### **About Advanced Human Imaging:**

AHI has developed and patented a proprietary technology stack that simplifies the collection of measurements across the human form using only a smartphone. This allows end users to privately and accurately check, track, and assess themselves in conjunction with known health risk indicators.

AHI's multi-layered solution is made available to partners via an embeddable Software Development Kit (SDK) allowing partners to unlock a multitude of biometric markers through their smartphone application.

Our goal is to assist our partners by empowering their consumers with this capability. This in return gives our partners the ability to assess, assist, and communicate outcomes with their consumers when navigating day to day life.

Our technology targets multiple industries, including mHealth, Life & Health Insurance, Fitness, and Apparel.
