2.3 Consider the Entitlement Offer carefully in light of your particular investment objectives and circumstances

The Entitlement Offer is being made pursuant to provisions of the Corporations Act which allow entitlement offers to be made without a prospectus. This Retail Offer Booklet does not contain all of the information which may be required in order to make an informed decision regarding an Application for New Shares offered under the Entitlement Offer.

As a result, it is important for you to read carefully and understand the information on OBM and the Entitlement Offer made publicly available, prior to deciding whether to take up all or part of your Entitlement or do nothing in respect of your Entitlement. In particular, please refer to this Retail Offer Booklet and other announcements made available on the ASX website relating to OBM.

Please consult with your stockbroker, accountant or other professional adviser if you have any queries or are uncertain about any aspect of the Entitlement Offer. You should also refer to the "Key Risks" section of the Investor Presentation included in Section 4 of this Retail Offer Booklet.

2.4 How Eligible Retail Shareholders Can Accept or Renounce the Entitlement Offer

2.4.1 If you wish to take up all of your Entitlement

If you wish to take up all of your Entitlement, please pay your Application Monies via BPAY® by no later than 5.00pm (Perth time) on Thursday, 17 March 2022 by following the instructions set out on the personalised Entitlement and Acceptance Form. Alternatively, you may submit your payment via cheque. You may also apply for Additional Shares to your Entitlement pursuant to the Shortfall Facility as set out in Section 2.8.

If you are unable to pay by BPAY® (for example if you are a New Zealand based shareholder without an Australian bank account) or are having difficulty paying by BPAY® please call the Offer Information Line on 1300 850 505 (within Australia) or +61 3 9415 4000 (outside Australia) between 8.30am and 5.00pm (AEDT) on Monday to Friday, before the Retail Entitlement Offer closes on Thursday, 17 March 2022.

If you take up and pay for all of your Entitlement, before the close of the Entitlement Offer, it is expected that you will be issued New Shares on 24 March 2022.

OBM's decision on the number of New Shares to be issued to you will be final.

OBM also reserves the right (in its absolute discretion) to reduce the number of New Shares issued if OBM believes an applicant's claim to be overstated or if an applicant or their nominees fail to provide information to substantiate their claims to OBM's satisfaction.

Entitlements are non-renounceable and will not be tradeable on ASX or otherwise transferable. Eligible Retail Shareholders who do not take up their rights in full will not receive any value in respect of those rights they do not take up.

If you do not take up your Entitlement in full, you will have your percentage holding in the Company reduced as a result of dilution by the New Shares issued under the Entitlement Offer.

2.4.2 If you wish to take up part of your Entitlement

If you wish to take up part of your Entitlement and apply for New Shares, please pay your Application Monies via BPAY® by no later than 5.00pm (Perth time) on Thursday, 17 March 2022 by following the instructions set out on the personalised Entitlement and Acceptance Form for the amount of New Shares you wish to apply. Alternatively, you may submit your payment via cheque.

If you are unable to pay by BPAY® (for example if you are a New Zealand based shareholder without an Australian bank account) or are having difficulty paying by BPAY® please call the Offer Information Line on 1300 850 505 (within Australia) or +61 3 9415 4000 (outside Australia) between 8.30am and 5.00pm (AEDT) on Monday to Friday, before the Retail Entitlement Offer closes on Thursday, 17 March 2022.

Entitlements are non-renounceable and will not be tradeable on ASX or otherwise transferable. Eligible Retail Shareholders who do not take up their rights in full will not receive any value in respect of those rights they do not take up.

If you do not take up your Entitlement in full, you will have your percentage holding in the Company reduced as a result of dilution by the New Shares issued under the Entitlement Offer.

2.4.3 If you wish to do nothing, in which case your Entitlement will lapse and you will receive no value for those lapsed Entitlements

Your Entitlement is non-renounceable, which means it is non-transferrable and cannot be sold, traded on ASX or any other exchange, nor can it be privately transferred.

If you take no action you will not be allocated New Shares and your Entitlement will lapse. Shareholders who do not take up their Entitlements will not receive any payment or value for those Entitlements they do not take up.

Eligible Retail Shareholders who do not participate fully in the Retail Entitlement Offer will have their percentage holding in OBM diluted.

2.5 Ineligible Shareholders

All Shareholders who are not Eligible Retail Shareholders are ineligible Shareholders (**Ineligible Shareholders**). Ineligible Shareholders will not be entitled to participate in the Retail Entitlement Offer.

OBM has determined pursuant to ASX Listing Rule 7.7.1 that it would be unreasonable on this occasion to extend the Entitlement Offer to Ineligible Shareholders, having regard to the number of Ineligible Shareholders, the number and value of securities to be offered to Ineligible Shareholders and the costs of complying with the legal and regulatory requirements which would apply to an offer of securities to Ineligible Shareholders in various jurisdictions.

OBM has obtained approval from ASIC to appoint Euroz Hartleys as nominee for the purposes of section 615 of the Corporations Act to sell New Shares which would otherwise have been available to Ineligible Shareholders had they been eligible to participate in the Retail Entitlement Offer. Euroz Hartleys will not be paid a fee with respect to its role as nominee. However, Euroz Hartleys is also an Underwriter and its fees for its role as Underwriter are set out in section 5.8.

Euroz Hartleys will arrange the sale of New Shares which would have been offered to the Ineligible Shareholders. OBM will arrange for the proceeds of sale (if any), net of expenses, to be distributed to Ineligible Shareholders in proportion to their Entitlements at the Record Date.

Neither the Company nor Euroz Hartleys will be liable for the failure to sell the New Shares or the failure to sell the New Shares at any particular price.

2.6 Payment

You can pay by BPAY® or by cheque.

If you are unable to pay by BPAY® (for example if you are a New Zealand based shareholder without an Australian bank account) or are having difficulty paying by BPAY® please call the Offer Information Line on 1300 850 505 (within Australia) or +61 3 9415 4000 (outside Australia) between 8.30am and 5.00pm (AEDT) on Monday to Friday, before the Retail Entitlement Offer closes on Thursday, 17 March 2022.

Cash payments will not be accepted. Receipts for payment will not be issued.

OBM will treat you as applying for as many New Shares as your payment will pay for in full up to your Entitlement.

Any Application Monies received for more than your Entitlement to New Shares will be refunded as soon as practicable after the close of the Entitlement Offer. No interest will be paid to applicants on any Application Monies received or refunded.

Payment by BPAY® or EFT

For payment by BPAY® or EFT, please follow the instructions on the personalised Entitlement and Acceptance Form. You can only make payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions.

If you are paying by EFT, please make sure you use the unique reference number on your personalised Entitlement and Acceptance Form. Failure to do so may result in your funds not being allocated to your application and New shares subsequently not issued.

If you are paying by BPAY®, please make sure you use the specific Biller Code and your unique Customer Reference Number (**CRN**) on your personalised Entitlement and Acceptance Form. If you have multiple holdings and consequently receive more than one personalised Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those holdings only use the CRN or unique reference number specific to that holding. If you do not use the correct CRN or unique reference number specific to that holding your Application will not be recognised as valid.

Please note that should you choose to pay by BPAY® or EFT:

- you do not need to submit your personalised Entitlement and Acceptance Form but are taken to make the declarations, representations and warranties on that Entitlement and Acceptance Form and in Section 2.8; and
- if you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares which is covered in full by your Application Monies.

It is your responsibility to ensure that your BPAY® or EFT payment is received by the Share Registry by no later than 5.00pm (Perth time) on Thursday, 17 March 2022. You should be aware that your financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration in the timing of when you make payment.

Payment by cheque

For payment by cheque, you should complete your personalised Entitlement and Acceptance Form in accordance with the instructions on the form and return it accompanied by a cheque in Australian currency for the amount of the Application Monies, payable in Australian dollars to **"ATF Ora Banda Mining Limited"** and crossed **"Not Negotiable"**.

Your cheque must be:

- for an amount equal to \$0.05 multiplied by the number of New Shares that you are applying for; and
- in Australian currency drawn on an Australian branch of a financial institution.

You should ensure that sufficient funds are held in relevant account(s) to cover the Application Monies as your cheque will be processed on the day of receipt. If the amount of your cheque for Application Monies (or the amount for which the cheque clears in time for allocation) is insufficient to pay in full for the number of New Shares you have applied for in your personalised Entitlement and Acceptance Form, you will be taken to have applied for such lower whole number of New Shares as your cleared Application Monies will pay for (and to have specified that number of New Shares on your personalised Entitlement and Acceptance Form). Alternatively, your application will not be accepted.

2.7 Mail

To participate in the Entitlement Offer, your payment must be received no later than the close of the Entitlement Offer, being 5.00pm (AWST) on 17 March 2022 (unless extended). All payments made by cheque must be drawn on an Australian Bank, made payable in Australian currency to “**ATF Ora Banda Mining Limited**” and crossed “**Not Negotiable**”. If you make payment via cheque, you should mail your completed personalised Entitlement and Acceptance Form together with Application Monies to:

Mailing Address

Computershare Investor Services Pty Limited
GPO BOX 505 Melbourne Victoria 3001 Australia

Personalised Entitlement and Acceptance Forms and Application Monies will not be accepted at other offices of the Share Registry.

2.8 Shortfall Facility

A Shortfall will arise at the Retail Closing Date if valid Applications received for New Shares under the Retail Entitlement Offer are less than the number of New Shares under this Retail Offer Booklet.

New Shares not taken up by Eligible Shareholders will become available as Shortfall under the shortfall facility (**Shortfall Facility**). Eligible Shareholders who subscribe for their Entitlement in full may apply for additional New Shares under the Shortfall Facility (**Additional Shares**).

There is no guarantee regarding the number of Additional Shares (if any) that will be available to Eligible Shareholders under the Shortfall Facility. This will depend on the extent to which Shareholders have taken up their Entitlement. If all Entitlements are taken up then there will be no Additional Shares available under the Shortfall Facility.

