DIRECTORS' REPORT

The Directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'Group') consisting of Attila Resources Limited (referred to hereafter as the 'Company') and the entities it controlled for the year ended 30 June 2014.

Directors

The names of Directors who held office during or since the end of the year and until the date of this report are set out below. Directors were in office for the entire period unless otherwise stated.

Russell Clark	Non Executive Chairman (appointed 11 March 2014)
Max Brunsdon	Executive Director
Evan Cranston	Executive Director
Shaun Day	Non Executive Director
Bryn Hardcastle	Non Executive Director
Alan Thom	Non Executive Director

Information on Directors

Russell Clark, Independent Non Executive Chairman

Mr Clark is a highly experienced and successful senior resources sector executive, and has more than 35 years' experience in technical roles, project management, general management and executive positions at projects in the USA, Africa, Papua New Guinea, and throughout Australia. Mr Clark is currently Managing Director of specialty metals exploration and development company, Wolf Minerals Limited (ASX: WLF, AIM: WLFE). Wolf Minerals is currently transitioning from the exploration and development phase of its evolution into mine construction, and eventual production, at its Hemerdon tungsten and tin project in Devon, England.

Mr Clark holds a Mining Engineering degree (BSc Hons) from the Royal School of Mines, London, UK and a Graduate Diploma from the Securities Institute of Australia.

Mr Clark was appointed to the Board on 11 March 2014 and is a member of the Remuneration Committee (from 31 March 2014).

Other current listed directorships

Wolf Minerals Ltd (from 16 October 2013)

Former listed directorships in last 3 years

Grange Resources Ltd (6 March 2008 – 6 July 2012)

Max Brunsdon, Executive Director

Max Brunsdon is Executive Director – Marketing for Attila Resources Ltd. He has over 30 years' experience in the coal industry having worked for BHP and Bathurst Resources Limited. Mr Brunsdon's particular areas of expertise are in the fields of sales, marketing and logistics.

Mr Brunsdon was appointed to the Board on 10 October 2012.

Company Secretary

Oonagh Malone was appointed as Company Secretary on 10 October 2012 following the resignation of Mr Grant Mooney. Ms Malone is a principal of a corporate advisory firm which provides company secretarial and administrative services. She has over 5 years' experience in administrative and company secretarial roles for listed companies and is a member of the Governance Institute of Australia. She currently acts as company secretary for ASX-listed Boss Resources Ltd and Carbine Resources Ltd.

Directors' Meetings

During the financial year ended 30 June 2014, there were 8 meetings of the Board of Directors, 2 meetings of the Audit Committee and 4 meetings of the Remuneration Committee. Attendances by each Director during the period were as follows:

Director	Board of Directors		Audit Committee		Remuneration Committee	
	Number Attended	Number Eligible to Attend	Number Attended as Member	Number Eligible to Attend	Number Attended as Member	Number Eligible to Attend
Russell Clark	4	4	-	-	2	2
Max Brunsdon	8	8	-	-	-	-
Evan Cranston	8	8	-	-	-	-
Shaun Day	8	8	1	2	4	4
Bryn Hardcastle	6	8	2	2	4	4
Alan Thom	7	8	2	2	2	2

The Directors made and approved 5 circular resolutions during the financial period ended 30 June 2014.

Principal Activities

The principal activities of the Group are the review and development of mineral exploration projects. There were no significant changes in the nature of these activities during the year ended 30 June 2014.

Dividends

No dividend has been declared or paid by the Group during the financial year and the Directors do not at present recommend a dividend.

Operating Results

The consolidated comprehensive loss of the Group amounted to \$6,949,697 (2013: Loss \$13,391,232) after providing for income tax.

Review of Operations

Kodiak Coking Coal Project (Attila 70%)

During the period the Group focused on the exploration and development of the Kodiak Coking Coal Project located in the Cahaba Basin, Alabama USA. In August 2014 the Group released the results of a prefeasibility study for the Kodiak Coking Coal Project. The Group executed an option agreement to acquire the Upper Thompson coal seam (Gurnee Property) and a lease agreement on the Gholson and Clarke coal seams (Gurnee Property). The Group is currently undertaking a definitive feasibility study on the Project.

Significant Changes in the State of Affairs

The following significant changes in the state of affairs of the Group occurred during the year ended 30 June 2014:

- The Company issued the following ordinary shares:
 - 1,000,000 ordinary shares in settlement (without admission) of a legal dispute with Monomatapa Coal Limited
 - 11,500,000 ordinary shares at an issue price of \$0.60 per share
 - 2,002,324 ordinary shares as an interest payment on convertible notes at \$0.42 per share
 - 1,500,000 ordinary shares on conversion of unlisted options at \$0.20 each
 - 538,698 ordinary shares on the conversion of listed options at \$0.20 each
 - 3,079,776 ordinary shares as an interest payment on convertible notes at \$0.27 per share
- The Company issued the following unlisted options:
 - 1,000,000 director options exercisable at \$0.5888 each on or before 11 March 2017

- 500,000 director options exercisable at \$0.7247 each on or before 11 March 2017 (vesting after 12 months continuous service)
- 1,000,000 employee options exercisable at \$0.5251 each on or before 15 April 2017
- 500,000 employee options exercisable at \$0.6463 each on or before 15 April 2017 (vesting after 12 months continuous service)
- On 25 June 2014, the Company issued 1,000,000 Performance Rights with vesting subject to performance criteria being achieved and expiring on 25 June 2019.
- On 23 September 2013, the Company announced it had entered into a lease agreement and an option agreement to acquire additional leases within the Gurnee Property at the Kodiak Coking Coal Project.
- The Company relinquished the following Australian tenements – E15/1120, E15/1227, E15/1228, E09/1564 and E09/1747.

Matters Subsequent to the End of the Financial Year

Other than the following, the Directors are not aware of any other significant events since the end of the reporting period:

- On 11 July 2014, 6,378,892 ordinary shares were issued on the conversion of listed options at \$0.20 each
- On 8 August 2014, 1,000,000 fully paid ordinary shares were issued at an issue price of \$0.20 each on conversion of 1,000,000 unlisted options

No other matters or circumstances have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the Group, the result of these operations, or the state of the affairs of the Group in future financial year.

Future Developments, Prospects and Business Strategies

Disclosure of further information regarding likely developments in the operations of the Group in future financial periods and the expected results of those operations is likely to result in unreasonable prejudice of those operations, or the state of affairs of the Group in future financial periods.

Share Options

At the date of this report, the Group had the following options over ordinary shares on issue:

Type of Options	Number of Options	Exercise Price	Expiry Date
Unlisted Director Options	1,500,000	\$0.29	9 March 2015
Unlisted Options	4,000,000	\$0.50	28 June 2015
Unlisted Employee Options	250,000	\$1.25	9 November 2015
Unlisted Director Options	5,500,000	\$1.36	30 November 2015
Unlisted Director Options	1,500,000	\$1.02	28 March 2016
Unlisted Director Options vesting on 28 March 2014	1,000,000	\$1.14	28 March 2016
Unlisted Director Options	1,000,000	\$0.5888	11 March 2017
Unlisted Director Options vesting on 11 March 2015	500,000	\$0.7247	11 March 2017
Unlisted Employee Options	1,000,000	\$0.5251	15 April 2017
Unlisted Employee Options vesting on 1 April 2015	500,000	\$0.6463	15 April 2017

At the date of this report, the total unissued ordinary shares of Attila Resources Limited under option are 16,750,000.

Directors' interests

The relevant interest of each Director in the share capital of the Group shown in the Register of Directors' shareholdings as at the date of this report is:

DIRECTOR	ORDINARY SHARES FULLY PAID		OPTIONS	
	Direct	Indirect	Direct	Indirect
Russell Clark	41,667	-	1,500,000	-
Max Brunsdon	-	3,805,639	-	4,000,000
Evan Cranston	-	-	-	5,000,000
Shaun Day	-	127,881	-	1,500,000
Bryn Hardcastle	90,000	-	-	500,000
Alan Thom	-	-	1,500,000	-
Total	131,667	3,933,520	3,000,000	11,000,000

Remuneration report

The Remuneration Report, which has been audited, outlines the Director and executive remuneration arrangements for the Group and the Company, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Compensation of Key Management Personnel

Remuneration is referred to as compensation throughout this report.

Key management personnel have authority and responsibility for planning, directing and controlling activities of the Group, directly or indirectly, including directors of the Company and other key executives. Key management personnel comprises the Directors of the Company and the senior executives for the Group that are named in this report.

Compensation levels for key management personnel of the Group are competitively set to attract and retain appropriately qualified and experienced directors and executives. The Remuneration Committee assesses the appropriateness of compensation packages of the Group given trends in comparative companies and the objectives of the Group's compensation strategy.

The Constitution and the ASX Listing Rules specify that the aggregate remuneration of non-executive directors shall be determined from time to time by a general meeting.

The compensation structures explained below are designed to attract suitably qualified candidates, reward the achievement of strategic objectives, and achieve the broader outcome of creation of value for shareholders. The compensation structures take into account:

- the capability and experience of key management personnel
- the key management personnel's ability to control the relevant segment/s' performance
- the Group's performance including:
 - the Group's earnings;
 - the growth in share price and delivering constant returns of shareholder wealth; and
 - the amount of incentives within each key management person's compensation.

Compensation packages can include a mix of fixed and variable compensation, and short and long term performance based incentives.

Fixed compensation

Fixed compensation consists of base compensation (which is calculated on a total cost basis), as well as non-monetary benefits, leave entitlements and employer contributions to defined contribution superannuation funds.

Compensation levels are reviewed annually by the Remuneration Committee through a process that considers individual and overall performance of the Group. In addition, the Remuneration Committee may from time to time engage external consultants to provide analysis and advice to ensure the Directors' and senior executives' compensation is competitive in the market place.

Performance linked compensation

Performance linked compensation includes both short and long term incentives, and is designed to reward senior executives for meeting or exceeding their financial and personal objectives. The short term incentive (STI) is an "at risk" bonus provided in the form of cash. The long term incentive (LTI) can be issued in the form of options or performance rights.

Short term incentive bonus

The Remuneration Committee sets key performance indicators (KPIs) for relevant senior executives. The KPIs generally includes measures relating to the Group, the relevant segment, and the individual, and can include financial, people, strategy and risk measures. The measures are chosen as they directly align the individual's reward with the KPIs of the Group and with its strategy and performance.

At the end of the financial year, the Remuneration Committee assesses performance against the KPIs set at the beginning of the financial year. A percentage of the pre-determined maximum amount is awarded depending on results. The Remuneration Committee recommends the cash incentive to be paid for approval by the Board. The Board retains the discretion to vary the final cash incentive if performance is considered to be deserving of either a greater or lesser amount.

The short term incentive was not offered to any senior executives for the year ending 30 June 2014. KPIs for the year commencing 1 July 2014 have been set for the Chief Executive Officer and performance will be evaluated at the end of that financial year.

Long term incentive

The Company issues options to key management personnel in accordance with the Company's Employee Share Option Plan or in accordance with shareholder approval in the case of directors. Vesting conditions including length of service can be applied to these options. The Company views the exercise price being set at a premium to the share price at the time of issue as an incentive designed to drive Group performance.

