operations have not been materially impacted by the COVID-19 crisis during the year ended 30 June 2020. The Group has taken actions to minimise the risk that COVID-19 presents and as a result of these actions, the Group has continued to maintain its operations.

Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the Group unfavourably as at the reporting date. The challenges presented by COVID-19 are fluid and continue to change. The Group will continue to assess and update the Group’s response.

Other key judgements, estimates and assumptions

Other key judgements, estimates and assumptions which are material to the financial report are found in the following notes:

	Note
Income tax	7
Recovery of deferred tax assets	7
Exploration and evaluation costs	17
Ore reserve and resource estimates	17
Impairment of non-financial assets	18
Site rehabilitation provisions	22
Project closure	22

3. OPERATING SEGMENTS

Business segment

The Group has identified its operating segments based on internal management reports that are reviewed by the Board (the Chief Operating Decision Makers) in assessing performance and in determining the allocation of resources.

The Group continues to report its business results as three operating segments being Mining Services (previously reported as ‘ Mining Services and Processing’), Commodities (previously reported as ‘Mining’), and Central. All are operating within the Australian resources sector.

The measurement of segment results is in line with the basis of information presented to management for internal management reporting purposes and the performance of each segment is measured based on EBITDA contribution.

The accounting policies applied for internal reporting purposes are consistent with those applied in the preparation of the financial statements.

	Mining Services	Commodities	Central	Intersegment*	Total
Group - 2020	\$m	\$m	\$m	\$m	\$m

* Represents elimination of internal profits that are temporarily unrealised to the Group

Geographical information

Refer Note 4 for segment revenue disaggregated based on geographical locations of external customers.

All non-current assets of the Group, exclusive of, where applicable, financial instruments, deferred tax assets, post-employment benefits assets and rights under insurance contracts, are located in Australia.

Major customer information

During the year ended 30 June 2020, Commodities segment revenues from two customers amounted to \$863.8 million and \$258.9 million respectively, arising from the sale of commodities and related freight revenue. No other single customer contributed 10% or more to the Group's revenue for the year.

During the year ended 30 June 2019, Commodities segment revenues from two customers amounted to \$209.1 million and \$176.8 million respectively, arising from the sale of commodities and related freight revenue. No other single customer contributed 10% or more to the Group's revenue for the year.

4. REVENUE

(a) Disaggregation of revenue

The disaggregation of revenue from contracts with customers is as follows:

	Mining Services	Commodities	Central	Total
Group - 2020	\$m	\$m	\$m	\$m
<i>Type of goods or service</i>				
Sale of iron ore	-	1,552.7	-	1,552.7
Sale of lithium	-	131.1	-	131.1
Contract and operational revenue	435.1	-	-	435.1
Other	5.5	0.3	-	5.8
Total external revenue from contracts with customers	440.6	1,684.1	-	2,124.7

Geographical information (by location of customer)

Australia	440.6	0.3	-	440.9
China	-	292.8	-	292.8

--	-------	---------	-----	---------

4. REVENUE (CONTINUED)

(b) Contract balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

The Group does not have any material contract assets as at 30 June 2020 as performance and a right to consideration occurs within a short period of time and all rights to consideration are unconditional.

Trade receivables

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to Note 10 for trade receivables.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

- commodity sales which are sold under Cost and Freight (CFR) or Cost, Insurance and Freight (CIF) International Commercial Terms (Incoterms), whereby a portion of the cash may be received from the customer before the freight/insurance services are provided
- mining services revenue, including crushing services, whereby mobilisation charges may be received from the customer but is to be allocated and recognised based on the actual tonnes crushed each period (each performance obligation)

See Note 19 for further details of contract liabilities disclosed within Trade and Other Payables.

Accounting policy for revenue recognition

Revenue from contracts with customers

Revenue is recognised at an amount that reflects the consideration to which the Group is expected to be

entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the Group: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognises revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

Variable consideration within the transaction price, if any, reflects concessions provided to the customer such as discounts, rebates and refunds, any potential bonuses receivable from the customer and any other contingent events. Such estimates are determined using either the 'expected value' or 'most likely amount' method. The measurement of variable consideration is subject to a constraining principle whereby revenue will be recognised only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The measurement constraint continues until the uncertainty associated with the variable consideration is subsequently resolved. Amounts received that are subject to the constraining principle are recognised as a refund liability.

(i) Sale of goods

The Group earns revenue by mining, processing, and subsequently selling commodity products (including iron ore and lithium) by export to customers under a range of commercial terms.

Revenue from the sale of product is recognised at the point in time when control has been transferred to the customer, no further work or processing is required by the Group, the quantity and quality of the goods has been determined with reasonable accuracy, the price is fixed or determinable, and collectability is reasonably assured. This is generally when title passes. The majority of the Group's sales agreements specify that title passes when the product is delivered to the destination specified by the customer, which is typically the vessel on which the product will be shipped. In practical terms, revenue is generally recognised on the bill of lading date, which is the date the commodity is delivered to the shipping agent. Within each contract to sell commodity products, each unit of product shipped is a separate performance obligation. Revenue is generally recognised at the contracted price at this reflects the stand-alone selling price.

The Group's sales agreements may provide for provisional pricing of sales with pricing subsequently adjusted to reflect market prices over a quotation period stipulated in the sales contract, typically on or after the vessel's arrival at the port of discharge.

The estimated consideration in relation to provisionally priced contracts is marked to market using the spot price at the end of each reporting period with the impact of the price movements recorded as an adjustment to sales revenue. These sales agreements also allow for an adjustment to the sales price based on a survey of the goods by the customer (an assay for mineral content) therefore recognition of the sales revenue is based on the most recently determined estimate of product specifications. The effect of variable consideration arising from these arrangements with customers is included in revenue to the extent that it is highly probable that there will be no significant reversal of the cumulative amount of revenue recognised when any pricing uncertainty is resolved.

The Group sells the majority its commodity products on CFR or CIF Incoterms which means that the Group is responsible for providing freight services and, in CIF instances, insurance, after the date at which title of the goods passes. The Group therefore has separate performance obligations for freight/insurance services provided for sale of products under CFR and CIF Incoterms.

Freight/insurance revenue is allocated from the overall contract price at its standalone selling price (where observable) or otherwise at its estimated cost plus margin. The recognition of freight/insurance revenue is deferred until the product is delivered rather than when the product is shipped.

The Group does not disclose sales revenue from freight and insurance services separately as it does not consider that this is necessary in order to understand the impact of economic factors on the Group; and the Group's Chief Operating Decision Makers (as defined in the operating segments Note 3) do not review information specifically relating to these sources of revenue in order to evaluate the performance of business segments, neither is information on these sources of revenue provided externally.

The Group applies the practical expedient in AASB 15 *Revenue from Contracts with Customers* (AASB 15) paragraph 121 for its freight/insurance services and does not disclose information on the transaction price allocated to performance obligations that remain unsatisfied at the end of the reporting period as the performance obligations arising under sales arrangement for its commodity products have an original expected duration of one year or less.

(ii) Rendering of services

The Group's Mining Services segment earns contract and operational revenue from the provision of a range of mining services, including crushing services.

Revenue from mining services is recognised over time as the services are rendered.

4. REVENUE (CONTINUED)

As mining services are invoiced on a monthly basis based on the actual services provided or at cost plus margin incurred to date, the Group has used the practical expedient available under AASB 15 to recognise revenue based on the right to invoice, on the basis that the invoiced amount corresponds directly with the value to the customer of the Group's performance completed to date.

For crushing service contracts specifically, each tonne of ore crushed represents a separate performance obligation. Revenue from the rendering of crushing services is measured and recognised as each tonne is crushed based on a schedule of rates that is invoiced to the customer, being the estimate of the price to which the Group expects to be entitled, and a corresponding trade receivable is recognised. Mobilisation / demobilisation charges on crushing service contracts constitute variable charges that will be associated and allocated to each tonne crushed (each performance obligation) and therefore recognised based on the actual tonnes crushed each period, rather than when invoiced.

The Group applies the practical expedient in AASB 15 paragraph 121 for its mining services revenue and does not disclose information on the transaction price allocated to performance obligations that remain unsatisfied at the end of the reporting period as these are not material.

5. OTHER INCOME

Group		
	2020 \$m	2019 \$m
Net gain on disposal of property, plant and equipment	5.4	0.9
Net gain on sale of disposal group (note 13)	1,297.8	-
Interest income	14.4	2.5
Gain on bargain purchase	4.2	-
Other	4.5	7.1
Other income	1,326.3	10.5

6. EXPENSES

Group		
	2020 \$m	2019 \$m
Profit before tax includes the following specific expenses:		
Depreciation		
Plant and equipment	161.7	92.9
Depreciation capitalised to assets	(0.7)	(1.6)
Total depreciation	161.0	91.3
Amortisation		
Mine development	28.7	14.5
Other	3.9	2.8
Total amortisation	32.6	17.3
Total depreciation and amortisation	193.6	108.6
Impairment		
Exploration and mine development (note 18)	71.2	-
Intangibles (note 18)	50.0	-
Property, plant and equipment (note 18)	145.4	9.8
Trade receivables	0.2	-
Inventory (note 18)	19.0	-
Total impairment	285.8	9.8
Finance costs		
Interest on borrowings	94.2	25.1
Interest on lease liabilities	9.0	6.3
Other	1.7	2.5
Finance costs expensed	104.9	33.9
Included within other expenses:		
Net foreign exchange loss	22.7	6.1
Fair value loss on equity instruments at fair value through profit or loss	40.9	42.4
Minimum lease payments recognised as operating lease expense (i)	-	4.4
Short-term leases, low value leases and leases with variable payments (i)	0.9	-
Superannuation expense included in employee benefits expense:		
Defined contribution superannuation expense	27.7	25.6

(i) Until the end of the comparative period, leases were accounted for by applying the principles of AASB 117, which classified arrangements as either finance leases or operating leases. From 1 July 2019, the Group accounting policy was changed so that leases are recognised under the principles of AASB 16, therefore only payments associated with short-term leases, low-value leases and variable lease payments are recognised as an expense in the income statement. Refer note 1.3(a) for details of the impact on the Group of adopting the new standard.