In the event that demand for Additional Shares under the Shortfall Facility exceeds the number of Additional Shares that are available, then there will be a scale back at the Company's discretion. The Additional Shares will be allocated to Eligible Shareholders who have subscribed with valid Applications for their full Entitlements under the Retail Entitlement Offer, and who subscribe with valid Applications for Additional Shares in excess of their Entitlements with such Additional Shares subject to scale back at the Company's discretion (if required). However, the Company will only issue such Additional Shares pursuant to an Application for Additional Shares where the Directors are also satisfied that the issue of the Additional Shares will not increase the applicant's voting power above 19.99%. Additional Shares offered pursuant to the Shortfall Facility will be issued at the same price as the Shares offered to Eligible Shareholders under the Retail Entitlement Offer.

Any New Shares not allocated and issued under the Shortfall Facility will be subscribed for by the Underwriters in accordance with the terms of the Underwriting Agreement. In the event the Underwriting Agreement is terminated, the Directors reserve the right, subject to the requirements of the Listing Rules and the Corporations Act, to place any Additional Shares under the Shortfall Facility at their discretion within 3 months after the Retail Closing Date, and further reserve the right to engage one or more brokers to act as lead manager(s) to the placement of Additional Shares at that same time.

2.9 Representations by acceptance

By applying for New Shares under the Retail Entitlement Offer (including making a payment by BPAY®), you will be deemed to have represented to OBM that you are an Eligible Retail Shareholder and:

- acknowledge that you have read and understand this Retail Offer Booklet and your personalised Entitlement and Acceptance Form in their entirety;

3 Australian Taxation Considerations

This section is a general summary of the Australian income tax, goods and services tax (**GST**) and stamp duty implications of the Entitlement Offer for certain Eligible Retail Shareholders.

Neither OBM nor any of its officers or employees, nor its taxation or other advisers, accepts any liability or responsibility in respect of any statement concerning taxation consequences, or in respect of the taxation consequences.

The comments in this section deal only with the Australian taxation implications of the Entitlement Offer if you:

- are a resident for Australian income tax purposes; and
- hold your Shares on capital account.

The comments do not apply to you if you:

- are not a resident for Australian income tax purposes; or
- hold your Shares as revenue assets or trading; or
- acquired the Shares in respect of which the Entitlements are issued under any employee share scheme or where the New Shares are acquired pursuant to any employee share scheme;
- are subject to the Taxation of Financial Arrangement (**TOFA**) provisions contained in Division 230 of the *Income Tax Assessment Act 1997* (Cth); or
- acquired Entitlements otherwise than because you are an Eligible Retail Shareholder.

The comments in this section are necessarily general in nature and are based on the Australian tax legislation and administrative practice in force as at the date of this Retail Offer Booklet. They do not take into account any financial objectives, tax positions, or investment needs of Eligible Retail Shareholders. The comments do not take into account or anticipate changes in Australian tax legislation or future judicial or administrative interpretations of law after this time unless otherwise specified. The comments also do not take into account tax law of any country other than Australia.

The taxation implications of the Entitlement Offer will vary depending upon your particular circumstances. Accordingly, you should seek and rely upon your own professional advice before concluding on the particular taxation treatment that will apply to you.

3.1 Issue of Entitlements

The issue of the Entitlements should not, of itself, result in any amount being included in the assessable income of an Eligible Retail Shareholder.

3.2 Take-up of Entitlements

New Shares will be acquired where the Eligible Retail Shareholder takes-up all or part of their Entitlement under the Entitlement Offer. An Eligible Retail Shareholder should not derive any assessable income, or make any capital gain or capital loss at the time of taking up their Entitlement under the Entitlement Offer. For Australian capital gains tax (CGT) purposes, each New Share should:

- be taken to have been acquired on the date the New Share is issued to the Eligible Retail Shareholder; and
- have a cost base (and reduced cost base) that is equal to the Offer Price that is payable for the New Share plus certain non-deductible incidental costs incurred in acquiring, holding and disposing the New Share.

3.3 Lapse of Entitlement

If an Eligible Retail Shareholder does not take-up all or part of their Entitlement in accordance with the instructions set out above, then that Entitlement will lapse and the Eligible Retail Shareholder will not receive any consideration.

There should be no Australian tax implications for an Eligible Retail Shareholder from the lapse of all or some of their Entitlements.

3.4 Dividends on New Shares

Any future dividends or other distributions made in respect of New Shares will constitute assessable income of an Eligible Retail Shareholder and will be subject to the same income taxation treatment as dividends or other distributions made on Existing Shares held in the same circumstances.

3.5 Disposal of New Shares

The disposal of a New Share will be a disposal for CGT purposes.

An Eligible Retail Shareholder should make a capital gain if the capital proceeds on disposal exceed the cost base of the New Share. An Eligible Retail Shareholder should make a capital loss if the capital proceeds are less than the reduced cost base of the New Share.

An Eligible Retail Shareholder that is an individual, complying superannuation entity or trustee and that has held their New Shares for at least 12 months (not including the dates of acquisition and disposal of the New Shares) at the time of disposal should be entitled (subject to meeting other conditions) to apply the CGT discount to reduce the capital gain (after the application of any current year or carry forward capital losses). The CGT discount is 50% for individuals and entities acting as trustees, and 33⅓% for complying superannuation entities.

The CGT discount is not available for companies (unless shares are held by the company in the capacity as trustee).

It is proposed that managed investment trusts (MITs) and attribution managed investment trusts (AMITs) will be prevented from applying the 50% CGT discount at the trust level (but will still be able to distribute such income as a capital gain that can be discounted in the hands of the beneficiary). This proposed change is yet to be enacted and is expected to apply from the income years commencing on or after three months after the date of Royal Assent of the enabling legislation. If a capital loss arises on disposal of the New Shares, the capital loss can only be used to offset capital gains; i.e. the capital loss cannot be used to offset amounts contributing to taxable income that are not capital gains. However, if the capital loss cannot be used in a particular income year it can be carried forward to use in future income years, provided certain tests are satisfied.

3.6 Other Australian taxes

No Australian GST or stamp duty will be payable by Eligible Retail Shareholders in respect of the issue or exercise of the Entitlements or the acquisition of New Shares.

There may be additional announcements made by OBM after the date of this Retail Offer Booklet and throughout the period that the Entitlement Offer is open that may be relevant to your consideration of whether to take up or do nothing in respect of your Entitlement. Therefore, it is prudent that you check whether any further announcements have been made by OBM (by visiting the ASX website at www.asx.com.au) before submitting your Application to take up your Entitlement.

No party other than OBM has authorised or caused the issue of this Information, or takes any responsibility for, or makes, any statements, representations or undertakings in this Information.

This Information is important and requires your immediate attention.

You should read this Information carefully and in its entirety before deciding how to deal with your Entitlement. In particular, you should consider the risk factors outlined in the “Key Risks” section of the Investor Presentation included in Section 4 of this Retail Offer Booklet, any of which could affect the operating and financial performance of OBM or the value of an investment in OBM.

You should consult your stockbroker, accountant or other professional adviser to evaluate whether or not to participate in the Entitlement Offer.

5.1 Eligible Retail Shareholders

This information contains an offer of New Shares to Eligible Retail Shareholders in Australia and New Zealand and has been prepared in accordance with section 708AA of the Corporations Act as notionally modified by ASIC.

Eligible Retail Shareholders are those persons who:

- are registered as a holder of Existing Shares as at the Record Date;
- have a registered address on the Share Registry in Australia and New Zealand, is an Institutional Investor in another Permitted Jurisdiction, or are a person that the Company has determined in its discretion is an Eligible Retail Shareholder;
- are not in the United States and are not acting for the account or benefit of a person in the United States (to the extent such a person holds Shares for the account or benefit of such persons in the United States);
- the Company determines in its absolute discretion did not receive an invitation or an offer to participate in (other than as a nominee, trustee or custodian, in each case in respect of other underlying holdings), or were otherwise ineligible to participate under, the Institutional Entitlement Offer; and

are eligible under all applicable securities laws to receive an offer under the Retail Entitlement Offer without a prospectus or other disclosure document or any lodgement, filing, registration or qualification.

Shareholders who are not Eligible Retail Shareholders are Ineligible Shareholders.

OBM reserves the right to determine whether a Shareholder is an Eligible Retail Shareholder or an Ineligible Shareholder.

Applying for New Shares under the Retail Entitlement Offer (including making a payment by BPAY®), you will be taken to have represented and warranted that you satisfy each of the criteria listed above to be an Eligible Retail Shareholder. Nominees, trustees or custodians are therefore advised to seek independent professional advice as to how to proceed.

OBM has decided that it is unreasonable to make offers under the Retail Entitlement Offer to Shareholders who have registered addresses outside Australia and New Zealand, having regard to the number of such holders in those places and the number and value of the New Shares that they would be offered, and the cost of complying with the relevant legal and regulatory requirements in those places. OBM may (in its absolute discretion) extend the Retail Entitlement Offer to Shareholders who have registered addresses outside Australia and New Zealand in accordance with applicable law.

5.2 Ranking of New Shares

New Shares issued under the Retail Entitlement Offer will be fully paid and rank equally in all respects with Existing Shares. The rights and liabilities attaching to the New Shares are set out in the Constitution, a copy of which is available at <https://orabandamining.com.au/investor-centre/>

5.3 Risks

The Investor Presentation details important factors and risks that could affect the financial and operating performance of OBM. You should refer to the “Key Risks” Section of the Investor Presentation released to ASX on 22 February 2022 and also included in Section 4 of this Retail Offer Booklet. You should consider these factors in light of your personal circumstances, including financial and taxation issues, before making a decision in relation to your Entitlement.

5.4 No cooling off rights

Cooling off rights do not apply to an investment in New Shares. You cannot withdraw your Application once it has been accepted.

5.5 No Entitlements trading

Entitlements are non-renounceable and so they cannot be traded on ASX or any other exchange, nor can they be privately transferred.

5.6 Rounding of Entitlements

Where fractions arise in the calculation of an Entitlement, they will be rounded up to the nearest whole number of New Shares.

