

KEY LITHIUM TARGETS IDENTIFIED FOR WYEMANDOO DRILLING

Highlights

- Drilling commences at maiden hole for the Wyemandoo Rubidium-Lithium Project
- Key lithium targets identified following extensive sampling program
- Targeting two pegmatite loop structures that produced anomalous Lithium (up to 2.06% Li₂O) and Rubidium (up to 1.7% Rb) values from prior rock chip sampling
- Aldoro to place focus on newly identified Lithium drill locations

Aldoro Resources Limited (**Aldoro, The Company**) (ASX: **ARN**) is pleased to announce the commencement of the maiden drilling campaign at its Wyemandoo critical metal pegmatite Project.

Drilling contractors, Three Rivers Drilling, has commenced drilling a 200m vertical hole into the northern loop structure as part of locating a feeder to the tree-like model interpreted to feed the local dipping sills. The Reverse Circulation (**RC**) drill programme is initially focused on defining the geological setting for the dykes and sills with 5 vertical and 21 inclined holes with an estimated 3,500m to 4,200m over the northern and southern loop structures. Strategically, the programme will be geologically modelled as it progresses, allowing flexible modifications dictated by the morphology of the pegmatite intrusives encountered. Figure 1 below outlines the revised drilling programme and its proposed holes. Please refer to ASX company announcements dated 27/10/2021 and 28/2/2022 for full analytical results as referenced in Figure 1.

The Company shall update the market on progress of drilling as required.

About Aldoro Resources

Aldoro Resources Ltd is an ASX-listed (**ASX: ARN**) mineral exploration and development company. Aldoro has a portfolio of gold and nickel focused advanced exploration projects, all located in Western Australia. The Company's flagship project is the Narndee Igneous Complex, which is prospective for Ni-Cu-PGE mineralisation. The Company's other Ni-Cu-PGE projects include the Cathedrals Belt Nickel Project, with a significant tenement holding surrounding St George Mining's (**ASX: SGQ**) Mt Alexander Project, the Leinster Nickel Project (Ni), and the Windimurra Igneous Complex (Ni-Cu-PGE, Li).
