DRILLING UNDERWAY AT ALLAMBER

Highlights:

- ➢ *Reverse circulation drilling starts at Allamber in the Northern Territory*

- ➢ *Program will test targets at six prospects: Swamp Donkey, Hatrick, Nipper, Ox-Eyed Herring, Sulphur Hill and Cliff South*

- ➢ *25 holes planned for approximately 4,400m drilling*

- ➢ *Targets include copper mineralisation and skarn-style replacement mineralisation identified in previously reported exploration programs; and further evaluation of the known uranium-copper mineralisation at Cliff South*

Allamber Project, Pine Creek, NT

Allamber is approximately 180km south-east of Darwin and 25km north-east of Pine Creek. All tenements comprising the Allamber project are now owned 100% by Thundelarra or its wholly-owned subsidiary Element 92 Pty Ltd.

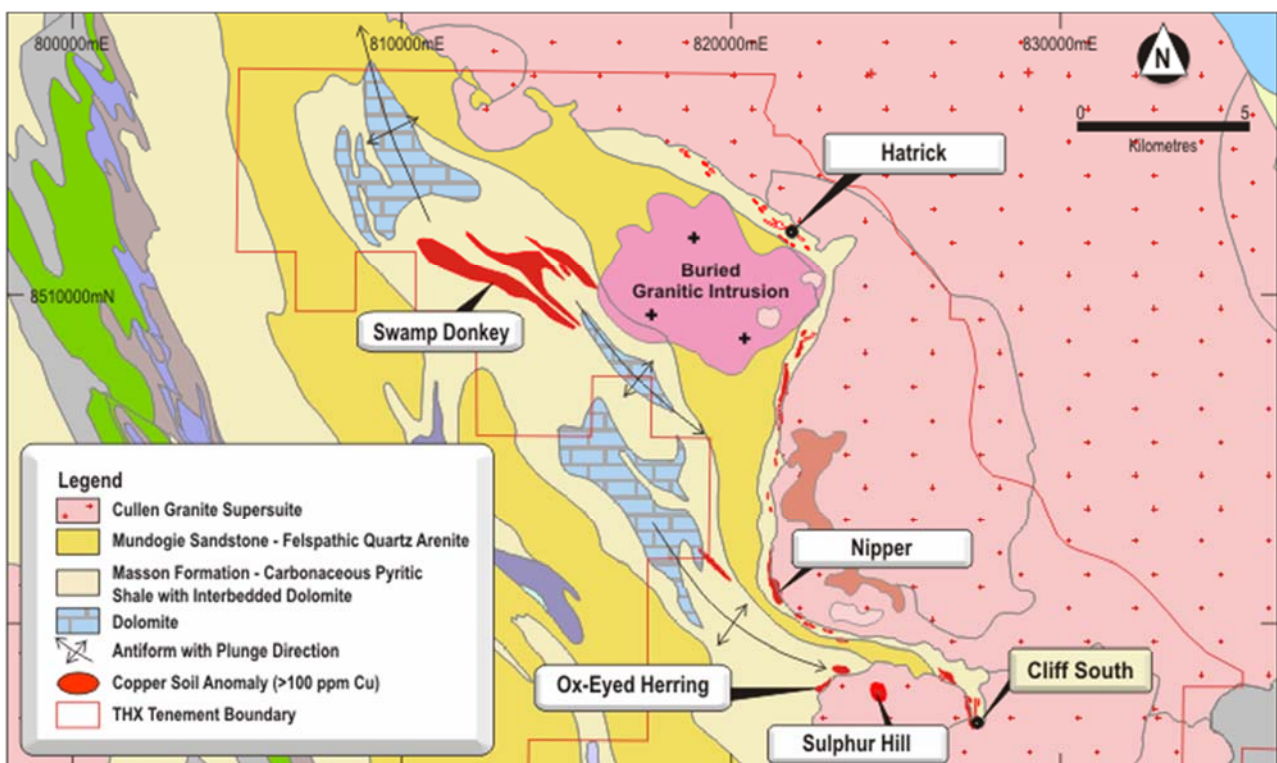

Figure 1. Allamber Project: prospect location map for current drilling program.

Allamber is located close to the established infrastructure corridor comprising the fully-surfaced Stuart Highway that runs through Pine Creek from Darwin to Adelaide via Alice Springs, together with a passenger and freight railway and a gas pipeline.

Thundelarra Price Catalysts and Newsflow:

Current budgeted work programs with planned timing are as follows:

1) October 2014: Allamber drilling program - underway.

2) November 2014: Red Bore follow-up drill program - Program of Work ("PoW") submitted to WA Department of Mines and Petroleum and awaiting approval.

3) November/December 2014: Allamber and Red Bore drilling and assay results.

4) November/December 2014: seismic surveying over Red Bore and Curara Well projects is still contemplated, subject to availability of seismic contractor and Thundelarra personnel if not committed to drilling programs.