5.7 Capital structure

After the issue of the maximum number of New Shares under the Offer, the capital structure of OBM (on an undiluted basis, and assuming no options on issue are exercised prior to settlement of the Retail Entitlement Offer) is expected to be as follows (subject to rounding of fractional Entitlements):

Existing Shares currently on issue	974,224,505
Number of New Shares to be issued under the Placement	100,000,000
Number of New Shares to be issued under the Entitlement Offer ²	299,761,386
Maximum total Shares on issue on completion of the Offer	1,373,985,891

5.8 Underwriting of the Entitlement Offer

Customary with these types of agreements:

- (a) the obligations of the Underwriters are subject to the satisfaction of certain conditions precedent documented in the Underwriting Agreement;
- (b) the Company and the Underwriters have given certain representations, warranties and undertakings in connection with (amongst other things) the Entitlement Offer;
- (c) the Company has agreed, subject to certain carve outs, to indemnify the Underwriters, their affiliates, successors and related bodies corporate, and each director, officer, partner, agent, representative, advisor or employee of the Underwriters (or any of their affiliates, successors or related bodies corporate), individually and collectively, against, and holds them harmless from, all claims, demands, losses, damages, costs or any allegation, debt, cause of action, liability, claim, proceeding, suit or demand liabilities, arising out of or in connection with the Offer, the Offer documents, or the appointment of the Underwriters pursuant to the Underwriting Agreement, in all cases as a result of either the Offer documents being false or misleading or incomplete or the Company breaching applicable laws or a term of the Underwriting Agreement;
- (d) the Underwriters may (in certain circumstances, having regard to whether the relevant event has had, or could be expected to have, a material adverse effect on the Company or the Offer, or lead to the contravention of applicable laws) terminate the Underwriting Agreement and be released from its further obligations under it (subject to the survival of certain obligations) on the occurrence of certain events, including but not limited to where:

² This does not include any fractional entitlements.

- (vi) ASX announces or informs the Company (including verbally) that the Company will be removed from the Official List or that Shares will be delisted or suspended from quotation by ASX for any reason, provided that, for the avoidance of doubt, this does not include any trading halt that has been obtained by the Company with the Underwriters' prior written consent;
- (vii) ASX announces or informs the Company (including verbally) that unconditional approval (or approval subject to customary listing conditions) by the ASX for Official Quotation of the New Shares will be refused or not granted, or if granted, such approval is withdrawn;
- (viii) the Company is prevented from allotting and issuing New Shares in accordance with the Underwriting Agreement and the timetable;

 - (xiii) there is an adverse change, or an event occurs that is likely to give rise to an adverse change, in the business, assets, liabilities, financial position or performance, operations, management, outlook or prospects of the Company or the Group (in so far as the position in relation to any entity in the Group affects the overall position of the Company);

 - (ii) a management fee of 2% of the proceeds received under the Retail Entitlement Offer and a distribution fee of 4% of the proceeds received under the Retail Entitlement Offer on the Retail Settlement Date in their Respective Proportions,

- (h) further, neither the Underwriters and the Company acknowledge and agree that nothing in or related to the Underwriting Agreement, the prior relationship between the parties, any services provided or representations made by the Underwriters to the company in connection with the Entitlement Offer or Placement or prior to the date of the Underwriting Agreement or any other matter represents or implies any fiduciary relationship or any other category of commercial relationship recognised at law or in equity as giving rise to forms of specific rights and obligations, except the contractual rights expressly set out in the Underwriting Agreement. By entering into the Underwriting Agreement the Company is deemed to have provided its informed consent to the exclusion of any such fiduciary relationship or duty.

The Underwriting Agreement also contains a number of representations and warranties from the Company and each of the Underwriters that are considered standard for an agreement of this type.

5.9 Potential impact on control

Hawke's Point has a current voting power of approximately 39.5% of the Existing Shares in the Company.

Hawke's Point has committed to take up the whole of its pro rata Entitlement under the Entitlement Offer, representing 118,440,100 New Shares with a total value of approximately \$5,922,005.

Hawke's Point has agreed to sub-underwrite the Entitlement Offer (excluding its own Entitlement under the Retail Entitlement Offer as set out above). Hawke's Point has entered into a Commitment and Sub-underwriting Letter with the Joint Lead Managers and Underwriters. Hawke's Point will not receive a fee for its sub-underwriting.

There are no significant events that could lead to the Commitment and Sub-underwriting Letter being terminated, other than termination of the Underwriting Agreement. If Hawke's Point is required to take up its full sub-underwriting allocation, it and its associates could increase their voting power in OBM by 39.5% up to 53.7% on completion of the Entitlement Offer.

This maximum voting power assumes the following:

- Hawke's Point subscribes for, and is allocated, its full entitlement under the Retail Entitlement Offer;
- no shareholders other than Hawke's Point participate in the Entitlement Offer;
- no shareholders subscribe for, and are allocated, New Shares under the top-up facility;
- Hawke's Point takes up its full sub-underwriting allocation; and
- no New Shares are issued under the Placement.

However, as announced by the Company on 24 February 2022, the Company has received firm commitments of \$5 million for the Placement, therefore if the Placement settles and \$5 million worth of New Shares are issued, Hawke's Point's maximum voting power will be 49.8%.

Additionally, if following completion of the Offer, Hawke's Point's (and its associates') voting power in the Company is less than its voting power prior to the Offer (being 39.5%), the Company has committed to issue to Hawke's Point (via a placement) a number of New Shares which will result in Hawke's Point's (and its associates') voting power being equal to its pre-Offer voting power of 39.5% on the same terms as the Offer, subject to the Company obtaining the prior shareholder approval in accordance with the requirements of the ASX Listing Rules. To the extent Hawke's Point's (and its associates') voting power after the Offer is equal to 39.5% or greater, then no New Shares will be issued to Hawke's Point under the Placement and the Company will not seek shareholder approval.

5.10 Potential dilution of Shareholders who do not take up Entitlements

You should note that if you do not participate in the Entitlement Offer, your holdings may be diluted by approximately 29% following the Entitlement Offer and the Placement. The following are examples of how any dilution may impact you if you do not participate in the Entitlement Offer, assuming the maximum number of New Shares are issued under the Entitlement Offer and the Placement.

Example Shareholder	Holdings as at Record Date	% as at Record Date	Entitlement under the Entitlement Offer	Holdings if Entitlement not take up	% following allotment of New Shares
Shareholder 1	97,422,451	10.0%	29,976,139	97,422,451	7.1%
Shareholder 2	48,711,225	5.0%	14,988,070	48,711,225	3.5%
Shareholder 3	24,355,613	2.5%	7,494,035	24,355,613	1.8%
Shareholder 4	9,742,245	1.0%	2,997,614	9,742,245	0.7%

5.11 Notice to nominees and custodians

If OBM believes you hold Shares as a nominee or custodian you will have received, or will shortly receive, a letter in respect of the Entitlement Offer. Nominees and custodians should consider carefully the contents of that letter.

OBM is not required to determine whether or not any registered holder or investor is acting as a nominee or custodian or the identity or residence of any beneficial owners of Existing Shares or Entitlements. Where any person is acting as a nominee or custodian for a foreign person, that person, in dealing with its beneficiary, will need to assess whether the distribution of any documents relating to the Entitlement Offer (including this Retail Offer Booklet) or the indirect participation in the Entitlement Offer by the beneficiary, including following acquisition of Entitlements on ASX or otherwise, complies with applicable foreign laws.

Nominees and custodians may not distribute any part of this Retail Offer Booklet in the United States and may not permit any person in the United States or elsewhere outside Australia or New Zealand to participate in the Entitlement Offer, except that nominees and custodians may permit Institutional Investors in other Permitted Jurisdictions to participate in the Entitlement Offer.

The Company is not required to determine whether or not any registered Shareholder is acting as a nominee or the identity or residence of any beneficial owners of Shares. Where any holder is acting as a nominee or custodian for a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Retail Entitlement Offer is compatible with applicable foreign laws.

Persons in the United States and persons acting for the account or benefit of a person in the United States will not be able to take up or exercise Entitlements to purchase New Shares.

5.12 Not investment advice

This Retail Offer Booklet is not a prospectus under the Corporations Act and has not been lodged with ASIC. It also is not financial product advice and has been prepared without taking into account your investment objectives, financial circumstances or particular needs. OBM is not licensed to provide financial product advice in respect of the New Shares. This Information does not purport to contain all the information that you may require to evaluate a possible Application for New Shares, nor does it purport to contain all the information which would be required in a prospectus prepared in accordance with the requirements of the Corporations Act. It should be read in conjunction with OBM's other periodic statements and continuous disclosure announcements lodged with ASX, which are available on the ASX website.

The New Shares offered under this Entitlement Offer should be considered speculative. Before deciding whether to apply for New Shares, you should consider whether they are a suitable investment for you in light of your own investment objectives and financial circumstances and having regard to the merits or risks involved. If, after reading the Information, you have any questions about the Entitlement Offer, you should contact your stockbroker, accountant or other professional adviser.

5.13 Quotation and trading

OBM has applied to the ASX for official quotation of the New Shares in accordance with the ASX Listing Rule requirements. If ASX does not grant quotation of the New Shares, OBM will repay all Application Monies (without interest).

Subject to approval being granted, it is expected that normal trading of New Shares allotted under the Entitlement Offer will commence on 25 March 2022.

5.14 Continuous disclosure

OBM is a 'disclosing entity' under the Corporations Act and is subject to regular reporting and disclosure obligations under the Corporations Act and the ASX Listing Rules, including the preparation of annual reports and half yearly reports.

OBM is required to notify the ASX of information about specific events and matters as they arise for the purposes of the ASX making that information available to the stock

markets conducted by the ASX. In particular, OBM has an obligation under the ASX Listing Rules (subject to certain exceptions) to notify the ASX immediately of any information of which it is or becomes aware which a reasonable person would expect to have a material effect on the price or value of its securities. That information is available to the public from the ASX and can be accessed at www.asx.com.au.

Some documents are required to be lodged with ASIC in relation to OBM. These documents may be obtained from, or inspected at, an ASIC office.

5.15 Information availability

You can obtain a copy of this Retail Offer Booklet during the Entitlement Offer on the ASX's website at <https://www2.asx.com.au/>.

A replacement Entitlement and Acceptance Form can also be requested by calling the Share Registry.

