

## ASX Announcement

CODE: SRJ

27 October 2021

# SRJ Technologies wins further asset integrity consulting work with SBM Offshore

### Highlights

- **New consulting contract for safety system integrity on SBM Offshores' floating production storage and offloading ("FPSO") vessels**
- **Contract extension for detailed engineering analysis for design optimisation of its FPSO's**
- **Combined contracts are currently valued at £100k (A\$184k)**

SRJ Technologies (ASX:SRJ; "SRJ" or "the Company") is pleased to announce it has been awarded a new consulting contract and a contract extension totalling GBP100k (A\$184k) by SBM Offshore ("SBM") based in Monaco.

The contract extension comes following the successful completion of a previous contract to undertake detailed engineering analysis of SBM's future FPSO designs as part of its Fast4ward programme. The SRJ analysis work will enable SBM to optimize the design of machinery spaces without compromising integrity and long-term reliability. The contract extension covers additional in-depth engineering analysis to enable further FPSO design optimisation and to deliver additional cost savings.

The new consulting contract award is for a reliability analysis and maintenance optimisation to ensure safety system integrity on its FPSO's. This contract continues the consulting work SRJ has been delivering to SBM over the last year to support the ongoing implementation and roll out of a new ERP system across its fleet of FPSOs.

Alex Wood CEO of SRJ commented "the SRJ Consulting team is seeing great demand for its expertise in asset integrity management in all its forms – this cements our relationships with customers and gives us credibility as well as clear visibility of opportunities to sell our asset integrity solutions and products"

## **ABOUT SRJ TECHNOLOGIES**

**SRJ Technologies provides specialised engineering services and containment management solutions, elevating customer's integrity management performance.**

We see real value in offering a wider range of asset integrity consulting services helping our customers to better understand the operational risks and where best to focus resource to minimise these risks.

SRJ's range of industry accredited products are designed to maintain and assure the integrity of pressure containment systems and therefore play an important role in the overall integrity of operating facilities.

Using pre-qualified service providers and manufacturers local to customer, SRJ is geolocation-flexible and able to deliver a range of high quality, agile and cost-conscious solutions globally.