Performance rights are issued in accordance with the Company's Performance Rights Plan (subject to shareholder approval). Performance rights convert to ordinary shares of the Company on a one-to-one basis depending on the achievement of performance hurdles. Performance rights were granted to the Chief Executive Officer during the year ending 30 June 2014 with a performance related vesting condition attached and an expiry date of five years from issue. The Board believes that the performance hurdle aligns the interests of the key management personnel with the interests of the Company's shareholders.

Rights that do not vest at the end of the five year period from issue will lapse, unless the Board in its discretion determines otherwise. Performance rights do not entitle holders to dividends that are declared during the vesting period.

Compensation of Key Management Personnel

2014	Short-Term Benefits Cash salary and fees \$	Post Employment Benefits Superannuation \$	Share-Based Payments Options and Performance Rights \$	Total \$	Proportion of remuneration performance related %
<i>Non-Executive Directors:</i>

* The value at grant date calculated in accordance with AASB 2 Share-based Payment of options granted during the year as part of remuneration. The dollar value of the percentage vested or paid during the year has been reflected in the table of Compensation for Key Management Personnel.

The assessed fair value at grant date of options granted to the individuals is allocated equally over the period from grant date to vesting date, and the amount is included in the remuneration tables above. Fair values at grant date are independently determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield, the risk-free interest rate for the term of the option and the liquidity of the share market. Refer to note 29.

Service Agreements

A summary of the current service agreements entered into with Executive Directors is set out below:

Executive Director	Term of Agreement	Base salary per annum including superannuation* (Non-performance based)	Termination Conditions	Proportion of elements of remuneration related to performance
Max Brunsdon	No specified term	\$240,000	1 month notice period	-
Evan Cranston	No specified term	\$240,000	3 month notice period	-

* Base salary quoted is the position as at 30 June 2014; salaries are reviewed annually.

On appointment to the Board, all non-executive directors enter into a service agreement with the Company in the form of a letter of appointment. The letter summarises the Board policies and terms, including compensation, relevant to the office of director. The major provisions relating to remuneration are set out below.

Non-Executive Director	Term of Agreement	Base salary per annum including superannuation* (Non-performance based)	Termination Conditions	Proportion of elements of remuneration related to performance
Russell Clark	No specified term	\$50,000	No notice required to terminate	-
Shaun Day	No specified term	\$40,000	No notice required to terminate	-
Bryn Hardcastle	No specified term	\$40,000	No notice require to terminate	-
Alan Thom	No specified term	\$40,000	No notice required to terminate	-

* Base salary quoted is the position as at 30 June 2014; salaries are reviewed annually.

Chief Executive Officer

The Chief Executive Officer, Scott Sullivan, was appointed on 1 April 2014 with a base salary of \$300,000 plus statutory superannuation and a short term bonus entitlement of up to a maximum of 30% subject to annual review and completion of set KPIs.

The Company or Mr Sullivan can terminate the contract on 3 months' notice and the Executive is entitled to a 12 month payment if made redundant.

Mr Sullivan has been issued with:

- 1,000,000 unlisted options to acquire fully paid shares in the capital of the Company with an exercise price of \$0.5251 and expiring on 15 April 2017;
- 500,000 unlisted options vesting after 12 months of continuous service with the Company with an exercise price of \$0.6463 and expiring on 15 April 2017; and
- 1,000,000 performance rights that are held in trust by the trustee of the Attila Resources Performance Rights Trust until the performance based vesting conditions are satisfied. On vesting, these performance rights convert into ordinary shares in the Company for no further consideration. These performance rights expire on 25 June 2019 if they have not previously vested. These performance rights have been valued for accounting purposes at \$0.41 each, being the share price at the grant date of 1 April 2014 for a total value of \$410,000. The performance rights are being expensed over the expected vesting period of one year from the grant date. \$102,219 has been expensed for these performance rights during the year, based on the expected portion of the vesting period occurring during the year. These performance rights were issued to the trustee of the Attila Resources Performance Rights Trust on 25 June 2014.

Option holdings of Key Management Personnel

The number of options over ordinary shares of Attila Resources Limited held by each KMP of the Group during the year is as follows:

2014

Key Management Personnel	Balance at beginning of year*	Granted as remuneration during the year	Options exercised during the year	Other changes during the year	Balance at end of year**	Vested during the year	Vested and exercisable
Max Brunsdon	4,000,000	-	-	-	4,000,000	-	4,000,000
Russell Clark	-	1,500,000	-	-	1,500,000	1,000,000	1,000,000
Evan Cranston	5,000,000	-	-	-	5,000,000	-	5,000,000

End of audited remuneration report.**Indemnifying Officers or Auditor**

The Company has paid premiums to insure all Directors and Officers against liabilities for costs and expenses incurred by them in defending any legal proceedings arising out of their conduct while acting in their capacity of director of the Company, other than conduct involving a wilful breach of duty in relation to the Company.

Disclosure of the nature and the amount of the premium is prohibited by the confidentiality clause of the insurance contract.

No indemnities have been given or agreed to be given or insurance premiums paid or agreed to be paid, during or since the year ended 30 June 2014, to any person who is or has been an auditor of the Company.

Auditor

Maxim Audit has been appointed as auditor of the Group in accordance with section 327 of Corporations Act 2001.

Non-audit Services

There were no non-audit services provided by a related practice of the Group's auditor during the year ended 30 June 2014.

Proceedings on behalf of the Company

No person has applied for leave of Court to bring proceedings on behalf of the Group or intervene in any proceedings to which the Group is a party for the purpose of taking responsibility on behalf of the Group for all or any part of those proceedings.

The Group was not a party to any such proceedings during the year.

Environmental Regulations

The Group is required to carry out its activities in accordance with the Mining Laws and regulations in the areas in which it undertakes its exploration activities. The Group is not aware of any matter which requires disclosure with respect to any significant environmental regulation in respect of its operating activities.

Auditor's Independence Declaration

The lead auditor's independence declaration for the year ended 30 June 2014 has been received and can be found on page 16.

Made and signed in accordance with a resolution of the Directors.

Russell Clark

Non Executive Chairman

Signed at Perth this 30th day of September 2014

**AUDITOR'S INDEPENDENCE DECLARATION
UNDER SECTION 307C OF THE CORPORATIONS ACT 2001**

TO THE DIRECTORS OF ATTILA RESOURCES LIMITED

I declare that, to the best of my knowledge and belief, during the year ended 30 June 2014 there has been no contraventions of:

- (i) the auditor independence requirements as set out in the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

NOTES TO THE FINANCIAL STATEMENTS

The consolidated financial statements and notes represent those of Attila Resources Limited and Controlled Entities (the "Group"). The separate financial statements of the parent entity, Attila Resources Limited, have not been presented within this financial report as permitted by the Corporations Act 2001.

The financial statements for the Group were authorised for issue in accordance with a resolution by the Board of Directors on 30th September 2014.

Note 1: Summary of Significant Accounting Policies

Basis of preparation

The financial statements are general purpose financial statements that have been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in financial statements containing relevant and reliable information about transactions, events and conditions. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards as issued by the IASB. Material accounting policies adopted in the preparation of these financial statements are presented below and have been consistently applied unless stated otherwise.

Except for cash flow information, the financial statements have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

a. Going concern

For the year ended 30 June 2014, the Group has incurred a loss of \$6,752,119 and generated net cash outflows of \$4,651,651 from operating activities, as disclosed in the consolidated statement of profit or loss and other comprehensive income and the consolidated statement of cash flows respectively. It also has a deficiency in working capital of \$7,087,937 as at 30 June 2014 as disclosed in the consolidated statement of financial position.

The deficiency in working capital is principally due to the potential for convertible notes to be repaid in cash in June 2015 (refer to note 14).

As a result of the loss, cash outflows from operations and the deficiency in working capital, the Directors have assessed the Group's ability to continue as a going concern and to pay its debts as and when they fall due as follows.

The Directors of the Parent entity advise that the Group has sufficient cash reserves to fund up to the next 11 months of operations from balance date, including expected completion of the definitive feasibility study, to continue as a going concern and to pay its debts as and when they fall due. This estimation is based on active management of the current level of discretionary exploration expenditure in line with the funds available.

The funding of the Group past this point and to continue as a going concern and to pay its debts as and when they fall due is dependent on the following:

- continued management of discretionary expenditure in line with the funds available to the Group; and
- the ability of the Group to secure additional funding through either the issue of further shares, debt or a combination of debt and equity. The form and value of such raisings is yet to be determined as they would depend on the results of the definitive feasibility study, along with metallurgical coal market considerations and capital market considerations.

Should the Group at any time be unable to continue as a going concern, it may be required to realise its assets and extinguish its liabilities other than in the normal course of business and at amounts different from those stated in the financial report.

The financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts nor to the amounts and classification of liabilities that may be necessary should the Group be unable to continue as a going concern.

Note 1: Summary of Significant Accounting Policies (continued)**b. Principles of Consolidation**

The consolidated financial statements incorporate all of the assets, liabilities and results of the parent (Attila Resources Limited) and all of the subsidiaries (including any structured entities). Subsidiaries are entities the parent controls. The parent controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. A list of the subsidiaries is provided in Note 25.

The assets, liabilities and results of all subsidiaries are fully consolidated into the financial statements of the Group from the date on which control is obtained by the Group. The consolidation of a subsidiary is discontinued from the date that control ceases. Intercompany transactions, balances and unrealised gains or losses on transactions between Group entities are fully eliminated on consolidation. Accounting policies of subsidiaries have been changed and adjustments made where necessary to ensure uniformity of the accounting policies adopted by the Group.

Equity interests in a subsidiary not attributable, directly or indirectly, to the Group are presented as “non-controlling interests”. The Group initially recognises non-controlling interests that are present ownership interests in subsidiaries and are entitled to a proportionate share of the subsidiary’s net assets on liquidation at either fair value or at the non-controlling interests’ proportionate share of the subsidiary’s net assets. Subsequent to initial recognition, non-controlling interests are attributed their share of profit or loss and each component of other comprehensive income. Non-controlling interests are shown separately within the equity section of the statement of financial position and statement of profit or loss and other comprehensive income.

Business combinations

Business combinations occur where an acquirer obtains control over one or more businesses.

A business combination is accounted for by applying the acquisition method, unless it is a combination involving entities or businesses under common control. The business combination will be accounted for from the date that control is attained, whereby the fair value of the identifiable assets acquired and liabilities (including contingent liabilities) assumed is recognised (subject to certain limited exemptions).

When measuring the consideration transferred in the business combination, any asset or liability resulting from a contingent consideration arrangement is also included. Subsequent to initial recognition, contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability is remeasured in each reporting period to fair value, recognising any change to fair value in profit or loss, unless the change in value can be identified as existing at acquisition date.

All transaction costs incurred in relation to business combinations are expensed to the statement of profit or loss and other comprehensive income.

The acquisition of a business may result in the recognition of goodwill or a gain from a bargain purchase.

Goodwill

Goodwill is carried at cost less any accumulated impairment losses. Goodwill is calculated as the excess of the sum of:

- (i) the consideration transferred;
- (ii) any non-controlling interest; and
- (iii) the acquisition date fair value of any previously held equity interest;

over the acquisition date fair value of net identifiable assets acquired.

The acquisition date fair value of the consideration transferred for a business combination plus the acquisition date fair value of any previously held equity interest shall form the cost of the investment in the separate financial statements.