ANNEXURE A: ASX ANNOUNCEMENTS

Ora Banda Launches up to \$20M Equity Raising

HIGHLIGHTS:

- Up to A\$20M equity raising comprising:
 - an institutional placement to raise up to A\$5M; and
 - an underwritten 4 for 13 Accelerated Non-Renounceable Entitlement Offer to raise approximately A\$15M
 - Proceeds from the equity raising, together with existing cash, will be used for exploration costs, drilling to progress resource development, operational improvements, working capital and offer costs
-

Ora Banda Mining Limited (ASX: OBM) ("**Ora Banda**", "**Company**") announces the launch of an up to A\$20 million equity raising comprising an institutional placement to raise up to A\$5 million, and a 4 for 13 Accelerated Non-Renounceable Entitlement Offer to raise approximately A\$15 million.

The equity raising proceeds, together with the Company's existing cash balance, will be utilised for exploration costs, drilling to progress resource development, operational improvements, working capital and offer costs.¹

Managing Director Comment

Ora Banda Managing Director, Peter Nicholson, said: *"The capital raising enables the Company to pursue its exciting regional exploration program whilst continuing the ongoing ramp-up of its Davyhurst Gold Project. With the Davyhurst plant now operating at a ~90kt monthly run rate and mining activities reaching the main ore zone of the Missouri pit, we are expecting to deliver FY22 gold production of between 62,000oz to 68,000oz. We thank our shareholders for their ongoing support and are glad be able to offer eligible shareholders an opportunity to participate in the capital raising."*

The Offer

The up to \$20 million equity raising will comprise:

- a single-tranche institutional placement of up to 100 million new shares to raise up to \$5 million ("**Placement**"); and
- the issue of approximately 300 million new shares under an underwritten 4 for 13 accelerated non-renounceable entitlement offer to raise approximately \$15 million ("**Entitlement Offer**"). The Entitlement Offer will consist of an Institutional Entitlement Offer and a Retail Entitlement Offer,

(the Placement and the Entitlement Offer together being the "**Offer**").

¹ The Company reserves the right to change its intentions in relation to the use of funds.

All new shares offered under the Offer will be issued at a price of \$0.05 per new share, which represents a:

- 35.1% discount to the last traded price of \$0.077 on 21 February 2022; and
- 27.7% discount to the TERP of \$0.069.²

Each new share issued under the Offer will rank equally with existing fully paid ordinary shares in the Company on issue. The Company will, upon issue of the new shares under the Offer, seek quotation of the new shares on the ASX.

Upon completion of the Offer, the Company will have up to approximately 1,374,224,505 shares on issue, excluding any further placement to Hawke's Point (see below). As the Entitlement Offer is non-renounceable, entitlements cannot be traded and are not otherwise transferable.

Euroz Hartleys Limited ("**Euroz Hartleys**") and amicaa Advisors Pty Ltd have been appointed as Joint Lead Managers for the Offer, with Euroz Hartleys and Fresh Underwriters Pty Ltd being appointed as underwriters ("**Underwriters**") for the Entitlement Offer.³ The Placement is not underwritten.

A summary of the key terms of the underwriting agreement between the Company and the Underwriters for the Entitlement Offer ("**Underwriting Agreement**") is set out in the appendix to this announcement and the Appendix 3B following this announcement.

Ora Banda's major shareholder, Hawke's Point, has committed to subscribe for its 39.5% entitlement in the Entitlement Offer. Hawke's Point has also entered into a sub-underwriting arrangement with the Joint Lead Managers and Underwriters with respect to the remaining 60.5% of the new shares to be issued under the Entitlement Offer ("**Sub-underwriting Agreement**"). Hawke's Point will receive no fee for sub-underwriting the Entitlement Offer. The key terms of the Sub-underwriting Agreement are set out in the appendix to this announcement.

If Hawke's Point is required to take up its full sub-underwriting allocation, it and its associates could increase their voting power in the Company from 39.5% up to 53.7% (an increase of up to 14.2%) assuming no shares are issued under the Placement. For further information regarding the assumptions underlying this maximum voting power and potential control implications, please refer to the cleansing statement lodged with ASX today.

If following completion of the Offer, Hawke's Point's (and its associates') voting power in the Company is less than its voting power prior to the Offer, the Company has committed to issue to Hawke's Point (via a placement) a number of shares which will result in Hawke's Point's (and its associates') voting power being equal to its pre-Offer voting power on the same terms as the Offer, subject to the Company obtaining prior shareholder approval in accordance with the requirements of the ASX Listing Rules. To the extent Hawke's Point's (and its associates') voting power after the Offer is equal to or greater than its pre-Offer voting power, then no shares will be issued to Hawke's Point under such a placement and the Company will not seek shareholder approval.

² The Theoretical Ex-Rights Price ("**TERP**") is the theoretical price at which the Company's shares should trade immediately after the ex-date for the Entitlement Offer. TERP is a theoretical calculation only and the actual price at which shares trade immediately after the ex-date for the Entitlement Offer will depend on many factors and may not equate to TERP. The TERP calculation includes shares issued under the Placement.

³ Fresh Equities Pty Ltd is amicaa Advisors Pty Ltd's settlement agent for equity placements. Fresh Underwriters Pty Ltd is an associate of Fresh Equities Pty Ltd.

The Company has obtained in-principle approval from ASIC to appoint Euroz Hartleys as nominee to sell any shares under the Entitlement Offer which would otherwise have been available to ineligible shareholders had they been eligible to participate in the Entitlement Offer. A letter will be sent to all ineligible shareholders with further details. Euroz Hartleys will not be paid a fee for its role as nominee, but will receive fees as one of the Underwriters to the Entitlement Offer as set out in the Appendix 3B released by the Company today.

Placement

The Placement will comprise the issue of up to 100 million new fully paid ordinary Ora Banda shares to certain sophisticated and professional investors to raise up to \$5 million at an issue price of \$0.05 per share, under the Company's existing placement capacity under ASX Listing Rules 7.1 (up to 146,133,675 new shares) and/or 7.1A (up to 97,422,450 new shares). Further details of the proposed share issue under the Placement are detailed in the Appendix 3B lodged by the Company today.

The Company confirms that the issue price of \$0.05, being not less than 75% of the volume weighted average market price for the Company's shares over the 15-day period before the date of this announcement, satisfies the requirements of Listing Rule 7.1A.

Institutional Entitlement Offer

Eligible institutional shareholders will be invited to participate in the accelerated institutional component of the Entitlement Offer, which will be conducted on 22 February 2022, along with the Placement. Eligible institutional shareholders can take up all, part or none of their entitlement.

To the extent there is any shortfall under the institutional component of the Entitlement Offer, those shortfall shares will be offered to sophisticated and professional investors through institutional bookbuild. To the extent there is any shortfall following the bookbuild process, those shares will be subject to the underwriting and sub-underwriting arrangements.

Retail Entitlement Offer

Eligible retail shareholders on the record date of 5:00pm Western Standard Time ("AWST") on 24 February 2022, with registered addresses in Australia and New Zealand will be invited to participate in the Retail Entitlement Offer at the same price as the Placement. The Retail Entitlement Offer will open on 1 March 2022 and close on 17 March 2022 (subject to any extension by the Company).

Eligible retail shareholders can take up all, part or none of their entitlement.

Further details about the Retail Entitlement Offer will be detailed in the Retail Offer Booklet that will be lodged with the ASX on 1 March 2022 and is expected to be despatched to eligible retail shareholders on 1 March 2022. The closing date for receipt of acceptance forms under the Retail Entitlement Offer is 5.00pm AWST on 17 March 2022 (subject to any extension by the Company).

Eligible retail shareholders will also be invited to subscribe for shares over and above their entitlement, as set out in the Retail Offer Booklet.

Neither OBM nor its advisers, or their respective representatives, have independently verified any such market or industry data.

Financial data

All dollar values are in Australian dollars (A\$ or AUD) unless otherwise stated. Amounts, totals and change percentages are calculated on whole numbers and not the rounded amounts presented. This Presentation includes certain historical financial information extracted from OBM's audited consolidated financial statements and information released to ASX (collectively, the **Historical Financial Information**). The Historical Financial Information is presented in an abbreviated form insofar as it does not include all the presentation and disclosures, statements or comparative information as required by the Australian Accounting Standards (**AAS**) and other mandatory professional reporting requirements applicable to general purpose financial reports prepared in accordance with the Corporations Act. Investors should be aware that financial data in this Presentation includes "non-IFRS financial information" under ASIC Regulatory Guide 230 'Disclosing non-IFRS financial information' and "non-GAAP" financial measures under Regulation G of the U.S. Securities Exchange Act of 1934, as amended. Non-IFRS / non-GAAP measures in this Presentation include all-in sustaining costs (AISC) per ounce of gold produced. OBM calculates the AISC in accordance with the guidance note published by the World Gold Council. OBM believes this non-IFRS financial information provides useful information to users in measuring the financial performance and conditions of the Company. The non-IFRS / non-GAAP financial information does not have a standardised meaning prescribed by AAS and, therefore, may not be comparable to similarly titled measures presented by other entities, nor should it be construed as an alternative to other financial measures determined in accordance with AAS. Investors are cautioned, therefore, not to place undue reliance on any non-IFRS / non-GAAP financial information included in this Presentation.

IMPORTANT NOTICES AND DISCLAIMERS

Past performance

Past performance metrics and figures (including past share price performance of OBM), as well as pro forma financial information, included in this Presentation are given for illustrative purposes only and should not be relied upon as (and is not) an indication of OBM's or any other Party's (as defined below) views on OBM's future financial performance or condition or prospects. Investors should note that past performance of OBM, including in relation to the historical trading price of OBM shares, mineral resources, costs and other historical financial information cannot be relied upon as an indicator of (and provides no guidance, assurance or guarantee as to) future OBM performance, including the future trading price of New Shares. The historical information included in this Presentation is, or is based on, information that has previously been released to the market.