7. INCOME TAX

(a) Income tax expense

Group		
	2020 \$m	2019 \$m
Income tax expense		
Current tax	563.1	48.7
Deferred tax - origination and reversal of temporary differences	(131.1)	20.5
Adjustment recognised for prior periods	2.0	1.8
Aggregate income tax expense	434.0	71.0
Deferred tax included in income tax expense comprises:		
Increase in deferred tax assets (note 7(b))	(73.8)	(13.7)
(Decrease)/increase in deferred tax liabilities (note 7(c))	(57.3)	34.2
Deferred tax - origination and reversal of temporary differences	(131.1)	20.5
Numerical reconciliation of income tax expense and tax at the statutory rate		
Profit before tax	1,436.2	235.9
Tax at the statutory tax rate of 30%	430.9	70.8
Tax effect amounts which are not deductible/(taxable) in calculating taxable income:		
Non allowable expenses	0.1	0.3
Research and development concessions	-	(0.9)
	431.0	70.2
Adjustment recognised for prior periods	2.0	1.8
Current year tax losses not recognised	1.0	0.4
Prior year tax losses not recognised now recouped	-	1.4
Income tax expense	434.0	71.0

Group		
	2020 \$m	2019 \$m
Amounts charged directly to equity		
Deferred tax liabilities	0.2	-
Tax losses not recognised		
Unused tax losses for which no deferred tax asset has been recognised (i)	30.0	26.7
Potential tax benefit @ 30%	9.0	8.0

(i) These losses relate to subsidiaries not within the MRL tax consolidated group that have a history of losses, do not expire, and may not be used to offset taxable income elsewhere in the Group. On this basis, the Group has not recognised deferred tax assets for these tax losses carried forward. These tax losses can only be utilised in the future if the continuity of ownership test is passed, or failing that, the continuity of business test is passed.

7. INCOME TAX (CONTINUED)

(b) Deferred tax asset

Group		
	2020 \$m	2019 \$m
Deferred tax asset		
Deferred tax asset comprises temporary differences attributable to:		
Amounts recognised in profit or loss:

Transfer to assets held for sale	-	(5.0)
Closing balance	119.8	45.5

7. INCOME TAX (CONTINUED)

(c) Deferred tax liability

Group		
	2020 \$m	2019 \$m

Deferred tax liability

Deferred tax liability comprises temporary differences attributable to:

Amounts recognised in profit or loss:		
Trade and other receivables	(5.1)	30.8
Property, plant and equipment	91.8	101.8
Exploration and evaluation	16.6	35.7
Research and development	8.3	20.0
Prepayments	10.4	-
Other	0.5	(2.7)

Deferred tax liability	122.5	185.6
------------------------	-------	-------

Movements:

Opening balance	185.6	165.7
(Credited)/charged to profit or loss	(57.3)	34.2
Charged to equity	0.2	-
Additions through business combinations (note 29)	0.9	-
(Over)/under provision from prior year	(6.9)	6.8
Transfer to liabilities associated with assets held for sale	-	(21.1)
Closing balance	122.5	185.6

Accounting policy for income tax

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Key judgement: Income tax

The Group is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Group recognises the amount of tax payable or recoverable based on management's best estimate of the most likely outcome. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

7. INCOME TAX (CONTINUED)

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Key judgement: Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the Group considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for

the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

Mineral Resources Limited (the 'head entity') and its wholly-owned Australian subsidiaries have formed an income tax group under the tax consolidation regime. The head entity and each subsidiary in the tax consolidated group continue to account for their own current and deferred tax amounts. The tax group has applied the 'separate taxpayer within group' approach in determining the appropriate amount of taxes to allocate to members of the tax group.

In addition to its own current and deferred tax amounts, the head entity also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from each subsidiary in the tax group.

Assets or liabilities arising under tax funding agreements with the tax group are recognised as amounts receivable from or payable to other entities in the tax group. The tax funding arrangement ensures that the intercompany charge equals the current tax liability or benefit of each tax group member, resulting in neither a contribution by the head entity to the subsidiaries nor a distribution by the subsidiaries to the head entity.

8. EARNINGS PER SHARE

Group		
	2020 \$m	2019 \$m
Profit after tax	1,002.2	164.9
Non-controlling interest	1.5	(1.3)
Profit after income tax attributable to the owners of Mineral Resources Limitede	1,003.7	163.6

	Number	Number
Weighted average number of ordinary shares used in calculating basic earnings per share	188,326,986	187,929,729
Weighted average number of ordinary shares used in calculating diluted earnings per share	188,326,986	187,929,729

	Cents	Cents
Basic earnings per share	532.96	87.09
Diluted earnings per share	532.96	87.09

Accounting policy for earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of Mineral Resources Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

9. CASH AND CASH EQUIVALENTS

(a) Cash and cash equivalents

	Group	
	2020 \$m	2019 \$m
Current		
Cash at bank and on hand	1,184.9	265.4
Short-term deposits and other cash equivalents	336.9	-
	1,521.8	265.4

Accounting policy for cash and cash equivalents

Cash and cash equivalents includes cash on hand, short-term deposits held with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(b) Cash flow information - Reconciliation of profit after tax to net cash from operating activities

Security deposits	1.4	1.2
Deferred consideration receivable from sale of disposal group (i)	606.1	-
	649.6	40.1

(i) The Group has recognized a fair value of \$606.1 million deferred consideration receivable arising from its right to receive a 40% interest in two lithium hydroxide modules being built in Kemerton as non-cash proceeds from the sale of Wodgina. Refer to Note 13 for further details on the sale. Fair value hierarchy disclosures are in Note 25(f).

10. TRADE AND OTHER RECEIVABLES (CONTINUED)

Expected credit losses on trade and other receivables are not material. Further information about the Group's exposure to credit and market risks, and impairment losses for trade receivables and contract assets is included in Note 25(d).

Accounting policy for trade and other receivables

Trade receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for impairment losses. Trade receivables are generally due for settlement within 30 days. Refer note 25(d) for the Group's credit risk management policies.

Impairment of trade receivables

Collectability of trade receivables is reviewed on an ongoing basis. Loss allowances for trade receivables are measured at an amount equal to lifetime expected credit losses (ECLs). Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments are considered indicators that a receivable is credit-impaired. ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive). Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

Debts which are known to be uncollectable are written off by reducing the carrying amount directly. If an impairment allowance has been recognised for a debt that then becomes uncollectable, the debt is written off against the allowance account. If an amount is subsequently recovered, it is credited against profit or loss.

Loans and other receivables

Other receivables generally arise from transactions outside the usual operating activities of the Group. Loans and other receivables are classified as financial assets held at amortised cost, less any allowance for impairment losses.

The Group's other receivables do not contain impaired assets and are not past due. Based on the credit history, it is expected that these other receivables will be received when due.

11. INVENTORIES

Group		
	2020 \$m	2019 \$m
Current		
Raw materials and stores	48.5	29.0
Ore inventory stockpiles	91.7	136.4
Work in progress	15.4	14.8
	155.6	180.2
Non-current		
Ore inventory stockpiles	35.3	-

Accounting policy for inventories

Raw materials, work in progress and finished goods are stated at the lower of weighted average cost and net realisable value. Cost comprises direct materials and delivery costs, direct labour, import duties and other taxes, an appropriate proportion of variable and fixed overhead expenditure based on normal operating capacity, and, where applicable, transfers from cash flow hedging reserves in equity. Costs of purchased inventory are determined after deducting rebates and discounts received or receivable.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

13. ASSETS HELD FOR SALE

Sale of 60% interest in Wodgina Lithium Project

In June 2019, the Group committed to selling a 60% interest in certain tenements, assets and related infrastructure, together comprising the Wodgina Lithium Project within the Commodities segment under a binding Asset Sale and Share Subscription Agreement (Sale Agreement) with Albemarle Corporation (NYSE: ALB, Albemarle). Accordingly, the 60% interest in the assets and associated liabilities was presented as a disposal group held for sale as at 30 June 2019.

The transaction completed on 1 November 2019. The Group recognised a pre-tax gain on disposal of \$1,297.8 million (post-tax \$908.5 million) in the year ended 30 June 2020.

(a) Assets and liabilities of disposal group classified as held for sale

Group		
	2020 \$m	2019 \$m

Income tax expense	(389.3)
Gain on disposal after tax	908.5

(d) Proceeds from sale of disposal group

Disposal proceeds received in the year ended 30 June 2020 included:

- Cash proceeds totalling \$1,206.1 million, comprising of \$1,187.5 million (US\$820.0 million) cash consideration and \$18.6 million completion adjustments net of disposal costs, reflected in 'cash flows from investing activities' on the statement of cash flows
- Non-cash deferred consideration of \$606.1 million, recognised in 'non-current trade and other receivables' on the balance sheet

Accounting policy for non-current assets or disposal groups classified as held for sale

Non-current assets and assets of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continued use. They are measured at the lower of their carrying amount and fair value less costs of disposal. For non-current assets or assets of disposal groups to be classified as held for sale, they must be available for immediate sale in their present condition and their sale must be highly probable.

An impairment loss is recognised for any initial or subsequent write down of the non-current assets and assets of disposal groups to fair value less costs of disposal. A gain is recognised for any subsequent increases in fair value less costs of disposal of a non-current assets and assets of disposal groups, but not in excess of any cumulative impairment loss previously recognised.

13. ASSETS HELD FOR SALE (CONTINUED)

Non-current assets are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of assets held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of disposal groups classified as held for sale are presented separately on the face of the balance sheet, in current assets. The liabilities of disposal groups classified as held for sale are presented separately on the face of the balance sheet, in current liabilities.