Note 1: Summary of Significant Accounting Policies (continued)

Fair value remeasurements in any pre-existing equity holdings are recognised in profit or loss in the period in which they arise. Where changes in the value of such equity holdings had previously been recognised in other comprehensive income, such amounts are recycled to profit or loss.

The amount of goodwill recognised on acquisition of each subsidiary in which the Group holds less than a 100% interest will depend on the method adopted in measuring the non-controlling interest. The Group can elect in most circumstances to measure the non-controlling interest in the acquiree either at fair value (*full goodwill method*) or at the non-controlling interest's proportionate share of the subsidiary's identifiable net assets (*proportionate interest method*). In such circumstances, the Group determines which method to adopt for each acquisition and this is stated in the respective notes to these financial statements disclosing the business combination.

Under the full goodwill method, the fair value of the non-controlling interests is determined using valuation techniques which make the maximum use of market information where available. Under this method, goodwill attributable to the non-controlling interests is recognised in the consolidated financial statements.

Goodwill on acquisition of subsidiaries is included in intangible assets. Goodwill on acquisition of associates is included in investments in associates.

Goodwill is tested for impairment annually and is allocated to the Group's cash-generating units or groups of cash-generating units, representing the lowest level at which goodwill is monitored not larger than an operating segment. Gains and losses on the disposal of an entity include the carrying amount of goodwill related to the entity disposed of.

Changes in the ownership interests in a subsidiary are accounted for as equity transactions and do not affect the carrying amounts of goodwill.

c. Income Tax

The income tax expense (revenue) for the year comprises current income tax expense (income) and deferred tax expense (income).

Current income tax expense charged to profit or loss is the tax payable on taxable income. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well unused tax losses.

Current and deferred income tax expense (income) is charged or credited outside profit or loss when the tax relates to items that are recognised outside profit or loss.

Except for business combinations, no deferred income tax is recognised from the initial recognition of an asset or liability, where there is no effect on accounting or taxable profit or loss.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled and their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability. With respect to non-depreciable items of property, plant and equipment measured at fair value and items of investment property measured at fair value, the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of the asset will be recovered entirely through sale.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur.

Note 1: Summary of Significant Accounting Policies (continued)

Deferred tax assets and liabilities are offset where: (a) a legally enforceable right of set-off exists; and (b) the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

d. Foreign currency transactions and balances**Functional and presentation currency**

The functional currency of each of the Group's entities is measured using the currency of the primary economic environment in which that entity operates. The consolidated financial statements are presented in Australian dollars, which is the parent entity's functional currency.

Transactions and balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the year-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items are recognised in profit or loss, except where deferred in equity as a qualifying cash flow or net investment hedge.

Exchange differences arising on the translation of non-monetary items are recognised directly in other comprehensive income to the extent that the underlying gain or loss is recognised in other comprehensive income; otherwise the exchange difference is recognised in profit or loss.

Group companies

The financial results and position of foreign operations, whose functional currency is different from the Group's presentation currency, are translated as follows:

- assets and liabilities are translated at exchange rates prevailing at the end of the reporting period;
- income and expenses are translated at average exchange rates for the period; and
- retained earnings are translated at the exchange rates prevailing at the date of the transaction.

Exchange differences arising on translation of foreign operations with functional currencies other than Australian dollars are recognised in other comprehensive income and included in the foreign currency translation reserve in the statement of financial position. These differences are recognised in profit or loss in the period in which the operation is disposed of.

e. Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand and deposits held at call with financial institutions which are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

f. Property, plant and equipment

Each class of property, plant and equipment is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Note 1: Summary of Significant Accounting Policies (continued)**Property, Plant and equipment**

Property, plant and equipment are measured on the cost basis and therefore carried at cost less accumulated depreciation and any accumulated impairment. In the event the carrying amount of property, plant and equipment is greater than the estimated recoverable amount, the carrying amount is written down immediately to the estimated recoverable amount and impairment losses are recognised either in profit or loss or as a revaluation decrease if the impairment losses relate to a revalued asset. A formal assessment of recoverable amount is made when impairment indicators are present (refer to Note 1(j) for details of impairment).

The carrying amount of property, plant and equipment is reviewed annually by directors to ensure it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the asset's employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts.

The cost of fixed assets constructed within the consolidated group includes the cost of materials, direct labour, borrowing costs and an appropriate proportion of fixed and variable overheads.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are recognised as expenses in the statement of profit or loss and other comprehensive income during the financial period in which they are incurred.

Depreciation

The depreciable amount of all fixed assets including buildings and capitalised lease assets, but excluding freehold land, is depreciated on a straight-line basis over the asset's useful life to the consolidated group commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

Buildings	25 years
Furniture, fittings and equipment	3-8 years

Land is not depreciated. Buildings and mining plant are only depreciated when in use.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are recognised in profit or loss in the period in which they arise. When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained earnings.

g. Intangibles other than goodwill

Trademarks, licences and logos are recognised at cost of acquisition. Trademark, licences and logos are carried at cost less any accumulated amortisation and any impairment losses. Amortisation is calculated and determined based on case by case basis.

h. Exploration, Evaluation and Development Expenditure

All exploration and evaluation expenditure is expensed to the statement of profit or loss and other comprehensive income.

Note 1: Summary of Significant Accounting Policies (continued)

Expenditure in relation to the acquisition of a defined resource including an option to enter a mining lease is capitalised in respect of each identifiable area of interest. These costs are only capitalised to the extent that they are expected to be recovered through the successful development of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Accumulated costs in relation to an abandoned area are written off in full against profit or loss in the year in which the decision to abandon the area is made.

When production commences, the accumulated costs for the relevant area of interest are amortised over the life the area according to the rate of depletion of the economically recoverable reserves.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to capitalise costs in relation to that area of interest.

i. Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST except:

- where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, are classified as operating cash flows included in receipts from customers or payments to suppliers.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

j. Impairment of assets

At the end of each reporting period, the Group assesses whether there is any indication that an asset may be impaired. The assessment will include the consideration of external and internal sources of information including dividends received from subsidiaries, associates or jointly controlled entities deemed to be out of pre-acquisition profits. If such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, to the asset's carrying amount. Any excess of the asset's carrying amount over its recoverable amount is recognised immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another Standard (e.g. in accordance with the revaluation model in AASB 116). Any impairment loss of a revalued asset is treated as a revaluation decrease in accordance with that other Standard.

Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

k. Share based payments

Equity-settled share-based payments are measured at fair value at the date of grant. Fair value is measured by use of a Black-Scholes model. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of shares that will eventually vest.

Note 1: Summary of Significant Accounting Policies (continued)**I. Trade and Other Payables**

These amounts represent liabilities for goods and services provided to the Company prior to the end of financial year ended 30 June 2014 which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

m. Contributed Equity

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

n. Employee benefits

A provision is made for the Group's liability for employee benefits arising from services rendered by employees to balance date. Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably. Employee benefits that are expected to be settled within one year have been measured at the amounts expected to be paid when the liability is settled plus related on costs. Employee benefits payable later than one year have been measured at the present value of the estimated future cash outflows to be made for those benefits. In determining the liability, consideration is given to employee wages increases and the probability that the employee may satisfy vesting requirements. Those cash flows are discounted using market yields on national government bonds with terms to maturity that match the expected timing of cash flows.

Equity-settled compensation

Share-based payments to employees are measured at the fair value of the instruments issued and amortised over the vesting periods. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The corresponding amount is recorded to the option reserve. The fair value of options is determined using the Black-Scholes pricing model. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting period such that the amount recognised for services received as consideration for the equity instruments granted is based on the number of equity instruments that eventually vest.

o. Financial instruments*Recognition*

The Group recognises financial assets and financial liabilities on the date that they are originated. All other financial assets are recognised initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Classification and Subsequent Measurement

Financial instruments are subsequently valued at fair value amortised cost using the effective interest method, or cost.

Amortised Cost

Amortised cost is calculated as the amount at which the financial asset or financial liability is measured at initial recognition less principal repayments and any reduction for impairment, and adjusted for any cumulative amortisation of the difference between that initial amount and the maturity amount calculated using the effective interest method.

Note 1: Summary of Significant Accounting Policies (continued)*The Effective Interest Method*

The effective interest method is used to allocate interest income or interest expense over the relevant period and is equivalent to the rate that discounts estimated future cash payments or receipts (including fees, transaction costs and other premiums or discounts) over the expected life (or when this cannot be reliably predicted, the contractual term) of the financial instrument to the net carrying amount of the financial asset or financial liability. Revisions to expected future net cash flows will necessitate an adjustment to the carrying amount with a consequential recognition of an income or expense item in profit or loss.

Fair value

The Group measures some of its assets and liabilities at fair value on either a recurring or non-recurring basis, depending on the requirements of the applicable Accounting Standard.

Fair value is the price the Group would receive to sell an asset or would have to pay to transfer a liability in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset or liability. The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset or liability (ie the market with the greatest volume and level of activity for the asset or liability) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (ie the market that maximises the receipts from the sale of the asset or minimises the payments made to transfer the liability, after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

The fair value of liabilities and the entity's own equity instruments (excluding those related to share - based payment arrangements) may be valued, where there is no observable market price in relation to the transfer of such financial instruments, by reference to observable market information where such instruments are held as assets. Where this information is not available, other valuation techniques are adopted and, where significant, are detailed in the respective note to the financial statements.

Valuation techniques

In the absence of an active market for an identical asset or liability, the Group selects and uses one or more valuation techniques to measure the fair value of the asset or liability. The Group selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the Group are consistent with one or more of the following valuation approaches:

- *Market approach:* valuation techniques that use prices and other relevant information generated by market transactions for identical or similar assets or liabilities.
- *Income approach:* valuation techniques that convert estimated future cash flows or income and expenses into a single discounted present value.
- *Cost approach:* valuation techniques that reflect the current replacement cost of an asset at its current service capacity.

Note 1: Summary of Significant Accounting Policies (continued)

Each valuation technique requires inputs that reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the Group gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability are considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

Fair value hierarchy

AASB 13 requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurements into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

Level 1	Level 2	Level 3
Measurements based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.	Measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.	Measurements based on unobservable inputs for the asset or liability.

The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

The Group would change the categorisation within the fair value hierarchy only in the following circumstances:

- (i) if a market that was previously considered active (Level 1) became inactive (Level 2 or Level 3) or vice versa; or
- (ii) if significant inputs that were previously unobservable (Level 3) became observable (Level 2) or vice versa.

When a change in the categorisation occurs, the Group recognises transfers between levels of the fair value hierarchy (ie transfers into and out of each level of the fair value hierarchy) on the date the event or change in circumstances occurred.

The Group has no assets or liabilities measured at fair value because, while assets acquired and liabilities assumed in business combinations have been measured at their acquisition date fair values, in accordance with paragraph 18 of AASB 3, these initial measurements have formed the costs of the assets acquired and liabilities assumed for the purpose of other accounting standards.

Impairment

At the end of each reporting period, the Group assesses whether there is objective evidence that a financial asset has been impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events (a "loss event") having occurred, which has an impact on the estimated future cash flows of the financial asset(s).