Forward-looking statements and forecasts

This Presentation contains certain "forward-looking statements" and comments about future matters. Forward-looking statements can generally be identified by the use of forward-looking words such as, "expect", "anticipate", "likely", "intend", "should", "could", "may", "predict", "plan", "propose", "will", "believe", "forecast", "estimate", "target", "outlook", "guidance" and other similar expressions within the meaning of securities laws of applicable jurisdictions and include, but are not limited to, the outcome and effects of the Offer and the use of proceeds. Indications of, and guidance or outlook on, future earnings or financial position or performance are also forward-looking statements. You are cautioned not to place undue reliance on forward-looking statements. Any such statements, opinions and estimates in this Presentation speak only as of the date hereof, are preliminary views and are based on assumptions and contingencies subject to change without notice, as are statements about market and industry trends, projections, guidance and estimates. Forward-looking statements are provided as a general guide only. The forward-looking statements contained in this Presentation are not indications, guarantees or predictions of future performance and involve known and unknown risks and uncertainties and other factors, many of which are beyond the control of OBM, and may involve significant elements of subjective judgement and assumptions as to future events which may or may not be correct.

There can be no assurance that actual outcomes will not differ materially from these forward-looking statements. Any such forward looking statement also inherently involves known and unknown risks, uncertainties and other factors that may cause actual results, performance and achievements to be materially greater or less than estimated (refer to the "Key Risks" section of this Presentation). These factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations, economic uncertainties, increased capital costs and operating costs, the speculative nature of exploration and project development (including the risks of obtaining necessary licenses and permits, diminishing quantities or grades of reserves and the ability to exploit successful discoveries), general mining and development operation risks, closure and rehabilitation risks, changes to the regulatory framework within which OBM operates or may in the future operate, environmental conditions including extreme weather conditions, geological and geotechnical events, and environmental issues, and the recruitment and retention of key personnel, industrial relations issues and litigation.

Any such forward looking statements are also based on assumptions and contingencies which are subject to change and which may ultimately prove to be materially incorrect, as are statements about market and industry trends, which are based on interpretations of current market conditions. Investors should consider the forward looking statements contained in this Presentation in light of those disclosures and not place undue reliance on such statements (particularly in light of the current economic climate and significant volatility, uncertainty and disruption caused by the COVID-19 pandemic). The forward looking statements in this Presentation are not guarantees or predictions of future performance and may involve significant elements of subjective judgment, assumptions as to future events that may not be correct, known and unknown risks, uncertainties and other factors, many of which are outside the control of OBM.

Except as required by law or regulation OBM undertakes no obligation to finalise, check, supplement, revise or update forward-looking statements or to publish prospective financial information in the future, regardless of whether new information, future events or results or other factors affect the information contained in this Presentation.

Mineral resources and ore reserve reporting

This presentation contains estimates of OBM's Mineral Resources, Ore Reserves, Exploration Results and Production Targets. The information in this Presentation that relates to the Mineral Resources, Ore Reserves and Exploration Results of OBM has been extracted from OBM's previous ASX announcements, including the announcement dated 29 July 2021 'Davyhurst Gold Project Mineral Resources and Ore Reserves Statement' and the announcement dated 22 February 2022 'Operational and Exploration Update'. Copies of these announcements are available at www.asx.com.au.

OBM confirms that it is not aware of any new information or data that materially affects the information included in those announcements and, in the case of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the announcements continue to apply and have not materially changed, with the exception of the Mineral Resources and Ore Reserves relating to Mt Ida, which the Company has since sold (as announced to the market on 24 September 2021 '\$11M Mt Ida Sale Complete'). The Company confirms that whilst the operational issues continued to be reviewed, no conclusions have been drawn that would materially affect the information included in those announcements and, in the case of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the announcements continue to apply. Conclusions drawn from the current operational analysis may result in material downgrading the Ore Reserve estimate for specific deposits. See Appendix A and Appendix B to this presentation for further details.

The Company acknowledges that mining operations conducted to date have not achieved all of the Modifying Factors used to estimate the Ore Reserve. However, the operational issues continue to be reviewed, and Missouri is considered to be an early stage operation and the Company has not formed any conclusions that would materially impact Modifying Factors. A work stream has commenced that involves in-depth analysis of the operation and all the available technical data with the view to implementing remedial action to minimise the potential impacts on the Ore Reserve estimate. Conclusions drawn from the current operational analysis may result in material downgrading the Ore Reserve estimate for specific deposits. Any future updates to the Ore Reserve estimate will consider the actual performance of the operation in conjunction with typical industry parameters, to arrive at a position on the appropriate Modifying Factors to apply to the estimate, such that they continue to align with expected and achievable outcomes.

In the ordinary course of their various business activities, the Joint Lead Managers and the Underwriters and their affiliates or related bodies corporate may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of OBM, and/or persons and entities with relationships with OBM. The Joint Lead Managers and Underwriters and their affiliates and related bodies corporate may also communicate independent investment recommendations, market colour or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments. One or more entities within the Joint Lead Managers' and/or Underwriters' respective groups may act as a lender to OBM or its affiliates and related bodies corporate and may provide other financial services to OBM or its affiliates and related bodies corporate. The Joint Lead Managers are acting as joint lead managers and bookrunners, and the Underwriters are acting as underwriters, to the Offer for which they have received or expect to receive fees and expenses.

Determination of eligibility of investors for the purposes of all or any part of the Offer is determined by reference to a number of matters, including legal requirements and the discretion of OBM, the Joint Lead Managers and the Underwriters. To the maximum extent permitted by law, OBM, the Joint Lead Managers and the Underwriters and their respective Limited Parties expressly disclaim any duty or liability (including for negligence) in respect of the exercise of that discretion or otherwise.

In connection with the Offer, one or more investors may elect to acquire an economic interest in the New Shares (**Economic Interest**), instead of subscribing for or acquiring the legal or beneficial interest in those securities. The Joint Lead Managers and the Underwriters (or their respective affiliates and related bodies corporate) may, for their own respective accounts, write derivative transactions with those investors relating to the New Shares to provide the Economic Interest, or otherwise acquire securities in OBM in connection with the writing of those derivative transactions in the Offer and/or the secondary market. As a result of those transactions, the Joint Lead Managers and the Underwriters (or their respective affiliates and related bodies corporate) may be allocated, subscribe for or acquire securities of OBM in the Offer and/or the secondary market, including to hedge those derivative transactions, as well as hold long or short positions in those securities. These transactions may, together with other securities in OBM acquired by the Joint Lead Managers and/or the Underwriters or their affiliates and related bodies corporate in connection with its ordinary course sales and trading, principal investing and other activities, result in the Underwriters or their affiliates disclosing a substantial holding and earning fee.

The Joint Lead Managers and/or the Underwriters (and/or their respective affiliates and related bodies corporate) may also receive and retain other fees, profits and financial benefits in each of the above capacities and in connection with the above activities, including in their capacity as joint lead managers or underwriters (as applicable) to the Offer.

Effect of rounding

JORC Code

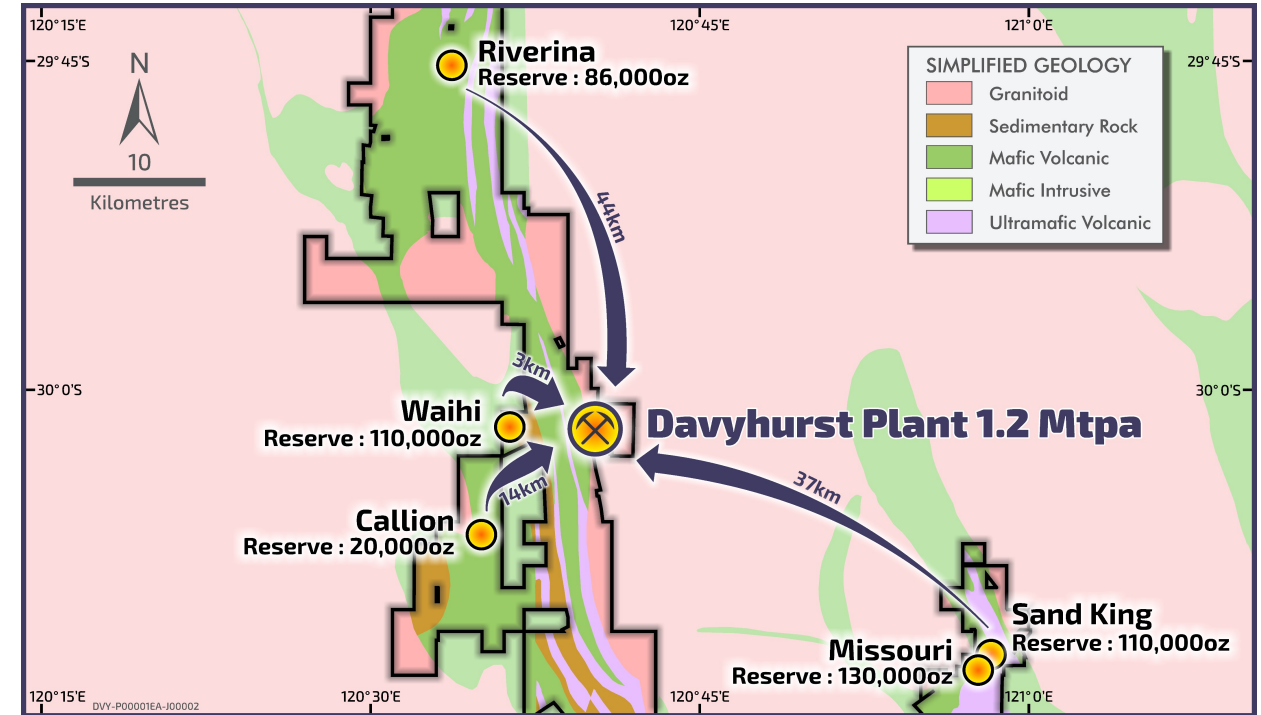

It is a requirement of the ASX Listing Rules that the reporting of ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves ("JORC Code"). Investors outside Australia should note that while ore reserve and mineral resource estimates of the Company in this document comply with the JORC Code (such JORC Code-compliant ore reserves and mineral resources being "Ore Reserves" and "Mineral Resources" respectively), they may not comply with the relevant guidelines in other countries and, in particular, do not comply with (i) National Instrument 43-101 (Standards of Disclosure for Mineral Projects) of the Canadian Securities Administrators (the "Canadian NI 43-101 Standards"); or (ii) Item 1300 of Regulation S-K, which governs disclosures of mineral reserves in registration statements filed with the SEC. Information contained in this document describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws.