14. FINANCIAL ASSETS

	Group	
	2020 \$m	2019 \$m
Non-current		
Shares in listed corporations - at fair value through profit or loss	42.3	75.1
Reconciliation		
Reconciliation of the fair values at the beginning and end of the current and previous financial year are set out below:		
Opening fair value	75.1	118.1
Additions	8.1	3.4
Disposals	(1.1)	(4.0)
Revaluation	(39.8)	(42.4)
Closing fair value	42.3	75.1

Refer to note 25 for further information on fair value measurement.

Accounting policy for investments and other financial assets

Investments and other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement, except for financial assets at fair value through profit or loss. Such assets are subsequently measured at either amortised cost or fair value depending on their classification. Classification is determined based on both the business model within which such assets are held and the contractual cash flow characteristics of the financial asset unless an accounting mismatch is being avoided.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Financial assets at fair value through profit or loss

Financial assets not measured at amortised cost or at fair value through other comprehensive income (FVOCI) are classified as financial assets at fair value through profit or loss (FVTPL). Typically, such financial assets will be either: (i) held for trading, where they are acquired for the purpose of selling in the short-term with an intention of making a profit, or a derivative; or (ii) designated as such upon initial recognition where permitted. Fair value movements are recognised in profit or loss.

The Group's investments in equity instruments that are not held for trading are measured at FVTPL. An irrevocable election has not been made by management to measure any instruments at FVOCI. This election is made on an investment by investment basis.

Balance at 30 June 2020	14.4	54.4	40.0	271.3	985.8	1,365.9

Capitalised borrowing costs

The amount of borrowing costs capitalised during the year ended 30 June 2020 was not material.

In the prior year ended 30 June 2019, the amount of borrowing costs capitalised was \$21.9 million relating to the construction of the Wodgina spodumene concentrate plant which was financed for a substantial part of the financial year under a syndicated loan facility. The rate used to determine the amount of borrowing costs eligible for capitalisation was 4.33%, which is the effective interest rate (EIR) of the specific borrowing.

Assets in the course of construction

At 30 June 2020, there were no material amounts included in property, plant and equipment relating to assets in the course of construction (2019: \$468.9 million).

Impairment testing

Refer to note 18 for details of impairment testing.

Accounting policy for property, plant and equipment

Owned assets

Items of plant and equipment are stated at cost less accumulated depreciation and impairment losses. The cost of self-constructed assets includes the cost of materials, direct labour and an appropriate portion of production overheads. The cost of self-constructed and acquired assets includes (i) the initial estimate at the time of installation and during the period of use, when relevant, of the costs of dismantling and removing the items and restoring the site on which they are located, and (ii) changes in the measurement of existing liabilities recognised for these costs resulting from changes in the timing or outflow of resources required to settle the obligation or from changes in the discount rate.

Where parts of an item of plant and equipment have different useful lives, they are accounted for as separate items of plant and equipment.

15. PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

Right-of-use assets

The Group has adopted AASB 16 Leases (AASB 16) from 1 July 2019. Except for short-term leases and leases of low-value assets, right-of-use assets and corresponding lease liabilities are recognised in the balance sheet when a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Refer to note 1.3(a) for details of the impact on adoption of AASB 16.

A right-of-use asset is recognised at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the Group expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of use assets are subject to impairment or adjusted for any re-measurement of lease liabilities.

Depreciation

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment over the shorter of the lease term (where applicable) and their expected useful lives, as follows:

16. INTANGIBLES

Group		
	2020 \$m	2019 \$m
Non-current		
Goodwill - cost	1.4	1.4
Development - at cost	21.8	56.7
Patents - cost	1.7	1.7
Access rights - cost	56.7	56.7
Less: Accumulated amortisation and impairment	(35.6)	(33.1)
	21.1	23.6
Other - cost	7.1	5.0
Less: Accumulated amortisation	(5.2)	(3.7)
	1.9	1.3
	47.9	84.7

Buildings	40 years
Buildings at mine sites	10 years or usage basis
Right-of-use buildings	Shorter of 40 years or the term of the lease
Right-of-use plant and equipment	Shorter of 3 - 20 years or the term of the lease
Plant and equipment	1 - 10 years or usage basis

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Subsequent costs

The Group recognises in the carrying amount of an item of plant and equipment the cost of replacing part of such an item when that cost is incurred if it is probable that the future economic benefits embodied within the item will flow to the Group and the cost of the item can be measured reliably. All other costs are recognised in the income statement as an expense as incurred.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to prepare for their intended use or sale are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

16. INTANGIBLES (CONTINUED)

Reconciliations

Reconciliations of the written down values at the beginning and end of the current and previous financial year are set out below:

	Goodwill	Capitalised development costs	Patents	Access rights	Others	Total

Allocation of goodwill to cash-generating units

The following cash generating units have carrying amounts of goodwill:

Group		
	2020 \$m	2019 \$m
Process Minerals International Pty Ltd	1.4	1.4

Impairment testing

Refer to note 18 for details of impairment testing.

Accounting policy for intangible assets

Intangible assets acquired as part of a business combination, other than goodwill, are initially measured at their fair value at the date of the acquisition. Intangible assets acquired separately are initially recognised at cost. Indefinite life intangible assets are not amortised and are subsequently measured at cost less any impairment. Finite life intangible assets are subsequently measured at cost less amortisation and any impairment. The gains or losses recognised in profit or loss arising from the derecognition of intangible assets are measured as the difference between net disposal proceeds and the carrying amount of the intangible asset. The method and useful lives of finite life intangible assets are reviewed annually. Changes in the expected pattern of consumption or useful life are accounted for prospectively by changing the amortisation method or period.

Goodwill

Goodwill arises on the acquisition of a business. Goodwill is not amortised. Instead, goodwill is tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Impairment losses on goodwill are taken to profit or loss and are not subsequently reversed.

Research and development

Research costs are expensed in the period in which they are incurred. Development costs are capitalised when it is probable that the project will be a success considering its commercial and technical feasibility; the Group is able to use or sell the asset; the Group has sufficient resources; and intent to complete the development and its costs can be measured reliably. Capitalised development costs are amortised when it is available for use in the manner intended by management on a straight-line basis over the period of their expected benefit.

Patents and trademarks

Significant costs associated with patents and trademarks are deferred and amortised on a straight-line basis over the period of their expected benefit.

Access rights

Access rights acquired as part of a business combination are recognised separately from goodwill. The rights are carried at their fair value at the date of acquisition less accumulated amortisation and impairment losses. Amortisation is calculated based on the timing of projected cash flows of the access rights over their estimated useful lives.

17. EXPLORATION AND MINE DEVELOPMENT

Accounting policy for exploration and mine development assets

Exploration and evaluation assets

Exploration and evaluation expenditure in relation to separate areas of interest for which rights of tenure are current is carried forward as an asset in the balance sheet where it is expected that the expenditure will be recovered through the successful development and exploitation of an area of interest, or by its sale; or exploration activities are continuing in an area and activities have not reached a stage which permits a reasonable estimate of the existence or otherwise of economically recoverable reserves.

Key judgement: Exploration and evaluation costs

Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised. In addition, costs are capitalised only if expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes and changes in commodity prices. To the extent that capitalised costs are determined not to be recoverable in the future, the expenditure incurred in relation to the project or an area of interest will be written off in the period in which this determination is made.

17. EXPLORATION AND MINE DEVELOPMENT (CONTINUED)

Mine development

Development expenditure incurred by or on behalf of the Group is accumulated separately for each area of interest in which economically recoverable resources have been identified. Such expenditure comprises cost directly attributable to the construction of a mine and the related infrastructure.

Once a development decision has been taken, the carrying amount of the exploration and evaluation expenditure in respect of the area of interest is aggregated with the development expenditure and classified under non-current assets as development properties. A development property is reclassified as a mining property at the end of the commissioning phase, when the mine is capable of operating in the manner intended by management.

Depreciation is charged using the units-of-production method, with separate calculations being made for each area of interest. The units-of-production basis results in a depreciation charge proportional to the depletion of proved, probable and estimated reserves. These calculations require the use of estimates and assumptions, including the amount of recoverable reserves and estimates of future capital expenditure. The Group adopts a Run of Mine (ROM) tonnes of ore produced methodology.

Development properties are tested for impairment in accordance with the policy on impairment of assets.

Key estimate: Mineral resources and ore reserves

Resources or mineral resources refer to a concentration or occurrence of solid material of economic interest in or on the Earth's crust in such form, grade (or quality), and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade (or quality), continuity and other geological characteristics of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge, including sampling.

Ore reserves are estimates of the amount of product that can be economically and legally extracted from the Group's current mining tenements. The Group estimates its ore reserves based on information compiled by appropriately qualified persons able to interpret the geological data. The estimation of recoverable reserves is based on factors such as estimates of foreign exchange rates, commodity prices, future capital requirements, and production costs, along with geological assumptions and judgements made in estimating the size and grade of the ore body.

Changes in the reserves or resource estimates may impact on the value of exploration and evaluation assets, mine properties, property plant and equipment, provision for rehabilitation and depreciation and amortisation charges.

Stripping (waste removal) costs

As part of its mining operations, the Group incurs stripping (waste removal) costs both during the development phase and production phase of its operations.

Development stripping costs arise from the removal of overburden and other mine waste materials removed during the development of a mine site in order to access the mineral deposit. Costs directly attributable to development stripping activities, inclusive of an allocation of relevant overhead expenditure, are initially capitalised to exploration and evaluation expenditure. Capitalisation of development stripping costs ceases at the time that saleable material begins to be extracted from the mine.

On completion of development, all capitalised development stripping included in exploration and evaluation is transferred to mine development.