In the case of available-for-sale financial assets, a significant or prolonged decline in the market value of the instrument is considered to constitute a loss event. Impairment losses are recognised in profit or loss immediately. Also, any cumulative decline in fair value previously recognised in other comprehensive income is reclassified to profit or loss at this point.

In the case of financial assets carried at amortised cost, loss events may include: indications that the debtors or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments; indications that they will enter bankruptcy or other financial reorganisation; and changes in arrears or economic conditions that correlate with defaults.

Note 1: Summary of Significant Accounting Policies (continued)

For financial assets carried at amortised cost (including loans and receivables), a separate allowance account is used to reduce the carrying amount of financial assets impaired by credit losses. After having taken all possible measures of recovery, if management establishes that the carrying amount cannot be recovered by any means, at that point the written-off amounts are charged to the allowance account or the carrying amount of impaired financial assets is reduced directly if no impairment amount was previously recognised in the allowance account.

When the terms of financial assets that would otherwise have been past due or impaired have been renegotiated, the Group recognises the impairment for such financial assets by taking into account the original terms as if the terms have not been renegotiated so that the loss events that have occurred are duly considered.

Financial Liabilities

Non-derivative financial liabilities other than financial guarantees are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss through the amortisation process and when the financial liability is derecognised.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss through the amortisation process and when the financial asset is derecognised.

Derecognition

Financial assets are derecognised when the contractual rights to receipt of cash flows expire or the asset is transferred to another party whereby the entity no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are derecognised when the related obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised in profit or loss.

p. Revenue and Other Income

Interest revenue is recognised using the effective interest method.

q. Parent entity financial information

The financial information for the parent entity, Attila Resources Limited, disclosed in note 30 has been prepared on the same basis as the consolidated financial statements, except as set out below.

Investments in subsidiaries

Investments in subsidiaries are accounted for at cost in the financial statements of Attila Resources Limited.

Tax consolidation legislation

Attila Resources Limited and its wholly-owned Australian controlled entity have implemented the tax consolidation legislation. The Group has applied to become consolidated tax entity.

The head entity, Attila Resources Limited, and the controlled entity in the tax consolidated group account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a standalone taxpayer in its own right.

In addition to its own current and deferred tax amounts, Attila Resources Limited also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from the controlled entity in the tax consolidated group.

Note 1: Summary of Significant Accounting Policies (continued)

Attila Resources Limited will be responsible for any current tax payable, current tax receivable and deferred tax assets relating to unused tax losses or unused tax credits of the wholly owned subsidiary, which are transferred to Attila Resources Limited under tax consolidation legislation.

The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

Assets or liabilities arising with the tax consolidated entity are recognised as current amounts receivable from or payable to other entity in the Group.

Any difference between the amounts assumed and amounts receivable or payable are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entity.

Share-based payments

The grant by the Company of options over its equity instruments to the employees of subsidiary undertakings in the Group is treated as a capital contribution to that subsidiary undertaking. The fair value of employee services received, measured by reference to the grant date fair value, is recognised over the vesting period as an increase to investment in subsidiary undertakings, with a corresponding credit to equity.

r. Leases

Leases of fixed assets where substantially all the risks and benefits incidental to the ownership of the asset, but not the legal ownership are transferred to entities in the consolidated group, are classified as finance leases.

Finance leases are capitalised by recognising an asset and a liability at the lower of the amounts equal to the fair value of the leased property or the present value of the minimum lease payments, including any guaranteed residual values. Lease payments are allocated between the reduction of the lease liability and the lease interest expense for the period.

Leased assets are depreciated on a straight-line basis over the shorter of the lease term or estimated useful lives.

Lease payments for operating leases, where substantially all the risks and benefits remain with the lessor, are recognised as expenses in the periods in which they are incurred.

Lease incentives under operating leases are recognised as a liability and amortised on a straight-line basis over the lease term.

s. New and Amended Accounting Policies adopted by the Group

The Group has adopted the following new and revised Australian Accounting Standards from 1 July 2013 together with consequential amendments to other Standards:

- AASB 10: *Consolidated Financial Statements*;
- AASB 127: *Separate Financial Statements* (August 2011);
- AASB 11: *Joint Arrangements*;
- AASB 128: *Investments in Associates and Joint Ventures* (August 2011);
- AASB 12: *Disclosure of Interests in Other Entities*;
- AASB 2011–7: *Amendments to Australian Accounting Standards arising from the Consolidation and Joint Arrangements Standards*;
- AASB 2012–10: *Amendments to Australian Accounting Standards – Transition Guidance and Other Amendments*; and
- AASB 13: *Fair Value Measurement*

Note 1: Summary of Significant Accounting Policies (continued)

These Standards became mandatorily applicable from 1 January 2013 and became applicable to the Group for the first time in the current year ending 30 June 2014. The Group has applied these Accounting Standards retrospectively in accordance with AASB 108: *Accounting Policies, Changes in Accounting Estimates and Errors* and the specific transition requirements in AASB 10 and AASB 11. The effects of initial application of these Standards in the current reporting period are as follows:

Consolidated financial statements

AASB 10 provides a revised definition of control and additional application guidance so that a single control model will apply to all investees. Revised AASB 127 facilitates the application of AASB 10 and prescribes requirements for separate financial statements of the parent entity. On adoption of AASB 10, any assets, liabilities and non-controlling interests related to investments in businesses that are now assessed as being controlled by the Group, and were therefore not previously consolidated, are measured as if the investee had been consolidated (and therefore applied acquisition accounting in accordance with AASB 3: *Business Combinations*) from the date when the Group obtained control of that investee on the basis of the requirements in AASB 10.

Upon the initial application of AASB 10, retrospective restatement of financial statement amounts of the year that immediately precedes the date of initial application (ie 2012–2013) is necessary. When control is considered to have been obtained earlier than the beginning of the immediately preceding year (ie pre-1 July 2012), any difference between the amount of assets, liabilities and non-controlling interests recognised and the previous carrying amount of the investment in that investee is recognised as an adjustment to equity as at 1 July 2012.

Although the first-time application of AASB 10 (together with the associated Standards) caused certain changes to the Group's accounting policy for consolidation and determining control, it did not result in any changes to the amounts reported in the Group's financial statements as the "controlled" status of the existing subsidiaries did not change, nor did it result in any new subsidiaries being included in the Group as a consequence of the revised definition. However, the revised wording of accounting policy for consolidation is set out in Note 1(b).

Joint arrangements

AASB 11 requires joint arrangements to be classified as either "joint operations" (where the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities) or "joint ventures" (where the parties that have joint control of the arrangement have rights to the net assets of the arrangement). Revised AASB 128 facilitates the application of AASB 11 and incorporates guidance relating to the equity method of accounting. Joint ventures will generally be required to be accounted for using the equity method under AASB 11. The proportionate consolidation method is no longer permitted.

Disclosure of interest in other entities

AASB 12 is the Standard that addresses disclosure requirements of AASB 10, AASB 11, AASB 127 and AASB 128. New disclosures that are material to this financial report and associated with the Group's interests in subsidiaries and joint arrangements as prescribed by AASB 12 have been set out in Note 25. Further, as required by AASB 12, details of the significant judgments made in determining the controlled entity status of subsidiaries are disclosed in Note 1(b).

Fair value measurements and disclosures

The Group has adopted AASB 13: *Fair Value Measurement* and AASB 2011–8: *Amendments to Australian Accounting Standards arising from AASB 13* from 1 July 2013 together with consequential amendments to other Standards. These Standards became mandatorily applicable from 1 January 2013 and became applicable to the Group for the first time in the current year end 30 June 2014. AASB 13 sets out a comprehensive framework for measuring the fair value of assets and liabilities and prescribes enhanced disclosures regarding all assets and liabilities measured at fair value. Although these Standards do not significantly impact the fair value amounts reported in the Group's financial statements, the directors have determined that additional accounting policies providing a general description of fair value measurement and each level of the fair value hierarchy, as set out in Note 1(o), should be incorporated in these financial statements.

Note 1: Summary of Significant Accounting Policies (continued)*Other*

Other new and amending Standards that became applicable to the Group for the first time during this half-year reporting period are as follows:

- AASB 2012-2: *Amendments to Australian Accounting Standards – Disclosures – Offsetting Financial Assets and Financial Liabilities* and AASB 2012-5: *Amendments to Australian Accounting Standards arising from Annual Improvements 2009-2011 Cycle*.

These Standards make changes to presentation and disclosure requirements, but did not affect the Group's accounting policies or the amounts reported in the financial statements.

- AASB 119: *Employee Benefits (September 2011)* and AASB 2011-10: *Amendments to Australian Accounting Standards arising from AASB 119 (September 2011)*.

These Standards did not affect the Group's accounting policies or the amounts reported in the financial statements, mainly because the Group does not have defined benefit plan assets or obligations.

t. New Accounting Standards for Application in Future Periods.

Accounting Standards and Interpretations issued by the AASB that are not yet mandatorily applicable to the Group, together with an assessment of the potential impact of such pronouncements on the Group when adopted in future periods, are discussed below:

- AASB 9: *Financial Instruments* and associated Amending Standards (applicable for annual reporting periods commencing on or after 1 January 2017).

The Standard will be applicable retrospectively (subject to the comment on hedge accounting below) and includes revised requirements for the classification and measurement of financial instruments, revised recognition and derecognition requirements for financial instruments and simplified requirements for hedge accounting.

The key changes made to the Standard that may affect the Group on initial application include certain simplifications to the classification of financial assets, simplifications to the accounting of embedded derivatives, and the irrevocable election to recognise gains and losses on investments in equity instruments that are not held for trading in other comprehensive income. AASB 9 also introduces a new model for hedge accounting that will allow greater flexibility in the ability to hedge risk, particularly with respect to hedges of non-financial items. Should the entity elect to change its hedge policies in line with the new hedge accounting requirements of AASB 9, the application of such accounting would be largely prospective.

Although the directors anticipate that the adoption of AASB 9 may have an impact on the Group's financial instruments, including hedging activity, it is impracticable at this stage to provide a reasonable estimate of such impact.

- AASB 2012-3: *Amendments to Australian Accounting Standards – Offsetting Financial Assets and Financial Liabilities* (applicable for annual reporting periods commencing on or after 1 January 2014).

This Standard provides clarifying guidance relating to the offsetting of financial instruments, which is not expected to impact the Group's financial statements.

- Interpretation 21: *Levies* (applicable for annual reporting periods commencing on or after 1 January 2014).

Interpretation 21 clarifies the circumstances under which a liability to pay a levy imposed by a government should be recognised, and whether that liability should be recognised in full at a specific date or progressively over a period of time. This Interpretation is not expected to significantly impact the Group's financial statements.

Note 1: Summary of Significant Accounting Policies (continued)

- AASB 2013–3: *Amendments to AASB 136 – Recoverable Amount Disclosures for Non-Financial Assets* (applicable for annual reporting periods commencing on or after 1 January 2014).

This Standard amends the disclosure requirements in AASB 136: *Impairment of Assets* pertaining to the use of fair value in impairment assessment and is not expected to significantly impact the Group's financial statements.

- AASB 2013–4: *Amendments to Australian Accounting Standards – Novation of Derivatives and Continuation of Hedge Accounting* (applicable for annual reporting periods commencing on or after 1 January 2014).

