SRJ secures first Australian order from Woodside

Highlights:

- **Woodside to deploy SRJ's BoltEx® products for eight-week lease campaign**
- **First deployment of SRJ's products offshore Australia**
- **Demonstrates attractiveness of SRJ's customer value proposition**

SRJ Technologies Group Plc (ASX:SRJ, "SRJ" or "the Company") has received its first purchase order for a Woodside Energy Ltd ("Woodside") bolting campaign, representing the first deployment of its products offshore in Australia. The agreement covers an eight-week rental period, utilising multiple SRJ BoltEx® products. BoltEx® is SRJ's flange clamp product that can reduce the need for plant shutdown and improve asset uptime while also reducing maintenance costs.

SRJ Technologies CEO, Alexander Wood, said: "This contract is a significant first step, validating SRJ's customer value proposition: delivering enhanced operational integrity at competitive pricing."

The contract follows hard on the heels of SRJ's announcement last week of a first purchase order from global floating production giant, Mitsui subsidiary MODEC.

The initial order for the Woodside facilities, although not considered financially material, is significant given it is the first deployment offshore within Australia and with a customer the size of Woodside.

ABOUT SRJ TECHNOLOGIES

SRJ Technologies provides specialised engineering services and containment management solutions, elevating customer's integrity management performance.

We see real value in offering a wider range of asset integrity consulting services helping our customers to better understand the operational risks and where best to focus resource to minimise these risks.

SRJ's range of industry accredited products are designed to maintain and assure the integrity of pressure containment systems and therefore play an important role in the overall integrity of operating facilities.

Using pre-qualified service providers and manufacturers local to customer, SRJ is geolocation-flexible and able to deliver a range of high quality, agile and cost-conscious solutions globally.