Production stripping commences at the time that saleable materials begin to be extracted from the mine and, under normal circumstances, continue throughout the life of the mine. Costs of production stripping are charged to the profit or loss as operating costs when the ratio of waste material to ore extracted for a "component" of the ore body is expected to be constant throughout its estimated life. A "component" is a specific section of the orebody that is made more accessible by the stripping activity. It will typically be a subset of the larger orebody that is distinguished by a separate useful economic life.

When the ratio of waste to ore is not expected to be constant, production stripping costs are accounted for as follows:

- (i) All costs are initially charged to profit or loss and classified as operation costs
- (ii) When the current ratio of waste to ore is greater than the estimated life-of-component strip ratio, a portion of the stripping costs (inclusive of an allocation of relevant overhead expenditure) is capitalised to mine development as a stripping activity asset
- (iii) The amount of production stripping costs capitalised or charged in a financial year is determined so that the stripping expense for the financial year reflects the estimated life-of-component strip ratio. The stripping activity asset is amortised on a units-of-production method over the life of the component, unless another method is more appropriate.

Life-of-component strip ratios are based on estimates of ore reserves and resources and the latest approved mine plan; they are a function of the mine design and therefore changes to that design will generally result in changes to the ratios. Changes to the estimated life-of-mine ratio are accounted for prospectively from the date of the change.

18. IMPAIRMENT OF NON-FINANCIAL ASSETS

Impairment testing

The Group tests non-financial assets for impairment:

- At least annually for indefinite life intangibles and goodwill; and
- Where there is an indication that the asset may be impaired

If the asset does not generate independent cash inflows and its value in use cannot be estimated to be close to its fair value, the asset is tested for impairment as part of the cash generating unit (CGU) to which it belongs. The recoverable amount of each CGU is determined based on the higher of an asset's fair value less costs of disposal (FVLCD) and value-in-use (VIU).

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount

18. IMPAIRMENT OF NON-FINANCIAL ASSETS (CONTINUED)

Key assumptions: Assumptions used in the impairment assessments of non-financial assets	
In determining the recoverable amount of assets where impairment indicators exist, key assumptions and estimates are used that require significant levels of judgement and are subject to risk and uncertainty that are beyond the control of the Group, including political risk, climate risk, and other global uncertainty risks, such as the impacts of COVID-19.	
Where impairment indicators exist, key assumptions contained in the cash flow projections for FVLCD and VIU models include:	
<ul style="list-style-type: none"><i>Estimates of future production, operating costs, capital expenditure, and rehabilitation:</i> the estimation of the future production driving the cash flow projections is based on a detailed data analysis that reflects current life of mine and long-term production plans. As each area of interest has specific economic characteristics, the cash flows applied have been calculated using appropriate models and key assumptions established by management;<i>Future commodity prices:</i> commodity prices are estimated with reference to externally sourced, forward consensus prices, adjusted for ore properties;<i>Future foreign exchange rates:</i> exchange rates are estimated with reference to externally sourced forward consensus rates;<i>Discount rates:</i> the cash flows are discounted using a real pre-tax discount rate of 8.3%, representing the target weighted average cost of capital for the Group, with appropriate adjustments made to reflect the risks specific to the cash generating unit;<i>Terminal values:</i> the terminal value calculation used in VIU models incorporates a nominal growth rate of 2.0% based on industry research and long-term inflation rates.	

Recognised impairment

Assets are firstly assessed for impairment at the individual level. For the current financial year, this resulted in a pre-tax total of \$285.8 million of impairments recognised in relation to various classes of assets, being:

- \$71.2 million of capitalised exploration and mine development expenditure associated with tenements in the Yilgarn region. Following a reassessment during the year of the Group's future iron ore operating plans in the Yilgarn region, the Group updated its Yilgarn Iron Ore Strategy which it announced to the ASX on 20 November 2019. The Yilgarn Iron Ore Strategy no longer places dependency on the need to mine at several deposits in which the Group had previously conducted significant exploration and development work. As a result, an impairment charge was recorded to fully write-off associated accumulated exploration and mine development expenditure;
- \$145.4 million of various idle plant and equipment was impaired to reflect a change in management's future operational plans which no longer required utilisation of these assets; \$22.5 million of this related to infrastructure associated with the Yilgarn tenements noted above;
- \$15.4 million of ore stockpiles and \$3.6 million of other inventory impaired to net realisable value; and
- \$50.0 million of capitalised development costs to align carrying values with future recovery expectations.

The Group considered assets which are assessed for impairment at the CGU level, with these assessments net of impairments summarised above. There was no resulting impairment charge for the year ended 30 June 2020 at the CGU level. There was no reversal of previous impairments recorded.

Previously recognised impairment

In the previous financial year, an impairment expense of \$9.8 million represented the write-down of certain plant and equipment in the Mining Services segment which were assessed for impairment at the individual asset level.

19. TRADE AND OTHER PAYABLES

Group		
	2020 \$m	2019 \$m
Current liabilities		
Trade payables and accruals	305.9	248.7

Lease liability	183.5	99.1
	1,190.2	1,081.7

(i) US\$700 million senior unsecured notes offering due 2027, at an interest rate of 8.125% per annum.

Refer to note 25 for further information on financial instruments.

Accounting policy for borrowings

Loans and borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

Where there is an unconditional right to defer settlement of the liability for at least 12 months after the reporting date, the loans or borrowings are classified as non-current.

Lease liability

A lease liability is recognised at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Lease payments are comprised of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or a rate are expensed in the period in which they are incurred.

Lease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right-of use asset, or to profit or loss if the carrying amount of the right-of-use asset is fully written down.

The lease liabilities are effectively secured as the rights to the leased assets, recognised in the balance sheet as right-of-use assets and revert to the lessor in the event of default.

21. EMPLOYEE BENEFITS

	Group	
	2020 \$m	2019 \$m
Current		
Employee benefits	53.4	35.6

Accounting policy for employee benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

The current provision includes amounts for vested long service leave for which the Group does not have an unconditional right to defer settlement, regardless of when the actual settlement is expected to occur. However, based on past experience, the Group does not expect all employees to take the full amount of accrued leave or require payment within the next 12 months.

22. PROVISIONS

	Group	
	2020 \$m	2019 \$m
Current		
Project Closure	10.8	4.9
Site rehabilitation	17.2	6.2
Other	1.5	0.3
	29.5	11.4
Non-current		
Project closure	9.3	8.7
Site rehabilitation	89.0	80.3
	98.3	89.0

Movements in provisions

Movements in each class of provision during the current financial year, other than employee benefits, are set out below:

	Project Closure	Site Rehabilitation closure	Other
Group - 2020	\$m	\$m	\$m
Carrying amount at the start of the year	13.6	86.5	0.3
Additional provisions recognised	6.5	19.8	1.3
Amounts used	(0.1)	(1.5)	(0.1)
Unwinding of discount	-	1.5	-
Carrying amount at the end of the year	20.0	106.3	1.5

22. PROVISIONS (CONTINUED)

Accounting policy for provisions

Provisions are recognised when the Group has a present (legal or constructive) obligation as a result of a past event, it is probable the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate specific to the liability. The increase in the provision resulting from the passage of time is recognised as a finance cost.

Key estimate: Site rehabilitation provisions

In accordance with the Group's legal requirements, provision is made for the anticipated costs of future restoration and rehabilitation of areas from which natural resources have been extracted. The provision includes costs associated with dismantling of assets, reclamation, plant closure, waste site closure, monitoring, demolition and decontamination. The provision is based upon current costs and has been determined on a discounted basis with reference to current legal requirements and current technology.

Each reporting period the impact of unwinding of the discount is recognised in the income statement as a financing cost. Any change in the restoration provision is recorded against the carrying value of the provision and the related asset, only to the extent that it is probable that future economic benefits associated with the restoration expenditure will flow to the entity, with the effect being recognised in the income statement on a prospective basis over the remaining life of the relevant operation. The restoration provision is separated into current (estimated costs arising within 12 months) and non-current components based on the expected timing of these cash flows.

Key estimate: Project closure

At the completion of some projects the Group has a liability for redundancy and the cost of relocating crushing and other mobile plant. An assessment is undertaken on the probability that such expenses will be incurred in the normal course of business for contracting services and is provided for in the financial statements.

23. ISSUED CAPITAL

Balance at 30 June 2020	526.6	(10.3)	516.3

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the Company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Treasury shares

Movements in treasury shares represent acquisition of the Company's shares on market and allocation of shares to the Company's employees from the vesting of awards and exercise of rights under the employee share-based payment plans.

24. DIVIDENDS

Dividends

	2020		2019	
	Dividend per share Cents	Total \$m	Dividend per share Cents	Total \$m
Declared and paid during the year				
Final franked dividend for the year ended 30 June 2019 (2019: 30 June 2018)	31.00	58.1	40.00	75.0
Interim franked dividend for the year ended 30 June 2020 (2019: 30 June 2019)	23.00	43.4	13.00	24.4
	54.00	101.5	53.00	99.4
Proposed				
Final franked dividend for the year ended 30 June 2020 (2019: 30 June 2019)	77.00	144.6	31.00	58.1

Franking credits

	Group	
	2020 \$m	2019 m
Franking credits available for subsequent financial years based on a tax rate of 30%	716.0	235.0

The above amounts represent the balance of the franking account as at the end of the financial year, adjusted for:

- franking credits that will arise from the payment of the amount of the provision for income tax at the reporting date
- franking debits that will arise from the payment of dividends recognised as a liability at the reporting date
- franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date

25. FINANCIAL INSTRUMENTS

(a) Capital risk management

The Group's objectives when managing capital are to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group may look to raise capital when an opportunity to invest in a business or company is seen as value adding relative to the current Company's share price at the time of the investment. The Group is actively pursuing additional investments in the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

The Group is subject to certain financing arrangement covenants and meeting these is given priority in all capital risk management decisions. There have been no events of default on financing arrangement covenants during the financial year.

The capital risk management policy remains unchanged from the prior year.