- Currently undertaking open pit mining at Riverina and Missouri and pre-stripping of Sand King
- Increasing trend in average mined grade (1.97 g/t in December 2021 quarter):
 - Excluding the contribution from Golden Eagle, average grade has been relatively stable from 1.55g/t Au in the September 2021 quarter, to 1.58g/t Au in the December 2021 quarter and 1.56g/t Au in January 2022
 - Increased contribution from the main zone of the Missouri Phase 1 pit is expected to benefit average grade from February
- Riverina
 - Production in December 2021 quarter adversely affected due to delays in grade control drilling results and minor pit wall failures

The TERP is a theoretical calculation only and the actual price at which Ora Banda shares trade immediately after the ex-date for the ANREO will depend on many factors and may not equal the TERP. Introductions

New Shares are considered highly speculative. An investment in the Company is not risk free. The proposed future activities of the Company are subject to a number of risks and other factors that may affect its future performance. Some of these risks can be mitigated by the use of safeguards and appropriate controls. However, many of the risks are outside the control of the Directors and management of the Company and cannot be mitigated.

The risks described in this Section are not an exhaustive list of the risks faced by the Company or by investors in the Company. It should be considered in conjunction with other information in this Presentation. The risks described in, and others not specifically referred to, in this Section may in the future materially affect the financial performance and position of the Company and the value of New Shares offered under the Offer. The New Shares to be issued pursuant to the Offer carry no guarantee with respect to the payment of dividends, return of capital or the market value of those securities. The risks described in this Section also necessarily include forward looking statements. Actual events may be materially different to those described and may therefore affect the Company in a different way.

Investors should be aware that the performance of the Company may be affected and the value of its Shares may rise or fall over any given period. None of the Directors or any person associated with the Company guarantees the Company's performance, the performance of the New Shares the subject of the Offer or the market price at which the New Shares will trade. The Directors strongly recommend that potential investors consider the risks detailed in this Section, together with information contained elsewhere in this Presentation, and consult their professional advisers, before deciding whether to apply for New Shares.

Risks specific to the Company

(a) Production and cost estimates

The Company's ability to achieve production expectations and meet operating and capital expenditure estimates on a timely basis cannot be assured and could be affected by various factors, some of which it has little or no control over and which could have adverse effects including delays and cost overruns.

The operations and assets of the Company, as with any other mining operations, are subject to a number of uncertainties, including in relation to ore tonnes, grade, metallurgical recovery, actual realised values and grades of stockpiles (which are also estimated), ground conditions, operational environment, funding for development, regulatory changes, weather (including flooding in the event of heavy rainfall), accidents, shortage or delay of critical supplies including personnel, difficulties in operating plant and equipment and other unforeseen circumstances such as operator error or unplanned failure of plant or equipment.

Costs of production for the Company may be affected by a variety of factors, including changing waste-to-ore ratios, geotechnical issues, unforeseen difficulties associated with power supply, water supply and infrastructure, ore grade, metallurgy, labour costs, changes to applicable laws and regulations, general inflationary pressures and currency exchange rates. Unforeseen production cost increases could result in the Company not realising its operational or development plans or such plans costing more than expected or taking longer to realise than expected. Any of these outcomes could have an adverse effect on the Company's operational or financial performance. Failure of the Company to achieve production or cost estimates could have an adverse impact on the Company's future cash flows, profitability, results of operations and financial condition.

(b) Underwriting risk

The Company has entered into an underwriting agreement pursuant to which the Underwriters have agreed to underwrite the Entitlement Offer, subject to the terms and conditions of the Underwriting Agreement (refer to the appendix to the announcement dated 22 February 2022 for further details). If certain conditions are not satisfied or certain events occur, the Underwriters may terminate the Underwriting Agreement. Given the structure of the Offer, in which the Placement and Institutional Entitlement Offer settle before the Retail Entitlement Offer, there is a risk that the Underwriting Agreement may terminate before or after the Placement and the Institutional Entitlement Offer have settled. If the Underwriting Agreement is terminated and the Offer does not proceed or does not raise the funds required for the Company to meet its stated objectives, the Company would be required to urgently find alternative financing. In those circumstances, there is no guarantee that alternative funding could be sourced in the time required or at all, in which case the Company would be in a critical condition from a solvency perspective. As such, it is clear that termination of the Underwriting Agreement could materially adversely affect the Company's business, cash flow and financial position.

(c) Future capital requirements

The Company may require further financing to continue to operate in the future if, for example, it fails to meet its mining schedule or there is otherwise a material departure from the Company's stated production or cost guidance (which may itself be adversely affected by a material decrease in the price of gold or unfavourable movements in currency exchange rates).

Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the market price and the Offer price. Debt financing, if available, may involve restrictive covenants which limit the Company's financing, operations and business strategy.

There is no guarantee that alternative or additional funding could be sourced in the time required or at all or that the Company would be able to successfully negotiate the terms of any debt or equity funding arrangements. Further, in the future, the Company may be required to raise additional funds (whether by way of debt and/or equity), so as to carry out additional exploration activities at its projects, complete future scoping and feasibility studies on its projects, undertake its current and potential future mining operations and fund corporate, administrative and working capital needs.

No assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. Some of the risks noted in this Section could affect financiers' appetites to provide capital to the Company, and impact continued capacity to access capital market funding sources and/or financing facilities via credit markets, including any funder environmental, social and governance (ESG) requirements. If the Company is unable to obtain additional financing as needed, it may be required to reduce, delay or suspend its operations and this could have a material adverse effect on the Company's ability to continue as a going concern or remain solvent.

(d) Mining risk, Ore Reserve and Mineral Resource estimates and production targets

When compared with many industrial and commercial operations, mineral exploration and development are high-risk undertakings. Each orebody is unique. The nature of mineralisation, the occurrence and grade of the ore, as well as its behaviour during mining and processing can never be wholly predicted. There can be no assurance that exploration of the exploration licences and mining leases or any other tenements that may be acquired in the future, will result in the discovery of any economic deposits. Even if the Company identifies a viable deposit, there is no guarantee that the mineral deposit can be economically exploited.

The Company's Ore Reserve and Mineral Resource estimates and production targets announced from time to time are estimates only and no assurances can be given that any particular level of recovery of gold (or other minerals) will in fact be realised. Ore Reserve and Mineral Resource estimates and production targets are expressions of judgment based on knowledge, experience and industry practice. Conclusions drawn from the current operational analysis may result in material downgrading the Ore Reserve estimate for specific deposits.

By their very nature, Ore Resource and Mineral Resource estimates and production targets are necessarily imprecise and depend to some extent on interpretations, which may prove to be inaccurate and require adjustment. Estimates that are valid when originally calculated may reduce significantly in resource size and/or grades when new information or techniques become available, including new information obtained through additional drilling and analysis.

Whilst the Company has several risk mitigation measures in place including detailed grade control drilling, stockpile sampling to assist in reconciliation, mine plans which can be amended to address reconciliation issues, utilisation of mining software to support mine design and scheduling, changes in actual ore grades mined may result in increased unit costs, the ability of the operations to run profitably, alterations to the Company's exploration, development and production plans which may, in turn, affect the Company's future plans and ultimately its financial performance and value.

(e) Title risk

The Company's mining and exploration activities are dependent upon the maintenance (including renewal) of the mining tenements in which the Company (through its wholly-owned subsidiaries) has, will have or will acquire an interest. Maintenance of the Company's mining tenements is dependent on, among other things, the Company's ability to comply with tenement conditions imposed by relevant authorities including the payment of rent and compliance with the relevant tenement's minimum expenditure commitments which, in turn, is dependent on the Company being sufficiently funded to meet those commitments.

The mining tenements held by the Company are subject to annual review and periodic renewal. Although the Company has no reason to think that the mining tenements in which it currently has an interest, or will have an interest in, will not be renewed, there are no guarantees that the mining tenements that are subject to renewal will be renewed or that any applications for exemption from minimum expenditure conditions will be granted, each of which would adversely affect the standing of a mining tenement. Individual mining tenements may be subject to additional conditions, penalties, objections or forfeiture applications including additional conditions which may be imposed in the future. Alternatively, applications, transfers, conversions or renewals may be refused or may not be approved with favourable terms. Such events could have a materially adverse effect on the Company's prospects and the value of its assets.

The Company continues to defend proceedings in relation to a third party's applications for forfeiture and objections to exemption applications in respect of the Company's mining leases M16/262, M16/263 and M16/264 for the reporting year ending in 2011. If the exemption applications are refused, the Company will have failed to comply with the expenditure conditions in which case the forfeiture applications will go before the Warden for a recommendation and ultimately before the Minister for a determination as to whether, in all the circumstances of the case, the non-compliance is of sufficient gravity to justify forfeiture. The current status of the proceedings is that, following the Warden recommending in December 2018 that the Company's exemption applications should be refused, the Supreme Court of Western Australia in June 2020 quashed the Warden's decision and the Court of Appeal of the Supreme Court of Western Australia in July 2021 dismissed the third party's appeal of the Supreme Court's decision. Accordingly, the matter has been returned to the Warden's Court to be reheard in late-March 2022. If the proceedings are ultimately not resolved favourably, the Company would propose to redeploy the exploration expenditure allocated for these tenements, to other prospects.

An application for forfeiture and objection to an exemption application was lodged in respect of M24/208 for the reporting year ending in 2015. The exemption application has not yet been heard or determined. If the exemption application is refused, the Company will have failed to comply with the expenditure conditions in which case the forfeiture application will go before the Warden for a recommendation and ultimately before the Minister for a determination as to whether, in all the circumstances of the case, the non-compliance is of sufficient gravity to justify forfeiture. M24/208 is not part of the Company's current five-year development plan.

(f) Grant of future authorisations to mine

If the Company wishes to develop an economically viable mineral deposit, it will, among other things, require various approvals, permit and licences before commencing substantive development activity and it will need to satisfy certain environmental approval processes. The granting of such approvals, licences and permits are, as a practical matter, subject to the discretion of applicable government agencies or officials.

There is no guarantee that the Company will be able to obtain, or obtain in a timely fashion, all required approvals, licences or permits or satisfy all environmental approval processes. To the extent that required authorisations are not obtained or are delayed, the Company's operations may be significantly impacted in the future, including its production and financial performance.