AASB 2013–4 makes amendments to AASB 139: *Financial Instruments: Recognition and Measurement* to permit the continuation of hedge accounting in circumstances where a derivative, which has been designated as a hedging instrument, is novated from one counterparty to a central counterparty as a consequence of laws or regulations. This Standard is not expected to significantly impact the Group's financial statements.

- AASB 2013–5: *Amendments to Australian Accounting Standards – Investment Entities* (applicable for annual reporting periods commencing on or after 1 January 2014).

AASB 2013–5 amends AASB 10: *Consolidated Financial Statements* to define an "investment entity" and requires, with limited exceptions, that the subsidiaries of such entities be accounted for at fair value through profit or loss in accordance with AASB 9 and not be consolidated. Additional disclosures are also required. As neither the parent nor its subsidiaries meet the definition of an investment entity, this Standard is not expected to significantly impact the Group's financial statements.

u. Comparatives

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

Where the Group has retrospectively applied an accounting policy, made a retrospective restatement of items in the financial statements or reclassified items in its financial statements, an additional statement of financial position as at the beginning of the earliest comparative period will be disclosed.

Comparative balances have been restated in accordance with AASB 3, AASB 101 and AASB 108. This is to reflect the revisions to the accounting entries booked as at 30 June 2012 and 30 June 2013. These are disclosed in note 24.

v. Provisions

Provisions are recognised when the Group has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured.

Provisions are measured using the best estimate of the amounts required to settle the obligation at the end of the reporting period.

w. Stripping Costs of Surface Mining

The Group may incur costs to remove overburden and other waste materials in order to gain access to ore from which minerals can be extracted ("stripping costs"). Stripping costs incurred during the development phase of a mine (i.e. before production commences) are capitalised as part of the depreciable cost of developing and constructing the mine and are depreciated over the useful life using the units of production method, once production begins.

Stripping costs incurred during the production phase are recognised as:

- inventory in accordance with AASB 102: *Inventories* to the extent that benefits are realised in the form of inventory produced; and

Note 1: Summary of Significant Accounting Policies (continued)

- a non-current asset ("stripping activity asset") if, and only if, they generate a benefit of improved access to an identifiable component of the ore body, it is probable that the benefits will flow to the entity and the costs can be measured reliably. A stripping activity asset is accounted for as part of (as an enhancement to) an existing tangible or intangible asset.

At initial recognition, the stripping activity asset is measured at cost. After initial recognition, it is measured at either its cost or its revalued amount less depreciation and impairment losses, in the same way as the existing asset of which it is a part. The stripping activity asset is depreciated using the units of production method, over the expected useful life of the identified component of the ore body that becomes more accessible as a result of the stripping activity.

Note 2. Critical accounting judgements, estimates and assumptions

The directors evaluate estimates and judgments incorporated into the financial statements based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Group.

Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. Where the equity instruments granted are performance rights that are convertible with no further consideration other than meeting performance based vesting conditions, the fair value is equal to the value of the underlying share at the grant date.

Provision for impairment of receivables

The provision for impairment of receivables assessment requires a degree of estimation and judgement. The level of provision is assessed by taking into account the recent experience, the ageing of receivables, historical collection rates and specific knowledge of the individual debtors' financial position.

Estimation of useful lives of assets

The Group determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and definite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

Income tax

The Group is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Group recognises liabilities for anticipated tax audit issues based on the Group's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the Group considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Business combinations – acquisition of controlled entities

Under AASB 3 Business Combinations, Directors make an assessment of fair value of net assets acquired at the date of acquisition compared to the consideration paid. Directors make this assessment based on the technical expertise of the Board, by reference to due diligence reports obtained, by reference to geological expert reports, appraisals and the arm's length negotiated amounts set out in the purchase contracts.

Note 3. Operating segments

a. Description of Segments

The Board of Directors, which is the chief operating decision maker, has determined the operating segments based on geographical location as it reviews internal reports based on this. The Group has two reportable segments; namely, Australia and the United States of America, which are the Group's strategic business units.

b. Basis of accounting for purposes of reporting by operating segments

Accounting policies adopted

Unless stated otherwise, all amounts reported to the Board of Directors, being the chief operating decision maker with respect to operating segments, are determined in accordance with accounting policies that are consistent to those adopted in the annual financial statements of the Group.

Intersegment transactions

Intersegment loans payable and receivable are initially recognised at the consideration received/to be received net of transaction costs. If intersegment loans receivable and payable are not on commercial terms, these are not adjusted to fair value based on market interest rates. This policy represents a departure from that applied to the statutory financial statements.

Segment assets

Where an asset is used across multiple segments, the asset is allocated to the segment that receives the majority of economic value from the asset. In the majority of instances, segment assets are clearly identifiable on the basis of their nature and physical location.

Segment liabilities

Liabilities are allocated to segments where there is a direct nexus between the incurrence of the liability and the operations of the segment. Segment liabilities include trade and other payables and certain direct borrowings.

Unallocated items

There are no items of revenue, expenses, assets and liabilities that are not allocated to operating segments.

Comparative information

Comparative information has been restated to conform to the requirements of this Standard.

	2,832,577	7,945,100
<i>Professional expenses</i>		
Legal fees	64,320	495,839
Auditor's Remuneration		
- audit or review of financial report	54,499	72,306
Other professional expenses	270,852	184,260
	389,671	752,405

Note 5. Deferred exploration and development expenditure

Opening balance	1,239,892	1,049,685
Net expenditure incurred during the year	2,832,577	7,945,100
Tenement acquisition costs during the year	103,407	97,363
Expenditure written off	(2,832,577)	(7,945,100)
Exchange differences	(21,643)	92,844
Total	1,321,656	1,239,892

The ultimate recoupment of the deferred exploration and development expenditure is dependent upon the successful development and commercial exploration or alternatively the sale of respective areas of interest.

Note 6. Income Tax Benefit

a. Tax expense

The components of tax (expense)/income comprise:

	Consolidated	
	2014	2013
	\$	\$
Current tax	-	-
Deferred tax	-	-
Under/(over) provision in respect of prior years	-	-
	-	-

b. Numerical reconciliation of income tax benefit to prima facie tax payable

Loss from continuing operations before income tax expense	(6,752,119)	(14,082,398)
Tax at the Australian tax rate of 30% (2013: 30%) and U.S. tax rate of 40% (2013: 40%)	(2,493,590)	(4,904,230)
Tax effect amounts which are not deductible/(taxable) in calculating taxable income:		
Share based payments expensed during the year	165,106	715,450
Capital raising expenditure	(63,247)	(33,841)
Interest on convertible notes expensed during the year	555,436	513,674
Other non-allowable items	273,744	245,235
Other deductible items	(123,621)	(137,178)
Income tax benefits not recognised	1,686,172	3,600,890
Income tax expense	-	-

c. Unrecognised deferred tax assets – tax losses

Unused tax losses for which no deferred tax asset has been recognised	15,069,868	10,871,758
Potential tax benefit at the Australian tax rate of 30% (2013: 30%) and U.S. tax rate of 40%	5,640,126	3,953,954

The Group has Australian related tax losses for which no deferred tax asset is recognised of \$3,878,213 and U.S. related revenue tax losses of \$11,191,655 for which no deferred tax asset is recognised.

d. Unrecognised temporary differences

Borrowing costs	-	(4,531)	-	(4,531)
Capital raising costs	(77,689)	-	(50,440)	(128,129)
Balance not recognised as at 30 June 2013	(83,767)	(46,676)	15,416	(115,027)

Note 6. Income Tax Benefit (continued)

The temporary differences have not been brought to account because the Directors do not believe it is appropriate to regard realisation of those deferred tax assets as being probable. The benefit of these deferred tax assets will only be obtained if:

- (1) the Group derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deductions for the temporary differences to be realised;
- (2) the Group continues to comply with the conditions for deductibility imposed by tax legislation; and
- (3) no changes in tax legislation adversely affect the entity in realising the benefit from the deductions for the temporary differences.

No franking credits are available.

Note 7. Current assets - cash and cash equivalents

	Consolidated	
	2014	2013
	\$	\$
Cash on hand	13	540
Cash at bank	2,582,957	2,782,355
Cash on deposit	3,400,000	-
	5,982,970	2,782,895

The effective interest rate on cash on deposit was 3.56% (2013: 5.50%).

An amount of \$1,483,448 (2013: \$37,530) was held in USD at balance date.

Note 8. Current assets - trade and other receivables

GST receivable	11,465	48,757

Note 14. Borrowings – convertible notes

The Convertible Notes (Notes) are presented in the Consolidated Statement of Financial Position as follows:

Secured liabilities:

Face value of Notes on issue	14,000,000	14,250,000
Face value of Notes converted to equity	-	(250,000)
Transaction costs to be expensed in future periods	(229,682)	(482,038)
Equity component of convertible notes (note 16(e))	(404,548)	(404,548)
Accrued interest expense	218,583	68,487
Total carrying value of liability at 30 June	13,584,353	13,181,901

This liability is presented as:

Current liability	12,521,233	-
Non-current liability	1,063,120	13,181,901
Total carrying value of liability at 30 June	13,584,353	13,181,901

On 27 June 2012, 52 12% Notes, including 15 issued to Kingslane Pty Ltd ("Kingslane"), were issued with a face value of \$250,000 each, for a total face value of \$13,000,000 including \$3,750,000 issued to Kingslane, with convertibility subject to shareholder approval. As these Notes had not gained any conversion features at 30 June 2012, these were treated as secured debt with no equity component at 30 June 2012.

The conversion rate is 500,000 ordinary shares for each Note held, which is based on a conversion price of \$0.50 per share, but subject to adjustments for reconstructions for equity. The Notes shall be fully repaid at the expiry after a 3 year term unless converted or repaid earlier.

Each shareholder of Attila US LLC has pledged their interest in that company which owns 100% of Kodiak as security to the noteholders. The security is held by Kingslane Pty Ltd as agent and security Trustee under the Convertible Note Agreement.

Note 14. Borrowings – convertible notes (continued)

Notes and future interest coupon payments are classified as current when the liabilities are due to be settled within 12 months of the balance date.

On 9 October 2012, shareholders approved the convertibility of 37 Convertible Notes which excluded those issued to Kingslane.

On 30 October 2012, 2 further Convertible Notes were issued to Kingslane with a face value of \$250,000 each, with convertibility subject to shareholder approval.

On 30 November 2012, shareholders approved the convertibility of the 17 Convertible Notes issued to Kingslane.

A total of \$715,000 of capitalised borrowing costs recognised for the year ended 30 June 2012 are being expensed over the term of the initial convertible notes.

On 19 December 2012, 2 Notes for a total of \$500,000 were issued and convertible from the date of 19 December 2012.

On 18 January 2013, 1 additional Note was issued for \$250,000 and convertible from 18 January 2013.

On 25 June 2013, 1 Note was converted to 500,000 ordinary shares.

The Notes were valued at initial recognition based on the difference between the face value of the Notes and the present value of the liability component at a market yield of 14% - the rate that could be earned on a similar debt instrument without the conversion feature. The value of the equity component is the residual difference between the liability component calculated without the conversion feature and the face value of the Notes.

The total amount borrowed using Convertible Notes was \$14,250,000 (2013: \$14,250,000). Notes amounting to \$250,000 were converted to shares during 2013.