The gearing ratio at the reporting date was as follows:

	Group	
	2020 \$m	2019 \$m
Current liabilities - borrowings (note 20)	100.5	55.2
Current liabilities - lease liabilities (held for sale)	-	25.6
Non-current liabilities - borrowings (note 20)	1,190.2	1,081.7
Total borrowings	1,290.7	1,162.5
Current assets - cash and cash equivalents (note 9)	(1,521.8)	(265.4)
(Cash and cash equivalents, net of debt)/Net debt	(231.1)	897.1
Total equity	2,295.6	1,380.2
Total capital	2,064.5	2,277.3
Gearing ratio	(11%)	39%

(b) Financial risk management objectives

The Group's activities expose it to a variety of financial risks: market risk (including foreign currency risk, price risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group.

The Group uses derivative financial instruments such as forward foreign exchange contracts to hedge certain risk exposures. Derivatives are exclusively used for hedging purposes, i.e. not as trading or other speculative instruments. The Group uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks, ageing analysis for credit risk and beta analysis in respect of investment portfolios to determine market risk.

Risk management is carried out by senior finance and treasury executives ('Senior Finance and Treasury') under policies approved by the Board of Directors ('the Board'). These policies include identification and analysis of the risk exposure of the Group and appropriate procedures, controls and risk limits. Senior Finance and Treasury identifies, evaluates and hedge financial risks within the Group's operating units, and reports to the Board on a monthly basis.

(c) Market risk

Foreign currency risk

The Group undertakes certain transactions denominated in foreign currency and is exposed to foreign currency risk through foreign exchange rate fluctuations. Foreign exchange risk arises from future commercial transactions and recognised financial assets and financial liabilities denominated in a currency that is not the entity's functional currency. The risk is measured using sensitivity analysis and cash flow forecasting.

25. FINANCIAL INSTRUMENTS (CONTINUED)

The Group enters into forward exchange contracts to buy and sell specified amounts of foreign currencies in the future at stipulated exchange rates. The objective in entering the forward exchange contracts is to protect the Group against unfavourable exchange rate movements for both the contracted and anticipated future sales undertaken in foreign currencies. Certain of these foreign exchange forward contracts are designated as hedging instruments, detailed in note 25(g).

The carrying amount of the Group's foreign currency denominated financial assets and financial liabilities at the reporting date were as follows:

	Assets		Liabilities	
Group	2020 \$m	2019 \$m	2020 \$m	2019 \$m
USD denominated	654.2	57.4	1,038.4	1,020.8

The following table demonstrates the sensitivity of these foreign currency denominated financial assets and financial liabilities to a weakening/strengthening in the Australian dollar, with all other variables held constant. The impact on the Group's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives. The impact on the Group's pre-tax equity is due to changes in the fair value of forward exchange contracts designated as cash flow hedges.

	2020			2019	
	AUD strengthened/ (weakened) %	Profit before tax higher/(lower) \$m	Equity higher/(lower) \$m	Profit before tax higher/(lower) \$m	Equity higher/(lower) \$m
USD denominated	+5%	18.3	18.5	46.1	45.9
USD denominated	-5%	(20.2)	(20.4)	(51.0)	(50.7)

Commodity price risk

The Group is exposed to commodity price risk which arises from the Group's sale of iron ore, lithium direct ship ore (DSO) and lithium spodumene concentrate at contracted and/or spot prices.

	2020			2019	
	Change in price %	Profit before tax higher/(lower) \$m	Equity higher/(lower) \$m	Profit before tax higher/(lower) \$m	Equity higher/(lower) \$m
Iron Ore	+/- 10%	155.5	155.5	95.4	95.4
Lithium DSO	+/- 10%	0.9	0.9	5.3	5.3
Lithium Spodumene	+/- 10%	12.2	12.2	17.7	17.7

Equity price risk

The Group's investment in listed equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Board reviews and approves all equity investment decisions.

At the reporting date, the Group's exposure to listed equity securities at fair value was \$42.3 million (2019: \$75.1 million). A decrease of 10% (2019: 10%) on the share prices could have an impact of approximately \$4.2 million (2019: \$7.5 million) on the profit or loss attributable to the Group.

25. FINANCIAL INSTRUMENTS (CONTINUED)

Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's financial instruments that have variable interest rates.

As at the reporting date, the Group is exposed to interest rate risk on its variable rate financial instruments as follows:

	2020		2019	
	Weighted average interest rate %	Balance \$m	Weighted average interest rate %	Balance \$m
Group				
Cash at bank and on hand	0.88%	1,184.9	1.72%	265.4
Net exposure to cash flow interest rate risk		1,184.9		265.4

An analysis by remaining contractual maturities is shown in 'liquidity risk' note 25(e) below.

The Group has considered sensitivity relating to exposure to interest rate risk at reporting date. An official increase/decrease in interest rate of 100 (2019: 100) basis points would have a favourable/adverse effect on the profit before tax of \$11.8 million (2019: \$1.3 million) per annum.

(d) Credit risk

Nature of the risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group's exposure to financial position credit risk are as indicated by the carrying amounts of its financial assets, primarily from customer receivables from operating activities and deposits with financial instruments from financing activities. The Group does not have a significant exposure to any individual counterparty.

Credit risk management: trade receivables and contract assets

The Group has adopted a lifetime expected loss allowance in estimating expected credit losses to trade receivables through the use of a provisions matrix using fixed rates of credit loss provisioning. These provisions are considered representative across all customers of the Group based on recent sales experience, historical collection rates and available forward-looking information.

The Group has a strict policy for extending credit to customers, including obtaining agency credit information, confirming references and setting appropriate credit limits. The Group obtains guarantees where appropriate to mitigate credit risk and obtains letters of credit to mitigate credit risk for commodity sales. The maximum exposure to credit risk at the reporting date to trade receivables and contract assets is the carrying amount, net of any allowances for credit losses, as disclosed in the balance sheet and notes to the financial statements. The Group does not hold any collateral.

Generally, trade receivables are written off when there is no reasonable expectation of recovery. Indicators of this include the failure of a debtor to engage in a repayment plan, no active enforcement activity and a failure to make contractual payments for a period greater than 1 year.

In monitoring customer credit risk, customers are grouped according to their credit characteristics and counterparty type, including whether they arise from commodity sales, crushing and processing services or construction contracts, and the existence of previous financial difficulties. The Group's exposure to credit risk for trade receivables and contract assets by counterparty type as at the reporting date was as follows:

Group		
	2020 \$m	2019 \$m
Commodity sale customers	33.7	69.6
Crushing and processing services customers	51.5	30.9
Other mining services	47.7	13.7
Other	43.0	53.3
	175.9	167.5

25. FINANCIAL INSTRUMENTS (CONTINUED)

The Group uses an allowance matrix to measure the ECLs of trade receivables based on shared credit risk characteristics and days past due. At 30 June 2020, the Group had \$14.6 million (2019: \$29 million) of trade receivables past due. These past due receivables substantially relate to customers for whom there is no history of default. On this basis, the resulting allowance for credit losses on trade receivables is not material.

At 30 June 2020, the carrying amount of receivables and contract assets for the Group's two major customers (commodity sale customers) (2019: two commodity sale customers) totalled \$4.3 million (2019: \$50.4 million).

The Group has no customers who are credit-impaired at the reporting date.

Credit risk management: cash deposits and derivatives

The credit risk on liquid funds and derivative financial instruments is limited as the counterparties are Australian banks with high credit-ratings assigned by international credit-rating agencies.

Credit risk management: loan receivables and other financial assets

Lending to external parties may be provided; secured by acceptable collateral as defined in the Group credit policy and business unit procedures. The Group restricts its dealings to counterparties that have acceptable credit ratings. Should the rating of a counterparty fall below certain levels, Group policy dictates that approval by the Board is required to maintain the level of the counterparty exposure. Alternatively, management may consider closing out positions with the counterparty or novating open positions to another counterparty with acceptable credit ratings.

Credit risk management: financial guarantees given to banks

There is also exposure to credit risk when the Group provides a guarantee to another party. The Group's maximum exposure in this respect is the maximum amount the Group would have to pay if the guarantee is called upon. Details of contingent liabilities are disclosed in note 26.

(e) Liquidity risk

Vigilant liquidity risk management requires the Group to maintain sufficient liquid assets (mainly cash and cash equivalents) and available borrowing facilities to be able to pay debts as and when they become due and payable.

The Group manages liquidity risk by maintaining adequate cash reserves and available borrowing facilities by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities.

25. FINANCIAL INSTRUMENTS (CONTINUED)

Financing arrangements

Unrestricted access was available at the reporting date to the following lines of credit:

	Group	
	2020 \$m	2019 \$m
Total facilities

Syndicated loan facility	250.0	250.0
Senior unsecured notes	-	-
Lease liability	6.2	71.3
Other borrowings	19.8	19.9
Bank guarantee	6.1	21.1
	286.1	366.3

The bank overdraft facilities may be drawn at any time and may be terminated by the bank without notice.

25. FINANCIAL INSTRUMENTS (CONTINUED)

Remaining contractual maturities

The following tables detail the Group's remaining contractual maturity for its financial instrument liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the financial liabilities are required to be paid. The tables include both interest and principal cash flows disclosed as remaining contractual maturities and therefore these totals may differ from their carrying amount in the balance sheet.

	Weighted average interest rate	1 year or less	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Remaining contractual maturities
Group - 2020	%	\$m	\$m	\$m	\$m	\$m
Non-derivatives						
<i>Non-interest bearing</i>						
Trade payables	-	319.1	-	-	-	319.1
Interest-bearing - fixed rate						
Senior unsecured notes	8.125%	-	-	-	1,020.0	1,020.0
Lease liability	3.616%	99.3	89.9	72.7	20.9	282.8
Other	1.030%	1.2	-	-	-	1.2
Total non-derivatives		419.6	89.9	72.7	1,040.9	1,623.1

	Weighted average interest rate	1 year or less	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Remaining contractual maturities
Group - 2019	%	\$m	\$m	\$m	\$m	\$m
Non-derivatives						
<i>Non-interest bearing</i>						
Trade payables	-	259.4	-	-	-	259.4
Interest-bearing - fixed rate						
Senior unsecured notes	8.125%	-	-	-	998.1	998.1
Lease liability	4.079%	62.7	54.5	61.5	-	178.7
Other	1.250%	1.1	-	-	-	1.1
Total non-derivatives		323.2	54.5	61.5	998.1	1,437.3

The cash flows in the maturity analysis above are not expected to occur significantly earlier than contractually disclosed above.