(g) Nature of mineral exploration and mining and operational risks

Future development of the Company's mining operations is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, damage to equipment or loss of production due to operator error, shortages or increases in the price of attracting and retaining personnel, consumables, spare parts and plant and equipment, cost overruns, the impact of COVID-19, access to the required level of funding and contracting risk for third parties providing essential services.

The Company's operations may be disrupted, curtailed, delayed or cancelled by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes or shortages, the effects of COVID-19, unusual or unexpected rock formations, flooding due to hydrogeological events, and extended interruption due to inclement or hazardous weather condition and fires, explosions or accidents. No assurances can be given that the Company will achieve commercial viability through the exploration or development of its projects and treatment of deposits.

Access to the Company's site for its employees, contractors and suppliers is critical to the continuity of operations. Heavy rainfall may lead to road closures or a rapid deterioration in access roads. Any such limited access to the Company's sites may lead to delays in critical consumables to sites, business interruption and increased costs associated with alternative access arrangements.

Industrial and environmental accidents could lead to substantial claims against the Company for injury or loss of life, and damage or destruction to property, as well as regulatory investigations, clean up responsibilities, penalties and the suspension of operations.

The Company endeavours to take appropriate action to mitigate these operational risk (including by ensuring legislative compliance, properly documenting arrangements with counterparties, and adopting industry best practice policies and procedures) or to insure against them, but the occurrence of any one or a combination of these events may have a material adverse effect on the Company's performance and the value of its assets.

(h) Offer risks

The New Shares to be issued pursuant to this Offer carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares, which are a speculative investment. The last trading price of shares on ASX prior to the presentation being lodged is not a reliable indicator as to the potential trading price of New Shares.

There is no guarantee of liquidity. Further, the acquisition and disposal of shares will have tax consequences, which will differ depending on the individual financial affairs of each investor; the Company accepts no liability or responsibility with respect to tax consequences for investors. Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for New Shares.

The Placement is not underwritten. There is no guarantee the proposed Placement funds will be raised.

(i) Native title

The Company's mining tenements may be subject to native title applications in the future by native title claimants. This may preclude or delay granting of exploration and mining tenements or the ability of the Company to explore, develop and/or commercialise the resources of the mining tenements. Considerable expenses may be incurred negotiating and resolving issues, including any compensation agreements reached in settling native title claims lodged over any of the mining tenements held or acquired by the Company.

The presence of Aboriginal sacred sites and cultural heritage artefacts on the mining tenements is protected by State and Commonwealth laws. Any destruction or harming of such sites and artefacts may result in the Company incurring significant fines and Court injunctions. The existence of such sites may limit or preclude exploration or mining activities on those sites and delays and expenses may be experienced in obtaining any required clearances or consents.

(j) Risk of forfeiture applications

If the Company does not expend in excess of the minimum expenditure commitment or obtain a certificate of exemption in respect of each tenement for each reporting year, there is a risk that those tenements could be forfeited.

Even if the Company does expend in excess of the minimum expenditure or has good grounds for the grant of a certificate of exemption, it is possible that a third party could lodge a forfeiture application or an objection to any exemption application. If this occurs, the Company will need to substantiate that expenditure or grounds for exemption in proceedings before the Mining Warden which would entail legal and other costs.

(k) COVID-19 risks

The global economic outlook is facing continuing uncertainty due to the current COVID-19 pandemic, which has had, and will likely continue to have, a significant impact on global capital markets, commodity prices and foreign exchange. The severity, duration and locality of any potential impacts are however very difficult to predict.

COVID-19 has impacted the Company's operations, primarily through labour shortages experienced by the Company directly and by key contractors, as well as delays in supply of spare parts. It may do so to a greater extent in the future.

Although the Company has not had any recorded instances of infections at its sites, any infections on any of the Company's sites could result in delays or suspensions of operations at the affected site. Should issues surrounding the spread and longevity of COVID-19 persist for an extended period, sourcing the required workforce along with supply chain issues could become increasingly problematic and result in interruptions or suspension to operations and/or changes in costs.

Governmental measures in Western Australia, other parts of Australia and overseas to limit the transmission of the virus (such as border closures, mandatory vaccination requirements for resources sector workers in Western Australia, travel bans and quarantining) may, in addition to the general level of economic uncertainty caused by COVID-19, also adversely impact the Company's operations and financial performance.

The Company has implemented COVID-19 measures to minimise the risk and spread of infection and the impact on the Company's operations. The measures include temperature and questionnaire screening, remote working plans, mandatory self-quarantine, on-site isolation areas, optimising site works to manage within COVID-19 limitations, managing site manning levels to limit COVID-19 risk, optimising usage of installed accommodation and implementing the Western Australian Government's various directives as well as guidelines and recommendations issued by the Western Australian and Federal Governments. The Company is actively monitoring the developing situation, particularly within Western Australia, and will continue to review and update its COVID-19 mitigation measures based on those recommendations.

(l) Environmental and safety risk

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of resulting waste products. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations. The disposal of mining and process waste and mine water discharge are subject to constant legislative scrutiny and regulation.

The Company's operations are subject to significant environmental regulation. The governments and other authorities that administer and enforce environmental laws determine these requirements. It is expected that the Company's activities, like all exploration projects and mining operations, will have some impact on the environment, particularly in respect of mine development. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.

Further, the Company may require additional approvals from the relevant authorities before it can undertake activities that are likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations, which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or otherwise affect its operations.

There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments in such respect which could have a material adverse effect on the Company's business, financial condition and results of operations.

Climate change is a risk that the Company has considered, particularly in the context of its mining operations. The climate change risks particularly relevant include increased policy and regulatory emphasis on transitioning to a lower carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. Climate change may cause certain physical and environmental risks that cannot be predicted, including events such as increased severity of weather patterns, incidence of extreme weather events and longer term risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

Mining activities have inherent safety hazards and risks. The Company is committed to providing a safe and healthy workplace and environment for its personnel, contractors and visitors, including through its safety management system and site safety management plans, its emergency response capabilities and providing inductions, training and awareness programs for site personnel.

A serious site health and safety incident may result in regulatory intervention including investigations, and significant interruptions, suspensions and delays to operations. A health and safety incident which results in serious injury, illness or death would involve regulatory investigations, potential regulatory intervention and may also expose the Company to significant penalties and the Company may be liable for compensation. These liabilities may not be covered by the Company's insurance policies or, if they are covered, may exceed the Company's policy limits or be subject to significant deductibles which may be a substantial financial cost to the Company. Also, any claim under the Company's insurance policies could increase the Company's future costs of obtaining such insurance. Accordingly, any liabilities for workplace accidents could have a material adverse impact on the Company's liquidity and financial results and reputation. In addition, it is not possible to anticipate the effect on the Company's business of any changes to workplace health and safety legislation (including the expected commencement in 2022 of the *Work Health and Safety Act 2020* (WA) and its supporting regulations) or directions necessitated by concern for the health of the workforce. Such changes may have an adverse impact on the financial performance and/or financial position of the Company.

(m) Environmental and other statutory approvals

The Company's operations are subject to Commonwealth and State laws, regulations and specific conditions regarding approvals to explore, construct and operate. There is a risk that such laws, regulations and specific conditions may impact the profitability of the Company's projects and the ability for the projects to be satisfactorily permitted.

The Company's exploration and development activities are subject to extensive laws and regulations relating to numerous matters including grant and maintenance of mining tenements, statutory approvals and consents, conditions of operation including environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters.

The Company requires approvals from regulatory authorities for its current and future exploration, development, production and rehabilitation activities. These include approvals from the Environmental Protection Authority, Department of Mines, Industry Regulation and Safety, Department of Water and Environmental Regulation, Department of Biodiversity, Conservation and Attractions and many other agencies. The Company has identified that certain current and future activities undertaken as part of its operations have and will have disturbances associated with pipelines, bores, trenches, roads and waste storage facilities. Obtaining necessary approvals can be a time-consuming process and there is a risk that the Company will not obtain them on acceptable terms (including that they may be subject to costly conditions), in a timely matter or at all. The costs and delays associated with obtaining and complying with such approvals and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a mine or project generally. Any failure to comply with applicable laws and regulations or approvals, even if inadvertent, could result in material fines, penalties or other liabilities, suspension of the Company's activities or forfeiture of one or more of its tenements.

(n) Change in regulations

Adverse changes in Federal or Western Australian government policies or legislation (or the interpretation or implementation of legislation) may affect ownership of mineral interests, taxation, royalties, land access, labour relations and mining and exploration activities of the Company. The current system of exploration and mining permitted in Western Australia may change resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation. Increased royalties or any other changes to the royalty regime could result in higher operating costs for the Company and may have an adverse effect on the Company's business, results, financial condition and prospects.

(o) Commodity prices and exchange rates

The Company's revenue is generated from gold sales and is therefore exposed to commodity price and exchange rate risks, specifically the USD denominated gold price and the AUD / USD exchange rate.

Mineral production from the Project will depend upon the Australian gold price being sufficient to make the operations economically feasible. The financial model supporting the Company's operations is based on an Australian dollar gold price of AUD2,200 per ounce. A prolonged suppression of the gold price or a substantial strengthening of the Australian dollar has the potential to reduce the value of the Company and its operations.

Commodity prices fluctuate and are affected by many factors beyond the control of the Company, including supply and demand fluctuations for precious and base metals, technological advancements, forward-selling activities and other macroeconomic forces.

In addition, the international price of gold is denominated in United States dollars, whereas the income and expenditure of the Company are in Australian dollars, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets. These factors affect the value of the Company's assets and the supply and demand characteristics of gold, and may have an adverse effect on the viability of the Company's exploration, development and production activities, its ability to fund those activities and the value of its assets. A material move in the currency exchange rate may result in a fall in revenue, the ability of the Company's operations to be profitable and may affect the Company's valuation.

Risks associated with gold price volatility can be reduced by hedging. The Company has a hedging strategy in place but does not have any current hedging in place. Any adverse movements in the AUD / USD exchange rate while the Company is not hedged could impact the Company's financial performance as it would impact the AUD gold price received by the Company.