Note 15. Provisions

	75,623,404	23,125,607	56,002,606	13,444,148

At 30 June 2013, the Group had committed to issue 1,000,000 ordinary shares at a deemed value of \$0.44 per share for a total deemed value of \$440,000 in settlement (without admission) of the dispute with Monomotapa Coal Limited. These shares were issued on 4 July 2013.

Note 16. Issued capital (continued)

Holders of ordinary shares have the right to receive dividends as declared and in the event of winding up the parent entity, to participate in the proceeds from the sale of all surplus assets in proportion to the number of shares held and the amount paid up.

At shareholders' meetings each ordinary share is entitled to one vote when a poll is called, otherwise each shareholder has one vote on a show of hands.

b. Options over ordinary shares

As at 30 June 2014, there were 17,750,000 (2013: 16,250,000) unlisted options over ordinary shares in the Company. The fair value of unlisted options granted for nil consideration during the year ended 30 June 2014 was \$377,150 (2013: \$2,384,832). The values were calculated as at the grant date using the Black Scholes option valuation method taking into accounts the terms and conditions upon which the options are granted.

As at 30 June 2014, there were nil (2013: 10,263,226) listed options over ordinary shares in the Company.

Unlisted Options	Expiry date	Number of options	Remaining contractual life	Exercise price \$
Options issued 1 August 2010	1 August 2014	1,000,000	0.09	0.20
Options issued 9 March 2012	9 March 2015	1,500,000	0.69	0.29
Options issued 9 October 2012*	28 June 2015	4,000,000	0.99	0.50

Options issued 11 March 2014***	11 March 2017	500,000	2.70	0.7247
Options issued 15 April 2014	15 April 2017	1,000,000	2.79	0.5251
Options issued 15 April 2014****	15 April 2017	500,000	2.79	0.6463
Average			1.46	0.84

* These options had an issue price of \$0.001 for a total issue price of \$4,000

** These options vest on 28 March 2014

*** These options vest on 11 March 2015

**** These options vest on 1 April 2015

Each option entitles the holder to subscribe for one share upon exercise of each option.

Total options on issue by the Company as at 30 June 2014 are 17,750,000 (2013: 26,513,226). The weighted average contractual life is 1.46 years (2013: 1.65 years). The weighted average exercise price is \$0.84 (2013: \$0.58).

c. Performance rights

As at 30 June 2014, there were 1,000,000 performance rights over ordinary shares on issue that expire on 25 June 2019 if they have not previously vested.

Performance rights convert to ordinary shares of the Company on a one-to-one basis depending on the achievement of performance based vesting conditions. Rights that do not vest at the end of a five year period from issue lapse unless the Board in its discretion determines otherwise. Performance rights do not entitle holders to dividends that are declared during the vesting period.

Note 16. Issued capital (continued)

On vesting, performance rights convert into ordinary shares in the Company for no further consideration. These performance rights have been valued for accounting purposes at \$0.41 each, being the share price at the grant date of 1 April 2014 for a total value of \$410,000. The performance rights are being expensed over the expected vesting period of one year from the grant date. \$102,219 has been expensed for these performance rights during the year, based on the expected portion of the vesting period occurring during the year. These performance rights were issued to the trustee of the Attila Resources Performance Rights Trust on 25 June 2014.

d. Capital management

The Company's debt and capital includes ordinary share capital, and financial liabilities, supported by financial assets.

There are no externally imposed capital requirements.

The Board effectively manages the Company's capital by assessing the Company's financial risks and adjusting its capital structure in response to changes in these risks and in the market. These responses include the management of debt levels and share issues. The Board frequently review budgets and budget variance analyses that include cash flow projections and working capital projections, to ensure prudent management of capital budgeting requirements. There has been no change in the strategy adopted by the Board to control the capital of the Group since the prior year.

Note 18. Financial instruments**Financial Risk Management**

The Group's principal financial instruments are cash, receivables and payables (including convertible notes).

Overview

The Group has exposure to the following risks from their use of financial instruments:

- financial risk
- liquidity risk
- credit risk
- Interest rate risk
- Foreign exchange risk

This note presents information about the Group's exposure to each of the above risks.

Financial Risk Management Policies

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework.

Risk management policies are established by the Board of Directors to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

Financial Risk

The main risks the Group is exposed to through its financial instruments are interest rate risk, liquidity risk, credit risk and foreign exchange risk.

Note 18. Financial instruments (continued)

	Consolidated	
	2014	2013
	\$	\$
Financial Assets		
Cash and cash equivalents	5,982,970	2,782,895
Trade and other receivables	38,169	60,259

Non current convertible notes	1,063,120	13,181,901
	14,188,712	14,387,158

Non current other financial assets of \$816,035 (2013: \$752,684) consist of security deposits of \$59,000 (2013: \$62,638) plus an environmental bond denominated in USD of \$757,035 (2013: \$690,046).

Liquidity Risk and Liquidity Risk Management

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure that it will have sufficient cash to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of credit facilities or other fund raising initiatives.

The Board frequently reviews budget variance analyses that include working capital projections to monitor working capital requirements and optimise cash utilisation.

The Group has funding through convertible notes of \$13,584,353 (2013: \$13,181,901) at balance date. The Group continuously monitors forecast and actual cash flows and the maturity profiles of financial assets and financial liabilities to manage its liquidity risk.

The Group has access to a credit card facility totalling \$40,000 (2013: \$40,000). The credit card facility may be drawn at any time and may be terminated by the bank without notice.

The following are the contractual maturities of financial liabilities:

At 30 June 2014		Consolidated			
Non derivative financial liabilities:	Carrying Amount	Under 6 Months	6 – 12 Months	1 - 2 years	2 – 5 years
Trade and other payables	604,359	604,359	-	-	-

At 30 June 2013		Consolidated			
Non derivative financial liabilities:	Carrying Amount	Under 6 Months	6 – 12 Months	1 - 2 years	2 – 5 years
Trade and other payables	1,205,257	604,359	-	-	-
Convertible notes	13,181,901	-	-	12,185,662	996,239
	14,188,712	604,359	-	12,185,662	996,239

Note 18. Financial instruments (continued)

The conversion and conversion period of the Notes into ordinary shares of the parent entity were approved by the Company's shareholders at a General Meeting held on 9 October 2012.

Credit Risk

Credit risk refers to the risk that counterparties will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted the policy of only dealing with credit worthy counterparties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults.

Banks and financial institutions are chosen only if they are independently rated parties with a minimum rating of 'A'.

The Group does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics other than the security provided to the convertible noteholders whereby each shareholder of Attila US LLC has pledged their interest in that company which owns 100% of Kodiak as security to the noteholders.

The carrying amount of financial assets recorded in the financial statements, net of any provisions for losses, represents the Group's maximum exposure to credit risk without taking account of the value of any collateral or other security obtained.

Interest Rate Risk

Interest rate risk is managed with a mixture of fixed and floating rate debt. The Group's exposure to interest rate risk and the effective weighted average interest rate for each class of financial assets and financial liabilities is set out in the following table:

2014	Weighted Average Interest Rate %	Floating Interest Rate \$	Fixed Interest Maturing in 1 Year or Less \$	Fixed Interest Maturing in over 1 Year \$	Non- Interest Bearing \$	Total \$
Financial Asset						
Cash and cash equivalents	2.26	3,001,061	2,400,000	-	581,909	5,982,970

Non-current other financial assets	752,684	-	-	-	-
Trade and other payables	(1,205,257)	-	-	-	-
Convertible Notes	(13,181,901)	-	-	-	-
Total increase/(decrease)	(10,791,320)	(27,829)	(27,829)	27,829	27,829

Note 18. Financial instruments (continued)*Foreign exchange risk*

Exposure to foreign exchange risk may result in the fair value or future cash flows of a financial instrument fluctuating due to movement in foreign exchange rates of currencies in which the Group holds financial instruments which are other than the AUD functional currency of the Group.

With instruments being held by overseas operations, fluctuations in the US dollar may impact on the Group's financial results unless those exposures are appropriately hedged. The Group does not currently have any foreign currency hedging facility in place.

The following table shows the foreign currency risk on the financial assets and liabilities of the Group's operations denominated in currencies other than the functional currency of the operations.

2014	Net Financial Assets/(Liabilities) in AUD		
	USD	AUD	Total AUD
Consolidated Group	1,081,557	-	1,081,557

2013	Net Financial Assets/(Liabilities) in AUD		
	USD	AUD	Total AUD
Consolidated Group	(124,700)	-	(124,700)

In respect of the above USD foreign currency risk exposure in existence at the balance sheet date a sensitivity of -10% lower and 10% higher has been applied. With all other variables held constant, post tax loss and equity would have been affected as follows:

AUD \$108,156 loss; AUD \$108,156 gain (2013: AUD \$12,470 loss; AUD \$12,470 gain).

Financial risk management objectives

The Group's and parent entity's activities expose them to a variety of financial risks: market risk (including price risk and interest rate risk), credit risk and liquidity risk. The Group's and parent entity's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group and parent entity use different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate and other price risks, ageing analysis for credit risk and beta analysis in respect of investment portfolios to determine market risk.

Risk management is carried out by the Board of Directors. These policies include identification and analysis of the risk exposure of the Group and parent entity and appropriate procedures, controls and risk limits.

Unrecognised Financial Instruments

The Group does not have any unrecognised financial instruments.

Fair Value Estimation

The net fair value of cash and non interest bearing monetary assets and financial liabilities of the Group approximates their carrying amount.

Note 19. Interests of Key Management Personnel

Refer to the remuneration report contained in the Directors' Report for details of the remuneration paid or payable to each member of the Group's key management personnel (KMP) for the year ended 30 June 2014.

The totals of remuneration paid to KMP of the Company and the Group during the year are as follows:

	Short-Term Benefits	Post Employment Benefits	Share-Based Payments	Total KMP Compensation
	\$	\$	\$	\$
2014 Total	729,441	11,621	550,354	1,291,416
2013 Total	617,613	4,545	2,384,832	3,006,990

Performance rights holdings of Key Management Personnel

Scott Sullivan was granted and issued 1,000,000 performance rights during the year ended 30 June 2014, that did not vest during the year and were held at year end. There were no other performance rights transactions or balances during the current or prior year.

Other KMP Transactions

There have been no other transactions with KMP or their related parties involving equity instruments other than those described in the tables above. For details of other transactions with KMP, refer to Note 23 Related Party Transactions and Balances.

Note 20. Remuneration of auditors

	Consolidated	
	2014	2013
	\$	\$
Remuneration of the auditors for:		
- Audit or review of the financial report	54,499	72,306
Total	54,499	72,306

Note 21. Contingent Liabilities and Contingent Assets

The Group has no outstanding contingent assets or contingent liabilities at 30 June 2014, other than a statement of claim received by the Group during the prior year filed at the Circuit Court of Shelby County, Alabama relating to an alleged unfair dismissal claim by Mr Don Brown. The claim is for approximately US\$1,000,000. The Company intends to defend this matter and the Directors are of the opinion that the claim can be successfully defended. Accordingly, no liability has been recorded in relation to this matter.