25. FINANCIAL INSTRUMENTS (CONTINUED)

(f) Fair value of financial instruments

Fair value hierarchy

The following tables detail the Group's assets and liabilities, measured or disclosed at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Unobservable inputs for the asset or liability

	Level 1 \$m	Level 2 \$m	Level 3 \$m	Total \$m
Group - 2020				
Assets				
Financial assets held at fair value through profit or loss:				
- Shares in listed corporations	42.3	-	-	42.3
- Deferred consideration receivable from sale of disposal group	-	-	606.1	606.1
Total assets	42.3	-	606.1	648.4
Liabilities				
Other liabilities: Foreign exchange forward contracts in cash flow hedges	(5.9)	-	-	(5.9)
Total liabilities	(5.9)	-	-	(5.9)

	Level 1 \$m	Level 2 \$m	Level 3 \$m	Total \$m
Group - 2019				
Assets				
Financial assets held at fair value through profit or loss:				
- Shares in listed corporations	75.1	-	-	75.1
Other assets: Foreign exchange forward contracts in cash flow hedges	6.0	-	-	6.0
Total assets	81.1	-	-	81.1

Unless otherwise stated the carrying amount of financial instruments reflect their fair value.

The carrying amounts of trade and other receivables and trade and other payables are assumed to approximate their fair values due to their short-term nature.

Valuation techniques for fair value measurements categorised within level 3

The basis of the valuation of deferred consideration receivable is fair value. The Group obtained an independent valuation of the deferred consideration measured at fair value, arising from the sale of Wodgina on 1 November 2019 as per Note 13. The main level 3 inputs used in the independent valuation were derived and evaluated as follows:

- Discount rate, assumed fixed tolling charges per annum per feed tonne capacity, assumed variable tolling charges per wet metric tonne feed.
- Considered against the value implied by the Wodgina sale consideration for the arms-length transaction that completed on 1 November 2019.

The Group assessed that there were no material changes at the end of the reporting period since initial recognition.

25. FINANCIAL INSTRUMENTS (CONTINUED)

Accounting policy for fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value.

(g) Hedge activities and derivatives

The Group is exposed to risk from movements in foreign exchange in relation to its forecast US dollar denominated sales and as part of the risk management strategy has entered into foreign exchange forward contracts.

Certain of these foreign exchange forward contracts are designated as hedging instruments in cash flow hedges of forecast sales in US dollar.

The following contracts in relation to US Dollar revenue from forecasted sales remain open at the reporting date:

- Foreign exchange forward contracts covering US\$30 million a month up to March 2021; a total of US\$210.0 million, at an average rate of 0.6876 (2019: US\$30 million a month to May 2020, total of US\$330 at an average rate of 0.6986)

These forward contracts were entered into in April 2020 to correspond with the forecasted iron ore sales for the following 12 months to March 2021 (2019: 12 months to May 2020), and were closed out subsequent to the year end in July 2020, with an immaterial gain realised.

The hedged US Dollar revenues do not represent the full value of expected sales over this period.

The ineffective portion was immaterial in the current period.

Accounting policy for derivative financial instruments

The Group may hold derivative financial instruments from time to time to hedge its foreign currency risk exposure and a portion of its exposure to iron ore prices. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

Cash flow hedges

Cash flow hedges are used to cover the Group's exposure to variability in cash flows that is attributable to particular risks associated with a recognised asset or liability or a firm commitment which could affect profit or loss. When a derivative is designated as a cash flow hedging instrument, the effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income through the cash flow hedges reserve in equity, whilst the ineffective portion is recognised in profit or loss. Amounts taken to equity are transferred out of equity and included in the measurement of the hedged transaction when the forecast transaction occurs. Cash flow hedges are tested for effectiveness on a regular basis both retrospectively and prospectively to ensure that each hedge is highly effective and continues to be designated as a cash flow hedge. If the forecast transaction is no longer expected to occur, the amounts recognised in equity are transferred to profit or loss.

26. CONTINGENT LIABILITIES

Bank guarantees

The Group has provided guarantee to third parties in relation to performance of contracts and against warranty obligations for a defects liability period after completion of the work. Defects liability periods are usually from 12 to 18 months duration. Bank guarantees are issued as security for these obligations.

Group		
	2020 \$m	2019 \$m
Bank guarantee facility	40.0	40.0
Amount utilised	(33.9)	(18.9)
Unused facility	6.1	21.1

27. COMMITMENTS

Group		
	2020 \$m	2019 \$m
Capital commitments		
Commitments relating to the purchase of property, plant and equipment contracted for at reporting date and not recognised as liabilities, payable:		
- Within one year	167.4	94.1
Capital commitments relating to the Group's interest in a joint operation contracted for at reporting date but not recognised as liabilities, payable:		
- Within one year	27.4	-
- Within one to five years	1.2	-
	196.0	94.1

Lease commitments (i)

Committed at the reporting date and not recognised as liabilities, payable:

Within one year	-	6.6
One to five years	-	16.1
More than five years	-	21.5
	-	44.2

(i) Lease commitments committed as at 30 June 2019 and not recognised as liabilities related to operating lease commitments which included contracted amounts for arious retail outlets, warehouses, offices and plant and equipment under non-cancellable operating leases expiring within one to five years with, in some cases, options to extend. The leases have various escalation clauses. On renewal, the terms of the leases are renegotiated.

From 1 July 2019, the Group has adopted AASB 16. The Group has recognised right-of-use assets and corresponding liabilities for these leases on commencement date, except for short-term and low-value leases. Refer note 1.3(a) for further information. Refer to note 25(e) for remaining contractual maturities on lease liabilities. The Group has no non-cancellable leases to which it has committed to, and have not yet commenced, as at 30 June 2020.

28. PARENT ENTITY INFORMATION

Set out below is the supplementary information about the Parent Entity.

Income statement		
	Parent	
	2020 \$m	2019 \$m
Profit after tax	49.7	29.8
Total comprehensive income	49.7	29.8
Balance sheet		
	Parent	
	2020 \$m	2019 \$m
Total current assets	1,415.5	1,169.7
Total assets	4,724.9	1,421.5
Total current liabilities	514.8	59.6
Total liabilities	4,620.9	1,267.3
Net assets	104.0	154.2
Equity		
Issued capital	516.4	508.0
Reserves	8.8	14.7
Accumulated losses	(421.2)	(368.5)
Total equity	104.0	154.2

Guarantees entered into by the Parent Entity in relation to the debts of its subsidiaries

The Parent Entity had no guarantees in relation to the debts of its subsidiaries as at 30 June 2020 and 30 June 2019 other than as obligor under its syndicated financing facilities.

Contingent liabilities

The Parent Entity had no contingent liabilities as at 30 June 2020 (2019: \$nil).

Capital commitments - Property, plant and equipment

The Parent Entity had no capital commitments for property, plant and equipment at as 30 June 2020 (2019: \$nil).

Significant accounting policies

The accounting policies of the Parent Entity are consistent with those of the Group, as disclosed in note 1, except for the following:

- Investments in subsidiaries are accounted for at cost, less any impairment, in the Parent Entity
- Investments in associates are accounted for at cost, less any impairment, in the Parent Entity
- Dividends received from subsidiaries are recognised as other income by the Parent Entity

29. BUSINESS COMBINATIONS

Business combinations in 2020

Acquisition of Resource Development Group Limited (RDG)

On 17 June 2020, the Group acquired 1,897,587,201 fully paid ordinary shares of Resource Development Group Limited (ASX: RDG, RDG), which equates to 75 per cent of RDG's total issued capital on a fully diluted basis (the Acquisition). The Acquisition was pursuant to an Asset Sale Agreement executed on 18 March 2020 for MRL to transfer a 100% interest in the Ant Hill and Sunday Hill manganese tenements to RDG in return for MRL receiving RGD scrip, equivalent to a 75 per cent shareholding in RDG.

The Acquisition results in the restructure of MRL's non-core manganese assets, which are more relevant in scale to a company such as RDG that can provide the necessary strategic and financial support for the development of these assets, allowing MRL's core focus to increasingly be on assets that have significant scale and mine life and are able to deliver value for all shareholders.

The Acquisition has been accounted for using the Acquisition Method set out in AASB 3 Business Combinations (AASB 3). In accordance with AASB 3, the acquirer is required to fair value all acquired assets and liabilities. The initial accounting for the acquisition of RDG has been provisionally determined (as permitted by AASB 3) due to the proximity of the acquisition to the reporting date. The provisional determination will be reviewed and finalised within 12 months of the Acquisition, in accordance with AASB 3, should any new information obtained affect the fair values at the date of acquisition.

Details of the business combination are as follows:

Fair value of identifiable assets acquired and liabilities assumed:	\$m
Assets	
Cash	11.1
Receivables	5.9
Inventories	0.5
Current tax asset	0.1
Property, plant and equipment	9.3
Exploration and mine development	14.8
Deferred tax assets	0.3
Total assets	42.0
Liabilities	
Payables	(4.6)
Provisions	(0.7)
Borrowings - lease liabilities	(3.5)
Deferred tax liabilities	(0.9)
Total liabilities	(9.7)
Fair value of net identifiable assets acquired	32.3
Non-controlling interest in RDG measured at fair value	(13.3)
Total consideration transferred	(14.8)
Provisional gain on bargain purchase arising on acquisition	4.2
Consideration satisfied by:	
- Manganese assets transferred	14.8
Total consideration transferred	14.8

29. BUSINESS COMBINATIONS (CONTINUED)

Consideration transferred relates to the manganese assets and is not recognised at fair value, in accordance with AASB 3, as the manganese assets remain within the consolidated entity and MRL therefore retains control of the manganese assets. As a result, the manganese assets continue to be measured at their carrying amount immediately before the acquisition date and no gain or loss is recognised before and after the business combination.

