Ironbark Public Consultation Update

Ironbark Zinc Limited (Ironbark) is currently conducting the Public Consultation Process in Greenland with a team of Ironbark representatives and Greenland Government officials travelling to a range of prescribed hearing locations. The process was due to be complete by 1 December 2015 however storms and poor weather conditions have resulted in delays in transport between the meetings. Accordingly Ironbark has agreed with the Greenland Government to an extension of the Public Consultation process of two weeks to 15 December 2015.

Ironbark will advise on further developments regarding the Exploitation Licence Application for the Citronen Base Metal Project in due course.