Note 22. Commitments**Milestone Agreements**

In December 2012, Attila entered into formal consultancy agreements with its project partner, TBL Metallurgical Resources, and its key personnel in relation to the Kodiak Coking Coal Project. In addition to the provision of key services to ensure the success of the Kodiak Coking Coal Project, the agreements provide for milestone payments of up to US\$1 million each upon the achievement of key milestones linked to the Kodiak Coking Coal Project. The maximum outstanding amount payable for these milestones is US\$3 million. The outstanding milestones include the Group releasing a definitive feasibility study, the commencement of mining and washing of coal from the Kodiak Project and also annualised production of 250,000 saleable tonnes of hard coking coal from the Seymour or Gurnee Properties.

Note 22. Commitments (continued)

Gurnee Property

In the year ended 30 June 2012, the Group acquired, through its 70% owned subsidiary, Kodiak Mining Company LLC, options over coal leases at the Gurnee Property.

The option agreement to lease the underground mining rights to Atkins and Coke coal beds created the following outstanding commitments:

- Term of the lease: 3 year rolling terms until exhaustion of any discovered coal reserves subject to certain minimum production milestones per 3 year term; and
- Royalty of 8% on net coal sales with a minimum monthly payment of US\$30,000 per month commencing in July 2014. The minimum royalty payments will be offset against future Actual Production Royalty payments.

Seymour Property

On 20 December 2012, the Group announced that its 70% owned subsidiary, Kodiak Mining Company LLC, had finalised the formal documentation for the option to acquire additional coal leases at the Seymour Property as originally announced on 3 December 2012.

The key terms of the option agreement to lease the underground mining rights to the Atkins, Coke, Upper Thompson and Big Bone coal seams on an approximately 4,000 acre property from RGGS Land & Minerals Ltd LP are as follows:

- Upfront option fee of US\$100,000;
- 2 year option to complete a minimum of US\$500,000 worth of exploration in first year;
- Exercise of option at US\$300,000;
- Term of the lease: 3 year rolling terms until exhaustion of any discovered coal reserves subject to certain minimum production milestones per 3 year term; and
- Royalty of 8% on net coal sales with an upfront payment of US\$25,000 and minimum monthly payment of US\$5,000 per month for each coal seam leased.

The US\$500,000 exploration expenditure requirement was met by July 2013.

Upper Thompson Seam (option to lease)

On 23 September 2013, the Group announced that its 70% owned subsidiary, Kodiak Mining Company LLC, had entered into an option agreement to lease the Upper Thompson coal seam within its Gurnee Property, from the existing mineral rights holder RGGS Land and Minerals Ltd LP (RGGS).

The key terms of the option agreement to lease the underground mining rights to the Upper Thompson coal seam on an approximate 2,760 acre property from RGGS are as follows:

- Upfront option fee of US\$70,000;
- Option term 1 year from date of signing;
- Exercise price of option for a further US\$305,000;
- Term of the lease is 18 years or until exhaustion of any discovered coal reserves, subject to certain minimum production milestones; and
- Royalty of 8% on net coal sales at mine gate with a minimum monthly royalty of \$8,000 commencing 6 months from date of exercising the option.

Note 22. Commitments (continued)**Project X – Gholson and Clarke Coal Seams Lease**

On 23 September 2013, the Group announced that its 70% owned subsidiary, Kodiak Mining Company LLC, had entered into a lease agreement with RGGS to mine the Gholson and Clarke coal seams at an area known as Project X, which is also located on the Company's Gurnee Property.

The key terms for the acquisition of Project X, which incorporates the Gholson and Clarke seams are as follows:

- Upfront leasing fee of US\$25,000;
- Term of the lease is 18 years or until exhaustion of any discovered coal reserves subject to certain minimum production milestones; and
- Royalty of 8% on net coal sales at mine gate with a minimum monthly royalty of \$3,000 commencing in August 2014. The minimum royalty payments will be offset against future Actual Production Royalty payments.

Other commitments due within 1 year

Note 23. Related party transactions and balances

The Group's main related entities are key management personnel and Kingslane Pty Ltd (and its associated entities). Key management personnel are any people having authority and responsibility for planning, controlling and directing the activities of the entity, directly or indirectly, including any director (whether executive or otherwise). For further disclosures relating to key management personnel see note 19.

Kingslane Pty Ltd and associated entities (Kingslane) is a substantial shareholder in the Company and held 9,891,555 (2013: 8,348,778) ordinary shares in the Company at 30 June 2014. Entities controlled by Kingslane also:

- Held a 10% non-controlling interest in the Kodiak project and Kodiak Mining Company LLC through a non-controlling shareholding in 70% owned Attila Resources US LLC;
- held Notes with initial face values of \$4,250,000 (2013: \$4,250,000) convertible into 8,500,000 (2013: 8,500,000) shares, that were recognised as a current liability of \$4,126,822 (2013: non current liability of \$4,141,137) at 30 June 2014 with \$218,444 recognised in equity to 30 June 2014. Interest of \$510,000 (2013: \$489,452) was paid on these Notes during the year through the issue of 1,542,777 (2013: 1,381,873) ordinary shares.
- Exercised 152,500 listed options prior to 30 June for \$30,500. This balance was included in the balance of shares to be issued at 30 June 2014 with the shares issued on conversion of the options issued in July 2014.
- Received \$36,000 (2013: \$36,000) during the year for office rent.

Konkera Corporate, a related party of Kingslane, received \$169,800 (2013: \$50,400) during the year for administrative, bookkeeping and accounting services. The company secretarial fees of \$30,000 (2013: 25,710) for Oonagh Malone and Executive director fees of \$270,000 (2013: 217,742) for Evan Cranston were also payable to Konkera Corporate.

Note 23. Related party transactions and balances (continued)

Mr Bryn Hardcastle is a director of Bellanhouse Legal which provided legal services totalling \$55,000 (2013: \$30,000) in the financial year ended 30 June 2014.

Mr Alan Thom is a director of Aston Corporation Pty Ltd which provided mining consulting services totalling \$6,900 (2013: 16,725) in the financial year ended 30 June 2014.

Prior to Mr Shaun Day's appointment as a director, a party related to Mr Shaun Day acquired a Note. Interest of \$30,000 (2013: \$13,151) was paid on this Note during the year through the issue of 90,752 (2013: 37,129) ordinary shares. This Note was recognised as a non current liability of \$246,771 (2013: \$243,598) at 30 June 2014, with \$7,830 recognised in equity.

All related party transactions are on normal arms' length terms.

Note 24. Adjustments to balances in accordance with AASB 108

In the financial report for the year ended 30 June 2012, transaction costs of \$277,500 were previously fully expensed in relation to \$13,000,000 of Notes issued that became convertible notes during the year ended 30 June 2013. The previous treatment was not in accordance with AASB 139 and therefore the treatment of transaction costs has been adjusted in accordance with the effective interest method as defined in AASB 139. \$437,500 of transaction costs that were previously recognised as transaction costs and fully expensed in the year ended 30 June 2013 have also been adjusted to be recognised as transaction costs that arose in the year ended 30 June 2012 and similarly treated in accordance with the effective interest method as defined in AASB 139.

\$21,351 of these previously expensed transaction costs have been recognised as capital raising costs on the equity portion of the convertible notes.

The balance of accumulated losses at 30 June 2013 has been adjusted from (\$16,004,609) to (\$15,522,571) due to reversal of the \$715,000 of transaction costs previously expensed immediately, followed by the recognition of (\$232,962) expensed over the relevant period to 30 June 2013.

Whilst this adjustment is not material in the context of the current period accounts of the Group, for the purposes of accountability and transparency, comparative balances have been restated as follows in accordance with AASB108.

In the financial report for the year ended 30 June 2013, the liability for the amounts repayable on convertible notes was recognised as current on the basis that notes could be redeemed at any time for shares in the Company at the discretion of noteholders. The previous treatment was not in accordance with AASB 101 and therefore the current/ non-current classification of convertible notes has been adjusted in accordance with the requirements of AASB 101. \$13,181,901 of non-current borrowings that were previously recognised as current in the year ended 30 June 2013 have been adjusted to be recognised as non-current.

Note 24. Adjustments to balances in accordance with AASB 108 (continued)

Note 25. Controlled entities
a. Information about Principal Subsidiaries

The information presented in this note is presented here in accordance with AASB 12.

Set out below are the Group's subsidiaries at 30 June 2014. The subsidiaries listed below have share capital consisting solely of ordinary shares, which are held directly by the Group, and the proportions of ownership interests held equals the voting rights held by the Group. Each subsidiary's country of incorporation or registration is also its principal place of business.

Name of Subsidiary	Principal Place of Business	Ownership Interest Held by the Group		Proportion of Non-controlling Interests	
		2014	2013	2014	2013
Attila Resources US Pty Ltd	Australia	100%	100%	-	-
Attila Resources Holding US Ltd	United States of America	100%*	100%*	-	-
Attila Resources US LLC	United States of America	70%*	70%*	30%	30%
Kodiak Mining Company LLC	United States of America	70%*	70%*	30%	30%

*Indirect Holdings

Note 25. Controlled entities (continued)

b. Summarised Financial Information of Subsidiaries with Material Non-controlling Interests

The 30% non-controlling interest in Kodiak Mining Company LLC (Kodiak) had nil value at the date of acquisition of the business combination because the value at the date of acquisition of the business combination was calculated by deducting the parent entity's convertible note liability from 30% of the fair value of the net assets of Kodiak. This is because the convertible note is secured by the members of Kodiak in proportion with each Members' Interest in the shares of Kodiak. The non-controlling interest is 30% of the issued capital of Attila Resources US LLC.

The non-controlling interest is free carried until a decision to mine is made at which time the parties will be required to contribute their respective share from bankable feasibility stage onwards. This may be done as a forfeit of profits derived. Although the non-controlling interest in Kodiak consequently has nil book value, the nature of the non-controlling interest is considered to make this non-controlling interest qualitatively material. Subsidiaries' financial statements used in the preparation of these consolidated financial statements have been prepared as at the same reporting date as the Group's financial statements.

Set out below is the summarised financial information for each subsidiary that has non-controlling interests that are material to the Group.

	Kodiak	
Summarised Financial Position before intra-group eliminations	2014	2013
	\$	\$
Current assets	84,239	39,483
Non-current assets	13,394,771	13,481,613
Current liabilities	(13,542,401)	(9,718,999)
Non-current liabilities	(757,035)	(690,046)
Net Assets	(820,426)	3,069,049
Carrying amount of non-controlling interests	-	-

The non-current assets and non-current liabilities of Kodiak include a secured deposit of \$757,035 (30 June 2013: \$690,046) that is security against a non-current reclamation liability of \$757,035 (30 June 2013: \$690,046). The nature of this non-current reclamation liability significantly restricts the Group's ability to access the secured deposit for the purpose of meeting other liabilities of the Group.

The current liabilities of Kodiak also include intra-group loan balances totaling \$13,095,599, (30 June 2013: \$8,860,430). These intra-group loan balances are unsecured and at call, so consequently considered current despite the current nature of operations.

Although the functional currency of Kodiak is United States dollars and the presentation currency of the Group is Australian dollars, there are no foreign currency translation reserve movements recognised in other comprehensive income of Kodiak as foreign currency translation reserve movements only arise on consolidation.