A Gain on Bargain Purchase (as defined in AASB 3) arose in the business combination of RDG, as the fair value of the net assets of RDG that MRL obtained control over, by virtue of a 75 per cent shareholding in RDG, exceeds the fair value of the non-controlling interest. The gain on bargain purchase of \$4.2 million has been recognised as Other Income in the income statement for the year ended 30 June 2020.

The fair value of the 25 per cent non-controlling interest in RDG has been estimated with reference to the quoted market price of the shares at acquisition date.

Analysis of cash flows on acquisition:	\$m
Net cash acquired with the subsidiary (included in cash flows from investing activities)	11.1

Transaction costs relating to the acquisition were immaterial.

Given the proximity of the date of acquisition to the reporting date, RDG's contributed revenue and profit to the combined entity between the date of acquisition and the reporting date 30 June 2020 is immaterial.

If the acquisition of RDG had been completed on the first day of the financial year, Group revenues for the year would have been \$28.8 million and Group profit after tax would have been \$2.2 million higher.

Business combinations in 2019

Acquisition of additional interest in Reed Industrial Minerals Pty Ltd (RIM)

On 17 March 2019, the Group completed the purchase of an additional 6.9 per cent equity interest in Reed Industrial Minerals Pty Ltd (RIM) under a Share Sale Agreement (Sale Agreement) with Neometals Ltd (ASX: NMT) (Neometals) for the Group and Ganfeng Lithium Co., Ltd (Ganfeng) to jointly and equally acquire Neometals' 13.8 per cent equity interest. The acquisition would take the Group's interest in RIM and its underlying Mt Marion Lithium Project from 43.1 per cent to 50.0 per cent.

The Group accounts for its interest in RIM as an interest in a joint operation and will continue to do so with its 50.0 per cent interest as joint control has been maintained.

The business combination principles were applied to the acquisition of the additional 6.9 per cent interest in the joint operation. The Group's previously held 43.1 per cent interest in the joint operation was not remeasured.

The acquisition accounting balances recognised at 30 June 2019 were based on a provisional assessment of their fair value, which have since been finalised in the current year ended 30 June 2020 with no changes required to the provisional fair values of the identifiable assets acquired and liabilities assumed at the date of acquisition.

29. BUSINESS COMBINATIONS (CONTINUED)

The fair value of the additional 6.9 per cent interest in the identifiable assets acquired and liabilities assumed at the date of acquisition were:

Fair value of identifiable assets acquired and liabilities assumed:	\$m
Assets	
Cash and cash equivalents	7.5
Receivables	2.4
Inventory	2.0
Property, plant and equipment	1.7
Exploration and mine development	47.0
Total assets	60.6
Liabilities	
Trade and other payables	(7.8)
Deferred tax liability	(0.9)
Total liabilities	(8.7)
Fair value of net identifiable assets acquired	51.9
Consideration satisfied by:	
- Cash	51.9
Total consideration transferred	(51.9)
Goodwill	-

The purchase consideration is deemed to be representative of the fair value of the additional 6.9 per cent interest in the underlying assets acquired and liabilities assumed, being substantially the tenements and mine development properties of the underlying Mt Marion Lithium Project, hence no goodwill nor gain on bargain purchase arises.

Accounting policy for business combinations

The acquisition method of accounting is used to account for business combinations regardless of whether equity instruments or other assets are acquired.

The consideration transferred is the sum of the acquisition-date fair values of the assets transferred, equity instruments issued or liabilities incurred by the acquirer to former owners of the acquiree and the amount of any non-controlling interest in the acquiree. For each business combination, the non-controlling interest in the acquiree is measured at either fair value or at the proportionate share of the acquiree's identifiable net assets. All acquisition costs are expensed as incurred to profit or loss.

On the acquisition of a business, the Group assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic conditions, the Group's operating or accounting policies and other pertinent conditions in existence at the acquisition-date.

Where the business combination is achieved in stages, the Group remeasures its previously held equity interest in the acquiree at the acquisition-date fair value and the difference between the fair value and the previous carrying amount is recognised in profit or loss.

Contingent consideration to be transferred by the acquirer is recognised at the acquisition-date fair value. Subsequent changes in the fair value of the contingent consideration classified as an asset or liability is recognised in profit or loss. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity.

The difference between the acquisition-date fair value of assets acquired, liabilities assumed and any non-controlling interest in the acquiree and the fair value of the consideration transferred and the fair value of any pre-existing investment in the acquiree is recognised as goodwill. If the consideration transferred and the pre-existing fair value is less than the fair value of the identifiable net assets acquired, being a bargain purchase to the acquirer, the difference is recognised as a gain directly in profit or loss by the acquirer on the acquisition-date, but only after a reassessment of the identification and measurement of the net assets acquired, the non-controlling interest in the acquiree, if any, the consideration transferred and the acquirer's previously held equity interest in the acquirer.

29. BUSINESS COMBINATIONS (CONTINUED)

Business combinations are initially accounted for on a provisional basis. The acquirer retrospectively adjusts the provisional amounts recognised and also recognises additional assets or liabilities during the measurement period, based on new information obtained about the facts and circumstances that existed at the acquisition-date. The measurement period ends on either the earlier of (i) 12 months from the date of the acquisition or (ii) when the acquirer receives all the information possible to determine fair value.

30. INTERESTS IN SUBSIDIARIES

The consolidated financial statements incorporate the assets, liabilities and results of the following material subsidiaries in accordance with the accounting policy described in note 1:

Ownership interest			
Name	Country of incorporation	2020 %	2019 %
Crushing Services International Pty Ltd	Australia	100.00%	100.00%

*Entity incorporated during the year
**Entity acquired during the year

31. INTERESTS IN JOINT OPERATIONS

The Group has recognised its share of jointly held assets, liabilities, revenues and expenses of joint operations. These have been incorporated in the financial statements under the appropriate classifications. Information relating to joint operations that are material to the Group are set out below:

Ownership interest			
Name	Principal place of business/ Country of incorporation	2020 %	2019 %
Reed Industrial Minerals Pty Ltd	Australia	50.00%	50.00%
MARBL Lithium Joint Venture	Australia	40.00%	-

32. RELATED PARTY TRANSACTIONS

Parent Entity

Mineral Resources Limited is the Parent Entity.

Subsidiaries

Interests in subsidiaries are set out in note 30.

Joint operations

Interests in joint operations are set out in note 31.

Key management personnel

Disclosures relating to key management personnel are set out in note 33 and the Remuneration Report included in the Directors’ Report.

Transactions with related parties

The value of transactions with related parties and outstanding balances in relation to transactions with related parties were as follows:

Group				
	Transaction values for the year ended 30 June 2020 \$m	Transaction values for the year ended 30 June 2019 \$m	Balances outstanding as at 30 June 2020 \$m	Balances outstanding as at 30 June 2019 \$m
Key Management Personnel/Directors' interests:				
Properties from which the Group's operations are performed are rented from parties related to Chris Ellison and Peter Wade	(2.1)	(2.0)	-	-

Occupation of these premises date back prior to the Company's listing in 2006. The ongoing need for occupation of these premises, as well as rental arrangements, are assessed periodically. The Group has a Related Party Transaction Policy that requires the review and approval of Related Party Transactions by the Audit and Risk Committee (the Committee). A resolution is required by the Company's Board of Directors (where applicable, excluding those involved in the Related Party Transaction) to confirm that the transaction is on terms not materially less favourable than terms generally available from an unaffiliated third party under the same or similar circumstances.

Terms and conditions

All transactions were made on normal commercial terms and conditions and at market rates.

33. KEY MANAGEMENT PERSONNEL DISCLOSURES

Compensation

The aggregate compensation made to Directors and other members of key management personnel of the Group is set out below:

	Group	
	2020 \$m	2019 \$m
Short-term employee benefits	5.5	8.3
Post-employment benefits	0.1	0.2
Share-based payments	3.9	2.0
	9.5	10.5

Detailed information about the remuneration received by each KMP is provided in the Remuneration Report that is audited and forms part of the Directors’ Report.

34. SHARE BASED PAYMENTS

Expense arising from share-based payment transactions

The expense recognised for employee services received during the year is shown in the following table:

	Group	
	2020 \$m	2019 \$m
Equity-settled share-based payment transactions	6.7	3.3

Number and fair value of share awards granted during the period

		Weighted average fair value \$	Granted Number
FY20 STI plan (for Key Executives)	(Share Rights)	21.17	73,120
FY20 LTI plan (for Key Executives)	(Share Rights)	15.05	359,413
FY20 Annual and One-off Rights Plans	(Share Rights)	13.82	1,431,099

The weighted average fair value of the above equity instruments granted was determined with reference to the share price on the date of grant.

Additional information on the award schemes granted in FY20 are as follows:

- (i)

FY20 Short Term Incentive Plan (FY20 STI plan)
Executive KMP are invited to participate in the FY20 STI plan, under which awards made under the STI plan that exceed 50% of the FAR for the Managing Director or 40% of FAR for other KMP, will be settled in the form of MRL shares that vest progressively over the two years following grant, subject to continued service and application of clawback provisions. Further details on the FY20 STI plan are provided in the remuneration report.
- (ii)

FY20 Long Term Incentive Plan (FY20 LTI plan)
Executive KMP are invited to participate in the FY20 LTI plan, under which participants receive share rights in the Company, subject to four years of continuing service and testing of the performance measure over a four-year performance period. The performance measure is the four-year average ROIC enjoyed by the Company over the performance period compared with hurdles set in advance by the Board. Further details on the FY20 LTI plan are provided in the remuneration report.
- (iii)

FY20 Annual and One-off Rights Plans
Under the FY20 Annual Rights and One-off Rights Plans, eligible employees are invited to receive share rights in the Company, subject to employees remaining in service for a period of three to five years from the date of grant. Share Rights under the plan do not carry voting entitlements.