(p) Dependence on key personnel

The Company is dependent on the experience of its Directors and senior management. Whilst the Board has sought to and will continue to ensure that Directors, senior management and key employees are appropriately incentivised, the ongoing retention of their services cannot be guaranteed. The loss of the services of a Director, senior manager or key employee to the Company may have an adverse effect on the performance of the Company pending replacements being identified and retained by or appointed to the Board of the Company.

(q) Dependence on external contractors

The Company outsources substantial parts of its mining and exploration activities pursuant to services contracts with third party contractors. Circumstances could arise whereby such contractors may not be available to perform services to the Company, when required, or may only be willing to do so on terms that are not acceptable to the Company. Contractors' performance may be constrained or hampered by labour disputes or shortages of personnel, plant or equipment underperformance or breakdown or shortages or staff shortages and default.

Contractors may not comply with legal or contractual obligations in respect of quality, safety, environmental compliance and timeliness, which may be difficult for the Company to control. In the event that a contractor underperforms or is terminated, the Company may not be able to find a suitable replacement on satisfactory terms within a reasonable time or at all. These circumstances could have a material adverse effect on the Company's operations and give rise to claims against the Company.

(r) Insurance

The Company, where economically practicable and available, endeavours to mitigate various project and business risks by procuring relevant insurance cover. However, such insurance cover may not always be available or economically justifiable and the policy provisions and exclusions may render a particular claim by the Company outside the scope of the insurance cover.

Whilst the Company undertakes all reasonable due diligence in assessing the creditworthiness of its insurance providers there remains the risk that an insurer might default in payment of a legitimate claim by the Company under an insurance policy.

(s) Competition risk

Competition from competing gold and mineral producers may adversely affect the Company's future financial performance and profitability.

(t) Contractual disputes

There is a risk that the Company's business could be disrupted in situations where there is a disagreement or dispute with a contracting counterparty in relation to the provisions of the relevant contract. Should such a disagreement or dispute occur, this may have an adverse impact on the Company's operations and performance generally. It is not possible for the Company to predict or protect itself against all such risks.

(u) Contract risk

The Company may operate through a series of contractual relationships with operators and sub-contractors. All contracts carry risks associated with the performance by the contracting parties of their obligations as to time and quality of work performed. Any disruption to services or supply (including equipment or personnel shortages or unavailability that may be experienced by the Company's contracting counterparties) may have an adverse effect on the financial performance of the Company's operations.

Whilst the Company undertakes all reasonable due diligence in assessing the creditworthiness of its contractors, suppliers and insurers, there remains a risk that one or more of those parties may become insolvent, which may cause operational delays in the Company's operations while replacement contractors or suppliers are secured.

(v) Equipment risk

The operations of the Company could be adversely affected if essential equipment fails or critical parts are unavailable or there is delay in supply or repair of such equipment. Similarly, damage to plant or equipment due to operator error or other events such as fire or ground failure may result in business interruption, increased costs and affect the Company's ability to meeting production and financial targets.

(w) Personnel and labour risk

The current shortage of personnel in Western Australia may continue for an extended period, even if the effects of COVID-19 subside. Other potential factors, such as increased project activity in the resources sector and increased commodity prices, may arise which may increase the competition for available personnel and make it difficult for the Company to attract and retain the quantity of personnel required for its operations to function to capacity and/or may increase the Company's overall labour costs.

There can be no assurance that the Company's operations or those of its contractors or suppliers will not be affected by labour related problems in the future, such as disputes relating to remuneration or conditions of employment. Potential consequences for the Company may be increased costs or delays or other operational constraints, which may lead to the Company not meeting its financial targets, a decrease in the value of the Company's shares or its assets.

(x) Potential for significant dilution

If Eligible Shareholders elect not to take up their Entitlements or only take up part of their Entitlements, they will be subject to dilution as a result of the issue of Shares under the Offer. In addition, ineligible shareholders will be subject to dilution under the Offer.

3. General Risks

(a) Economic risk

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of Company. Factors that may contribute to such changes in the general economic climate include, but not are but not limited to:

- i. general economic conditions;
- ii. changes in Government policies, taxation and other laws;
- iii. the strength of the equity and share markets in Australia and throughout the world;
- iv. the level of direct and indirect competition against the Company;
- v. industrial disputes in Australia and overseas;
- vi. changes in investor sentiment toward particular market sectors;
- vii. financial failure or default by an entity with which the Company may become involved in a contractual relationship;

(b) Trading price of the Company's shares

The Company's operating results, economic and financial prospects and other factors will affect the trading price of the Company's shares. In addition, the price of the Company's shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks, and hedging or arbitrage trading activity involving the Company's shares.

In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

(c) Litigation risk

The Company is exposed to possible litigation risks including forfeiture claims, native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes from time to time with other parties in the future which may result in litigation or other formal dispute resolution proceedings. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position depending on the nature of the dispute and quantum of any such claim. The Company has recently become aware of a potential dispute with third party holders of nickel rights over a parcel of the Company's tenements. The Company is in discussion with those parties and will, if necessary, update the market.

(d) Taxation risk

The acquisition and disposal of New Shares will have tax consequences that will differ for each investor depending on their individual financial circumstances. All potential investors in the Company are urged to obtain independent financial advice regarding the tax and other consequences of acquiring New Shares. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability or responsibility with respect to any tax consequences of applying for New Shares under this Presentation.

(e) Accounting standards

Changes to any applicable accounting standards or to any assumptions, estimates or judgments applied by management in connection with accounting matters may adversely impact the Company's financial statements, results or condition.

(f) Disruption to IT systems

If the Company's IT hardware or software fails or is subject to a cyber attack, this may result in the loss of business data and may disrupt the Company's access to its key systems. In such a scenario, the Company may need to rework or recreate data and may experience loss of efficiencies until such data can be accessed or recreated. The Company has appropriate systems in place to mitigate the risk of such events, including data back-ups, system redundancy, an IT disaster recovery plan and periodic cyber system security reviews against malicious activity.

(g) Other projects

The Company may look to complete other investments and acquisitions in the future, the details of which are not known at the date of this Presentation. Any such acquisitions and investments will carry their own set of risks. There is no guarantee that any future investments or acquisition will provide an increase in shareholder value.

4. Speculative nature of investment

The list of risk factors in this Section ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The risks described in, and others not specifically referred to in, this Section may, in the future, materially affect the financial performance of the Company and the value of its New Shares.

Therefore, the New Shares to be issued pursuant to the Offer carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares. Potential investors should consider that the investment in the Company is speculative and should consult their professional adviser before deciding whether to apply for New Shares pursuant to the Offer.

APPENDIX A – ORE RESERVE TABLE AS AT 30 JUNE 2021

PROJECT	PROVED		PROBABLE		TOTAL MATERIAL		
	('000t)	(g/t Au)	('000t)	(g/t Au)	('000t)	(g/t Au)	('000oz.)
Sand King	-	-	1,200	2.7	1,200	2.7	110
Missouri	20	0.9	1,600	2.7	1,600	2.6	130
Riverina	340	1.1	1,300	1.7	1,700	1.6	86
Golden Eagle	50	3.2	85	3.6	140	3.5	15
Waihi	-	-	1,300	2.4	1,300	2.4	110
Callion	-	-	230	2.7	230	2.7	21
TOTAL	410	1.4	5,800	2.4	6,200	2.4	470

Notes:

1. The table contains rounding adjustments to two significant figures and does not total exactly.
2. This Ore Reserve was estimated from practical mining envelopes and the application of modifying factors for mining dilution and ore loss.
3. For the open pit Ore Reserve dilution skins were applied to the undiluted LUC Mineral Resource estimate at zero grade. The in-pit global dilution is estimated to be 31% at Sand King, 45% at Missouri, 24% at Riverina, 13% at Waihi and 26% at Callion all of which were applied at zero grade. The lower dilution at Riverina, Waihi and Callion reflecting the softer lode boundary and allows for inherent dilution within the lode wireframe. All Inferred Mineral Resources were considered as waste at zero grade.
4. The Open Pit Ore Reserve was estimated using incremental cut-off grades specific to location and weathering classification. They range from 0.67 g/t to 0.80 g/t Au and are based on a price of A\$2200 per ounce and include ore transport, processing, site overheads and selling costs and allow for process recovery specific to the location and domain and which range from 85% (Sand King fresh ore) to 95%.
5. Approximately 100,000 t at 1.6 g/t at Riverina was downgraded from Proved to Probable due to current uncertainty surrounding reconciliations experienced during the implementation phase.
6. The underground Ore Reserve was estimated from practical mining envelopes derived from expanded wireframes to allow for unplanned dilution. A miscellaneous unplanned dilution factor of 5% at zero grade was also included. The global dilution factor was estimated to be 52% with zero dilution grade.
7. The underground Ore Reserve was estimated using stoping cut-off of 2.1 g/t Au which allows for ore drive development, stoping and downstream costs such as ore haulage, processing, site overheads and selling costs. An incremental cut-off grade of 0.66 g/t Au was applied to ore drive development and considers downstream costs only. Cut-off grades were derived from a base price of A\$2200 per ounce and allow for process recovery of 92%.
8. For Golden Eagle, approximately 35,000 t at 3.9 g/t of material was classified as Proved and derived from the Measured portion of the Mineral Resource. The balance of the Proved material was contained within surface stockpiles.
9. The Ore Reserve is inclusive of surface stockpiles above the relevant incremental cut-off and total 370,000 t at 1.1 g/t. All surface stockpiles were classified as Proved.

The Company acknowledges that mining operations conducted to date have not achieved all of the Modifying Factors used to estimate the Ore Reserve. However, the operational issues continue to be reviewed, and Missouri is considered to be an early stage operation and the Company has not formed any conclusions that would materially impact Modifying Factors. A work stream has commenced that involves in-depth analysis of the operation and all the available technical data with the view to implementing remedial action to minimise the potential impacts on the Ore Reserve estimate. Any future updates to the Ore Reserve estimate will consider the actual performance of the operation in conjunction with typical industry parameters, to arrive at a position on the appropriate Modifying Factors to apply to the estimate, such that they continue to align with expected and achievable outcomes.
