SRJ secures first order in Saudi Arabia

Highlights:

- **SRJ receives first order in Saudi Arabia through ZOMCO agency agreement**
- **The order will provide SRJ asset integrity solutions to SABIC in Jubail Industrial City**
- **SABIC is a global leader in diversified chemicals and is majority owned by Saudi Aramco**
- **The first order through ZOMCO follows the entering of an agency agreement in Q4 2020 with further orders expected**

SRJ Technologies (ASX:SRJ; "SRJ" of "the Company") is pleased to announce it has received its first order in the Kingdom of Saudi Arabia following the appointment of ZAMIL Operations and Maintenance Co Ltd ("ZOMCO") as exclusive agent in the Kingdom in Q4 2020.

The SRJ/ZOMCO partnership has been awarded a contract to design, manufacture and install SRJ asset integrity solutions for the repair and maintenance of pipeline equipment for Saudi Basic Industries Corporation (SABIC) facilities in Jubail Industrial City. SABIC, a global leader in chemical manufacture and production, headquartered in Riyadh, operates in around 50 countries and is majority owned by Saudi Aramco.

SRJ's Head of EMEA, Roger Smith said SRJ will lead and manage the delivery of this project and provide engineering design of asset integrity solutions which is in line with our strategy for product deployment in the Middle East.

"The project will be fast tracked to meet demanding SABIC timescales, will utilise ZOMCO's in-country manufacturing facilities and installation teams and adhere to strict safety protocols."

Given the scale of SABIC's operations in the Kingdom, successful delivery of this first contract will lay the foundation for the expectation of strong sustainable revenues from the region.

The initial order for the SABIC facilities, although not considered financially material, is significant given it is the first major contract in the Kingdom of Saudi Arabia and with a customer the size of SABIC.

ABOUT SRJ TECHNOLOGIES

SRJ Technologies provides specialised engineering services and containment management solutions, elevating customer's integrity management performance.

We see real value in offering a wider range of asset integrity consulting services helping our customers to better understand the operational risks and where best to focus resource to minimise these risks.

SRJ's range of industry accredited products are designed to maintain and assure the integrity of pressure containment systems and therefore play an important role in the overall integrity of operating facilities.

Using pre-qualified service providers and manufacturers local to customer, SRJ is geolocation-flexible and able to deliver a range of high quality, agile and cost-conscious solutions globally.