34. SHARE BASED PAYMENTS (CONTINUED)

Equity-settled awards outstanding

Details of equity-settled share awards outstanding as at the reporting date are presented in the following table:

Schemes		Grant date	Expected vesting date	Outstanding at 30 June 2020 Number	Outstanding at 30 June 2019 Number	Vesting conditions
FY16 LTI	(Share Rights)	Aug-16	Aug-16/17/18/19	-	102,774	Non-market
FY17 LTI	(Share Rights)	Aug-17	Aug-18/19/20	159,407	653,365	Non-market
FY18 LTI	(Share Rights)	Aug-18	Aug-19/20/21	384,006	410,380	Non-market
FY20 STI (for Key Executives)	(Share Rights)	Jul-20	Aug-21/22	73,120	-	Non-market
FY20 LTI (for Key Executives)	(Share Rights)	Sep-19	Aug-23	359,413	-	Non-market
FY20 Annual and One-off Rights Plans (Employees)	(Share Rights)	Sep-19	Jul-22 / Sep-24	1,317,856	-	Non-market

Outstanding balance in relation to Share Rights granted under the FY16, FY17 and FY18 LTI plans represent awards not yet vested nor issued. Shares are issued upon vesting (no exercise required) and may be subject to trading re-strictions. Outstanding balance in relation to Share Rights granted under the FY20 plans represent awards not yet exercised. No awards have vested as at reporting date.

Accounting policy for share based payments

Certain employees may receive remuneration in the form of share-based compensation.

Equity-settled

Equity-settled transactions are awards of shares, or options over shares that are provided to employees in exchange for the rendering of services.

The cost of equity-settled transactions are measured at fair value on grant date and recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

If the non-vesting condition is within the control of the Group or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Group or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

35. REMUNERATION OF AUDITORS

During the financial year the following fees were paid or payable for services provided by RSM Australia Partners, the auditor of the Company:

	Group	
	2020 \$'000	2019 \$'000
Audit services - RSM Australia Partners		
Audit or review of the financial statements	551	446
Other services - RSM Australia Partners & overseas network firms		
Taxation services	64	204
Due diligence services required for US Notes offering	-	169
	64	373
	615	819

36. EVENTS AFTER THE REPORTING PERIOD

The following significant events have arisen since the end of the financial year.

Dividend

On 19 August 2020, the Directors declared a final fully franked dividend for the year ended 30 June 2020 of 77.0 cents per share to be paid on 15 September 2020, a total estimated distribution of \$144.6 million based on the number of ordinary shares on issue as at 26 August 2020.

COVID-19 pandemic

The impact of the COVID-19 pandemic is ongoing and has not had a material impact for the Group's operations during the year ended 30 June 2020. It is not practicable to estimate the potential impact, positive or negative, after the reporting date. The challenges presented by COVID-19 are fluid and continue to change. The Group will continue to assess and update the Group's response to the COVID-19 pandemic.

Purchase of corporate headquarters

On 30 July 2020, the Group executed a contract for the sale and purchase of land and buildings intended for the Group's new corporate headquarters in Osborne Park approximating \$65.0 million inclusive of purchase price, duty and other transactional costs.

Subsequent to the reporting date, the Group terminated the lease agreement for corporate headquarters in Subiaco, which has been recognised as a right-of-use asset with a corresponding lease liability on the balance sheet as at 30 June 2020. The parties are in dispute over the termination. Given the proximity of the matter to the reporting date, the legal costs or potential claims cannot be reliably estimated as at the date of this report.

No other matter or circumstance has arisen since 30 June 2020 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

DIRECTORS' DECLARATION

In the Directors' opinion:

- the attached financial statements and notes comply with the *Corporations Act 2001*, the Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 1 to the financial statements;
- the attached financial statements and notes give a true and fair view of the Group's financial position as at 30 June 2020 and of its performance for the financial year ended on that date; and
- there are reasonable grounds to believe that the Company will be able to pay its debts as and when they be-come due and payable.

The Directors have been given the declarations required by section 295A of the *Corporations Act 2001*.

Signed in accordance with a resolution of Directors made pursuant to section 295(5)(a) of the *Corporations Act 2001*.

On behalf of the Directors

Chris Ellison
Managing Director

19 August 2020
Perth

INDEPENDENT AUDITOR’S REPORT
TO THE MEMBERS OF
MINERAL RESOURCES LIMITED

Opinion

We have audited the financial report of Mineral Resources Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated balance sheet as at 30 June 2020, the consolidated income statement, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- (i) giving a true and fair view of the Group's financial position as at 30 June 2020 and of its financial performance for the year then ended; and
- (ii) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How our audit addressed this matter
<p>Sale of 60% interest in the Wodgina Lithium Project Refer to Note 13 in the financial statements</p> <p>In June 2019, the Group committed to sell a 60% interest in certain tenements, assets and related infrastructure, together comprising the Wodgina Lithium Project under a binding Asset Sale and Share Subscription Agreement (Sale Agreement) with Albemarle Corporation (NYSE: ALB, Albemarle).</p> <p>On 1 November 2019, the Group completed its transaction with Albemarle for the sale of 60% of the Wodgina Lithium Project.</p> <p>The Group has determined that Albemarle has control over the Joint Venture arrangement and the disposal of the Wodgina Lithium Project was accounted for as a partial asset disposal.</p> <p>We determined this to be a key audit matter as the accounting treatment of the disposal is complex and the resulting gain on disposal has a significant impact on the financial results of the Group. In addition, proceeds from the sale of the disposal group included non-cash deferred consideration which was measured at fair value.</p>	<p>Our audit procedures included, among others:</p> <ul style="list-style-type: none">• Obtaining the Sale Agreement and other associated documents to understand the transaction;• Assessing the Group's determination that Albemarle has control over the Joint Venture arrangement and the transaction was a partial asset disposal;• Assessing the accuracy and completeness of assets and liabilities of the disposal group at the date of disposal;• Agreeing the proceeds of the consideration transferred to the Sale Agreement, • other associated documents and to the bank account; and• Reviewing management's determination of the fair value of the non-cash consideration.
<p>Impairment consideration for Intangible Assets Refer to Note 16 in the financial statements</p> <p>For the year ended 30 June 2020, the Group has performed an impairment assessment over the capitalised development costs as part of its annual impairment testing process for intangible assets not yet available for use by comparing it's carrying amount with its future recoverable amount.</p> <p>This was considered a key audit matter due to the significant judgment involved in the impairment assessment which resulted in a \$50.0 million impairment charge in relation to capitalised development costs.</p>	<p>Our audit procedures included, among others:</p> <ul style="list-style-type: none">• Updating our understanding of the nature of the capitalised development costs;• Assessing the basis used by management to determine the recoverable amount of the capitalised development costs;• Evaluating the assumptions used by management in determining the recoverable amount; and• Assessing the appropriateness of the impairment charge recorded against capitalised development costs.

Impairment consideration for Mine Development and Exploration Expenditure Refer to Notes 17 and 18 in the financial statements	
<p>The Group has capitalised mine development and exploration expenditure with a carrying value of \$344.4 million and \$132.0 million as at 30 June 2020 respectively.</p> <p>This was considered a key audit matter due to the significant judgment involved in determining whether there are any indicators of impairment and appropriateness of the resulting impairment charges.</p> <p>Areas of judgment include:</p> <ul style="list-style-type: none">Assessing the risk of impairment of assets associated with tenements in the Yilgarn region following the reassessment of the Yilgarn Iron Ore Strategy. An impairment charge of \$71.2 million was recorded against mine development and exploration expenditure and \$22.5 million against related infrastructure recorded in property, plant and equipment; andAssessing whether any impairment indicators existed in its cash generating units (CGU) which would require impairment testing to be performed.	<p>Our audit procedures included, among others:</p> <ul style="list-style-type: none">Assessing the appropriateness of the Group's impairment charge recorded against the assets associated with the tenements in the Yilarn region; andCritically assessing and evaluating management's assessment that no indicators of impairment existed in relation to its cash generating units.
Impairment consideration for individual idle assets Refer to Note 18 in the financial statements	
<p>For the year ended 30 June 2020, management have performed an impairment assessment over individual assets in property, plant and equipment.</p> <p>This was considered a key audit matter as the assessment resulted in a \$145.4 million impairment of various idle plant and equipment to reflect a change in management's future operational plans which no longer required utilisation of these assets. \$22.5 million of this impairment charge related to infrastructure associated with the Yilgarn tenements recorded in property, plant and equipment.</p>	<p>Our audit procedures included, among others:</p> <ul style="list-style-type: none">Understanding the nature of idle plant and equipment;Assessing the appropriateness of the impairment charge recorded against individual assets in plant and equipment; andCritically assessing and evaluating management's assessment that the remaining idle assets are recoverable and will be available for use and redeployed in future financial periods.

Other Information <p>The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2020, but does not include the financial report and the auditor's report thereon.</p> <p>Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.</p> <p>In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.</p> <p>If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.</p> Responsibilities of the Directors for the Financial Report <p>The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the <i>Corporations Act 2001</i> and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.</p> <p>In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.</p> Auditor's Responsibilities for the Audit of the Financial Report <p>Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.</p> <p>A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: https://www.auasb.gov.au/auditors_responsibilities/ar1.pdf. This description forms part of our auditor's report.</p>

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included within the directors' report for the year ended 30 June 2020.
In our opinion, the Remuneration Report of Mineral Resources Limited, for the year ended 30 June 2020, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*.
Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