	Kodiak	
Summarised Financial Performance before intra-group eliminations	2014	2013
	\$	\$
Revenue	-	-
Loss before income tax	(4,661,380)	(6,950,261)
Income tax expense/income	-	-
Post-tax loss from continuing operations	(4,661,380)	(6,950,261)
Post-tax loss from discontinued operations	-	-
Other comprehensive income	-	-
Total comprehensive income	(4,661,380)	(6,950,261)
Profit/(loss) attributable to non-controlling interests	-	-
Distributions paid to non-controlling interests	-	-

Note 25. Controlled entities (continued)

Summarised Cash Flow Information before intra-group eliminations	2014	2013
	\$	\$
Net cash from/(used in) operating activities	(5,162,670)	(6,171,499)
Net cash from/(used in) investing activities	(167,967)	(1,480,620)
Net cash from/(used in) financing activities	5,289,713	7,675,102
Cash and Cash Equivalents at End of Year	71,901	32,459

Kodiak's net cash from financing activities for both 2014 and 2013 solely comprised movements in intra-group loan account balances.

Note 26. Events occurring after reporting period

Other than the following, the Directors are not aware of any other significant events since the end of the reporting period:

- On 11 July 2014, 6,378,892 ordinary shares were issued on the conversion of listed options at \$0.20 each
- On 8 August 2014, 1,000,000 fully paid ordinary shares were issued at an issue price of \$0.20 each on conversion of 1,000,000 unlisted options.

No other matters or circumstances have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the Group, the result of these operations, or the state of the affairs of the Group in future financial year.

Note 27. Cash-flow information
a. Reconciliation of cashflow from operations with loss after income tax

	Consolidated	
	2014	2013
	\$	\$
Loss after income tax	(6,752,119)	(14,082,398)
Non-cashflows in loss:		
Depreciation and amortisation	13,475	10,032
Share-based payments	550,354	2,384,832
Interest on convertible notes paid in equity instruments	1,680,006	1,643,759
Exploration and evaluation expenditure paid in equity instruments	-	440,000
Changes in assets and liabilities net of effects of purchase of subsidiaries:		
Decrease/ (increase) in trade and other receivables	22,090	998,161
Decrease/ (increase) in prepayments	(22,819)	3,083
Decrease in trade and other payables	(596,110)	(132,682)
Increase in borrowings due to accrued interest payable and expensing of capitalised borrowing costs	402,452	278,141
Increase in provisions	73,292	-
Exchange differences	(22,272)	348,001
Net cash used in operating activities	(4,651,651)	(8,109,071)

Note 27. Cash-flow information (continued)**b. Acquisition of subsidiaries**

No subsidiary or business combination was acquired in 2014 or 2013. Payments for subsidiaries of \$593,854 in 2013 were due to the Kodiak acquisition in 2012.

c. Non cash financing and investing activities

The Group did not have any non-cash financing and investing activities during the year ended 30 June 2014.

Note 28. Earnings per share

The following reflects the income used in the basic and diluted earnings per share computations:

	Consolidated	
	2014	2013
	\$	\$
Basic / dilutive earnings per share		
Basic loss per share (cents per share)	10.22	32.97
Weighted average number of ordinary shares outstanding during the year used in calculation of basic earnings per share	66,092,793	42,711,297
Net loss used in the calculation of basic earnings per share	(6,752,119)	(14,082,398)

Share options are not considered dilutive as the conversion of options will result in a decrease in the net loss per share. The weighted average number of shares has no dilutive effect to the diluted earnings per share.

Due to the Group being in a loss position, it is considered counter dilutive and therefore earnings per share are not diluted.

Note 29. Share Based Payments**Options**

Options granted to key management personnel in 2014 or 2013 are as follows:

Grant Date	9 November 2012	30 November 2012	28 March 2013
Vesting Date	9 November 2012	30 November 2012	28 March 2013
Expiry Date	9 November 2015	30 November 2015	28 March 2016
Exercise price (\$)	1.25	1.36	1.02
Underlying share price (\$)	0.97	0.95	0.70
Expected share price volatility	84%	82%	73%
Risk free interest rate	2.61%	2.62%	2.87%
Discount for illiquidity	20%	20%	20%
Value per option (\$)	0.3817	0.3458	0.2222

Value of Tranche (\$)	95,419	1,901,905	333,300
Amount expensed in 2013 (\$)	95,419	1,901,905	333,300
Amount expensed in 2014 (\$)	-	-	-

Note 29. Share Based Payments (continued)

Grant Date	28 March 2013	11 March 2014	11 March 2014
Vesting Date	28 March 2014	11 March 2014	11 March 2015
Expiry Date	28 March 2016	11 March 2017	11 March 2017
Exercise price (\$)	1.14	0.5888	0.7247
Underlying share price (\$)	0.70	0.46	0.46
Expected share price volatility	73%	65%	65%
Risk free interest rate	2.87%	2.96%	2.96%
Discount for illiquidity	20%	20%	20%
Value per option (\$)	0.2061	0.1405	0.1193
Number of options granted	1,000,000	1,000,000	500,000
Value of Tranche (\$)	206,099	140,500	59,650
Amount expensed in 2013 (\$)	54,208	-	-
Amount expensed in 2014 (\$)	151,892	140,500	18,304

Grant Date	1 April 2014	1 April 2014
Vesting Date	1 April 2014	1 April 2015
Expiry Date	15 April 2017	15 April 2017
Exercise price (\$)	0.5251	0.6463
Underlying share price (\$)	0.41	0.41
Expected share price volatility	64%	64%
Risk free interest rate	3.06%	3.06%
Discount for illiquidity	20%	20%
Value per option (\$)	0.1243	0.1054
Number of options granted	1,000,000	500,000
Value of Tranche (\$)	124,300	52,700
Amount expensed in 2013 (\$)	-	-
Amount expensed in 2014 (\$)	124,300	13,139

Valuations of options granted to Key Management Personnel in 2014 and 2013 were performed using a Black – Scholes option pricing model applying the above parameters. Historical volatility has been the basis for determining expected share price volatility as it is assumed that this is indicative of future tender which may not eventuate in the future.

The options hold no voting or dividend rights. Further details of these options are provided in the Director's Report. During the financial year, 3,000,000 options vested (2013: 7,250,000).

The total share based payment expense for options issued during the year ended 30 June 2014 was \$296,243 (2013: \$2,384,832).

The Company established an Employee Share Option Plan on 6 December 2010 as a long-term incentive to recognise talent and motivate employees and consultant to strive for Group performance. The options are granted at the sole discretion of the Board for no consideration and carry no entitlements to voting rights or dividends of the Group. The Board, in its discretion, determine the strike price of the options and may apply vesting conditions. On resignation from the Group, the optionholder has 30 days to exercise or forfeit the options. On termination without cause, the optionholder has six months to exercise or forfeit the options.

Note 29. Share Based Payments (continued)

A summary of the movements of options issued as share-based payments is as follows:

	Number	Weighted Average Exercise Price
Options outstanding as at 30 June 2012	4,000,000	0.2338
Granted	8,250,000	1.2682
Forfeited	-	-
Exercised	-	-
Expired	-	-
Options outstanding as at 30 June 2013	12,250,000	0.9304
Granted	3,000,000	0.6001
Forfeited	-	-
Exercised	(1,500,000)	0.2000
Expired	-	-
Options outstanding as at 30 June 2014	13,750,000	0.9380
Options exercisable as at 30 June 2014	12,750,000	0.9578
Options exercisable as at 30 June 2013	11,250,000	0.9118

The weighted average remaining contractual life of options outstanding at year end was 1.59 years.

The fair value of options granted to employees is deemed to represent the value of the employee services received over the vesting period.

The weighted average fair value of options granted during the year was \$0.1257 (2012: \$0.3075)

Performance Rights

Performance rights granted to key management personnel are detailed in note 16(c).

Shares

1,000,000 shares were agreed to be issued to Monomotapa Coal Limited in 2013 and issued in 2014 as a result of the settlement of a legal dispute (without admission). These shares were valued at the fair value of the equity interests granted determined by reference to market price on the grant date of \$0.44 per share. The expense of \$440,000 was included under Exploration and Evaluation expenditure in the Statement of Profit or Loss and Other Comprehensive Income in 2013.

Note 30. Parent entity

The following information has been extracted from the books and records of the parent entity and has been prepared in accordance with Accounting Standards.

Statement of Financial Position

	Parent entity	
	2014	2013

Statement of Profit or Loss and Comprehensive Income

Total loss	(7,664,464)	(13,401,930)
Total comprehensive loss	(7,664,464)	(13,401,930)

Guarantees

There are no guarantees entered into by the parent entity in the financial year ended 30 June 2014 in relation to the debt of a subsidiary.

Contingent Liabilities

The Company has been named as a part of a group that received a statement of claim filed at the Circuit Court of Shelby County, Alabama relating to an alleged unfair dismissal claim by Mr Don Brown. As detailed in Note 21, the Company intends to defend this matter.

Contractual commitments

At 30 June 2014, Attila Resources Limited had not entered into any contractual commitments for the acquisition of property, plant and equipment (2013: nil).

DIRECTORS' DECLARATION

The Directors of the Company declare that:

1. the financial statements and notes, as set out on pages 17 to 64 are in accordance with the *Corporations Act 2001* and:
 - a. comply with Accounting Standards, which, as stated in accounting policy Note 1 to the financial statements, constitutes explicit and unreserved compliance with International Financial Reporting Standards (IFRS); and
 - b. give a true and fair view of the financial position as at 30 June 2014 and of the performance for the year ended on that date of the company and consolidated group;
2. in the Directors' opinion there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration has been made after receiving the declarations required to be made to the Directors in accordance with Section 295A of the Corporations Act 2001 for the financial year ended 30 June 2014.

This declaration is made in accordance with a resolution of the Board of Directors.

Russell Clark
Non Executive Chairman

Dated this 30th day of September 2014

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ATTILA RESOURCES LIMITED

Report on the Financial Report

We have audited the accompanying financial report of Attila Resources Limited which comprises the consolidated statement of financial position as at 30 June 2014, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes comprising a summary of significant accounting policies and other explanatory information and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' Responsibility for the Financial Report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101: Presentation of Financial Statements that the financial statements comply with International Financial Reporting Standards (IFRS).

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Attila Resources Limited, would be in the same terms if provided to the directors as at the date of this auditor's report.

Auditor's Opinion

In our opinion:

- (a) the financial report of Attila Resources Limited is in accordance with the *Corporations Act 2001*, including:
 - (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2014 and of its performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards and the *Corporations Regulations 2001*; and
- (b) the financial report also complies with International Financial Reporting Standards as disclosed in Note 1.

Emphasis of Matter

Without modifying our opinion, we draw attention to Note 1(a) in the financial report, which indicates that the group incurred a consolidated net loss of \$6,949,697 and generated consolidated net cash outflows of \$4,651,651 from operating activities during the year ended 30 June 2014 and, as of that date the group's current liabilities exceeded its current assets by \$7,087,937. These conditions, along with other matters as set forth in Note 1(a), indicate the existence of a material uncertainty that may cast significant doubt about the company's ability to continue as a going concern and therefore, the company may be unable to realise its assets and discharge its liabilities in the normal course of business and at the amounts stated in the financial report.

Report on the Remuneration Report

We have audited the remuneration report included in pages 7 to 14 of the directors' report for the year ended 30 June 2014. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with s 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's Opinion

In our opinion the remuneration report of Attila Resources Limited for the year ended 30 June 2014 complies with s 300A of the *Corporations Act 2001*.
